

# Instructions for changing and editing music file information using 3uTools

The music file information editing feature has been integrated into 3uTools since early on. Up to now, this feature has been further optimized to help users easily update all the detailed information that audio files and music files need.

When downloading audio files online or copying music discs, users often see only the title information. When you listen to music on iPhone or connect to other devices, the music file will not show the artist name, album, or even the song name. If you are looking for a way to fix this error, tipsmake will guide you on how to use 3uTools software to **edit music file information** completely and quickly.

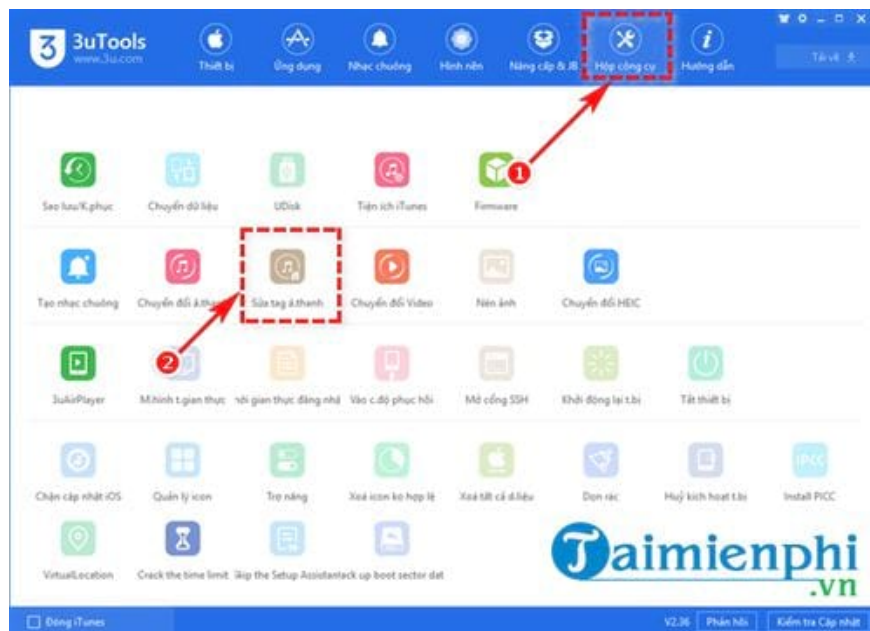

## *How to edit music file information using 3uTools*

To edit **music file information** as desired, users should update or install the latest version of 3uTools for the device. If you don't have it yet, you can download 3uTools immediately in the link below.

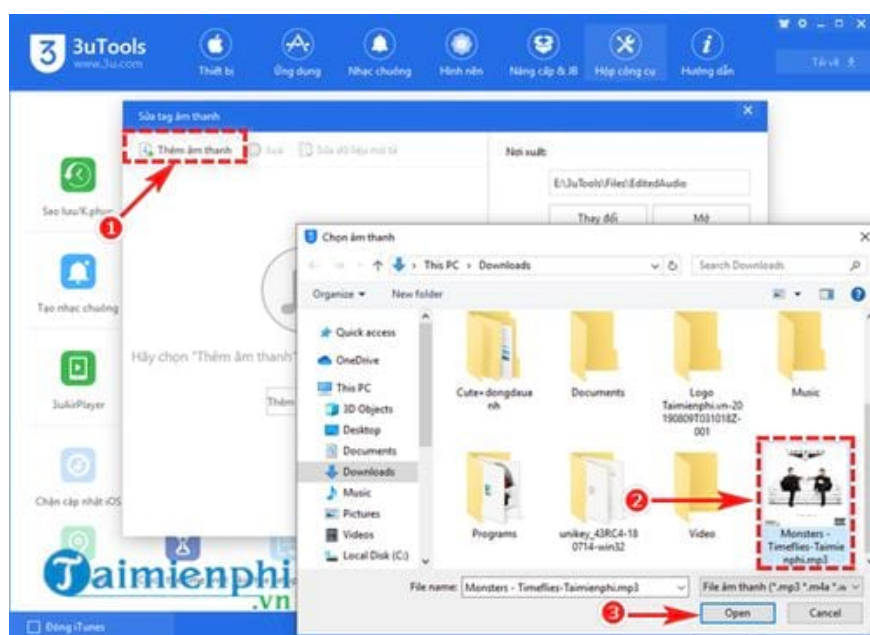

- Download 3uTools software here: **Download 3uTools**

In this article, Taimienphi will guide you on the Vietnamese interface. When you install the interface in English or another language, you can refer to how to **change the Vietnamese language on 3uTools** here.

**Step 1:** Open 3uTools software, select **Toolbox** , then click **Edit audio tag** ;

**Step 2:** In the new dialog box that appears, click the **Add Sound** button in the upper right corner. Continue **left-clicking** to **select the song** you want to edit. Click **Open** to finish the selection process;

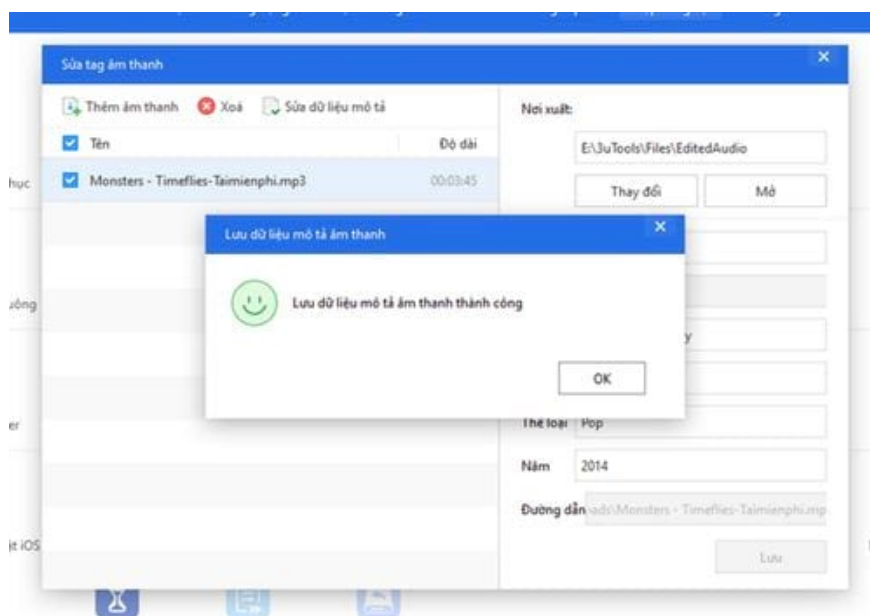

Users can choose to edit information for multiple songs at once by **holding down the CTRL key** and left-clicking on each audio file in turn;

**Step 3:** You will be taken back to the **Edit Audio Tag** dialog box, now left-click to select the music file. Edit details such as **Title, Artist, Album**, . as desired and click **Save** to finish.

After completing the above steps, 3uTools will display a dialog box with the content as illustrated below to notify completion.

Thus, Taimienphi has completed 3 simple steps to help you quickly **edit your music file information** yourself using 3uTools. Hopefully this trick will help you easily update information: song name, artist, album,. for your audio and music files to display them fully on all applications and devices. In addition, you can refer to how to **create iPhone ringtones using 3uTools** here.
