Are you looking for a way to check if the iPad is still under warranty, is it genuine or not by IMEI? Let's refer to the article to see 3 very simple ways to check IMEI iPad!

IMEI is a series of numbers on the iPad that helps users to look up product information such as checking warranty period, activation time. In today's article, I will guide you 3 ways to check IMEI iPad super simple, easy to do, follow along!

- What is IMEI?

IMEI stands for International Mobile Equipment Identity (roughly translated as International Mobile Equipment Identity Number), is a 15-digit sequence and is unique on each device, meaning there will be no two devices with the same IMEI.

- What does IMEI mean?

+ Help users and manufacturers look up information about that device such as warranty period, warranty period check, machine activation time.

+ IMEI helps the phone to read SIM and make calls.

So when the IMEI is lost, the device will not be able to make calls and lose the warranty.

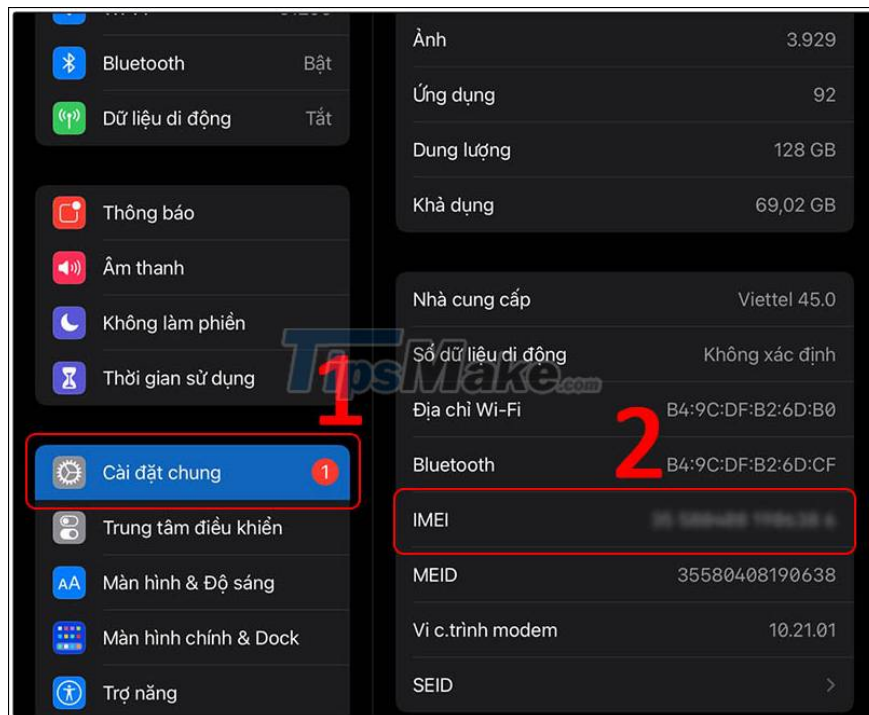

## 1. How to get IMEI

- Get IMEI through settings

Step 1: Go to Settings.

Step 2: Go to General> View IMEI number.

- Get the IMEI through the Apple page

Step 1: Go to Apple Website [HERE](#) > Sign in with your Apple ID.

Step 2: Select the device you need to see IMEI code> View IMEI code.

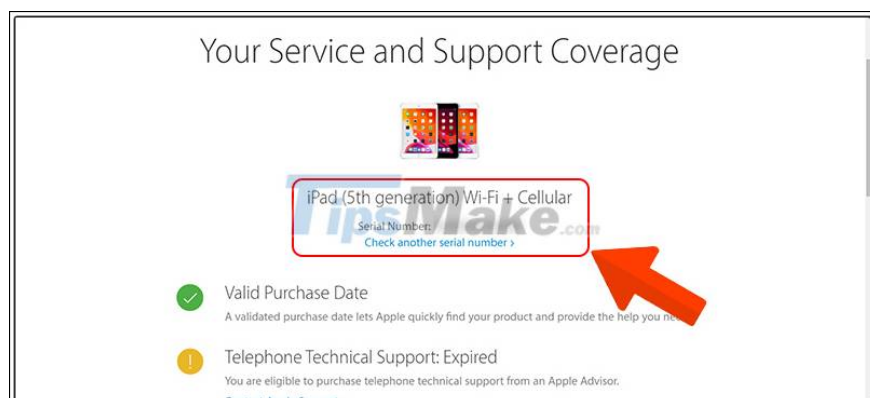

## 2. Look up IMEI iPad

Step 1: Go to the search site [HERE](#) .

Step 2: Enter IMEI and confirmation code.

Then the web page will show information about your device such as iPad name.

(1) Valid Purchase Data: Indicates that your device has been properly activated at Apple.

(2) Telephone Technical Support: Information about Apple software support.

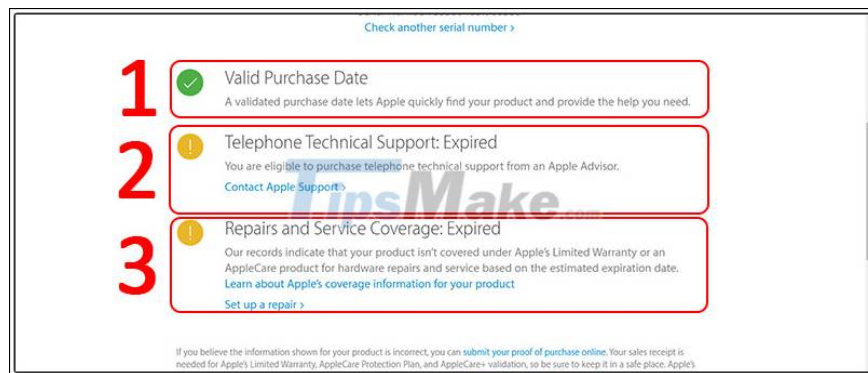

- If Telephone Technical Support: Expired as shown above means that the software support has expired, also known as the end of the 3-month software warranty period of Apple.

- If Telephone Technical Support: Active you will see the length of Apple's software support.

(3) Repairs and Service Coverage: Hardware warranty period.

- If Repairs and Service Coverage: Expired as shown above, your device has expired hardware warranty. This is the most important item to check the initial activation date of the iPhone and when the warranty expires.

- If Repairs and Service Coverage: Active you will see the device's warranty period up to date. To know the first activation date of iPhone, you subtract 12 months of hardware warranty by default.
