

Instructions for creating AI themes for Google Chrome

Google Chrome adds 3 AI features to the browser, including the ability to create AI themes on the browser.

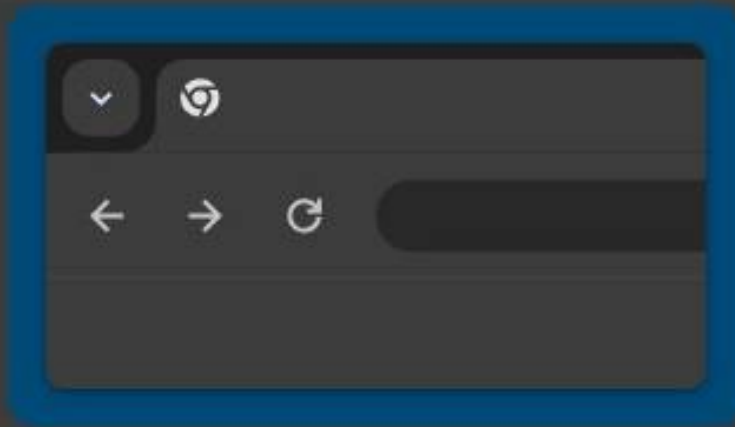

We will enter any theme request you want, what theme you want to create, and then Google Chrome will process that request to create the theme you want. Below are instructions for creating AI themes for Google Chrome.

How to create AI theme for Google Chrome

Step 1:

At the Chrome browser interface, click on the pen icon below to change the browser interface. Next, display customizations for the Chrome interface, click Change Theme.

Appearance

Default Chrome

 **Change theme**

 Light

Dark

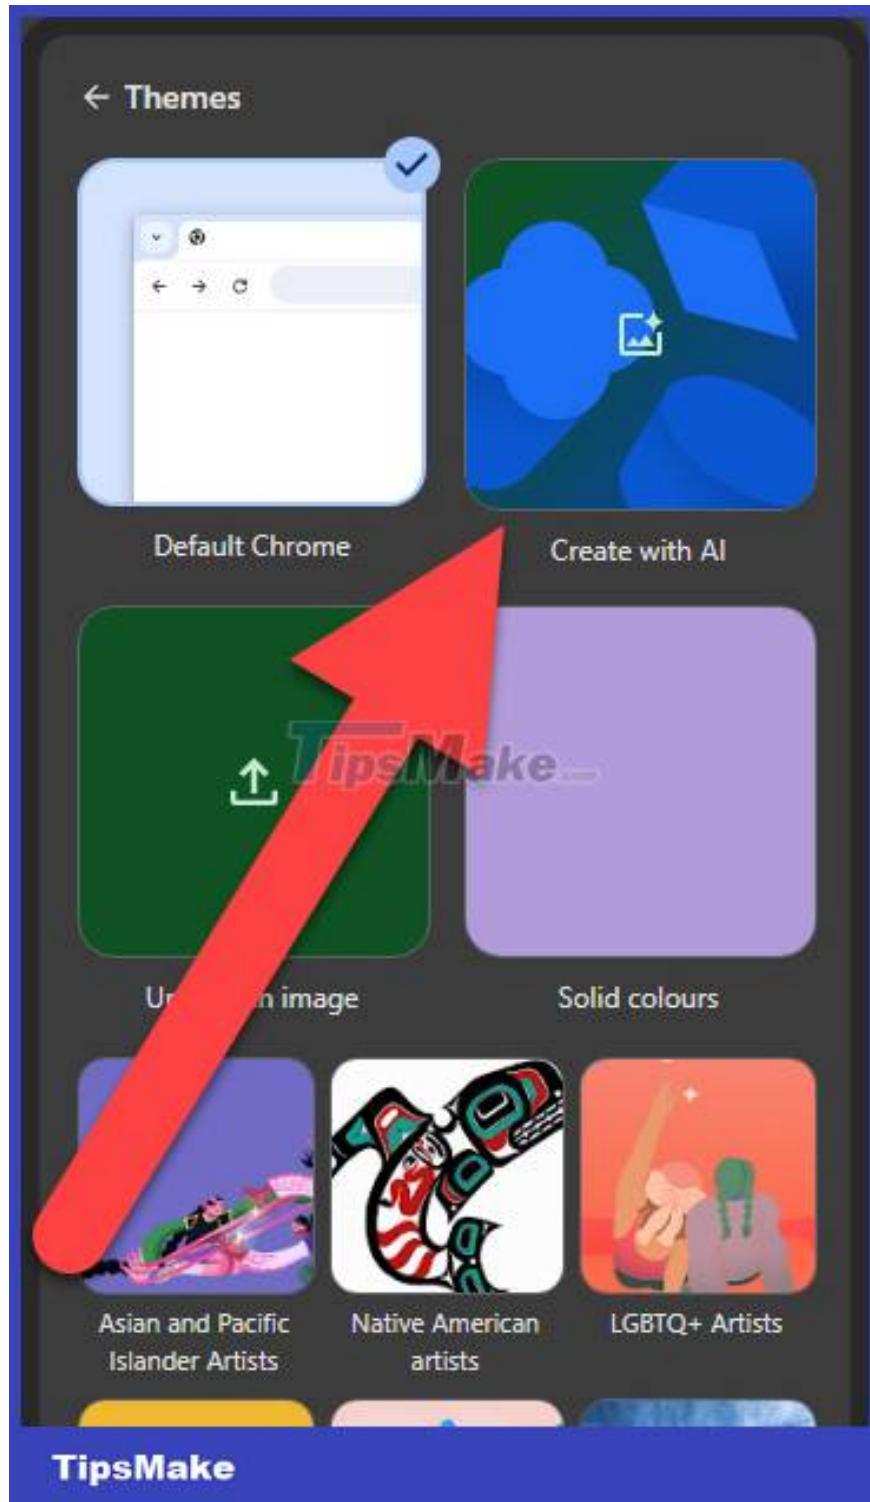

Device

Follow device theme

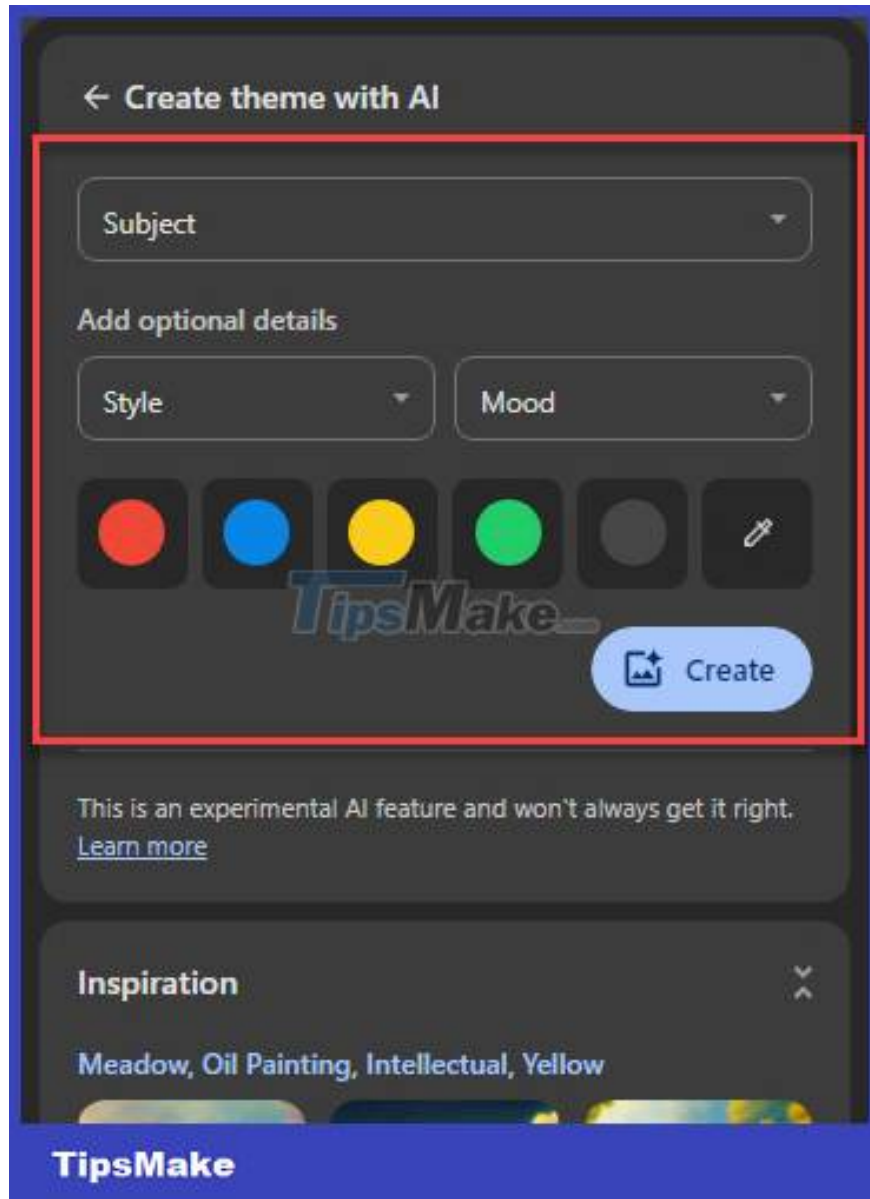

Step 2:

Now users will see options to create themes for Chrome, we click Create with AI to create an AI theme for the browser.

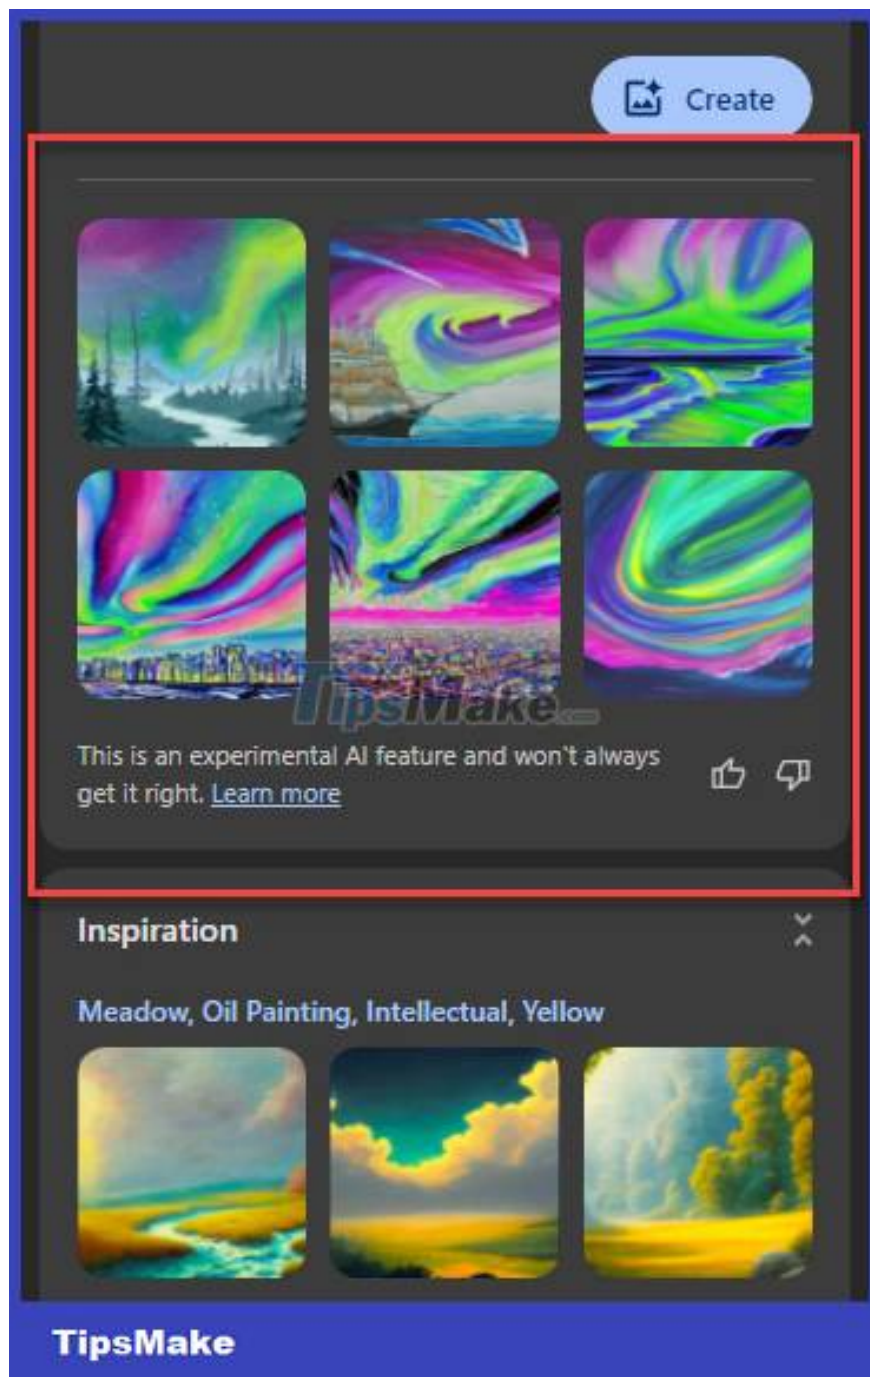

Step 3:

You will now see the interface to enter the theme content AI wants to create. We will select the subject, style, and mood elements and then click Create below to create as required. In each item there will be a menu below for us to choose according to our preferences.

Step 4:

Wait a moment and you will see the AI-generated theme on Google Chrome. If you like any AI theme, click on that theme and install the interface for Google Chrome browser.
