

Instructions for changing the Google logo on the New Tab page

If you want to change the Google logo in the New Tab interface, you can install the Custom Doodle for Google utility. This extension allows you to add another image instead of the Google logo.

When you access New Tab on Chrome, you will immediately see the Google logo displayed in the middle. If you want to change the Google logo in the New Tab interface, you can install the Custom Doodle for Google utility. This utility allows you to add another image instead of the Google logo, or add custom text to display on the New Tab page. Below are instructions for changing the logo in New Tab.

How to change the Google logo on the New Tab page

Step 1:

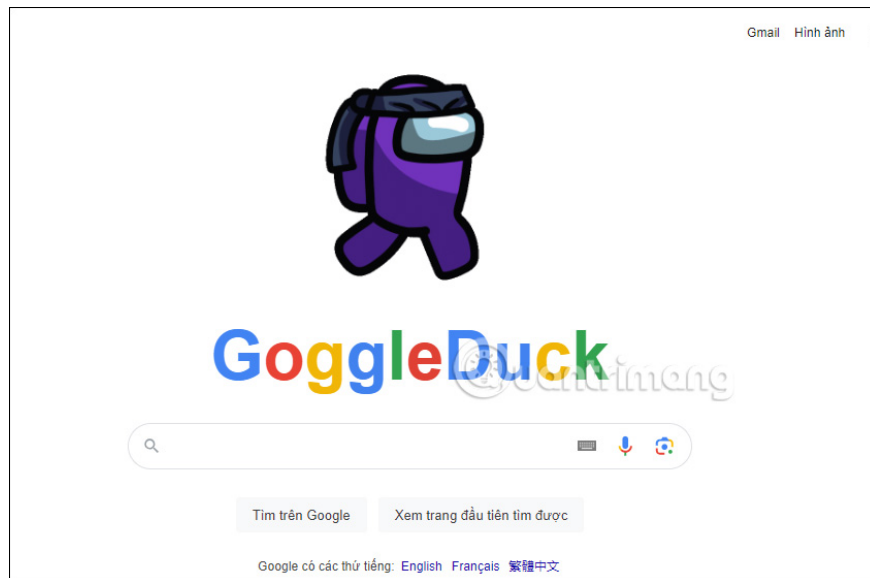

First, install the Custom Doodle for Google utility for Chrome browser according to the link below.

Step 2:

Immediately after you install the utility, you will see the New Tab interface **change to the Google icon** as shown below.

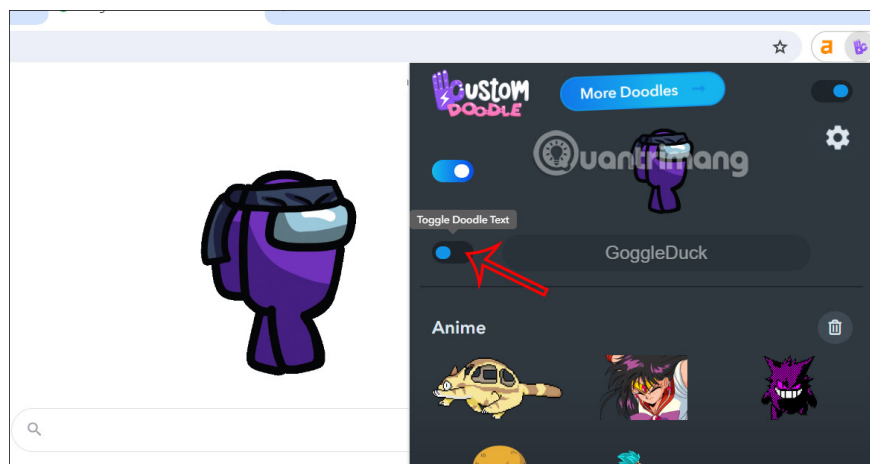

Click on the new icon and immediately the Google icon in New Tab has been changed.

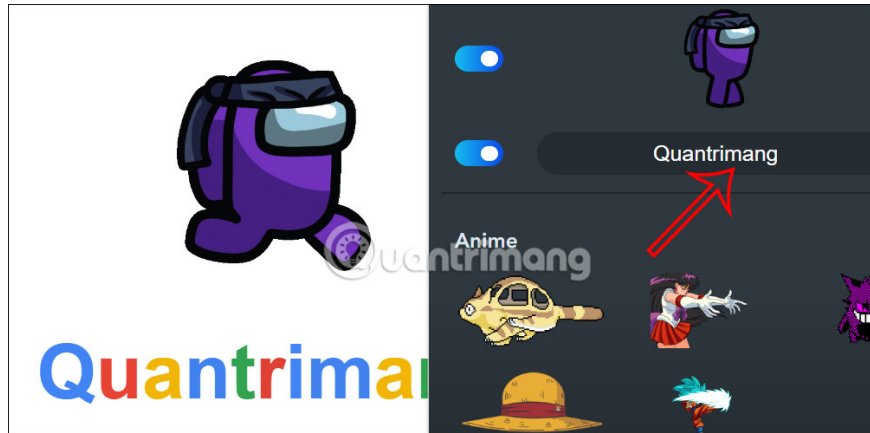

Step 4:

The utility also allows you to **change the current New Tab text** . We can turn off text, or enter new text.

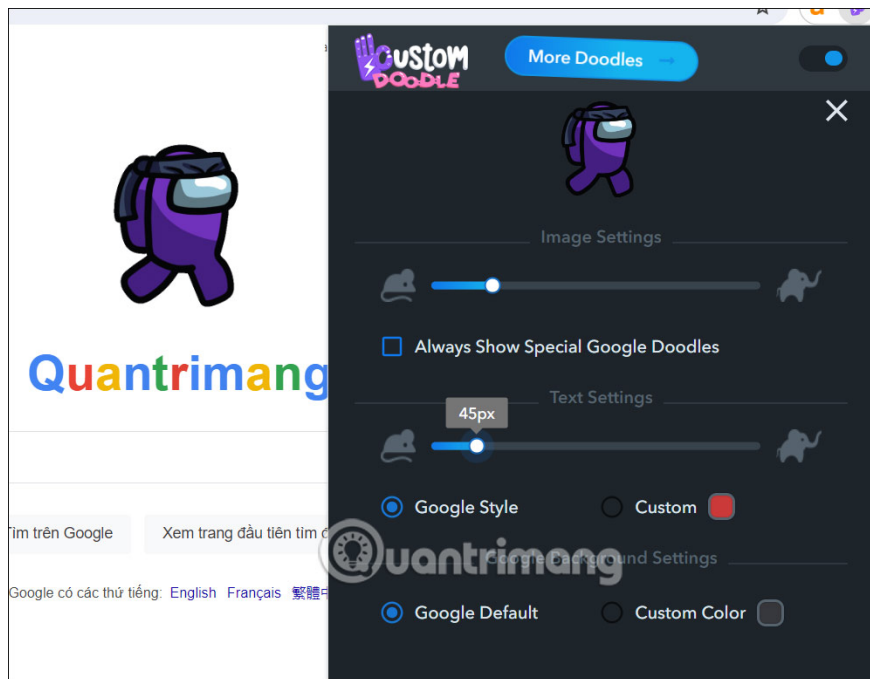

You just **update new text into the frame** and immediately the content is displayed in the New Tab interface as shown below.

Step 5:

Clicking on **the gear icon** will switch to **the custom interface displaying the new icon at New Tab** . You click on each item or change to see if it is correct to your liking or not.

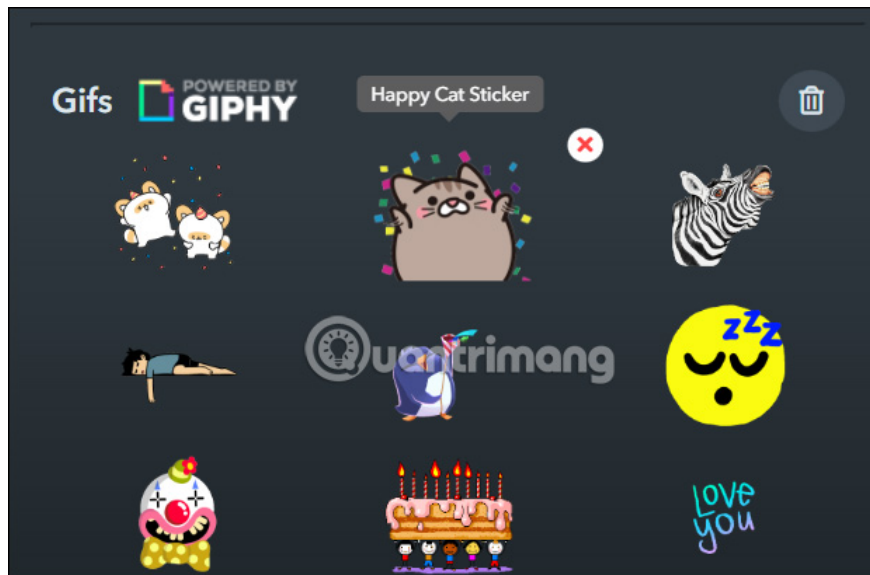

Step 6:

The Custom Doodle for Google utility also has an icon store for you to download, **click More Doodles** to access. In this interface, if you **like any icon**, **press the plus sign to add it** to your collection.

Icons added to Custom Doodle for Google are also arranged by category for easy management. If you want to delete the entire group of icons, click on the trash can. If you only want to delete 1 icon, press the red x.
