1. How to change custom icons for apps on Android
2. How to change the font on Android phones
3. How to change the call interface on Android

How to replace the network logo on Android phones

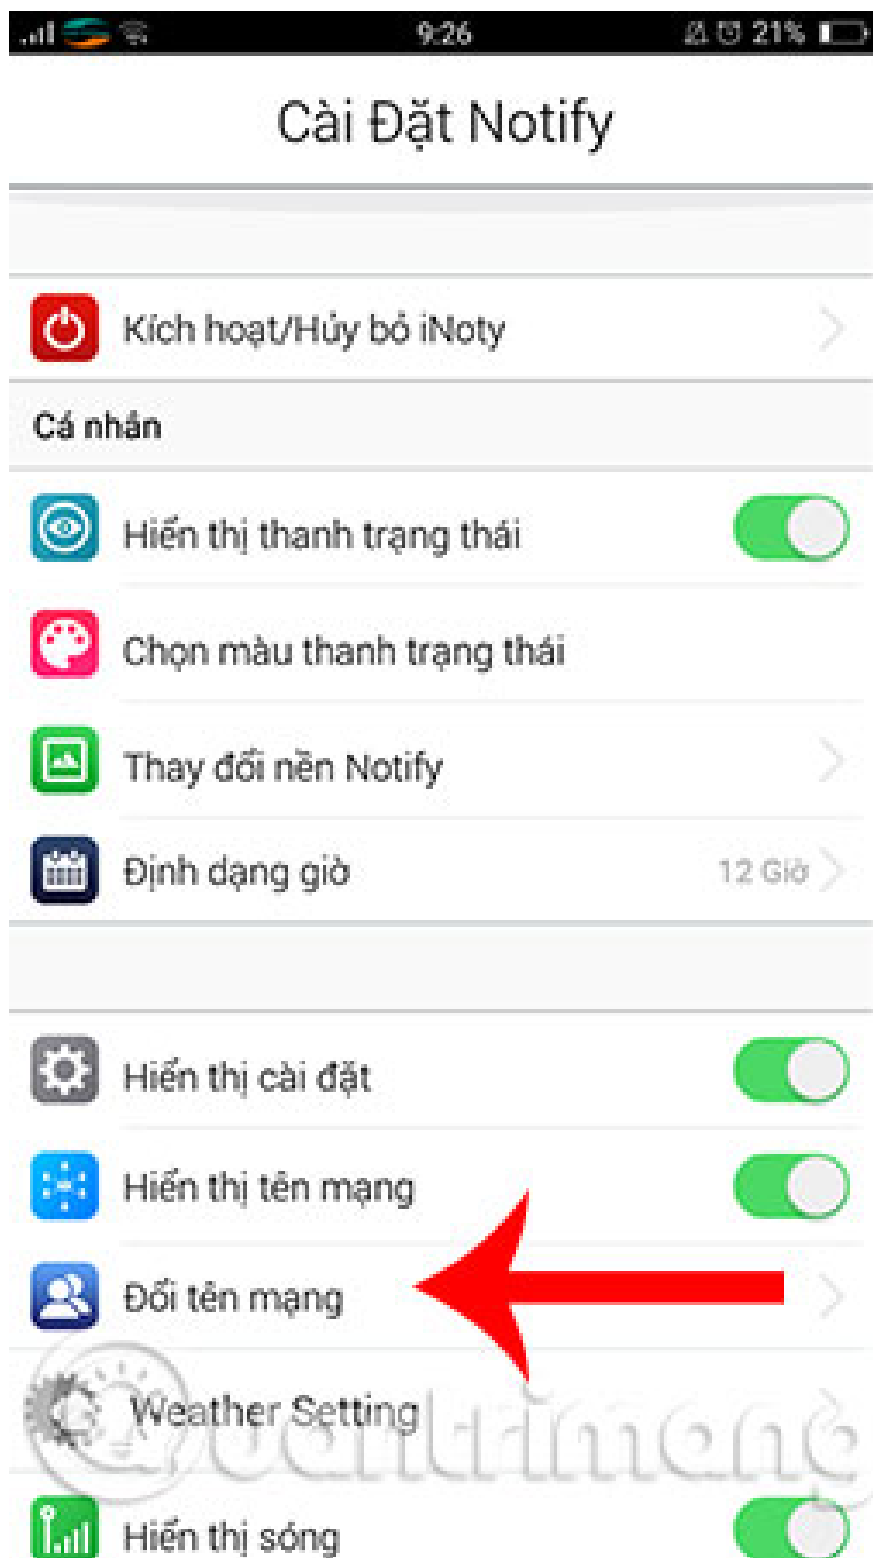

Step 1:

To change the name of the carrier on Android, you must first download the iNoty OS 10 application to your device, the application is compatible with Android OS 4.1 and above and requires at least 15MB of device memory.

1. Download iNoty OS 10 for Android

Step 2:

After successfully installing iNoty OS 11, start the application and access the application's main working interface. Here, you select the **name Rename network** to start conducting network logo changes on Android as well as change the name of the network on the phone.

Step 3:

A form appears on the screen that allows you to enter the name you want to replace the network logo on the Android you are using. You enter the content you want, then click **OK** to confirm the change. For example, here we will enter as Network Administrator.

This step is only for setting up a network name on your Android phone, you must continue to select the **Enable / Remove Notify** item at the application interface.

Step 4:

Now enable the Notify feature by selecting **the Notify icon** . Soon, the system will ask if you want to enable this feature, click **OK** .

 GO Speed 

 iNoty 

To complete the operation, you will see the name of the network icon that we just changed the network logo on the Android phone appears in the upper corner of the device screen. With this logo, your device will definitely stand out and make sure you don't "crash" with other phones.

Above we have instructed you how to change the network logo on Android phones, in general, the steps are very simple, with just a few steps, you can turn boring network logos into your favorite logos. right? Create your own logo with this iNoty OS 10 application, and you can change your Android app's name and icon, too, the free Icon Changer will be a support tool. Help you to do this.

Hope you are succesful.
