Today, many people are using Android devices. And as we all know that Android is now one of the leading smartphone operating systems because it provides many innovations for users. Sometimes you restore contacts from a variety of sources thanks to the synchronization feature. However, it does arise a problem that after synchronizing, your contacts appear many duplicate contacts. So the following article will show you how to delete duplicate contacts on Android device. Stay tuned if you encounter the same problem.

Use Simpler Merge Duplicates application to delete duplicate contacts

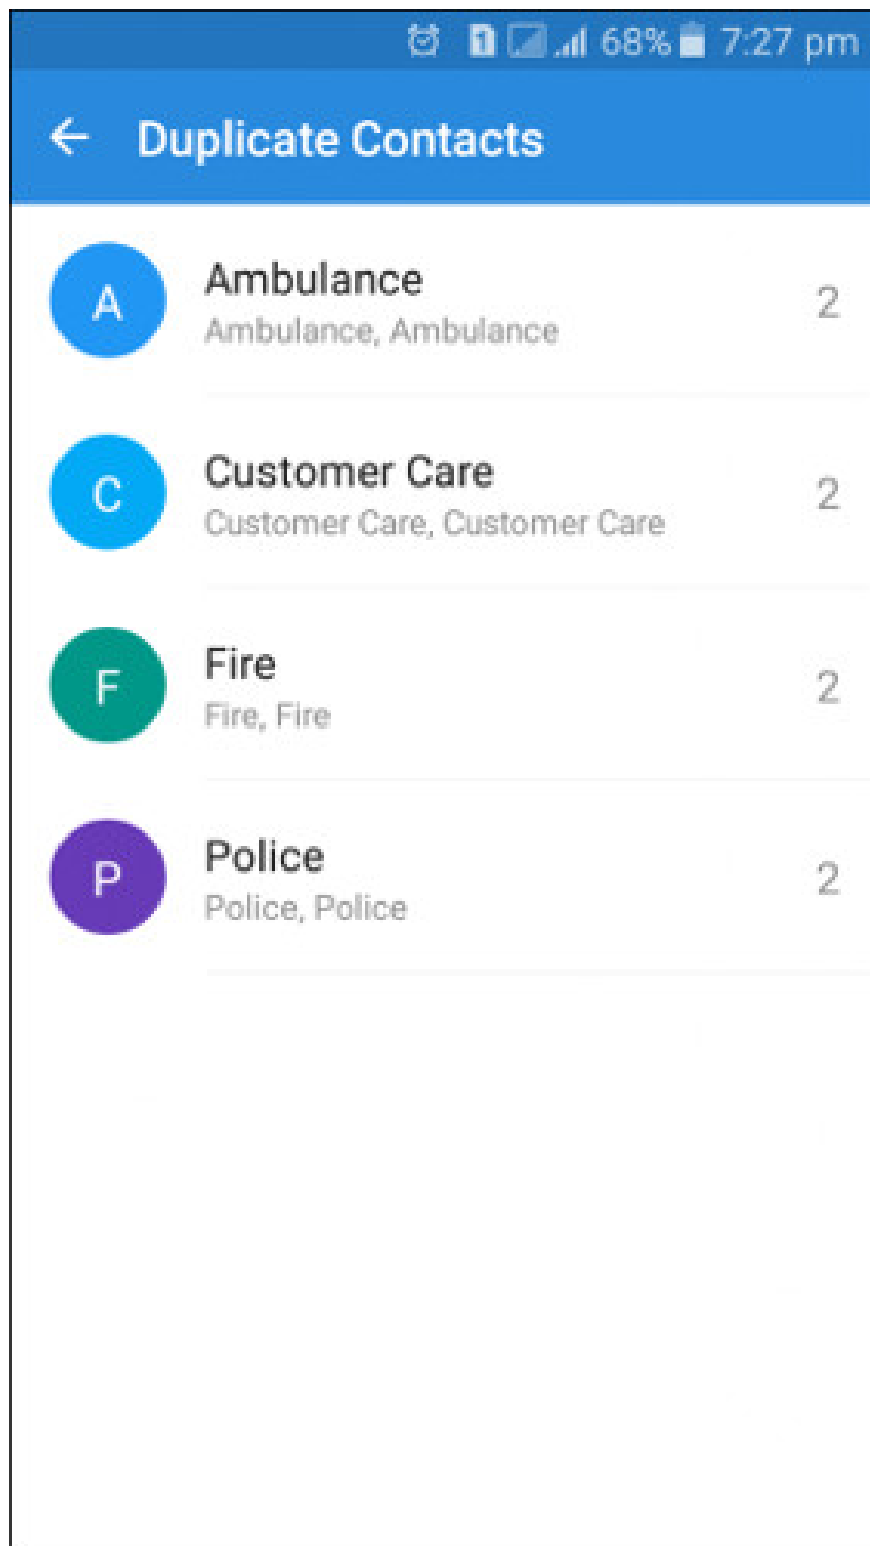

Step 1. First, you need to download and install the Simpler Merge Duplicates application.

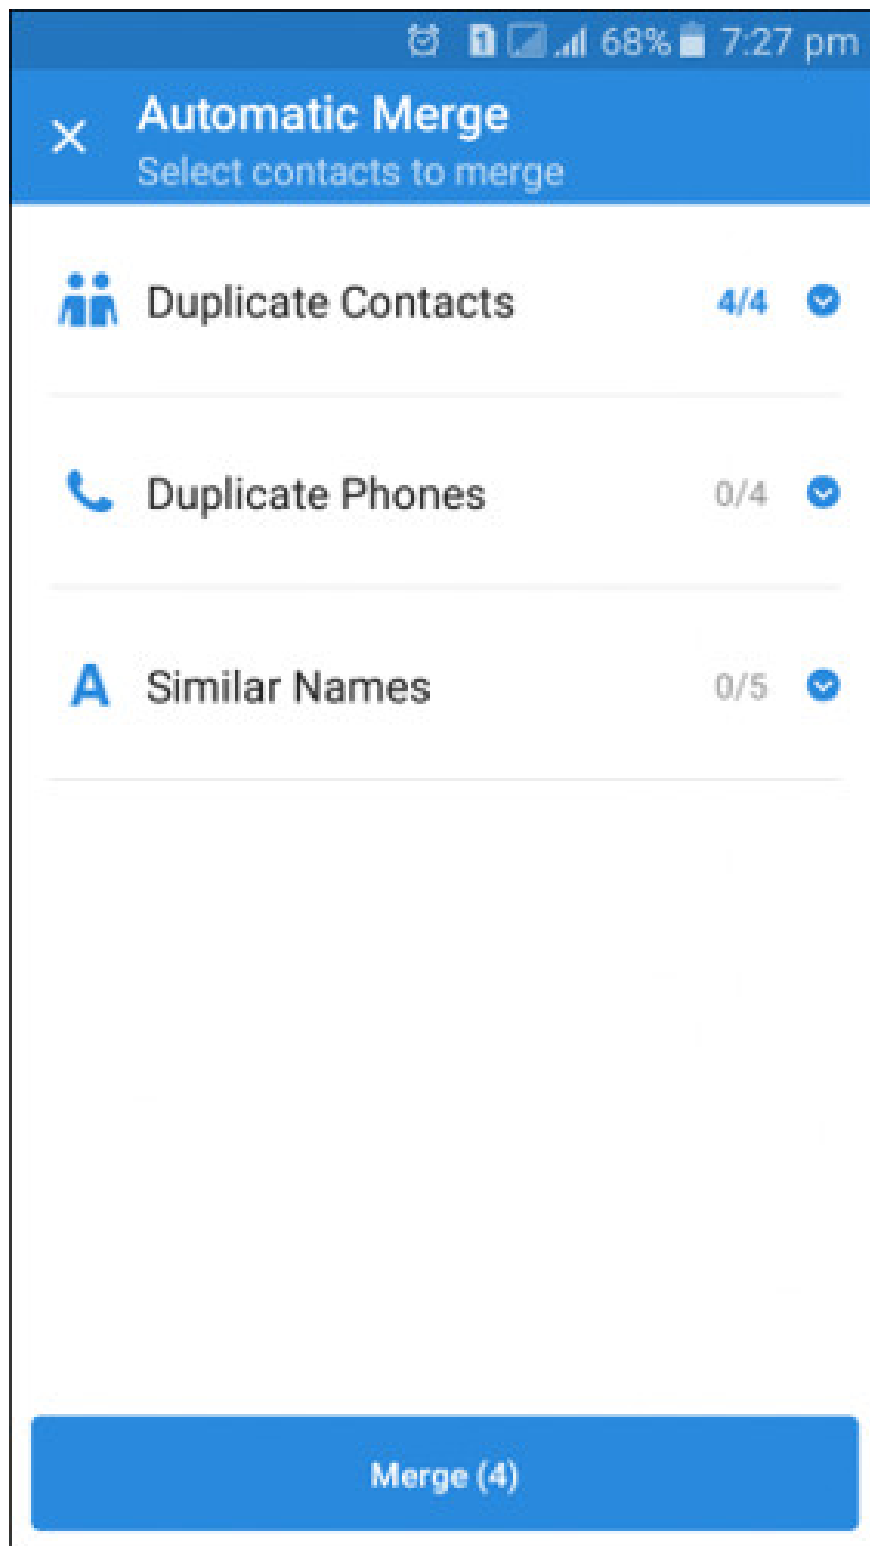

Step 2. After downloading, run the application on your Android device and the application will start scanning your entire contacts on the phone.

Step 3. After the scan is complete, the application will list the duplicate contacts.

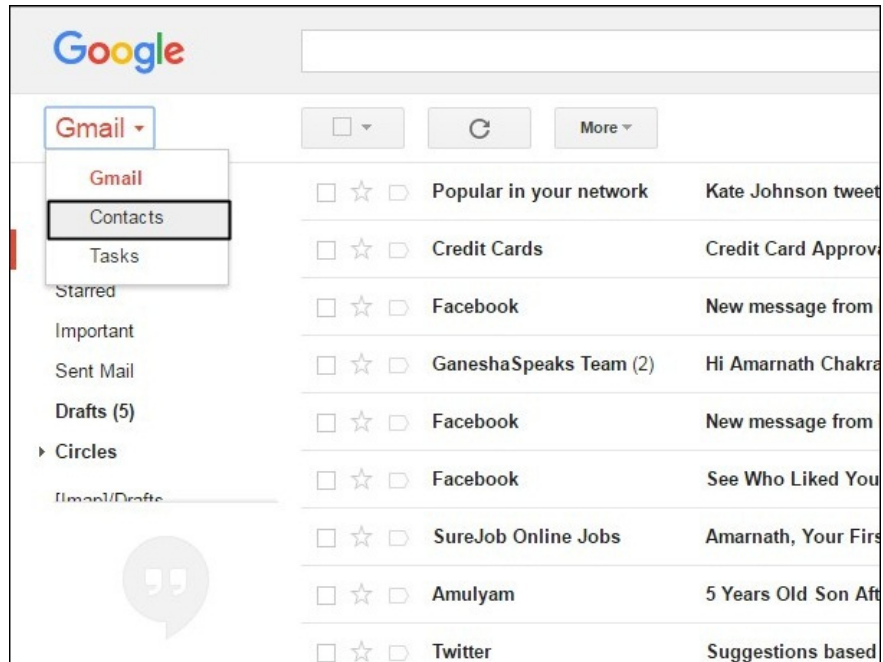

Step 4. Just click on the merge option, all contacts with the same name, description will be deleted from your device and leave only one contact.

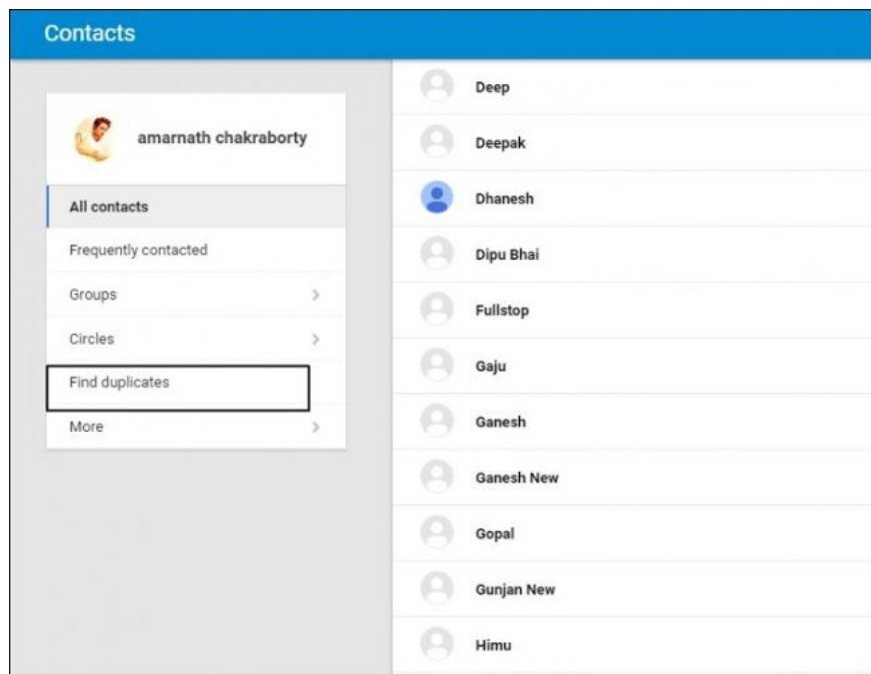

So you've finished deleting duplicate contacts with this great app.

Use Gmail to merge duplicate contacts

If you don't want to install any third-party applications to remove duplicate contacts, use Gmail. This will be a useful option. To use this feature, you need to enable synchronization with Gmail.

Open a Gmail account and from the **Gmail** menu, select '**Contacts**' to display all contacts in your contacts.

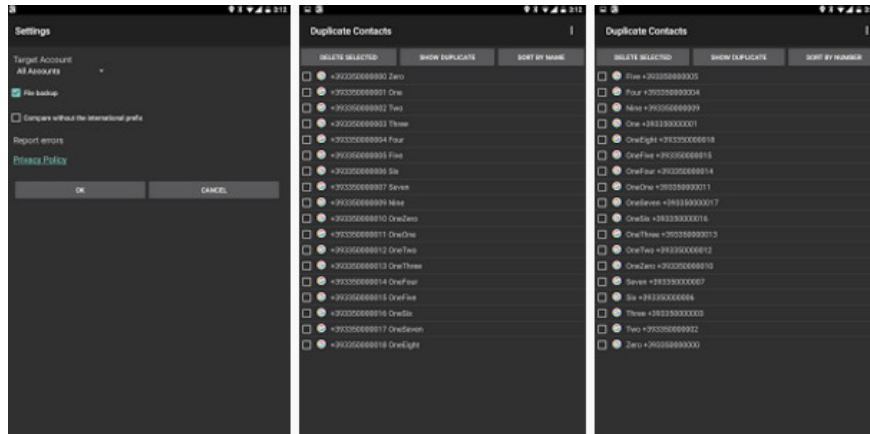

Then click '**Find Duplicates**' to find duplicate contacts. Click on the duplicate contacts to delete or merge it into a single address.

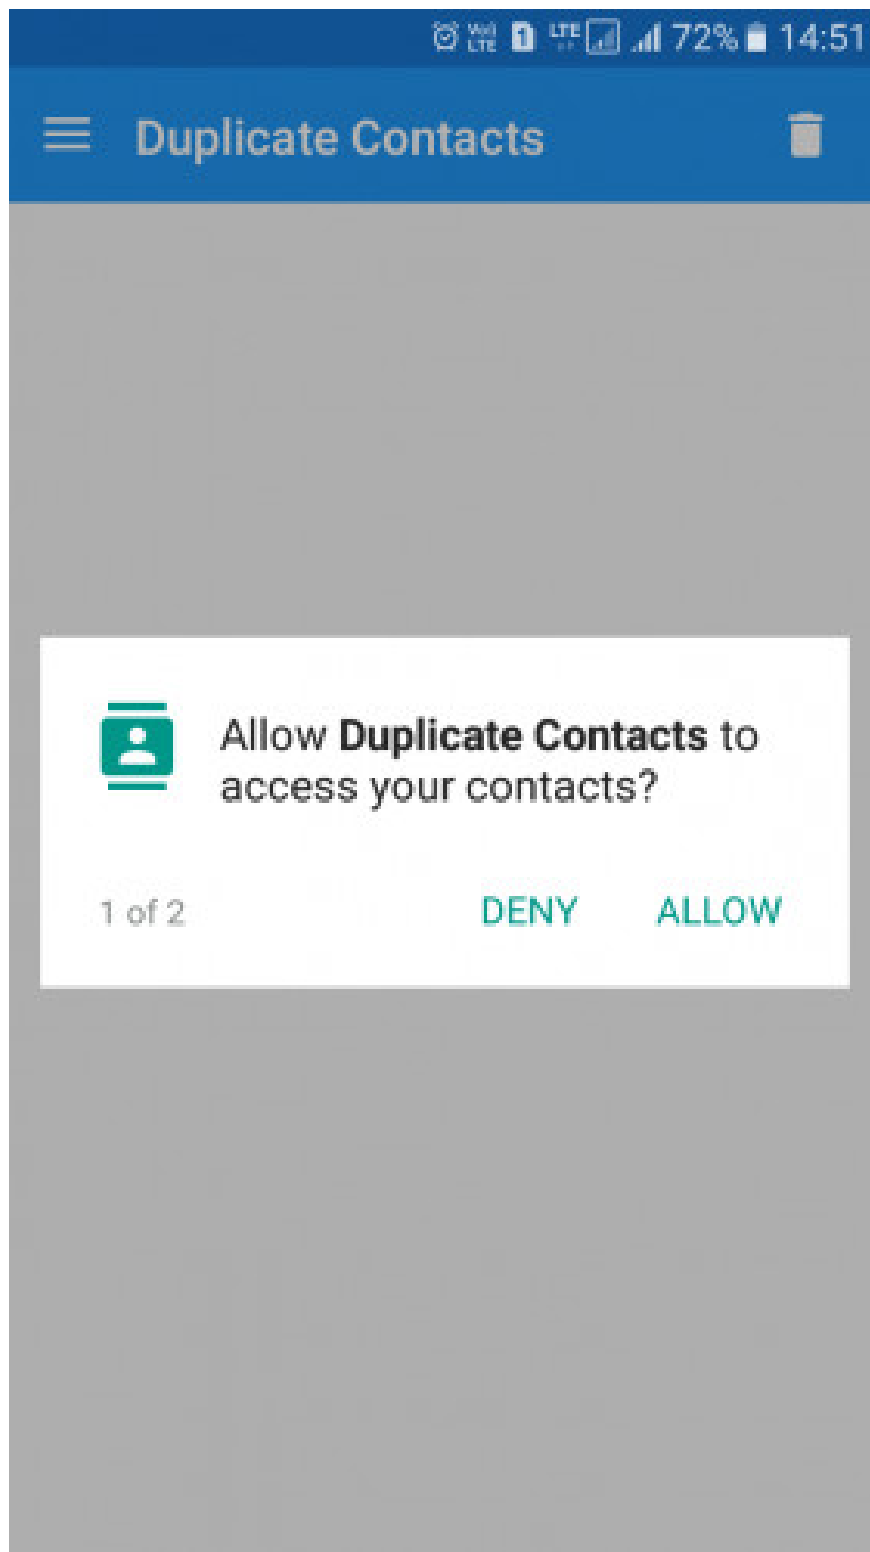

Use the Duplicate Contacts application to find duplicate contacts

This is a simple tool to view and delete duplicate contacts. You can view the list of contacts sorted by name or by phone number and select the addresses to delete. The deleted contacts are stored in vcf file on SD card.

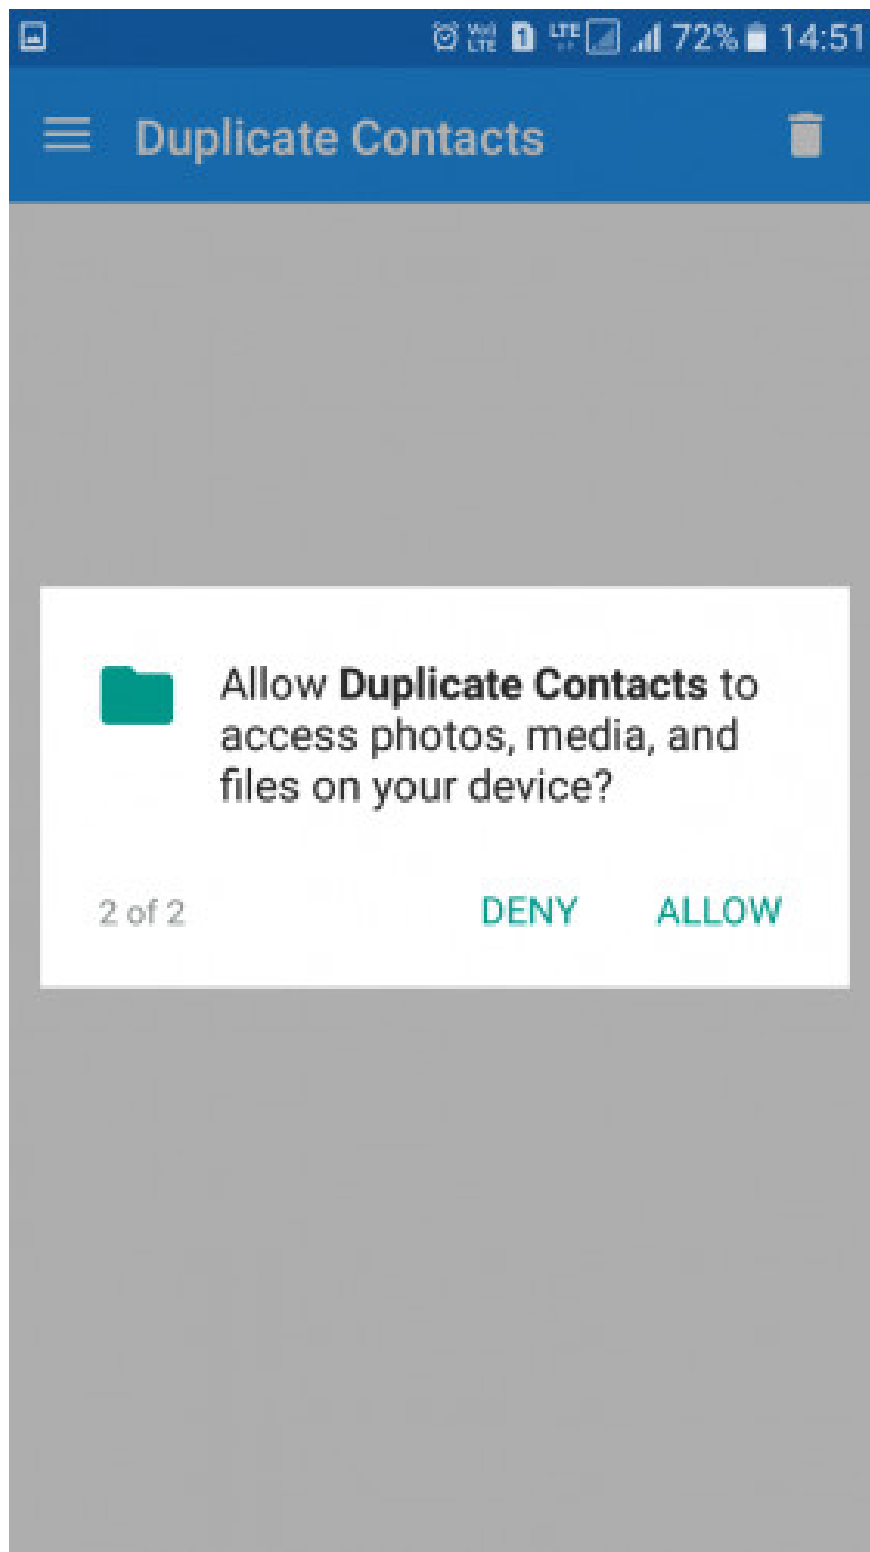

Step 1. First, download and install the Duplicate contacts application on your Android phone and run the application.

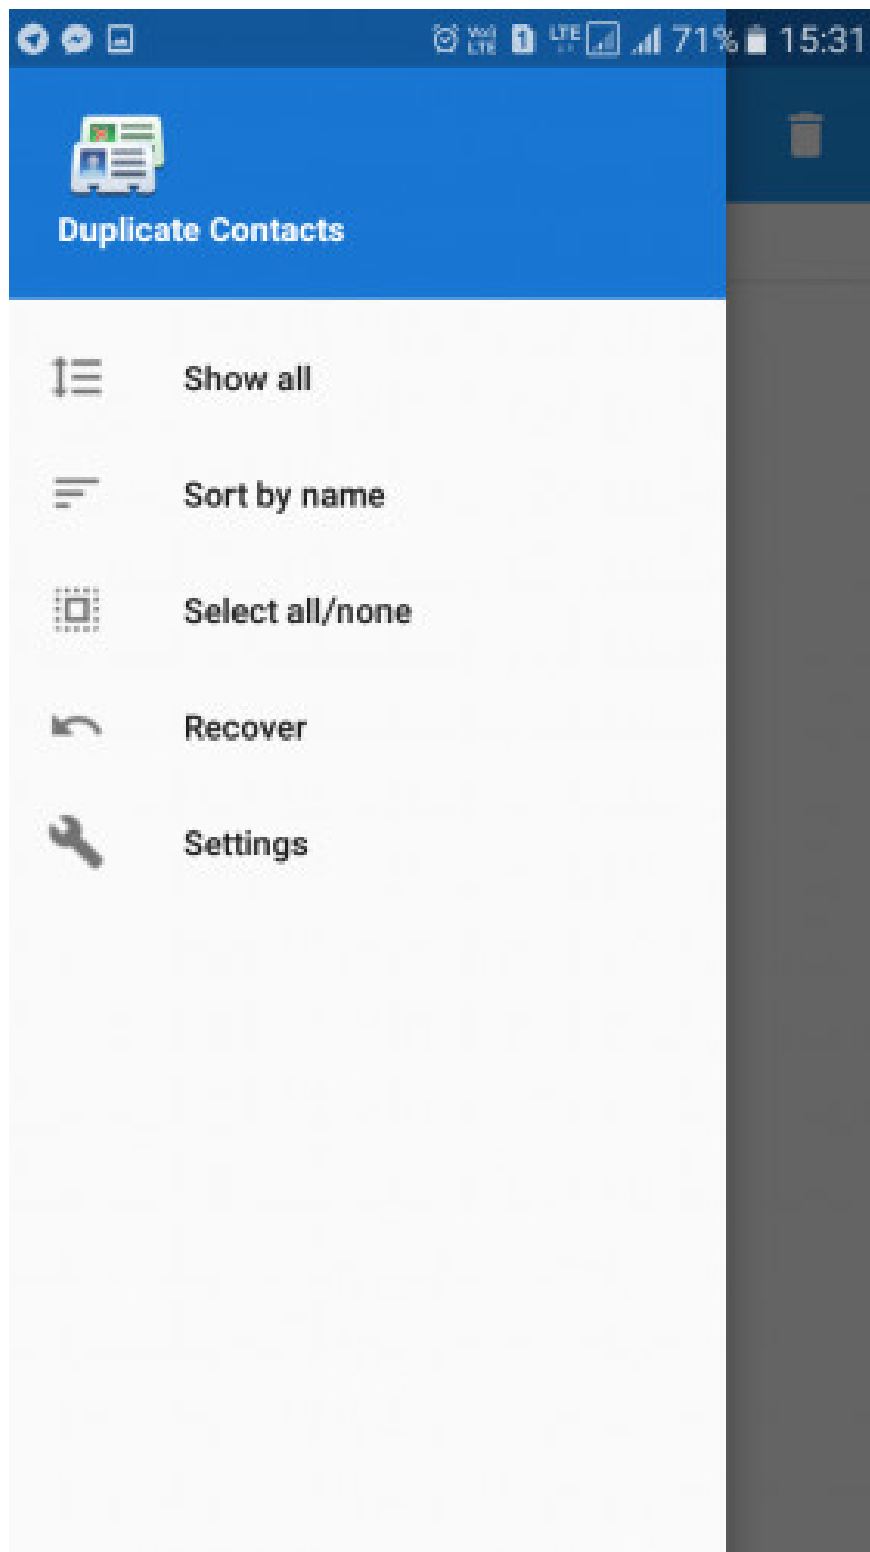

Step 2 . A notification box appears asking you to allow the application to access your contacts, click ' **Allow** ' to continue.

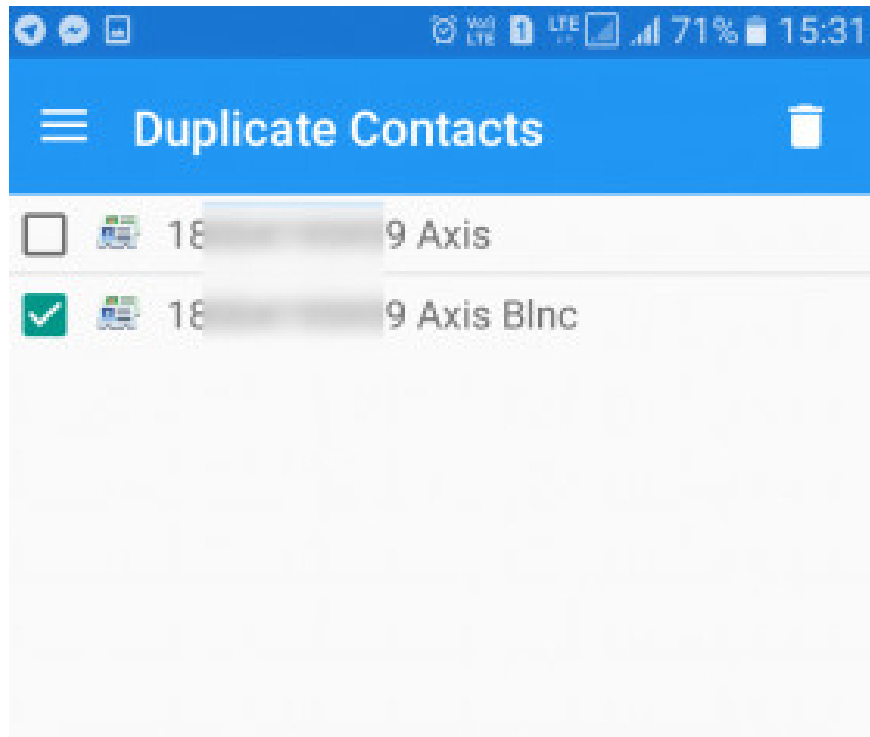

Step 3. Next, another notification box appears, select " **Allow** " to allow the application to access your photos, media and other files on your device.

Step 4. Swipe the application from left to right and select "**Show all**".

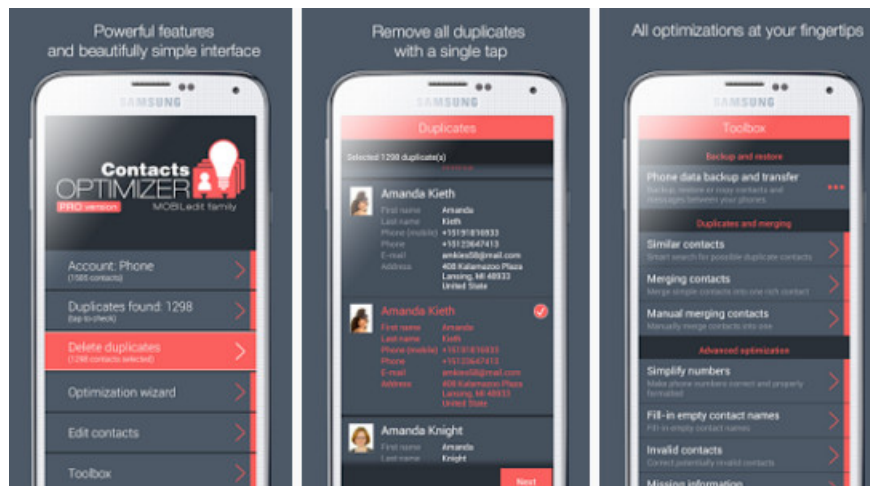

Step 5. The application will display all duplicate contacts. You can delete duplicate addresses directly from the application.
