

Instructions for deleting commemorative photos in Google Photos

Moments Memories in Google Photos are not always visible, so we can hide memories in Google Photos, or delete Memory Photos in Google Photos to no longer show them.

The Commemorative Photos section in Google Photos will re-display the images you previously posted that coincide with the current date. This feature will recall all our moments to review together. However, the Memory Photo moment in Google Photos is not always what you want to show, so we can hide the memory in Google Photos, or delete the Memory Photo in Google Photos to no longer show it. The following article will guide you to delete memories in Google Photos.

How to delete memories in Google Photos

Step 1:

First of all, we access the Google Photos application interface and will see Google Photos commemorative photos displayed above.

Step 2:

Click on any Google Photos commemorative photo to access the list of memories in Google Photos, then click on the **3 dots icon** at the Google Photos memory we want to hide.

Step 3:

Now show some options for this anniversary on Google Photos. We will click on **the Hide option** to proceed with hiding this memory on Google Photos.

Step 4:

Then Google Photos will give you the option to hide or delete this memory on Google Photos. Now click on **Remove This Memory** .

Finally, you just need to confirm Remove to delete this commemorative photo from the Google Photos interface.
