

Instructions for creating status classification folder on Lotus

The status folder creation feature, in Lotus, will help you post your own status for events, trips or achievements based on the created folders.

Lotus has an interesting feature that few people pay attention to, it is creating separate folders for statuses. You can create separate folders for each event, such as birthdays, travel, the process of achievement . and post separate status for that event. How to create the status Lotus folder you can see in the article below.

1. How to create application folders on iPhone
2. Experience trying Lotus social networks
3. Special content tools and formats on Lotus, helping users create the best content

How to create Lotus status folder

Step 1: Go to Lotus **Profile Management** , select **Manage folders** and click **Create new folder** .

Next, go out to write the content, add a photo or link as status and post normally.

This is a nice feature of Lotus because you can keep track of your directory and know which events you participated in or gained achievements in the folders you created.

You finished reading the article "[Instructions for creating status classification folder on Lotus](#)" edited by the [TipsMake](#) team.
