

Instructions for changing Profile information on LINE

When creating an account on LINE, you must use your email address and phone number. Some information will be left in Public mode (public mode), other users can access and read this information. Ideally, you should update (update) your Profile information.

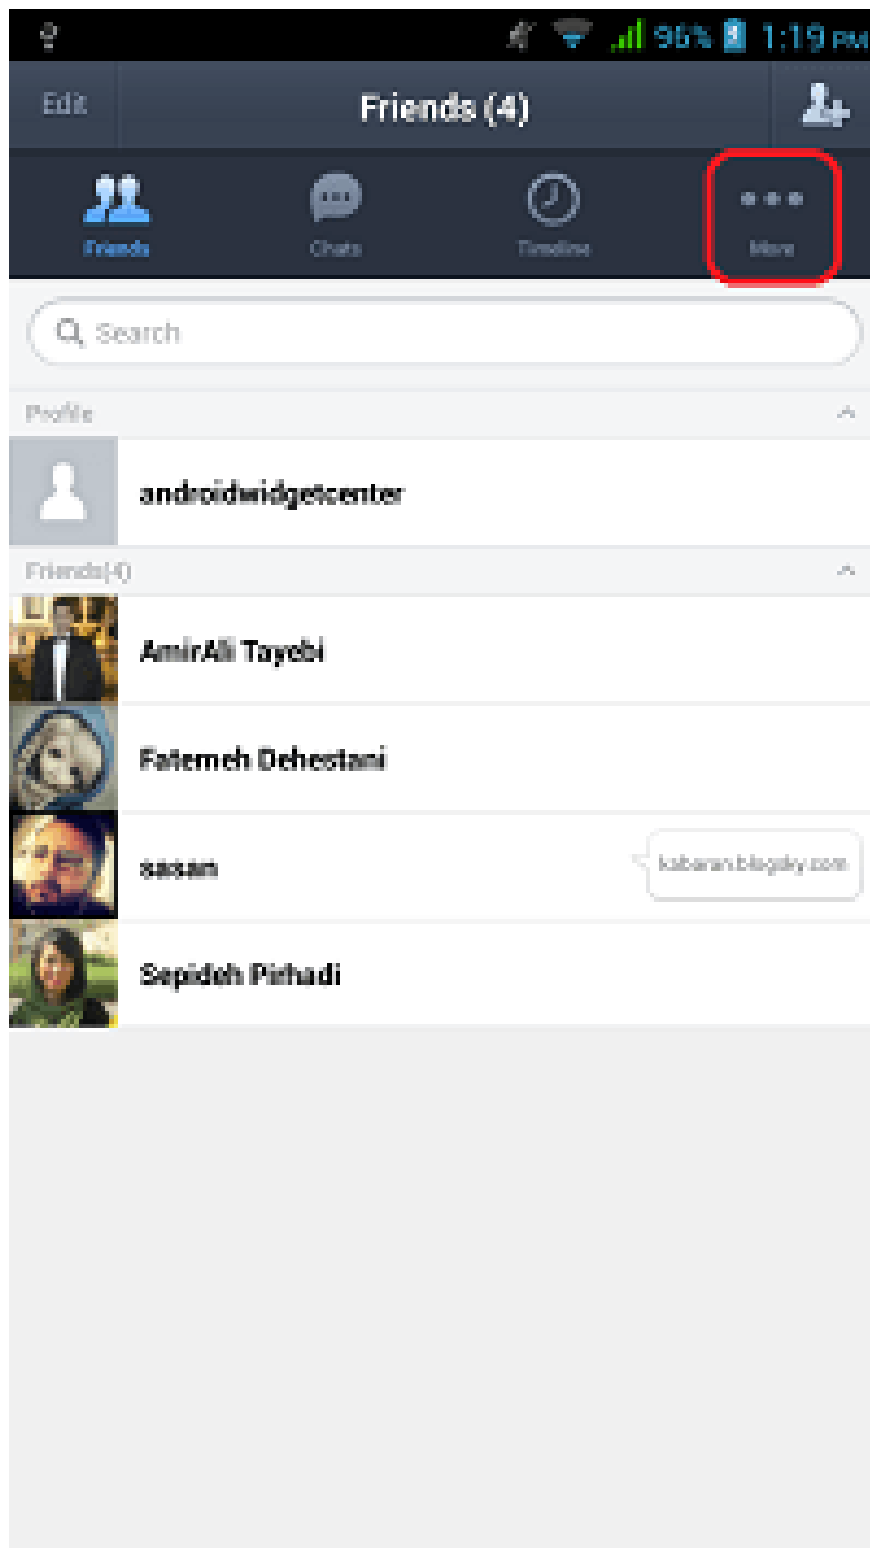

When creating an account on LINE, you must use your email address and phone number. Some information will be left in Public mode (public mode), other users can access and read this information. Ideally, you should update (update) your Profile information.

To update and change Profile information on LINE, please refer to the following article of Network Administrator.

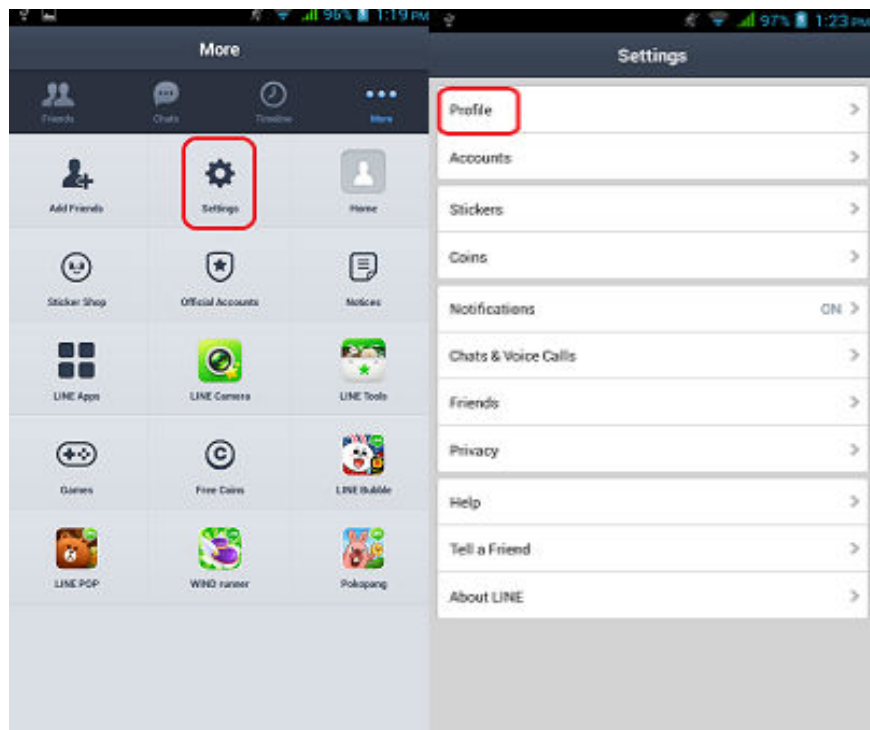

If your phone does not yet have the LINE application, you can download LINE to your device and install it here:

1. Download LINE for Android devices here.
2. Download LINE for iOS devices here.

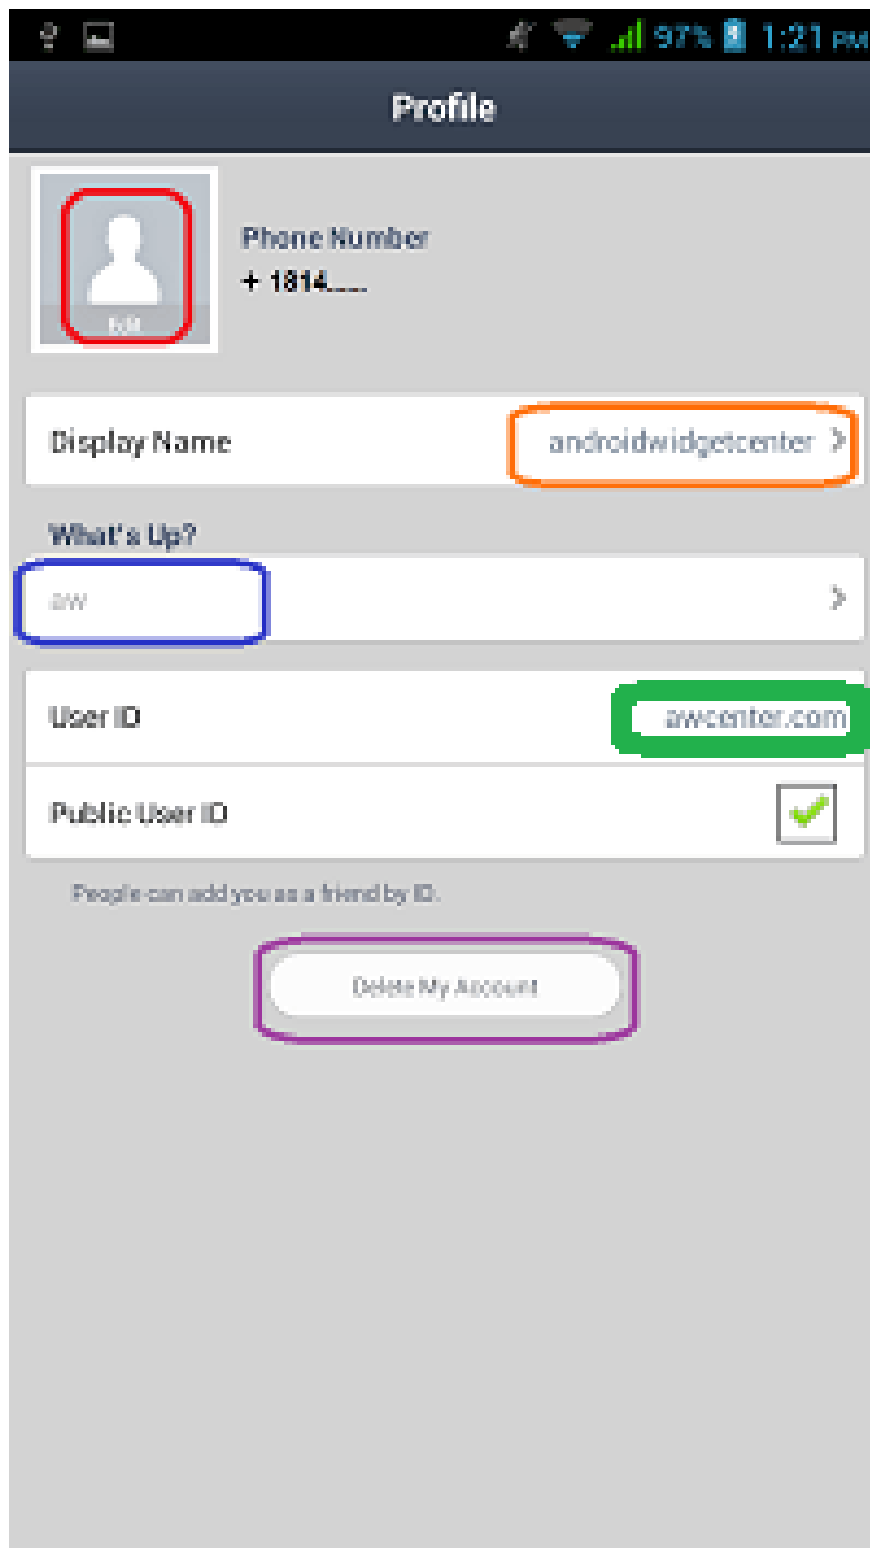

To change Profile information, first on the main interface of LINE, click on **More** (3 dots icon) in the upper right corner.

Next select **Settings** and then choose **Profile** .

On the Profile screen you can set your image to be a profile picture or change the profile picture, change the display name, update your "status" and select a user (User Public or Public User ID) or you can choose to delete your account if you no longer want to use it.
