

Instructions for cleaning touch screens for phones and tablets

Touch screen phones or tablets after only a few times of use will often clog dirt, fingerprints or other traces. This will make the user feel uncomfortable, the screen is blurry or dimmed.

For touchscreen types such as smartphones, tablets will be easy to get dirty and fingerprints. And it will greatly affect the user when the screen will reduce the display, blur or sensitivity when surfing on the screen. Therefore, cleaning the touch screen will help clean the screen, providing a more comfortable experience when we use it. The cleaning steps are very simple, the preparation is easy, but it takes only 2 minutes for the screen to come back.

How to clean the touch screen

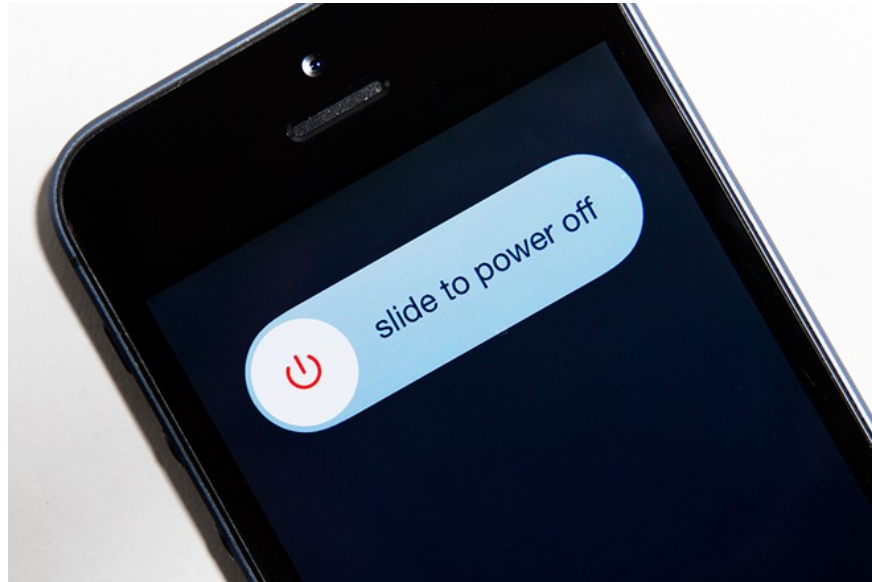

Note , during the process you must not spray the cleaning solution directly onto the screen. This will damage the touch screen.

In addition, we need to prepare a **towel made of microfiber cloth with a smooth surface** , to avoid scratching the screen. You can use the cloth in the eyeglasses box.

Step 1:

First, turn off the device during the cleaning process to avoid pressing the buttons on the screen, jumping touchy.

Step 2:

Take a soft cloth towel ready to wipe gently on the screen. Do not tighten the towel, emphasize on the screen. Wipe the screen horizontally, then vertically. Or wipe in circles until you see the stains clean.

Step 3:

With the type of stains difficult to wipe with a towel, we need to use cleaning solutions. You can make your own solution of vinegar and water in a ratio of 1: 1, or use a solution to clean the smartphone screen specifically.

We will spray a little solution on the towel, avoid too much spraying. Do not spray the solution directly onto the screen, avoid damaging the screen. Perform the operation of cleaning the screen horizontally and vertically as above.

Step 4:

After all the dirt has been removed, remove the dry cloth again and wipe the entire surface of the screen again. Leave the screen completely dry, then restart the device.

You will see all stains of dirt, fingerprints and stubborn stains removed from the surface of the machine. During the cleaning process, be careful not to spray any liquid onto the screen, or manipulate it severely to damage the screen.
