

Instructions for cutting videos on Viber

Viber has cut video to select the video that users want to use and edit when we send videos directly on Viber.

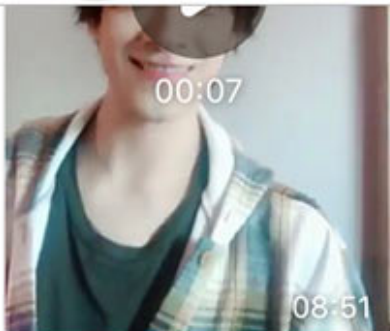

Viber on Android, iOS has just updated **the feature of cutting live video on Viber** with many other **Viber video editing** options such as inserting stickers, adding text or strokes to videos, or sending videos as secret messages. Privacy on Viber, hide the video as soon as the recipient sees it. So users can adjust the video or video in the album, shorten the video to reduce the size or focus on the main content of the video. The rest of the video editing operations are as simple and similar as when you edit images via Viber. The following article will guide you how to cut video on Viber phones.

Video tutorial on editing videos on Viber

Instructions for cutting videos on Viber Android, iOS

Step 1:

At the interface on Viber, click on **the camera icon** to send the video recording directly on Viber. Then display the video recording screen or you can also select videos available in the album also.
