

Instructions for connecting friends on Facebook Messenger with Code

Using Code to connect with friends on Facebook Messenger allows users to use the camera on the phone to search and connect with more friends.

It is not so much to say that Facebook is the social network that has "bloody face" when no opponent can beat. In parallel with the expansion of many features for Facebook, Facebook Messenger is also continuously upgraded by the manufacturer, giving users a rich usage space. It's not just about opening an unlimited chat world, we can play basketball, or chess and try our friends right on Facebook Messenger.

Recently, the manufacturer has updated the Messenger Code feature, searching and connecting with friends via code when scanning with the camera on the phone. Thanks to this feature, we can search for friends much faster, save time and traditional operations. Together with the Network Administrator, learn how to find friends through Messenger code in the tutorial below.

Note, Facebook Messenger needs to use the latest version to use this feature.

Find friends on the Facebook Messenger iPhone with QR Code

Step 1:

You log in to Facebook Messenger on your iOS device. At the main interface, click on the **Me** section at the bottom of the screen.

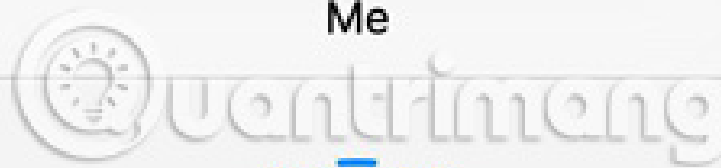

Step 2:

Here, you will **click on the QR code circle** and appear a new interface with the following two options:

1. **My Code** : display your Code code.
2. **Scan Code** : scan your friends' Code to connect.
