

Guide to creating a talking character in Canva

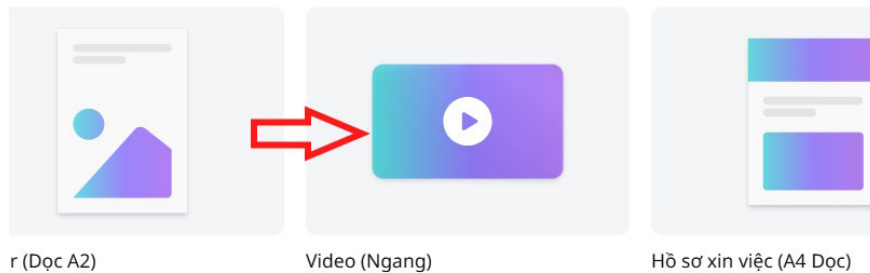

Canva AI helps us create talking characters based on text we type. You can use this video to introduce a particular topic.

Canva AI allows you to create talking characters based on text you type. You can use these videos to introduce a topic, making it less dry and more engaging for viewers. Below is a guide on how to create talking characters in Canva.

How to create a talking character in Canva

Step 1:

First, let's create a horizontal video in Canva.

Next, click on the **"Components"** section and **choose a background for the video**, such as a classroom, office, etc., depending on your purpose. Then, find **the characters** to add to the video.

Step 2:

Click on the character again and **select Edit to remove the background.** You need a Pro account to use these features.

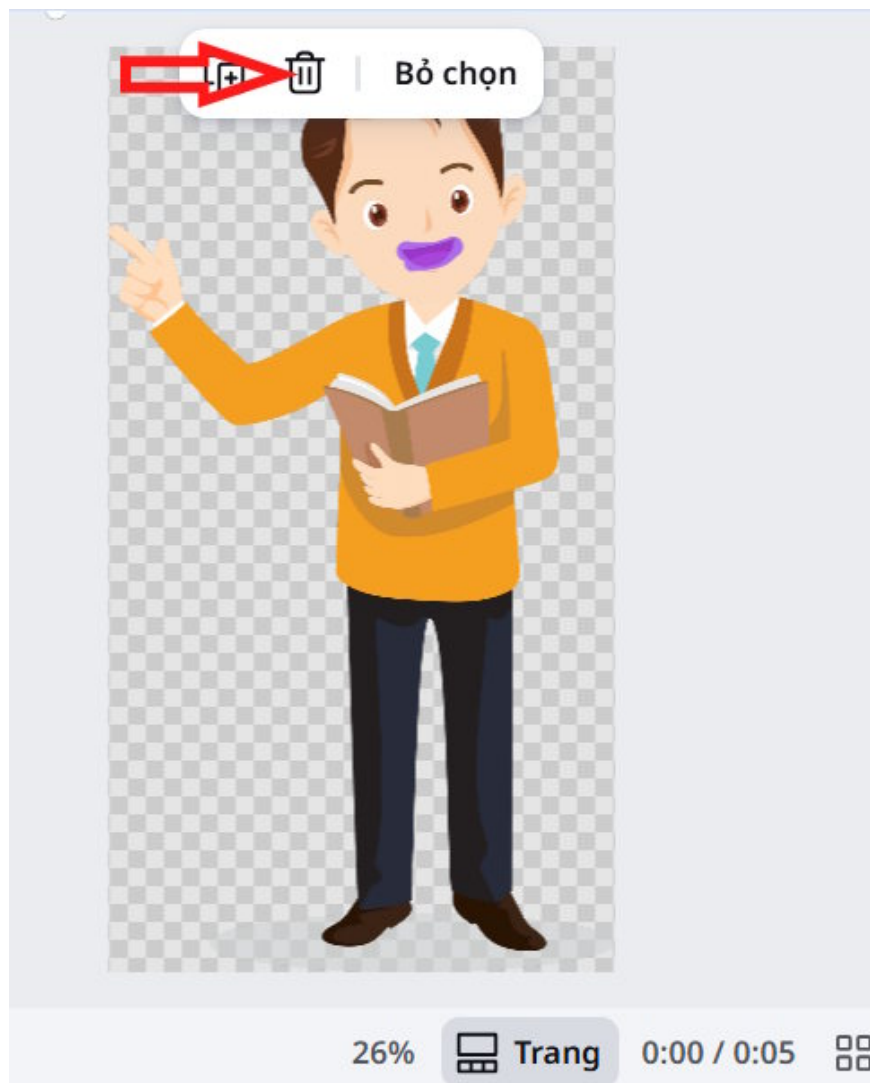

Here you **select the Magic Erase tool** . We will **erase the character's mouth** and then reattach a speaking mouth to the character.

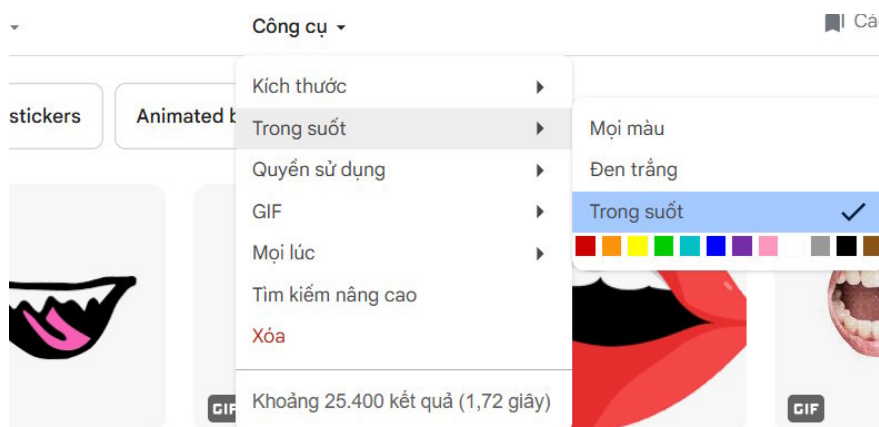

Step 3:

Adjust **the brush size to a small setting** and select the area around the character's **mouth** . **Press the trash can icon** to **erase the mouth area** .

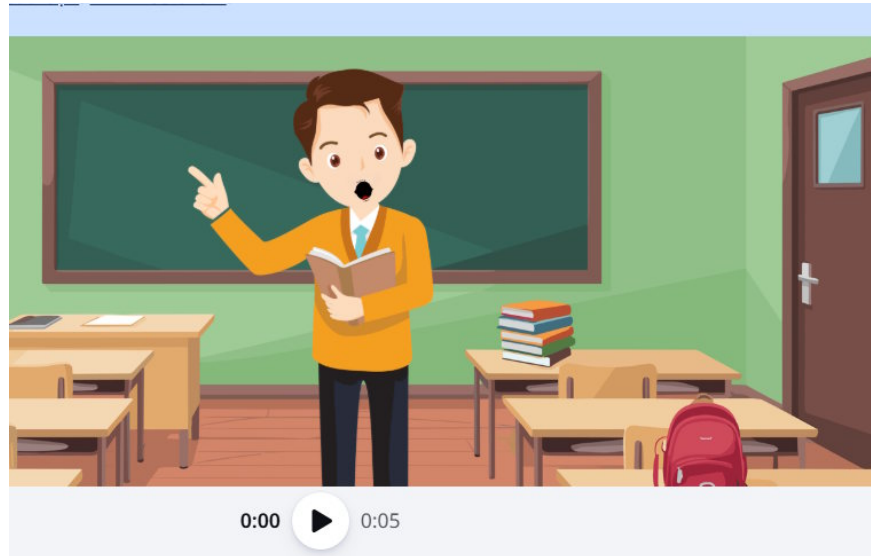

Open Google and search for "mouth taking gif ," then adjust the "Tools" section to "transparency" and "gif type ."

Choose the mouthpiece you want to use and download it.

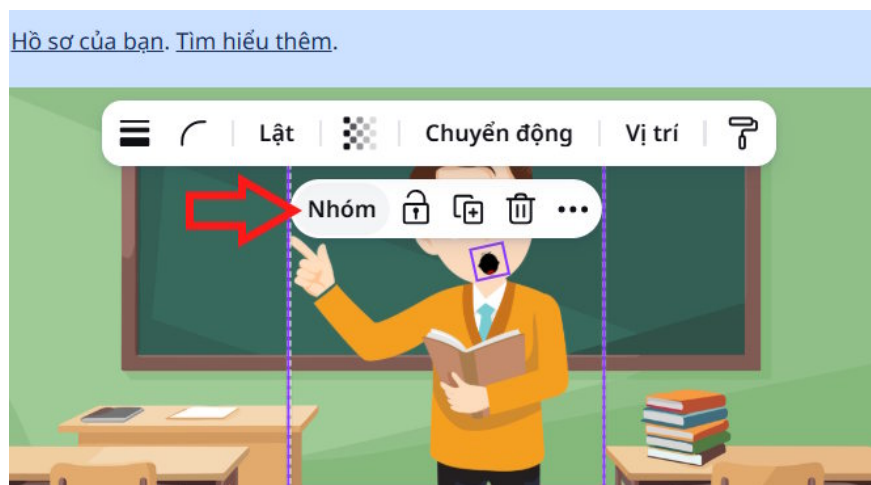

Step 4:

Go back to Canva and upload this **GIF** . Once uploaded, **attach the moving mouth to the character** and adjust the size and position for the best fit.

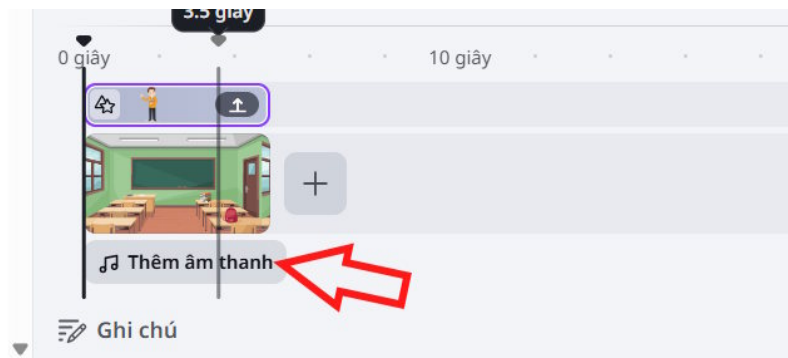

We **press the Shift key** , **select the character** and **the mouth**, and then **press Group** to group these two objects into one.

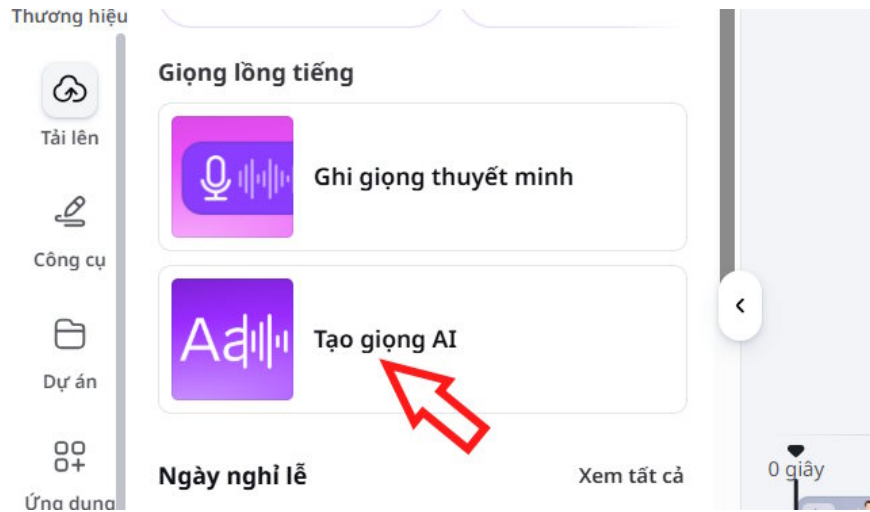

Step 5:

Continue by selecting "**Add audio**" below to insert voiceover into the video.

Select **AI Voice** to begin creating.

Step 6:

You select the **language** you want to use, **whether you prefer a male or female voice**, then **enter the content in the box**, and click "**Create AI Voice**" below.
