

Instructions for changing the name of the Magic Mouse mouse on the Mac

In order to be more aware or simply want to change the name for Magic Mouse on a Mac, we can follow the operation very simply and suit the version on the Mac operating system.

When we connect Bluetooth devices such as Apple Magic Mouse on Macs are named by default as "Username of Magic Mouse. Whatever the operating system and even the latest macOS Sierra However, Magic Mouse can also be set in the above format, however, we can also change the default Magic Mouse name easily if you want to. Refer to the article below.

Step 1:

We click on **the Apple icon** on the machine interface and select **System Preferences** .

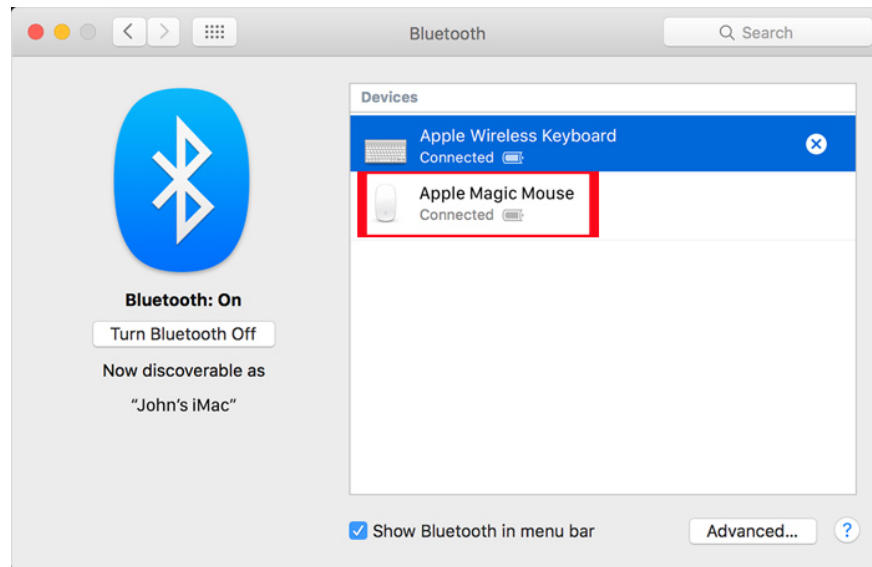

Step 2:

In the System Preferences interface, the user selects the **Bluetooth** entry.

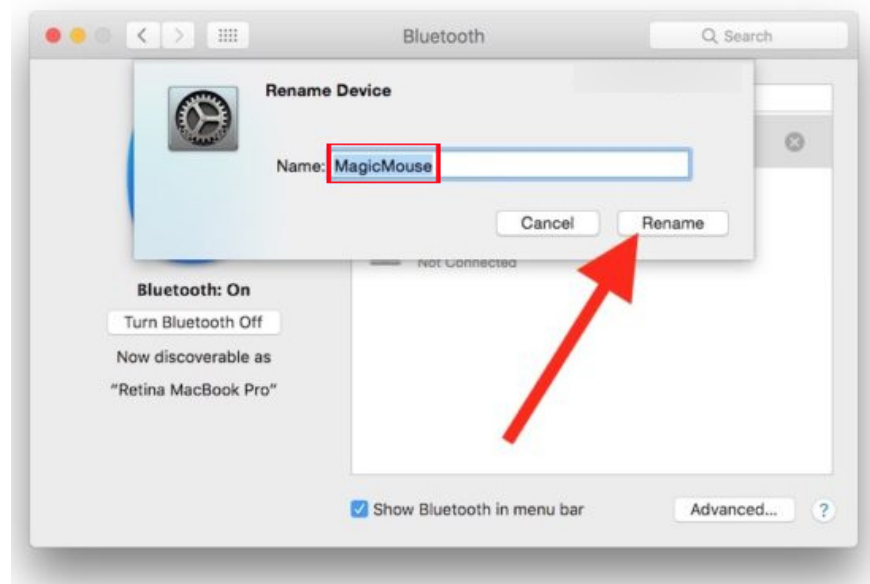

Step 3:

We will see Bluetooth devices that are connected to the Mac.

You **right-click on Apple Magic Mouse**, or use the key combination Control + Click. Soon a small window appears. Here, we will **enter a new name for the optional Magic Mouse**. Finally click **Rename** to change the new name for Magic Mouse.

So you've changed the name for the Magic Mouse device that is connected to the Mac. During the implementation process, users do not need to disconnect Bluetooth. This change will be applied immediately without having to reconnect Bluetooth. The new name will be assigned to the device even if you connect to any device. In addition, we can also use this operation to change the name of any connected Bluetooth device, on any version of the Mac.
