

Instructions for activating Apple News app on iOS 9

Being rated as one of the most attractive applications on iOS 9, Apple News integrates a large number of news pages in the same source, so changing from one page to another becomes simple and easier than ever to facilitate updating information.

Being rated as one of the most attractive applications on iOS 9, Apple News integrates a large number of news pages in the same source, so changing from one page to another becomes simple and easier than ever to facilitate updating information.

However, Apple New is only supported in a few countries, unfortunately not including Vietnam. But if you want to experience this service of Apple, you can follow the steps below of TipsMake.com.

Step 1 : From the main screen, go to the path after **Settings > General > Language & Region** .

Settings

 Notifications >

 Control Center >

 Do Not Disturb >

 General >

 Display & Brightness >

 Wallpaper >

 Sounds >

 Passcode >

 Battery >

 Privacy >

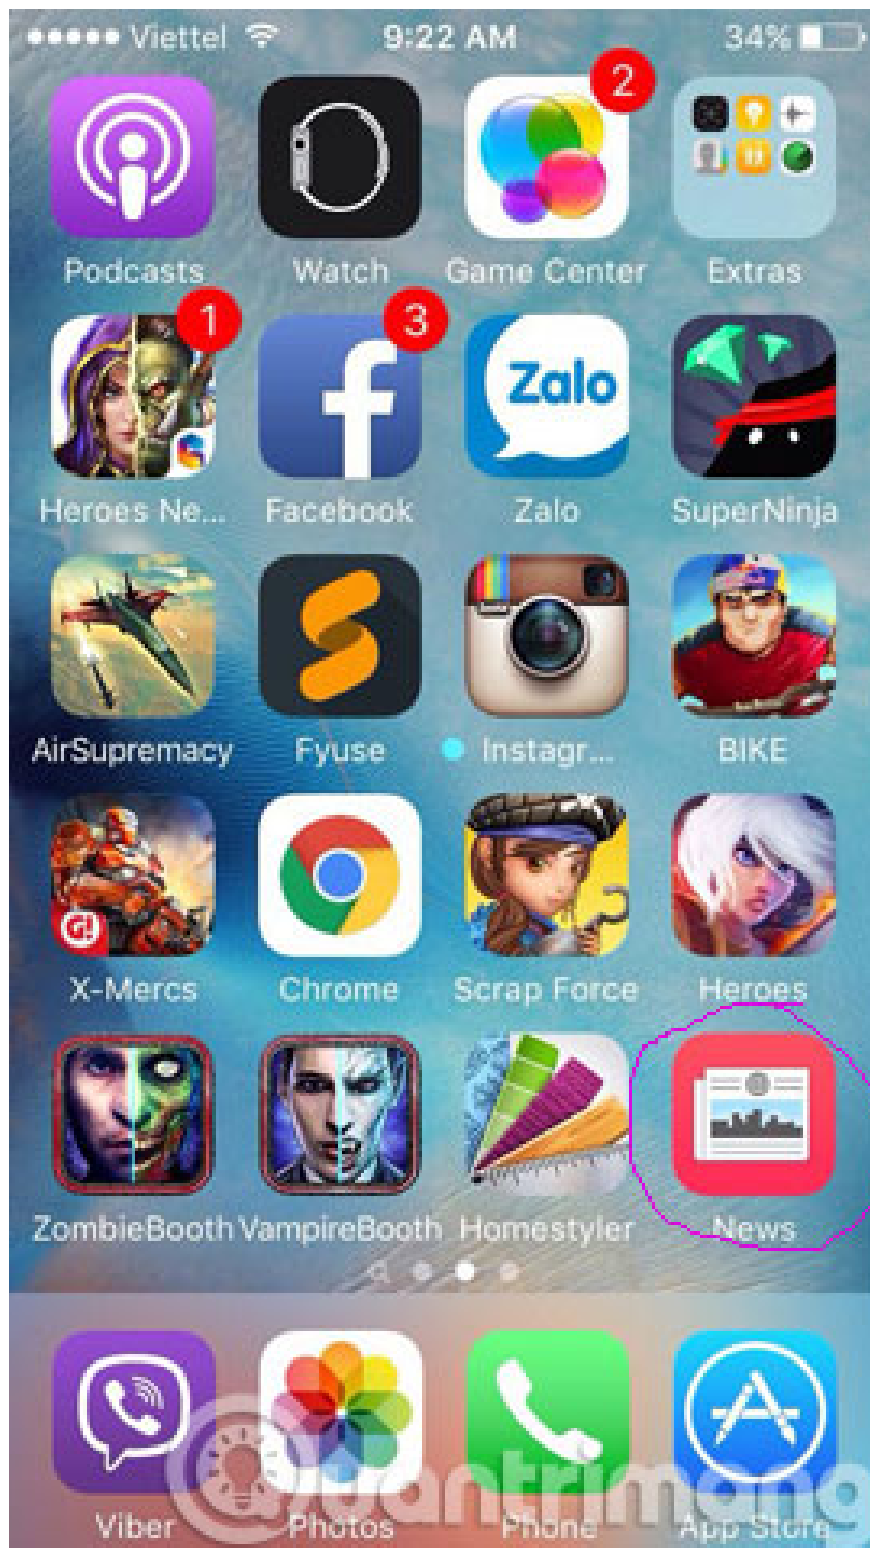

Step 2 : At the **Language & Region** interface, you scroll down to the **Region** section and proceed to change from Vietnam to a supported country (*here we choose the United States*)

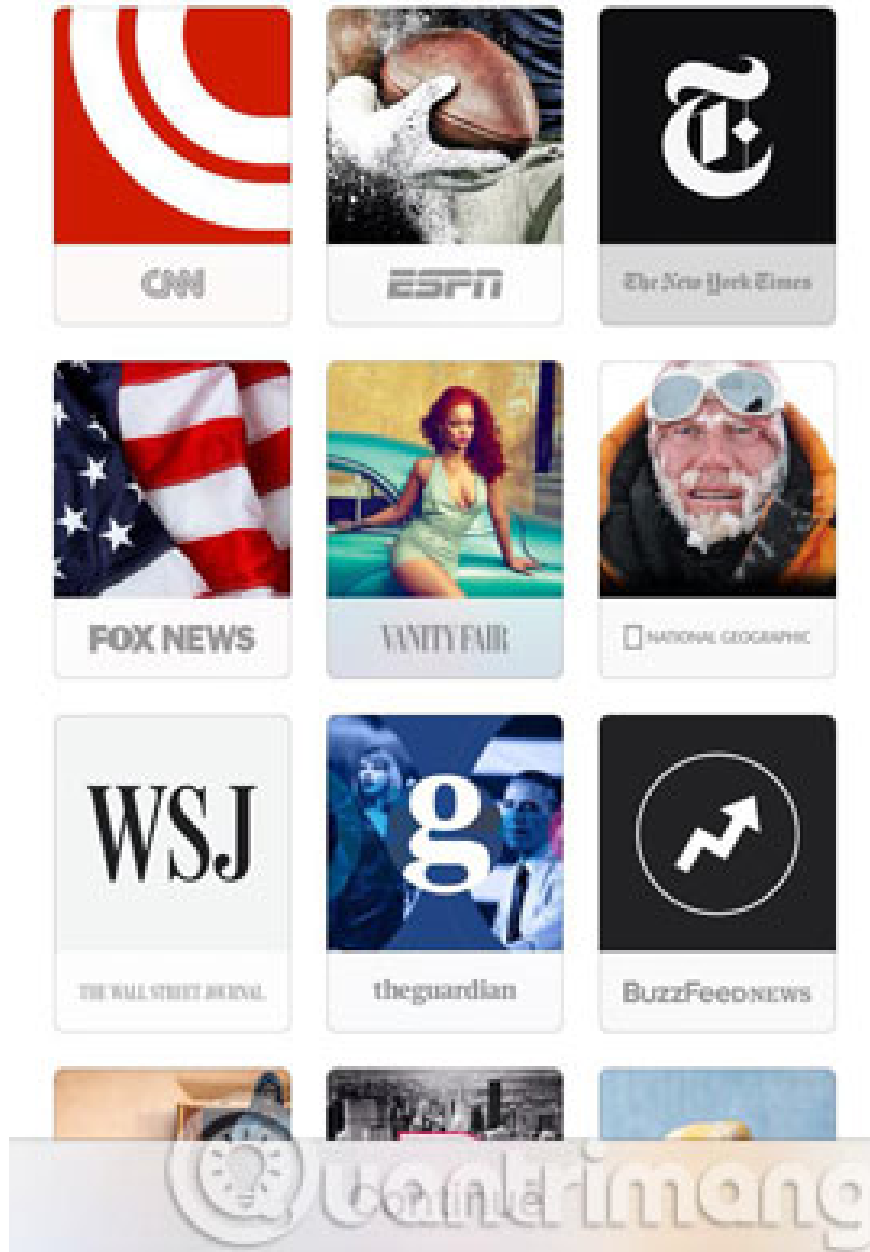

Step 3 : After switching "zone", the machine will reboot in about 20 seconds and when the screen pops up again, you will see the Apple News application icon appear on the screen as below.

Step 4 : You can double-click it to view the Apple News interface. By default, Apple News integrates foreign news sites.

Pick your favorites.

Tap at least one to continue.

Step 5 : If you want to add your favorite websites for later viewing, you can do the following

Open Safari and then visit the website to view. Next, click the **page sharing** icon at the bottom of the screen. When a new dialog box opens, swipe the screen to the right and select **More** (3 dots icon)

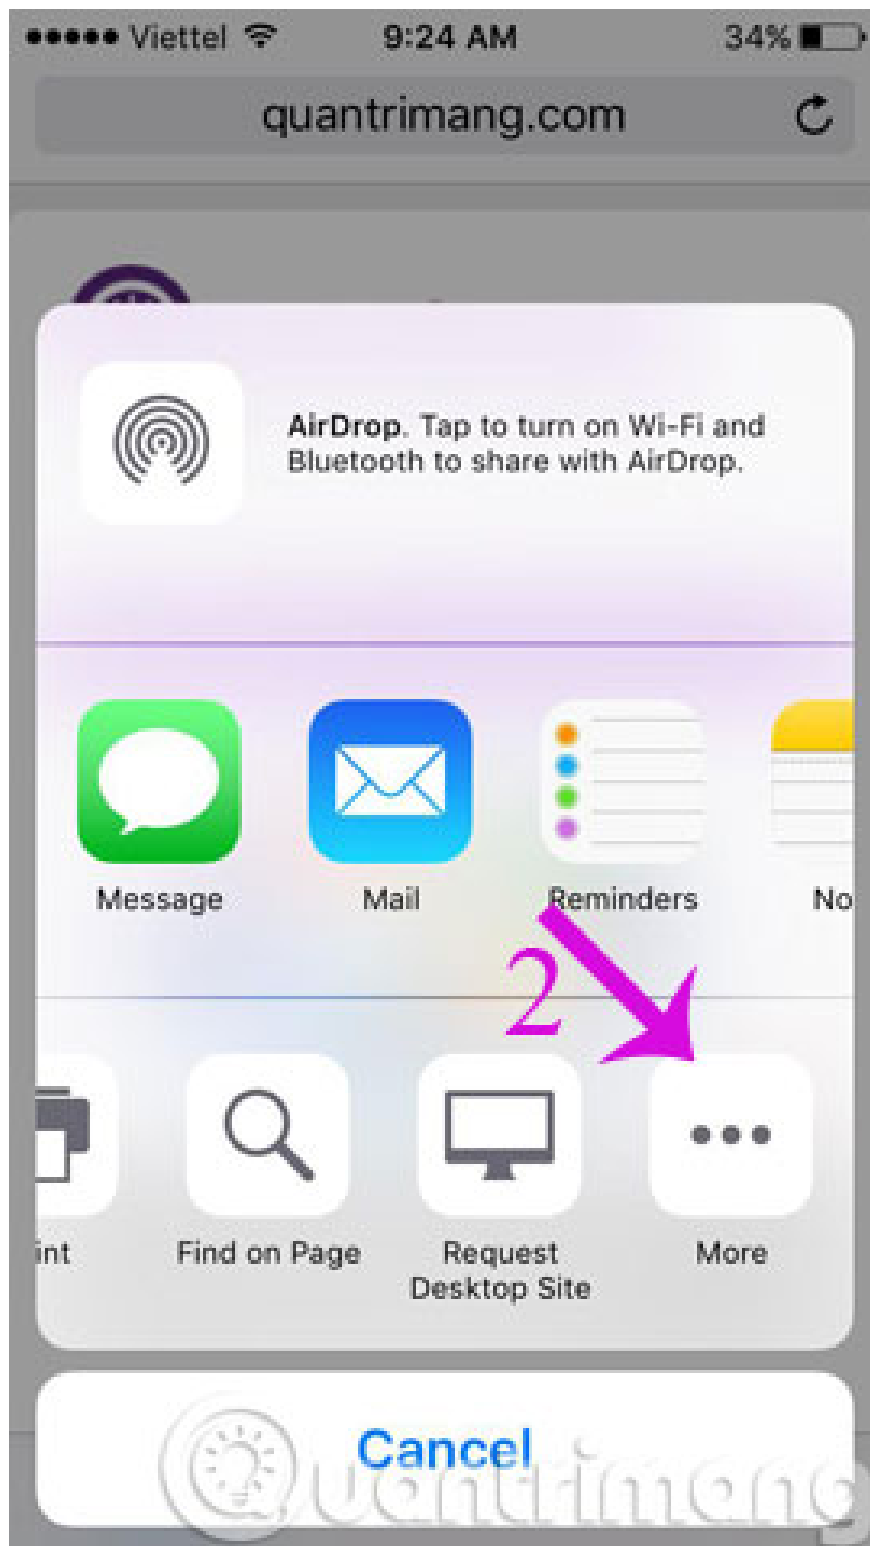

Google™ Tìm kiếm Tùy Chỉnh

☰ Tất cả

10 công cụ tùy chỉnh trên Windows 10

Step 6 : Here, you scroll down to find the **Add to News** section and turn it on (*turning green is okay*). Then, click **Done** to exit and select **Add to News** with this site, that's it! From now on, if you go to Apple News and want to access this site, you don't need to switch browsers, because it's already integrated in Apple News for you.
