That means it slows down your computer a bit, so if your computer is not really "fast" then you should consider whether to leave the screen in this mode. Below, Network Administrator will show you how to change the desktop on **Windows 7** , **Windows 8** and **Windows 10** .

Change Windows 7 and 8 desktop wallpapers

Method 1: Set a photo as wallpaper

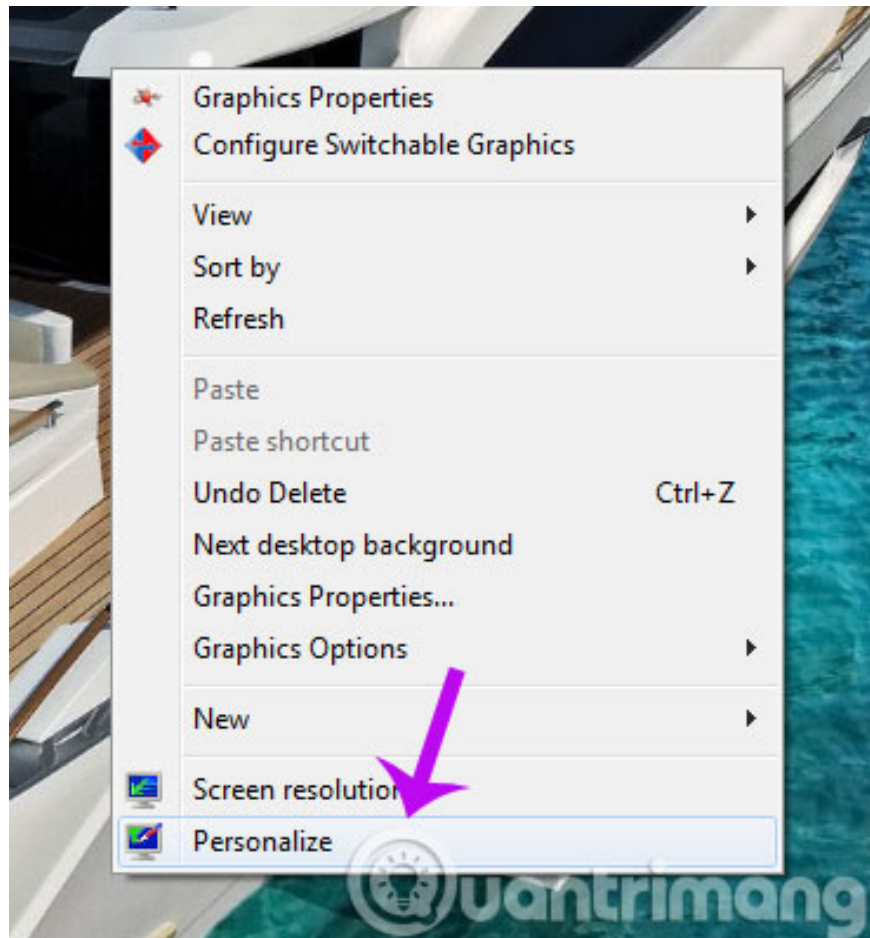

This way, you can apply for all versions of Windows. Right-click the image you want to use to replace the wallpaper for the Desktop and select **Set as desktop background**

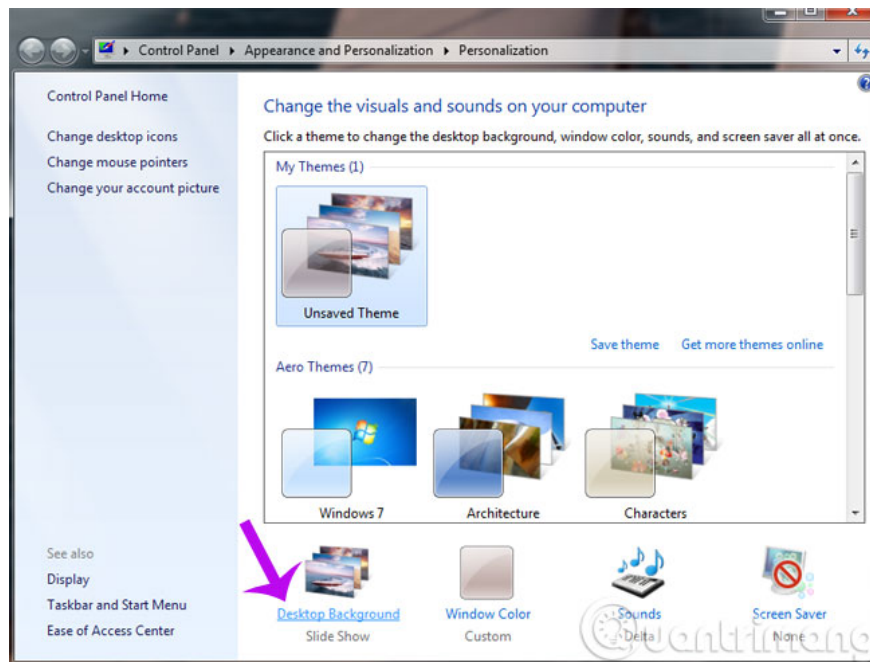

Method 2: Set the mode to automatically change the wallpaper

In Windows 7/8 operating system, there is a function to change the wallpaper automatically with available photo effects. This means that your Desktop not only encapsulates when using a certain wallpaper but will automatically change many different wallpapers.

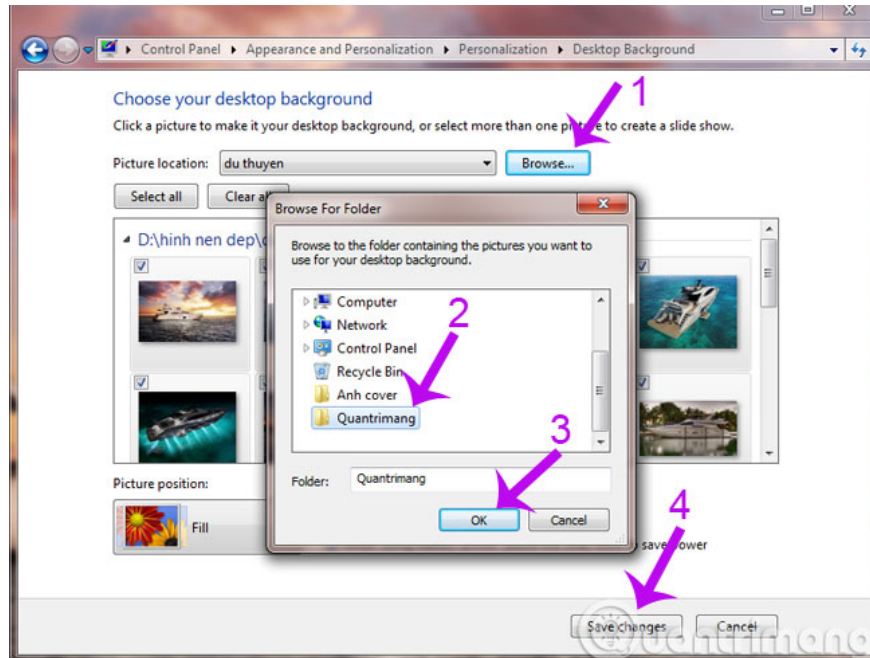

Step 1 : At the desktop screen, right-click and select **Personalize**

Step 2 : In the **Personalize** window, select **Desktop Background**

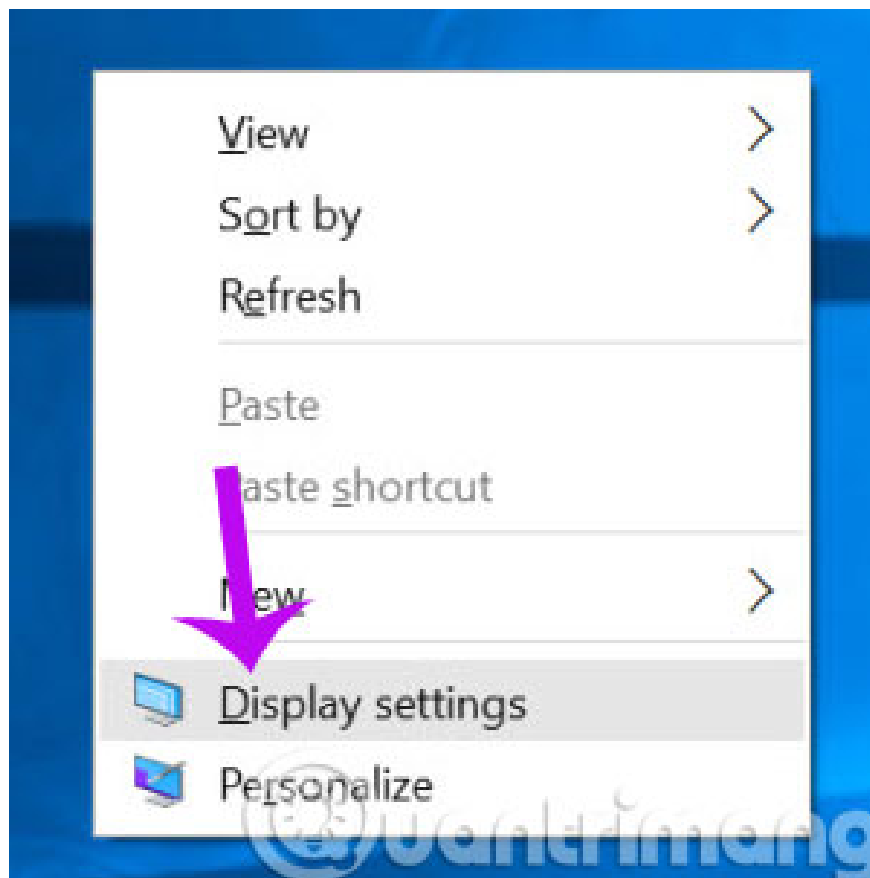

Step 3 : Here, you just need to click on **Browser** to select the folder containing the image files you want to set as wallpaper, the selected image files will be displayed directly on **Desktop Background** . Then, click **Save Changes** to save the changes.

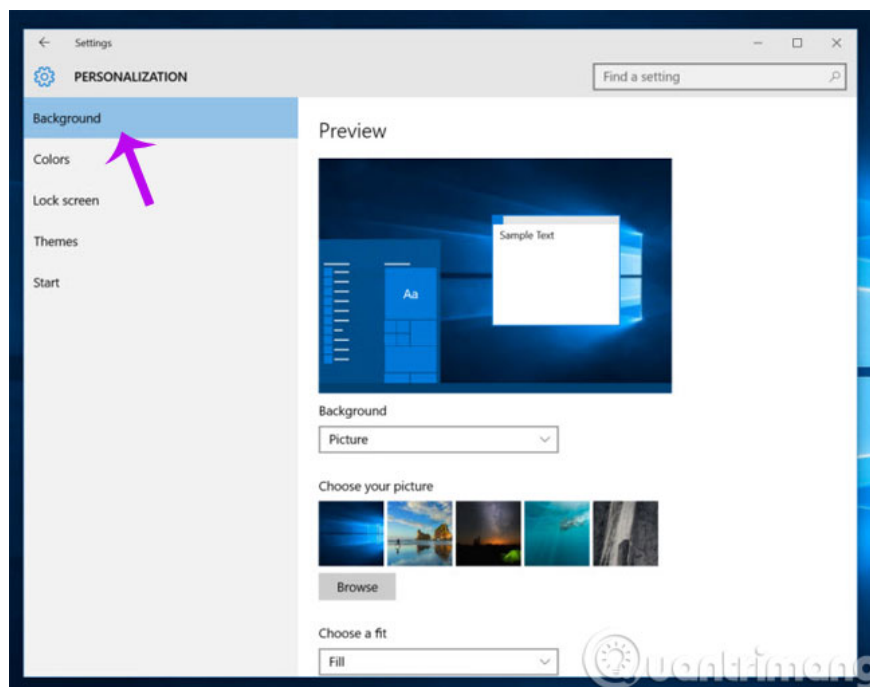

Change Windows 10 desktop wallpaper

Step 1 : From the desktop, right click, select **Display Settings**

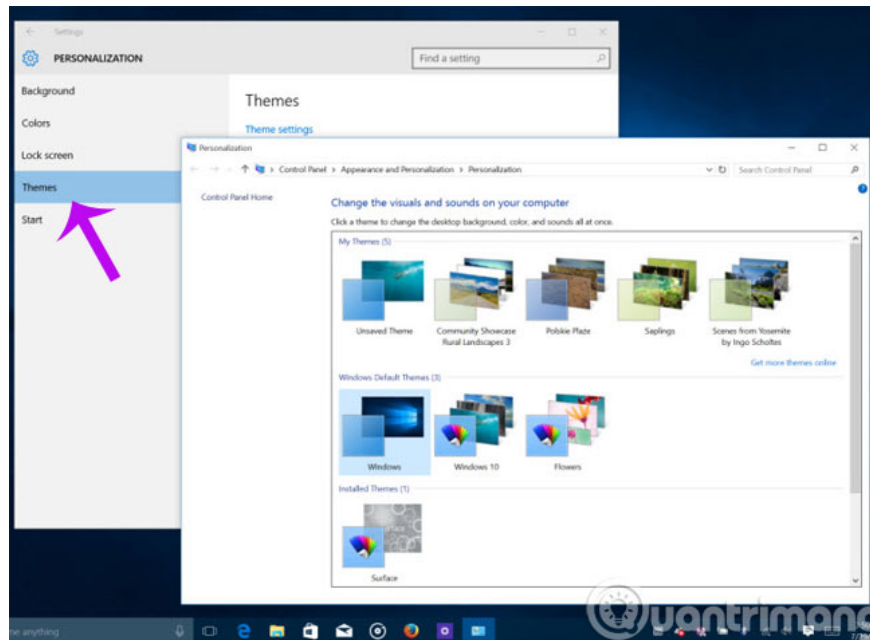

Step 2 : At the **Settings** window, you will also have 2 options

1. **Background:** Select 1 photo as wallpaper

1. Themes: Set multiple photos to change continuously like on Windows 7, 8

So, we have just shown you how to change the computer wallpaper on many different operating systems. Changing this wallpaper makes your computer unique and interesting to bring your own style and personality.

Having fun!
