2. Instructions on Windows 10

Next, **TipsMake** will guide you how to **connect your computer's bluetooth to the speaker** on Windows 10 extremely simply and effectively. If you are using a Windows 10 computer, you can connect your computer's Bluetooth to the speaker in one of the two ways below:

Method 1: Use keyboard shortcuts

Open Bluetooth mode on your computer by pressing the shortcut key combination **Fn + function keys** from F1 to F12 (depending on the type of computer) to turn off or turn on Bluetooth for the device. Now, please observe the Bluetooth icon displayed on the screen to be able to make the most accurate choice.

Below the taskbar you will see **the Bluetooth icon** . Turn on the speaker device in Bluetooth mode and click on the Bluetooth icon in the taskbar. Now on your computer screen the connection will appear. To connect to the speaker, you need to detect the Bluetooth of the speaker device, click '+' **Add Bluetooth or other Device** . When your device is successfully detected, the name will appear on the screen and you just need to click connect to complete.

Method 2: Start Bluetooth settings on the system

The second way **TipsMake** wants to send you how to **connect computer bluetooth to speakers** on Windows 10 extremely quickly:

Step 1: First, turn on Bluetooth on the speaker device and place the device within the connectable range.

Step 2: At the main screen, look at the left corner of the screen and select the '**Settings**' icon to go to the settings section.
