3. How to change the TP-Link wifi password?

How to change pass WiFi modem iGate VNPT

Step 1: First, you access the computer browser and then enter **the IP address 192.168.1.1** .

Step 2: At the new interface, enter the following information (try 1 or 2) and click Login below.

Admin **username** 1 admin admin 2 admin vnpt

The image shows a login interface for a VNPT device. It features two input fields: the top one contains the text 'admin' and has a user icon on the left and an asterisk on the right; the bottom one contains six dots and also has an asterisk on the right. Below these fields is a blue button with the text 'Login' in white, with a red arrow pointing to it from the left. At the bottom of the interface, the text 'Copyright ©2014 - VNPT Technology.' is displayed.

Step 3: Next, we follow the path **Network Settings> Wireless> Basic** on the menu on the left of the screen. If you look at the content on the right, the **SSID** section enters a **new name for the WiFi network** you are using.
