

Instructions for changing passwords for Skype

Choosing a password that is difficult to guess, long or different characters will make your Skype account more secure, avoid having to hack your account.

Being hacked, stealing information is a common problem for many social networks or messaging and chat applications like Skype. Maybe a beautiful day, your account has been hacked in seconds and will not know what will happen to that account. Therefore, changing passwords, choosing a hard-to-guess password, having many different characters will partly limit the status of hacked Skype accounts. However, when Skype is up to the new version, will the operations change? If you don't know how to do it, follow the change of Skype password in the article below.

Step 1:

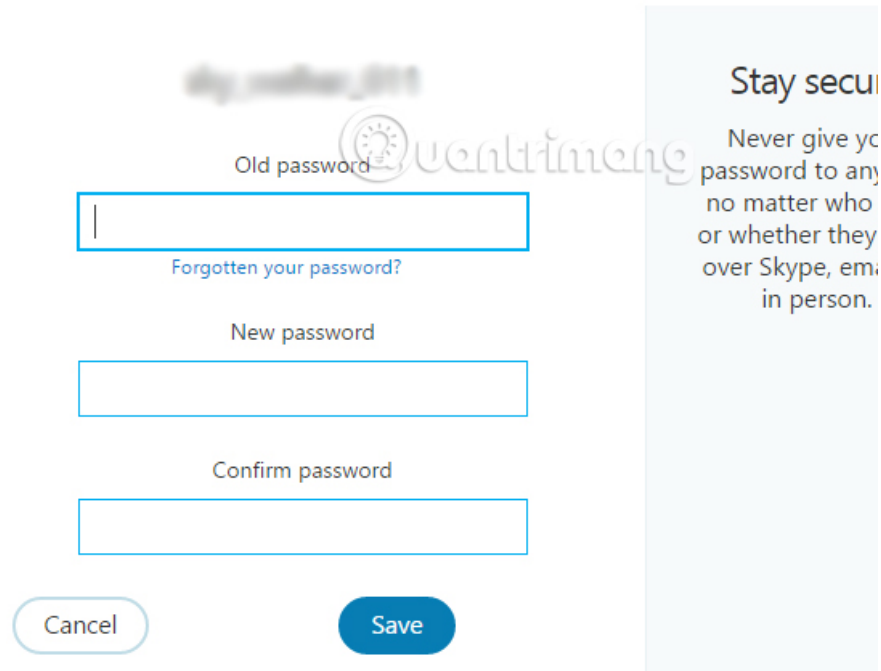

First of all, log in to your Skype account on your computer. At the main interface, we will click on the **word Skype** and then select **Change Password** .

Step 2:

Soon, we will be transferred to the completely new Skype home page interface. Here, users will see their account name and new and old password entries so that we can change the password for Skype.

Change your Skype password

Old password

Forgotten your password?

New password

Confirm password

Cancel Save

Stay secure

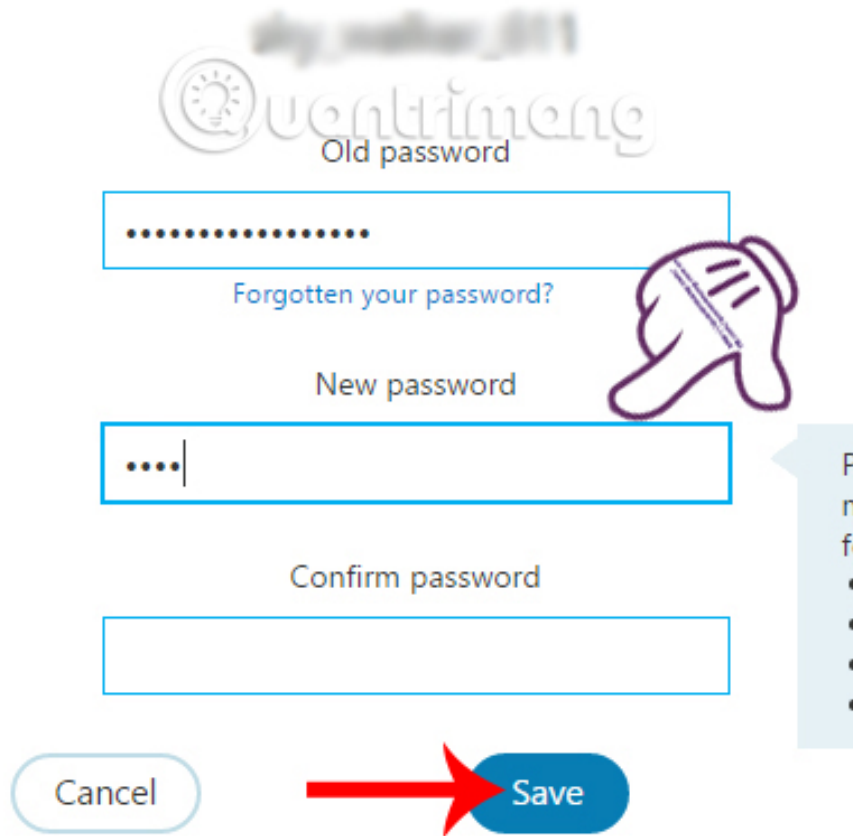

Never give your password to anyone, no matter who they claim to be, or whether they contact you over Skype, email, or in person.

Step 3:

Next, you will **enter the** currently used password for Skype and the **Old password** box. **Enter the new password** in the **New password** box and **re-enter the new password** again in **Confirm password** box.

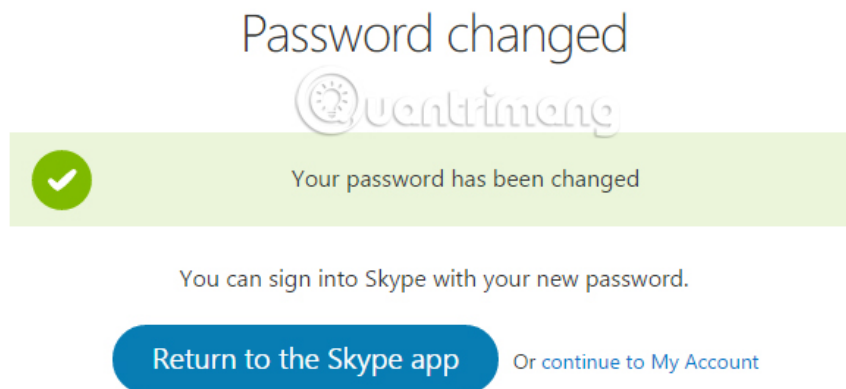

Note , the new password must meet the following conditions to successfully change: Password must be at least 8 characters, at least 2 of the password characters must have capital letters, lowercase letters, numbers or special symbols something special.

Finally click **Save** to save the new password.

The image shows the Skype password change interface. At the top, there is a watermark logo for 'Quentimeng' with the text 'Old password' below it. Below this is a text input field containing a series of dots. Underneath the field is a link that says 'Forgotten your password?'. To the right of the field is a hand icon pointing to the field. Below the first field is another text input field containing four dots, with the label 'New password' above it. Below the second field is a third text input field, with the label 'Confirm password' above it. At the bottom left is a 'Cancel' button, and at the bottom right is a 'Save' button. A red arrow points from the 'Cancel' button to the 'Save' button. On the right side, there is a vertical grey bar with some text and dots, partially cut off.

When you receive the message as shown below, it means that the password change operation for Skype was successful. Skype will automatically exit and we need to enter a new password to login as well.

So, we have completed the password change for Skype account. The password change operation is also very simple and fast. So change your Skype password to make your personal account safer.
