## Clean hard touchpad

Hard hover table is usually made of plastic, aluminum, fiberglass, . so it has a long life and brings good mouse sensation. The biggest advantage of it is that it is easy to clean so you just need to clean it with soft cloth.

## Clean soft touchpad

Most of the touchpads on the market are soft, cheap, and woven and can be rolled up easily. They are divided into two categories based on the surface texture of Speed ??and Control. In it, Speed ??is a smoother type of touchpad with small fabric holes, which increases the speed of the mouse, and Control has a rough surface with

large fabric holes. The downside of this type of touchpad is that it is easy to stain and also easily frayed when used or cleaned.

Cleaning the soft touchpad, you should wash your hands the best. Instead of using detergent, you can take shower gel, shampoo, conditioner or dishwashing liquid to remove dirt. If the stains stay on for a long time, use a towel soaked with a detergent solution to clean it with the Speedy touchpad or use a soft bristle brush with the Touchpad.

It should be noted, because the rubber part under the fabric is quite important so you should not use hot water or strong impact, otherwise the two layers may be detached, causing deformation and damage cannot be repair.

When washing the touchpad, dry it with a soft cloth, then dry it in the shade to avoid direct sunlight. In case of urgent use, it can be dried by a hair dryer, but be careful not to peel, peel off the surface or the rubber layer below.

Above is how to clean the computer mouse table simply and properly, do not forget to clean the laptop keyboard, clean the computer mouse periodically to improve the experience when using it!
