Avidemux is a free software that supports cutting, joining, and editing videos quite simply. Simple interface easy to use, integrated shortcuts, supports many video formats.

There are many software that can help you cut or join video like Camtasia Studio, Corel VideoStudio . but all are provided as a trial. Avidemux is one of the completely free software, video editing is quite simple. Simple interface easy to use, integrated shortcuts, supports many video formats.

Avidemux can cut or merge video, but also can split audio or image. After this, I would like to introduce you to cut and join video simply with **Avidemux** .

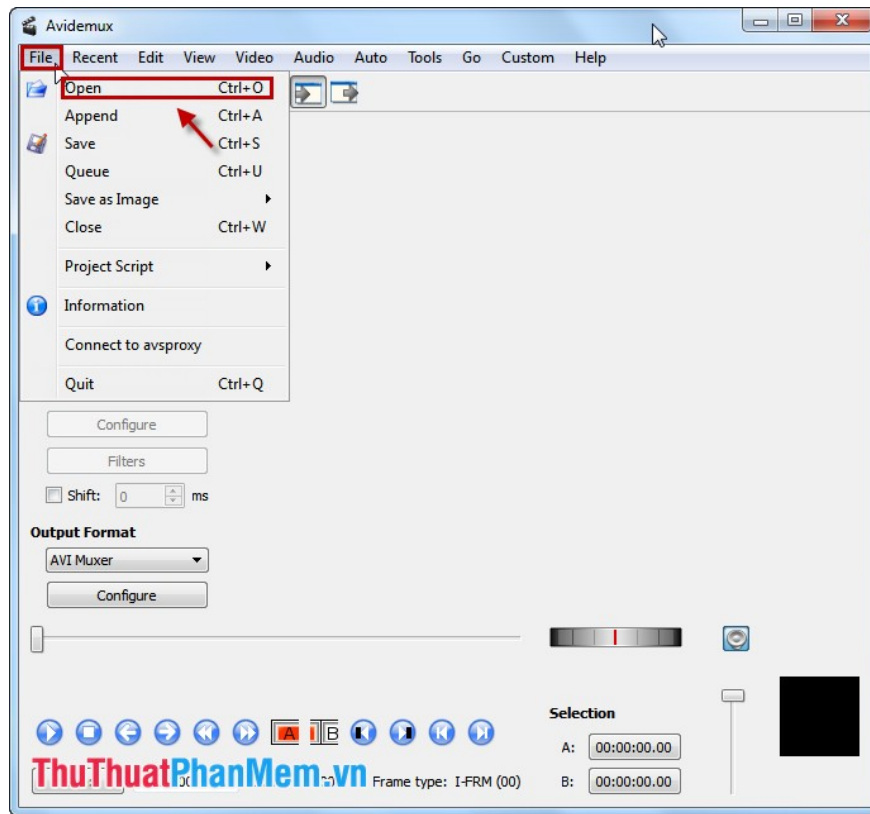

- First you download and install, completely free. The interface of the program:

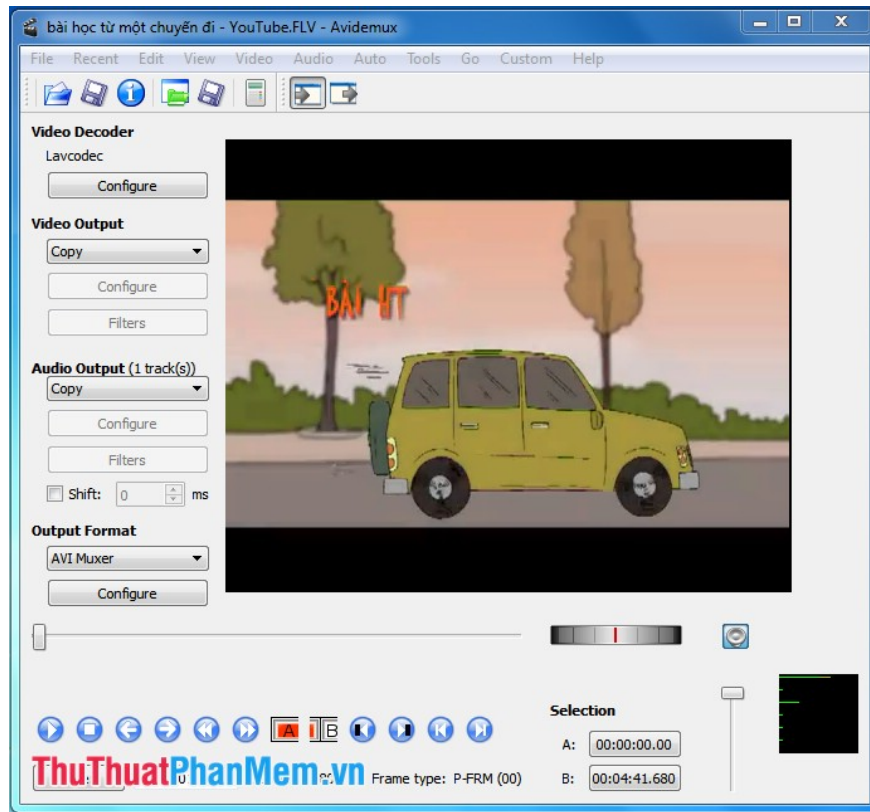

1. Cut a paragraph in the video.

Step 1: Select a video to cut.

Choose **File** -> **Open** (**Ctrl + O** key combination).

Select the video to cut and select **Open** .

Step 2: Mark the video to cut.

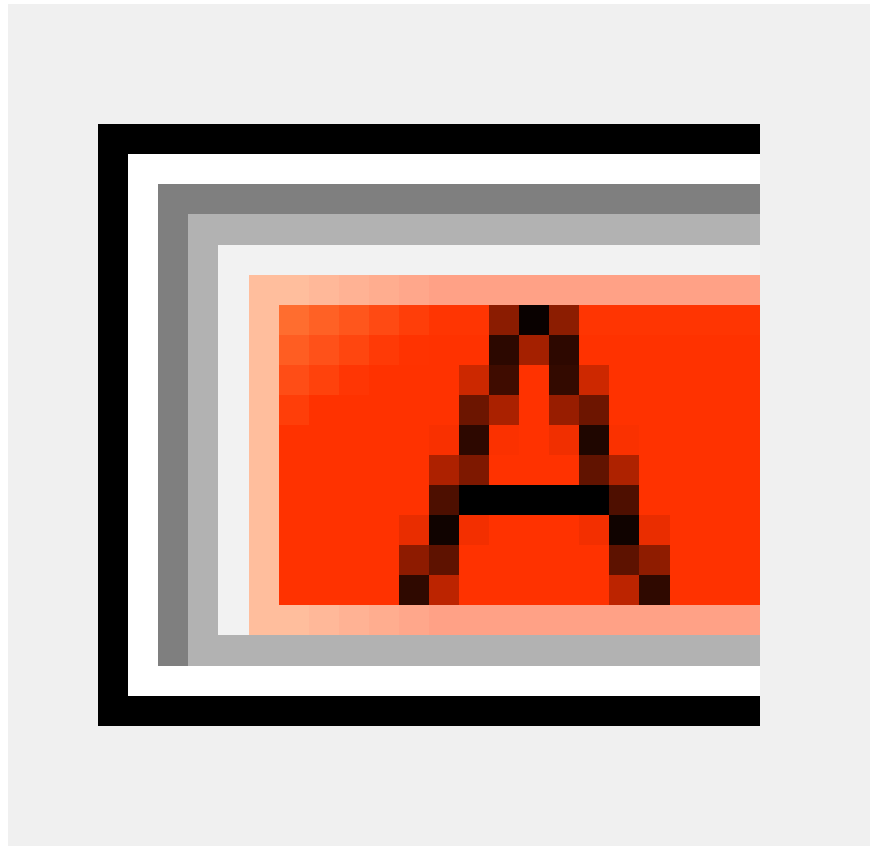

- Click the button

to play the video, go to the beginning to cut you press

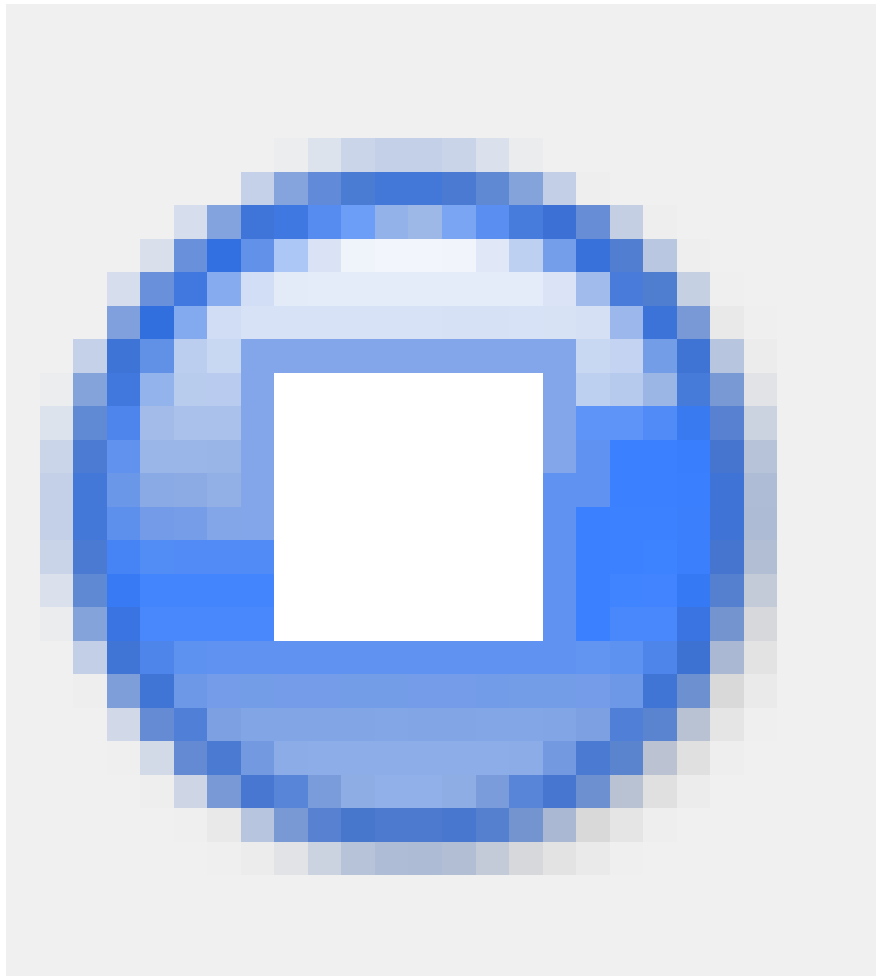

to stop the video, then click

to mark the first position to cut.
- Continue to press

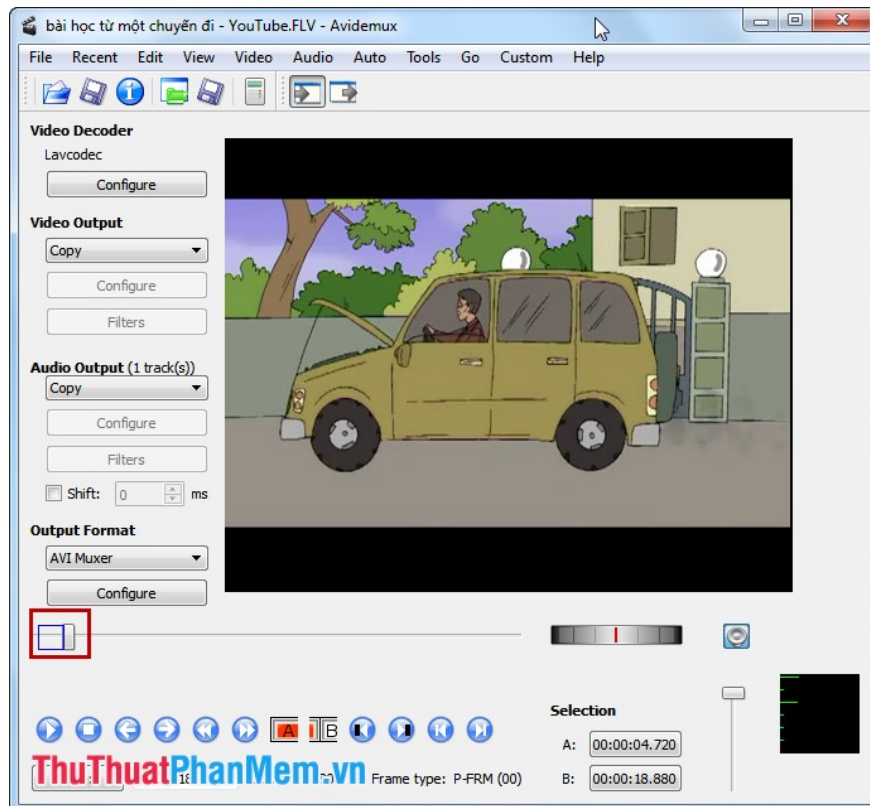

to play the video, when the end of the position you want to cut, click

to stop and click

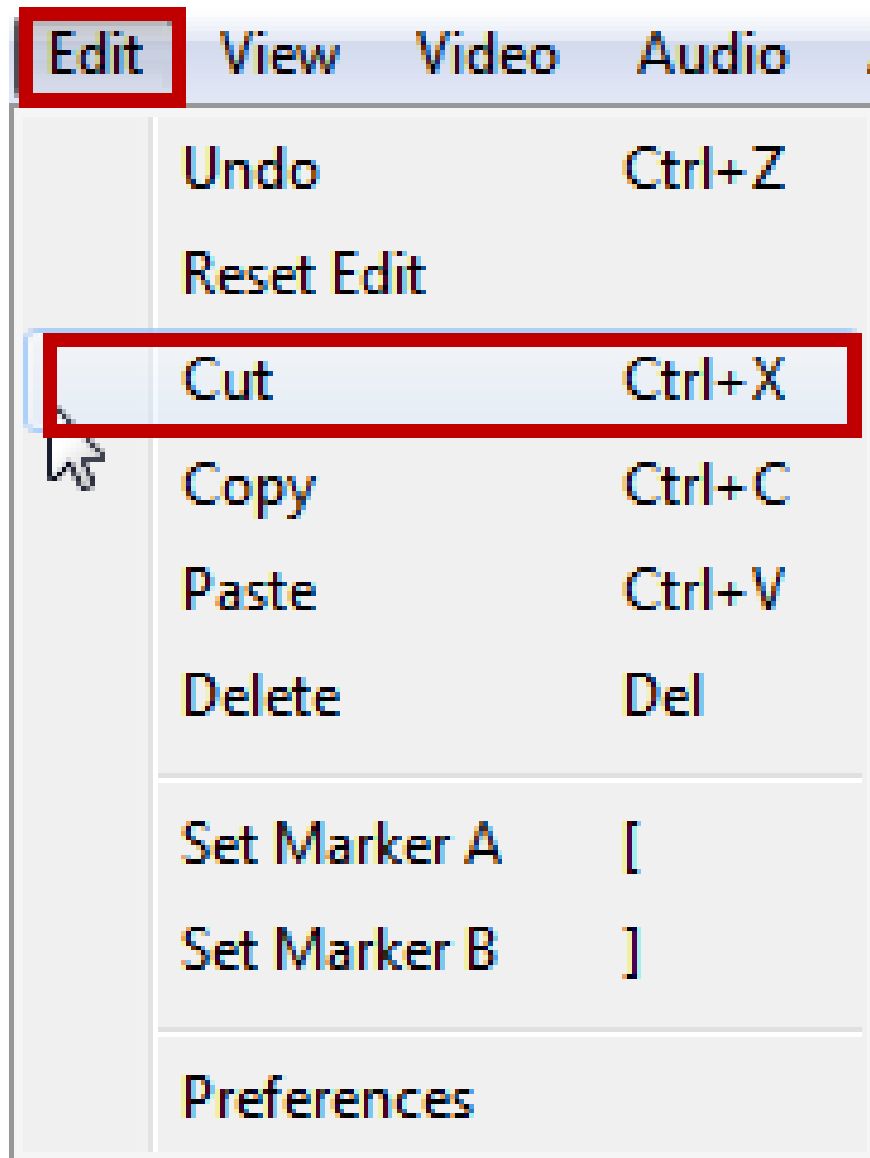

to mark the last position to cut. The video to be cut will be marked as follows:

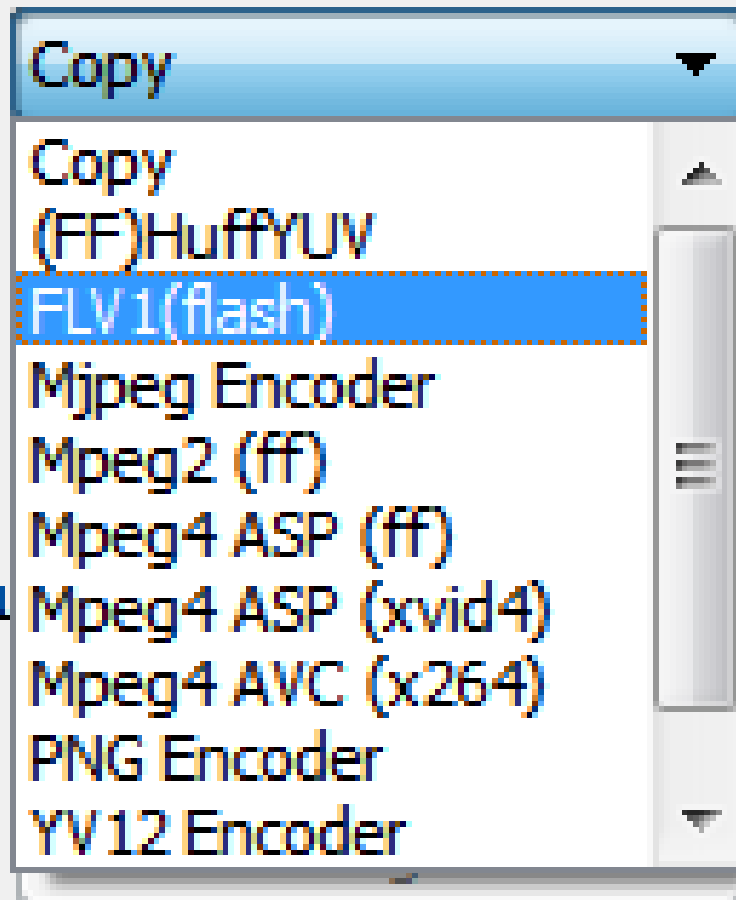

Step 3: Cut the highlighted video.

After marking the video to cut, select **Edit** -> **Cut** (**Ctrl** + **X** key combination).

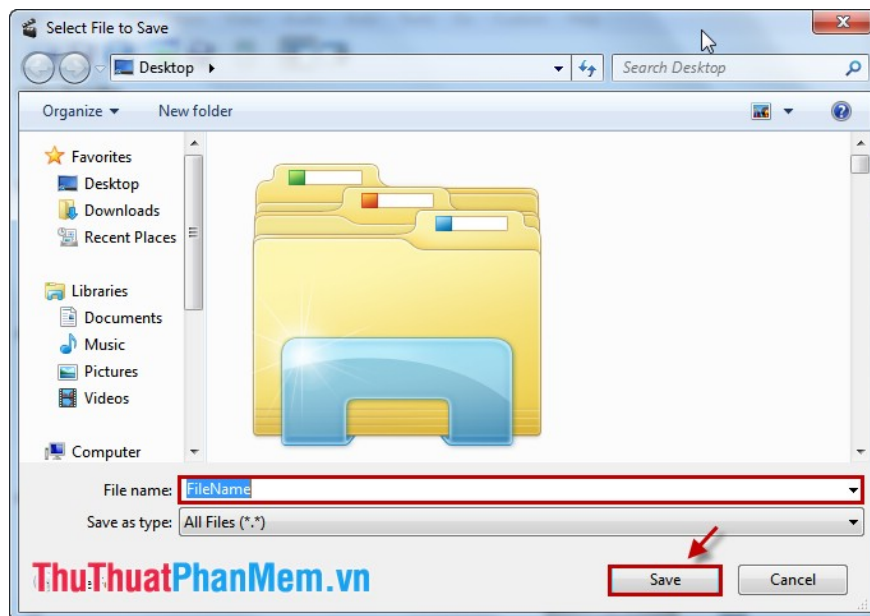

Step 4: Select the output file format at Video Output.

Video Output

Step 5: Save the file.

Choose **File** -> **Save** (**Ctrl + S** key combination).

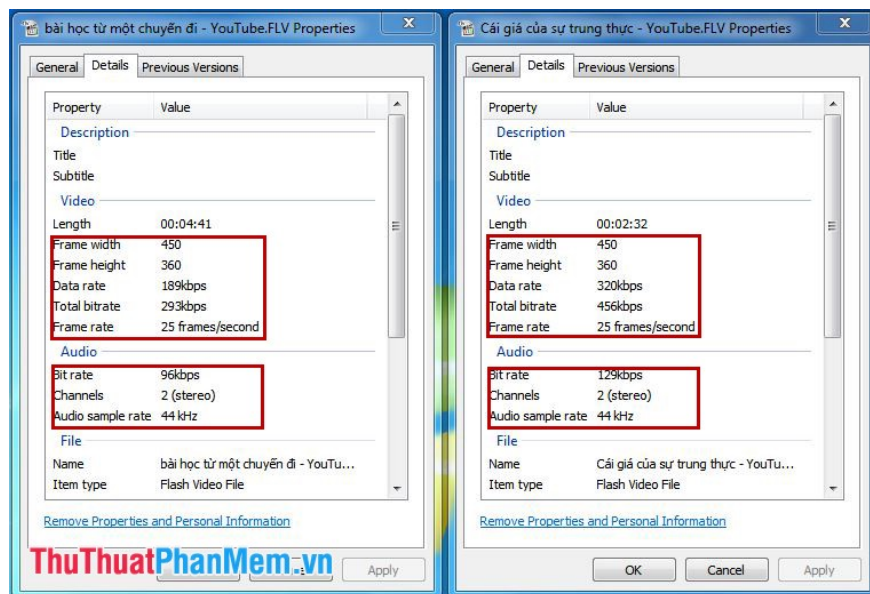

Enter a file name in the *File name* section and click **Save** to save the file.

2. Pair videos.

Step 1: To join the videos together, you need to see the parameters of the video, the right size and specifications.

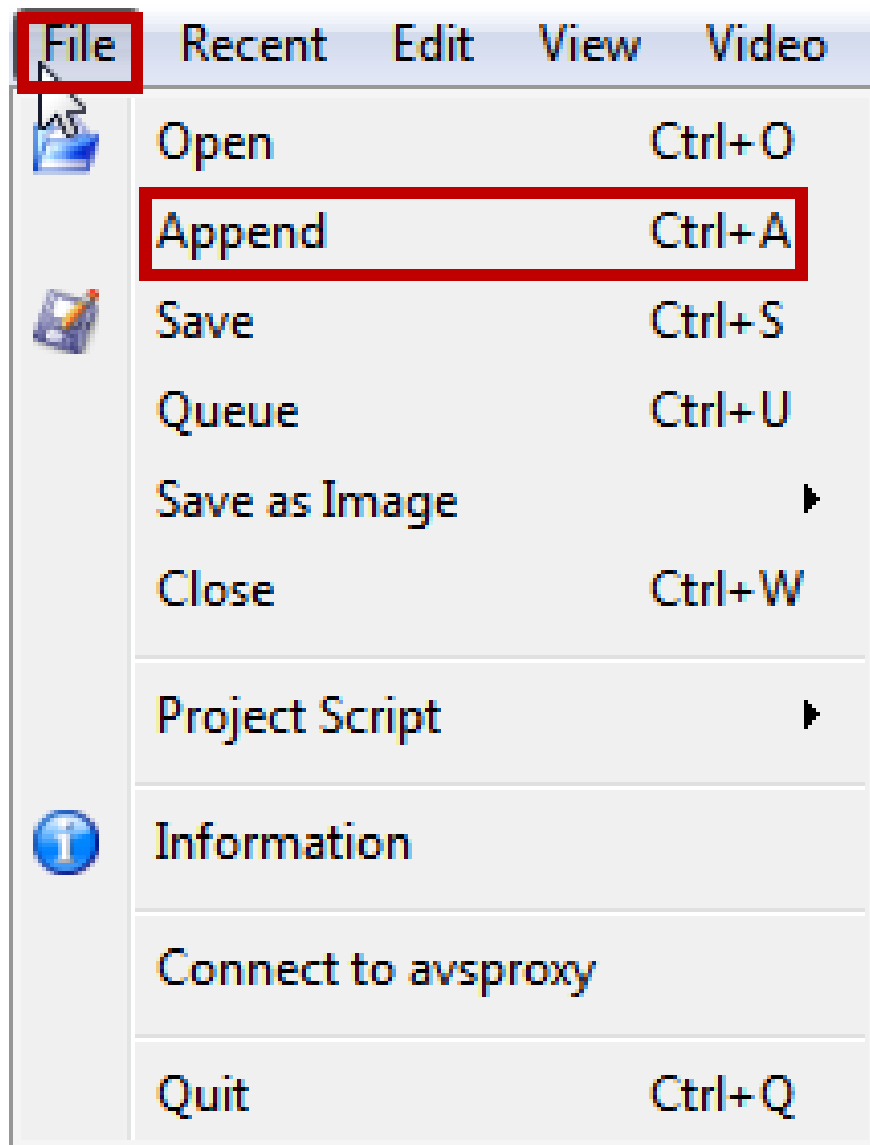

For example 2 videos below:

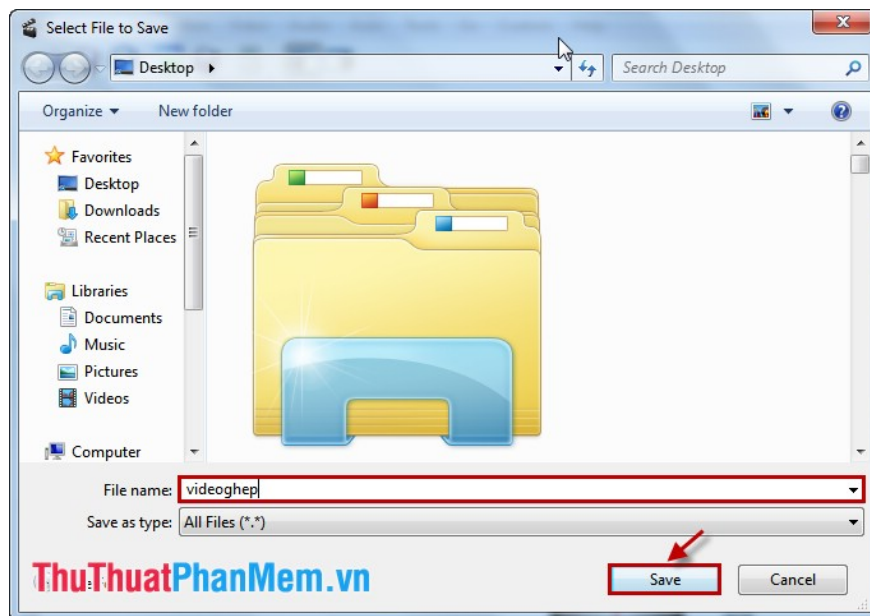

If not, you need to align the videos that need to be combined.

Open the first file to be paired (**File** -> **Open**) similarly above.

To open the second file, select **File** -> **Append** (**Ctrl + A** key combination).

Step 2: So you've merged 2 video files, to save the assembled video you choose **File** -> **Save** (**Ctrl + S** key combination).

Enter a file name in the *File name box*, then click **Save** to save the file.

Thus, with very simple steps and software **Avidemux** you can completely cut and join videos quickly.
