

# Install Windows 10 with Refresh Windows Tool from Microsoft

Refreshing Windows Tool supports users to install Windows 10 operating system without using the USB or Windows installation disk as before. The tool will reset and refresh the computer completely as if we installed Windows 10 with a USB or DVD.

The launch of a new tool from Microsoft called Refresh Windows Tool will solve all problems, as well as help users to reinstall Windows 10 operating system. Previously, to reinstall the computer. We still often use USB or DVD. However, when using this tool, refreshing Windows 10 operating system will be simpler.

The tool will reset and remove pre-installed applications on Windows, then refresh the computer completely. This program is similar to the Refresh feature on Windows 8 and 8.1. In the following article, we will help you reinstall Windows 10 operating system with the Refresh Windows Tool.

**Note :** Refresh Windows Tool only available on Windows Insiders (Home or Pro), integrated with Windows 10 Insider Preview build 14342 or newer. Connect to the Internet to download the Windows 10 ISO file installation tool, 3GB capacity.

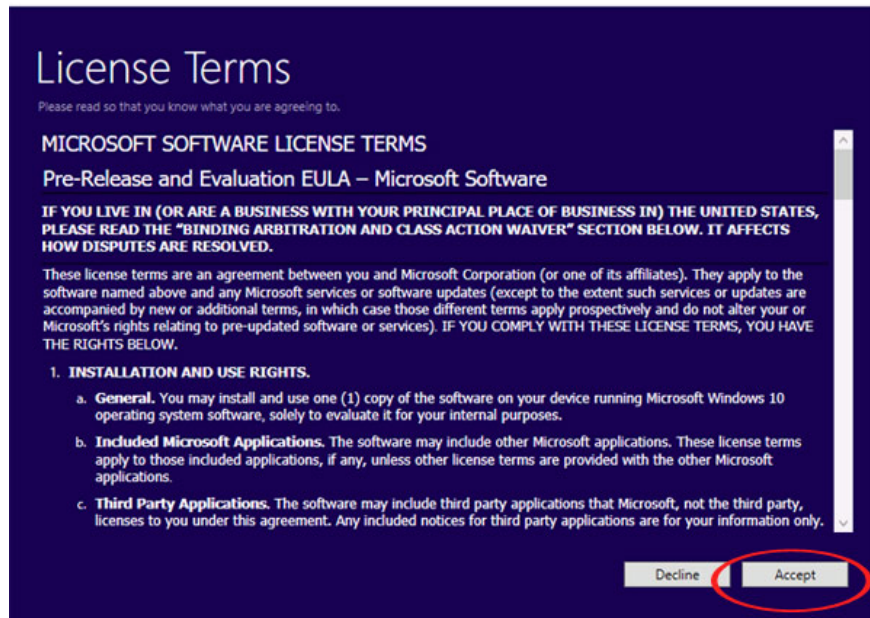

## Step 1:

First of all, we need to download the tool Refresh Windows Tool to the computer according to the link below.

1. Download the tool Refresh Windows Tool

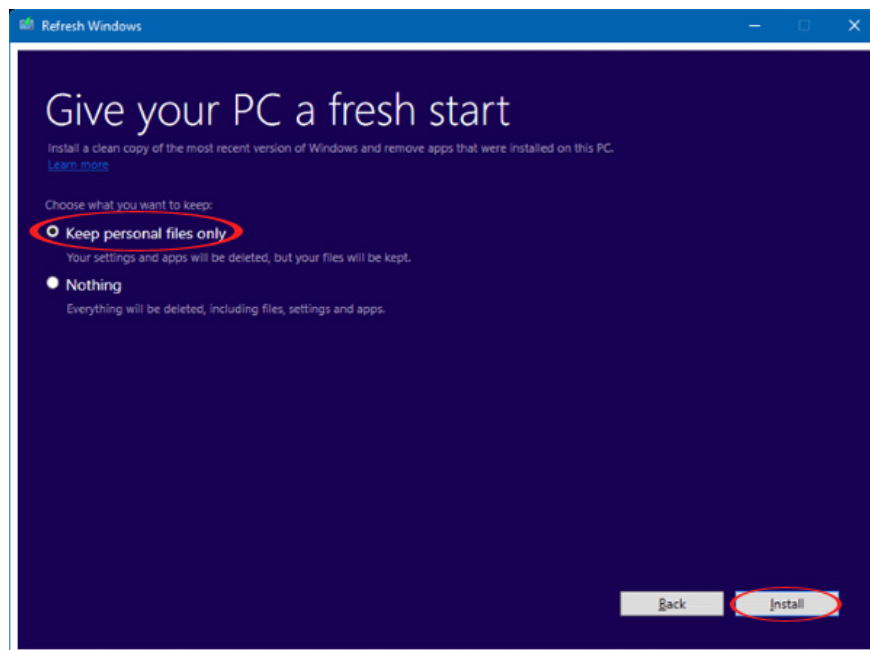

## Step 2:

After the download is complete, you will proceed to install the tool. The interface window appears with the terms of use of Microsoft. Click **Accept** and agree to install the program.

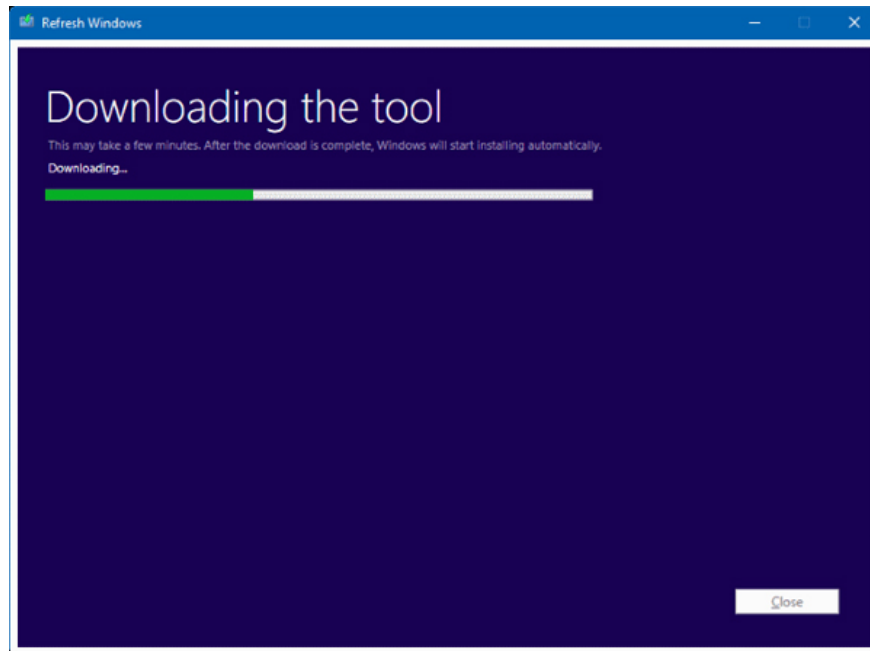

### Step 3:

After that, the program will ask if you want to keep all files on your computer. If you want to check the **Keep personal file only box** . If you don't want to keep choosing **Nothing** .

### Step 4:

Finally select **Install** to proceed to reinstall Windows 10 operating system.

**Note:**

1. Any third-party applications installed on your computer will be removed, including free and paid. Only original Windows 10 applications will be retained.
2. The process will take place automatically from downloading to reinstalling the operating system.
3. If we choose to keep the personal file and the version of Windows 10 we are using has a newer version of this tool, we have to choose Nothing, or stop the installation if we want.
4. You can cancel the installation if necessary even if the program takes place automatically.
5. You can reinstall the Windows app on Store with your Microsoft account.

The operation to reinstall Windows 10 with Refresh Windows Tool has been completed. To avoid unwanted situations, please remember to back up all data before installing.
