

# Instructions for creating attachments on Threads

New Threads update adds an additional text attachment option for you to post articles when you want to post long content, when the normal Threads posting mode limits the number of characters.

Threads has recently updated the attachment text option for you to post articles when you want to post long content, when the normal posting mode of Threads limits the number of characters. In addition, Threads has added basic text formatting, such as italics, bold,. Below are instructions for creating attachment text on Threads.

## How to create text attachments on mobile Threads

### Step 1:

At the interface on Threads, users click on **the plus icon** , then click on **the text icon** as shown. Display the interface for you **to enter text and proceed with formatting** .

### About genuine iPhone batteries

All rechargeable batteries are consumables and have a limited lifespan — eventually their capacity and performance decline so that they need to be replaced. iPhone uses built-in, high-quality lithium-ion batteries. They're rigorously designed, tested, and manufactured to meet Apple quality and performance standards. These genuine Apple batteries have also been certified for safety.

### ~~Learn about your repair options~~

For most customers, visiting a professional repair provider with certified technicians who use genuine Apple parts is the safest and most reliable way to get a repair. These providers include Apple and Apple Authorized Service Providers. Independent Repair Providers also have access to genuine Apple parts.<sup>1</sup>

# How to post attachments on Threads PC

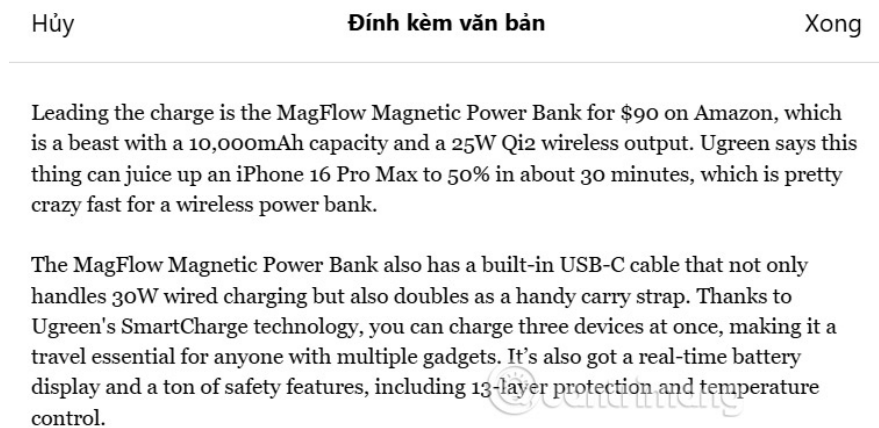

## Step 1:

In the Threads interface, click on **the plus icon** to post content, then click on **the attached text icon**.

## Step 2:

Displays the interface for you to enter text content, below is **the text formatting tool**.

**B** / U S

You use the available tools to change the text to your liking, then post it to your account.

**Leading the charge is the MagFlow Magnetic Power Bank for \$90 on Amazon**, which is a beast with a 10,000mAh capacity and a 25W Qi2 wireless output. *Ugreen says this thing can juice up an iPhone 16 Pro Max to 50% in about 30 minutes, which is pretty crazy fast for a wireless power bank.*

The MagFlow Magnetic Power Bank also has a built-in USB-C cable that not only handles 30W wired charging but also doubles as a handy carry strap. Thanks to Ugreen's SmartCharge technology, you can charge three devices at once, making it a travel essential for anyone with multiple gadgets. It's also got a real-time battery display and a ton of safety features, including 13-layer protection and temperature control.
