Instructions for copying CDs/DVDs using Nero

Prepare:

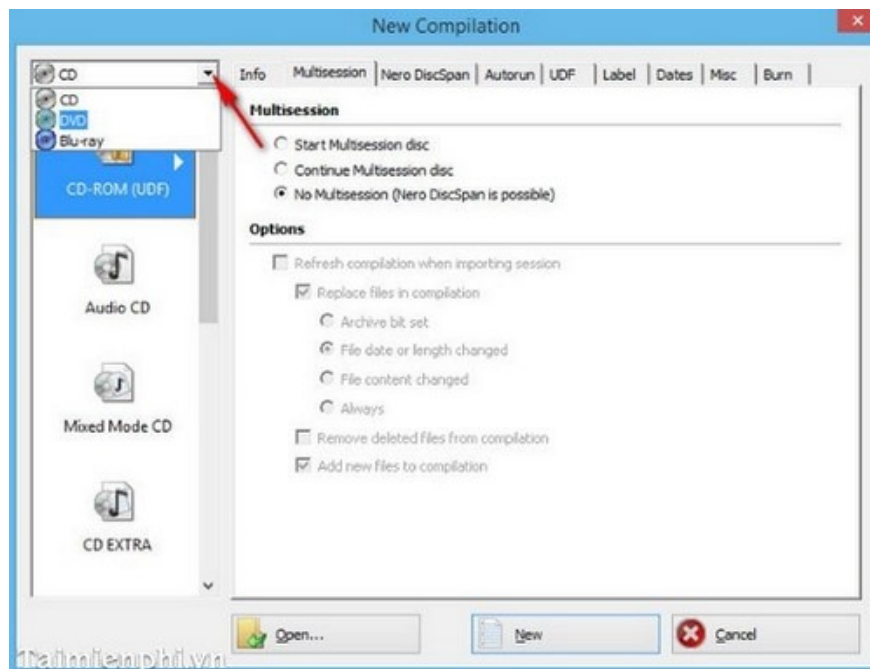

- Download and install Nero on your computer.
- Use a blank CD/DVD.
- Your computer must have a CD/DVD drive.

Step 1 : Download and install the software on your computer. If you don't have it yet, you can download the latest version here: **Download Nero**

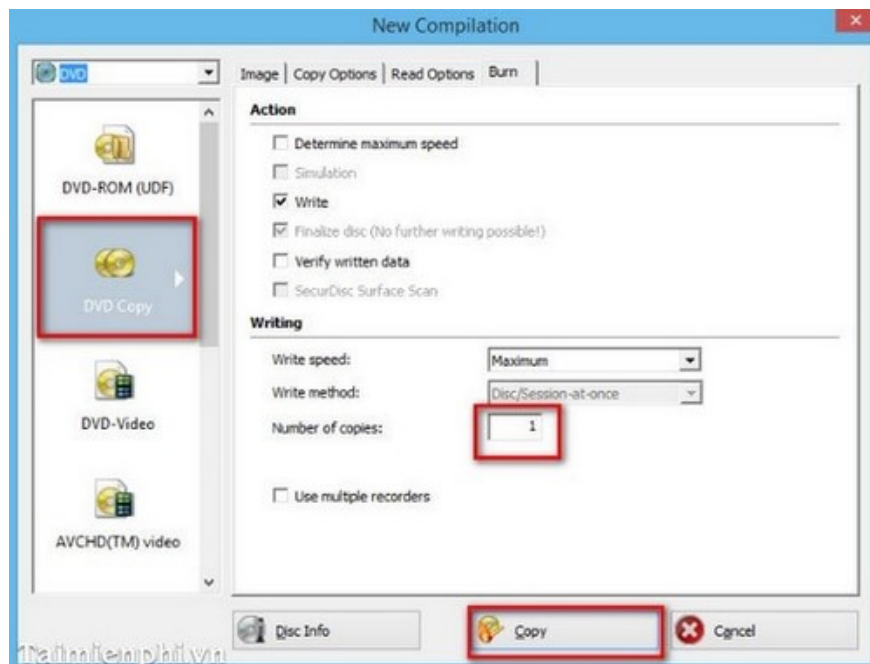

Step 2 : Open the Nero program. The interface will look like the image below.

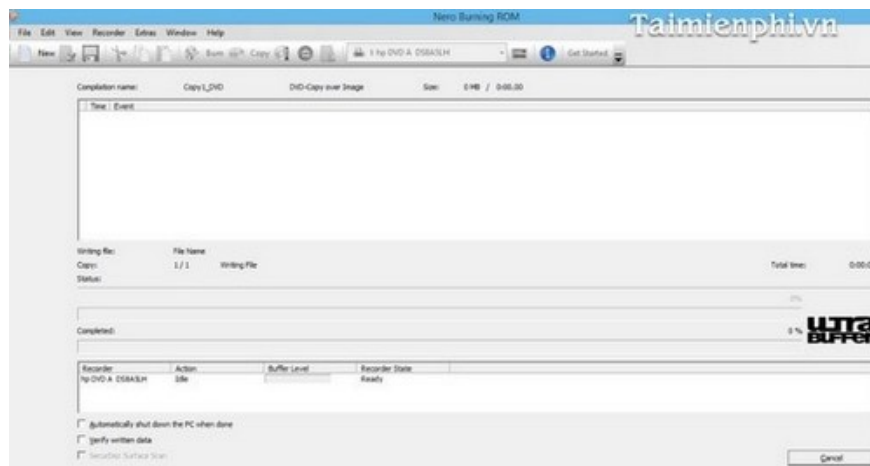

Step 3 : Look at the options in the upper left corner and select the type of disc you are using and want to **copy**, such as CD/DVD.

Step 4 : Once you've selected the disc type, look down and choose **DVD copy** (If you're using a DVD, select CD copy; the following steps are similar). Under Number of Copies, choose the number of CDs/DVDs you want to copy. There's also a **Write Speed** ??option that allows you to change the copy speed. It's best to leave it at the default setting. Then click and select **Copy**.

Step 5 : The process is starting, please wait a moment for the process to complete.

Copy CD/DVD

In this article, we have guided you on how to copy CDs/DVDs using Nero software. With these steps, you can quickly create copies for convenient sharing, learning, and entertainment. Additionally, if you want to burn discs using Nero, you can refer to our other article.
