

Instructions to change chat box color on ChatGPT

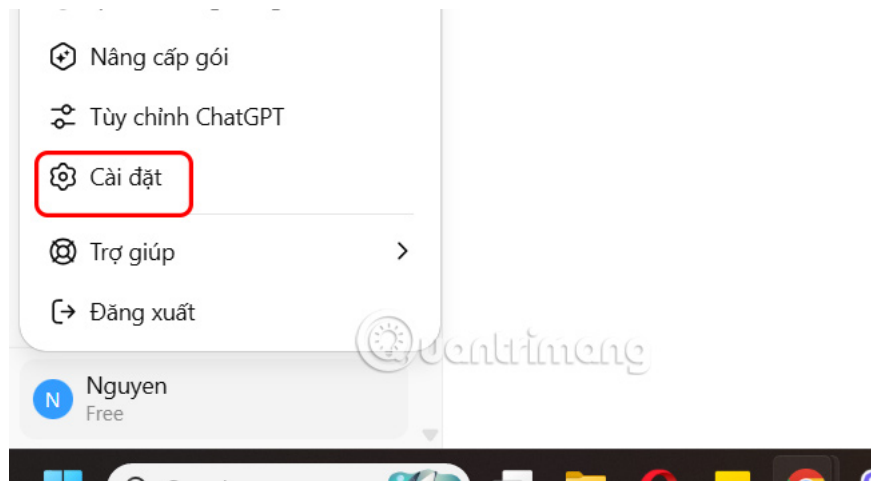

In addition to the improvements to the animation set, ChatGPT 5 also adds a number of new settings, including customizing the chat box interface with different colors.

In addition to the improvements to the animation set, ChatGPT 5 also adds a number of new settings, including customizing the chat box interface with different colors. If you are tired of the black and gray color scheme, ChatGPT now allows you to change the color scheme to five new colors, including blue, green, yellow, pink, and orange. Here is a guide to changing the chat box color on ChatGPT.

How to change chat box color on ChatGPT computer

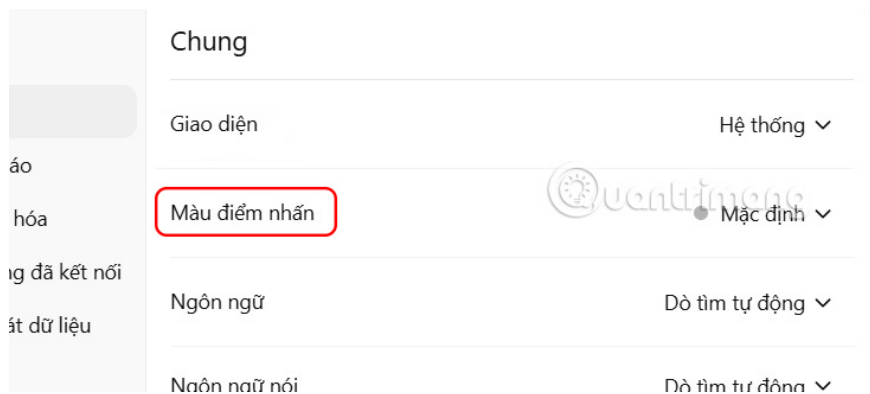

Step 1:

First, you log in to your ChatGPT account, then **click on your account name** and select **Settings** in the list.

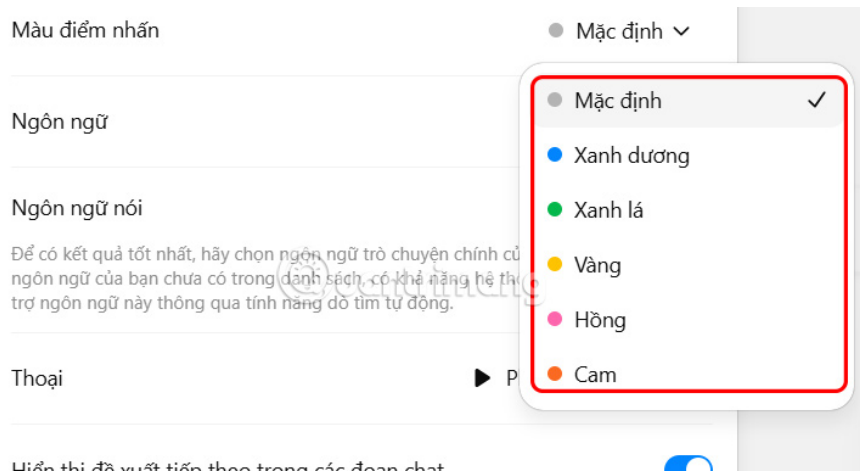

Step 2:

Go to the settings interface for ChatGPT, click on **General** and then look next to **Accent Color**, click to open new customization.

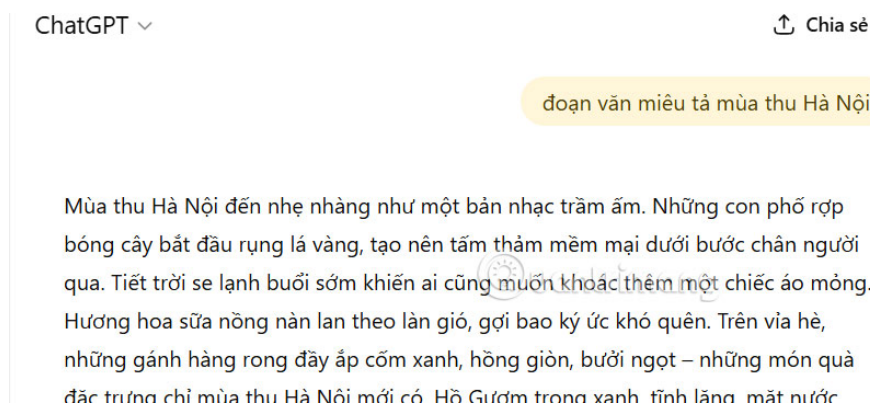

Step 3:

Here, users will **choose a new color for the ChatGPT chat box** according to their preferences. Click on the color you want to change the color of the chat box on ChatGPT.

Now you chat with ChatGPT as usual and will see the chat box change color as shown below.

If you want to return to the default gray color for ChatGPT chat, we can change it to Default.
