I. What is standing steam irons?

Vertical steam irons are a more modern version of steam irons including:

1. 1 water reservoir capacity ranges from 1.2 to 1.5 liters.
2. A metal bar can adjust height to hang clothes on ironing.
3. 1 water heater to create steam.
4. 1 duct is responsible for leading steam up.
5. An iron head has a design similar to a shower, which helps to heat and straighten clothes.

Advantages and disadvantages of vertical steam irons

Advantages:

1. No pain in your back when ironing for a long time.
2. Straighten up any fabric.
3. No need to use ironing board.
4. Safe when using.

Defect:

1. Big size, heavy weight.
2. The price is higher.
3. Hygiene is more difficult.

II. Instructions for cleaning standing steam irons

Step 1:

Similar to other household appliances, you need to unplug the device to make sure the device is no longer working and then proceed to cleaning.

1. Remove the steam pipe, the hanging bar, the water tank and empty the remaining water in the bottle.
2. Tilt the body of the water tank when pouring to prevent water from remaining in the tank.

Step 2:

1. Prepare a mixture of vinegar and water mixed in a ratio of 1 - 1.
2. Pour about half of the water container.
3. Insert the water tank back into the table, attach the steam pipe and plug the plug into the power, turn on the lowest steam mode for the iron to run for 5 minutes.

Step 3:

At the end of the 5-minute running process, proceed to shutdown, unplug and leave the iron in the normal environment to cool naturally for at least 1 hour.

Step 4:

1. Pour clean water into the container to rinse.
2. Repeat this twice, then place the steam pipe into the water tank to wash.
3. Pour water into one end of the duct and pour it out, perform this operation 3-5 times.
4. Finally, leave all parts drained and reinstall.

III. Note when using and cleaning standing steam irons

When using it, please note:

1. Use only clean water, free of impurities in the ironing process to avoid soil deposits that clog the steam vents.
2. Do not use chemicals that create odors, aromatic oils because the chemicals inside can corrode the iron.
3. Do not allow water to exceed the "Max" threshold because it will cause water leakage during use.
4. Do not reuse the water of the last time, pour the excess water after use.

When cleaning:

1. Thoroughly clean the steam knob from the residue, let the iron radiate natural heat, avoid using water to promote the process.
2. Check the water tank before plugging in, avoid water spillage, leak out when using.
3. Regularly check the plug of the iron, if signs of rust or oxidation are detected, clean it with sandpaper.

IV. Top best standing steam irons today

1. Standing steam irons Philips GC518 - 5 speeds - Reference price: VND 1990,000
