

Instructions for deleting logos on photos

To delete the logo on the photo, users can use photo editing software or the online logo image erasing service.

When you want to get certain images online but have a website logo, you need to look for photo editing software, or online photo editing tools to delete the logo in the image. Deleting logos in photos is similar to when you delete text in images. We can apply it in many different ways. The following article will show you how to delete logos in photos.

1. Use Photoshop Mix to delete details in the image
2. How to use Photoshop Fix delete excess details in photos
3. Tutorial to create a photo-crumbling image in Photoshop

Ways to delete logos on photos

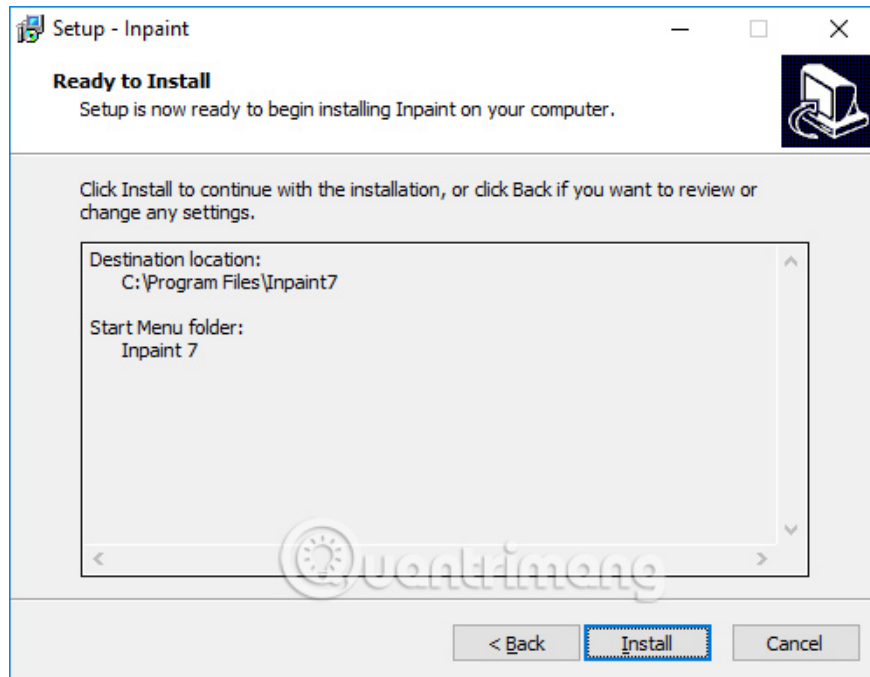

Method 1: Use Inpaint software to delete the logo image

This is a photo editing software, which removes unwanted objects and details from images. Besides, the software also has some features like restoring old photos, improving skin, .

Step 1:

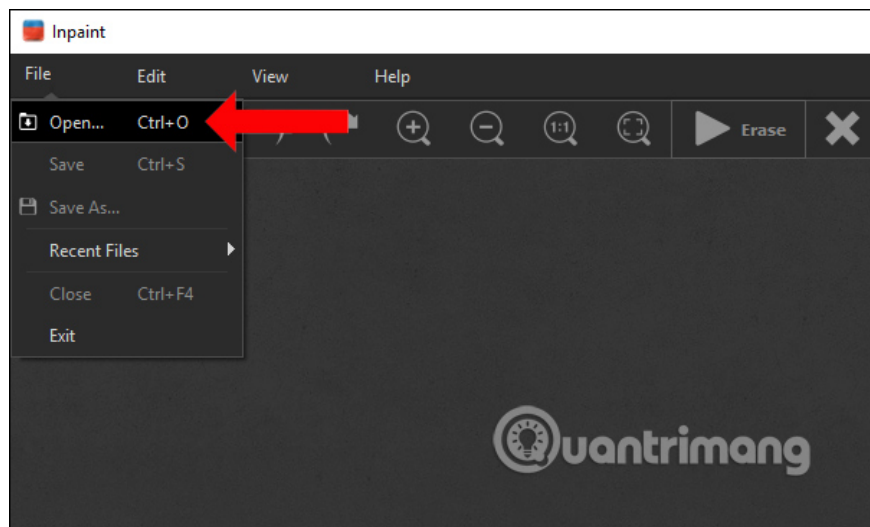

Download the software under the link below and then start Inpaint on your computer.

1. Download Windows Inpaint software

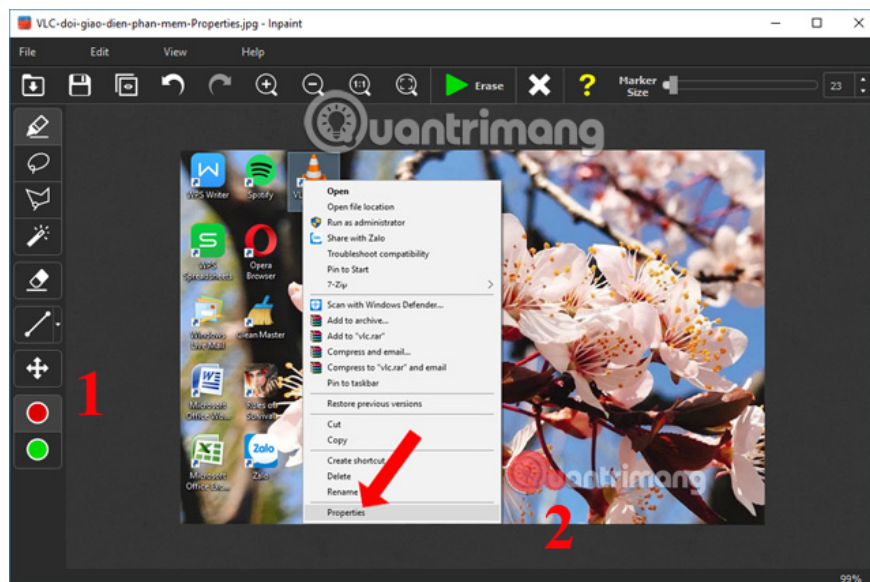

Step 2:

In the interface of the software, click on **File and** select **Open** then open the image to delete the logo. Or you can press Ctrl + O to open the image you want to edit with your computer.

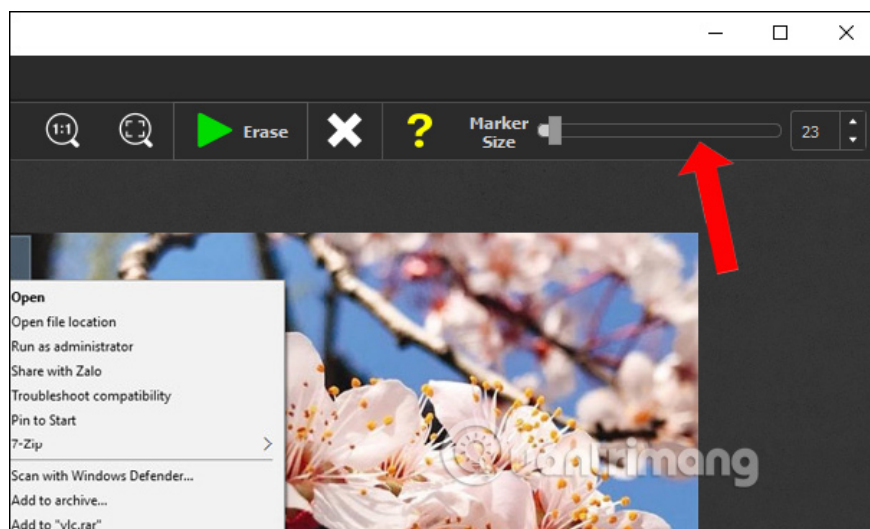

Step 3:

In the image editing interface, click on **the red dot icon** in the menu bar to the left of the interface. Next, deleting the logo you want to delete.

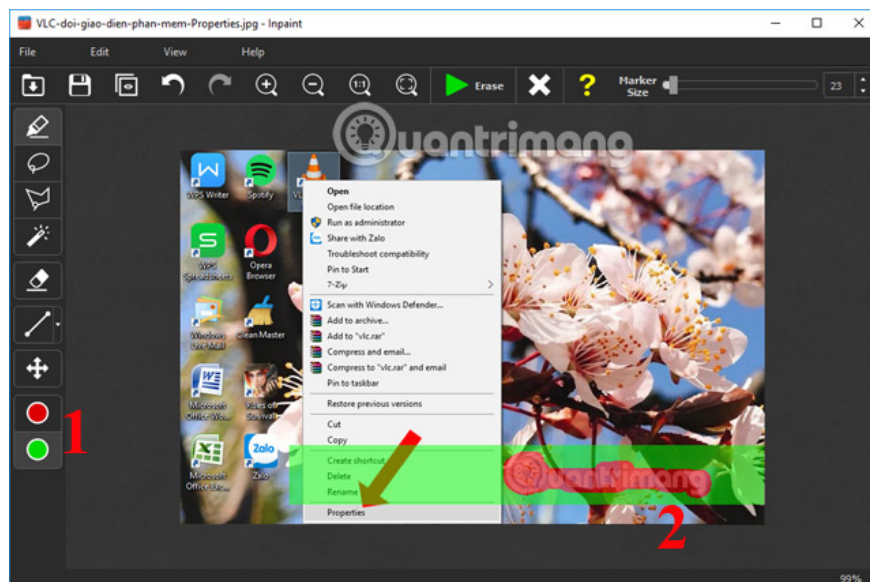

If the logo area needs to be deleted big or small, we can adjust the dot size to match the logo, with the **Maker size** bar above.

Note, you should adjust the red dot to fit the letter or logo you want to delete, the smaller the red dot, the more detailed it will be.

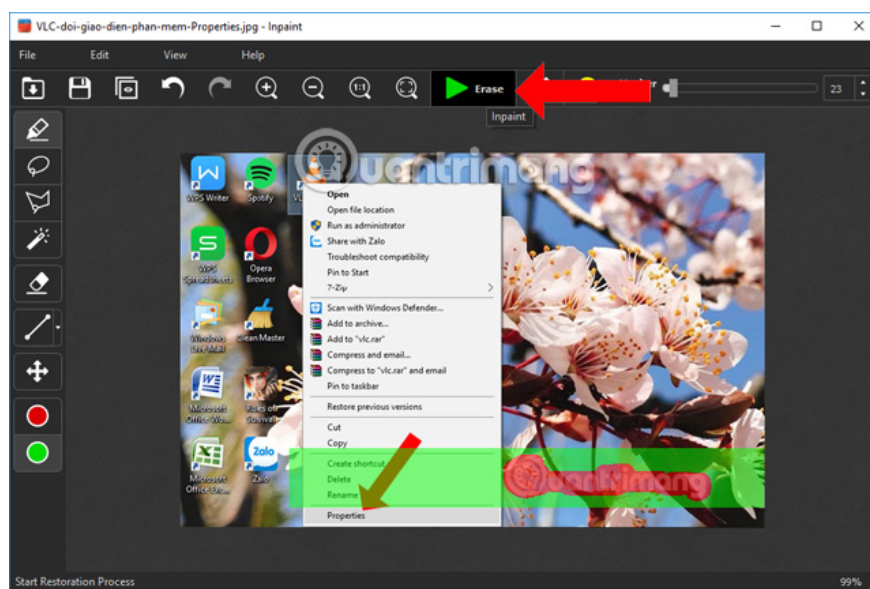

Step 4:

If you want to remove the red circled area, click on **the blue dot** . At that time, a green frame will appear so you can select which area you want to delete the part marked with red.

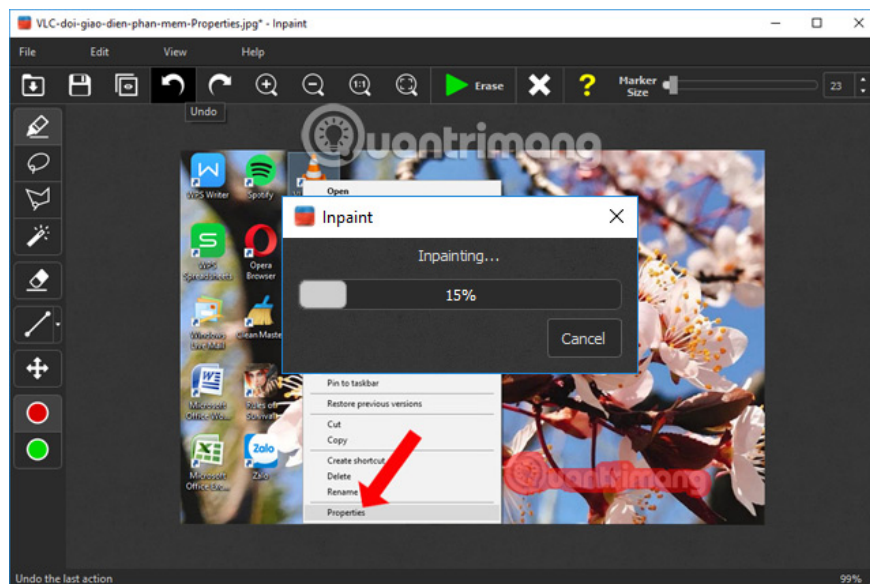

Step 5:

Click the **Erase button** to let the program proceed to delete the logo.

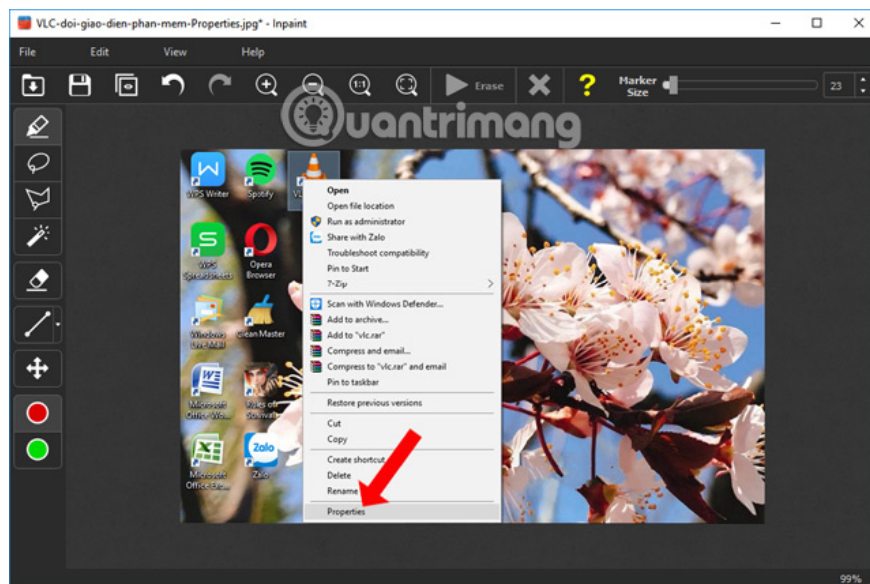

After that, the Inpaint software will perform deleting the logo on the image.

The result after deleting the logo will be as follows. In general, deletion is not too obvious. Besides, users also need a bit of their ingenuity to avoid being smudged. With more detailed images, it is even more amazing.

Currently with the trial version of Inpaint will not be able to download the image after deleting the logo on the image.

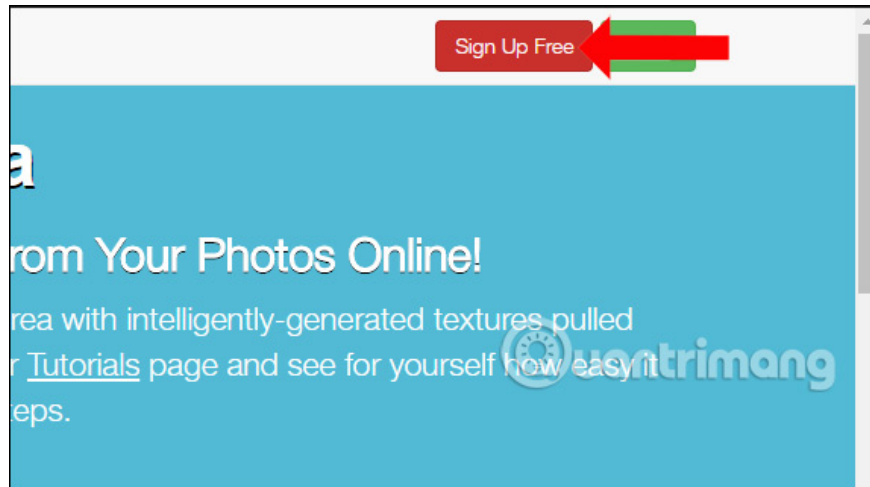

Method 2: Delete the logo on the image online

Here we will use the Webinpaint site for online photo editing.

Step 1:

Click on the link below to access the homepage of Webinpaint, click on the **Sign up Free** button in the top right bar of the interface.

1. <https://www.webinpaint.com/>

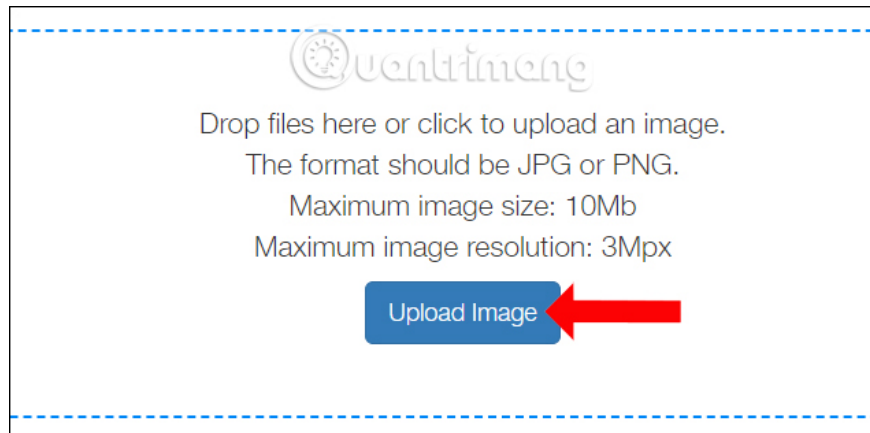

Step 2:

Enter the required information in this interface and then click **Sign up** below to register.

A registration form with three input fields. The first field is labeled "E-mail" and contains the text "quantrimang.com". The second field is labeled "Password" and contains seven dots. Below this field is the text "The password must be at least 6 characters." The third field is labeled "Confirm Password" and contains seven dots. Below the fields is a checkbox labeled "Subscribe to our newsletter" which is checked. At the bottom left, there is a green button labeled "Sign Up" with a red arrow pointing to it from the right. A watermark logo for "Quantrimang" is visible in the background.

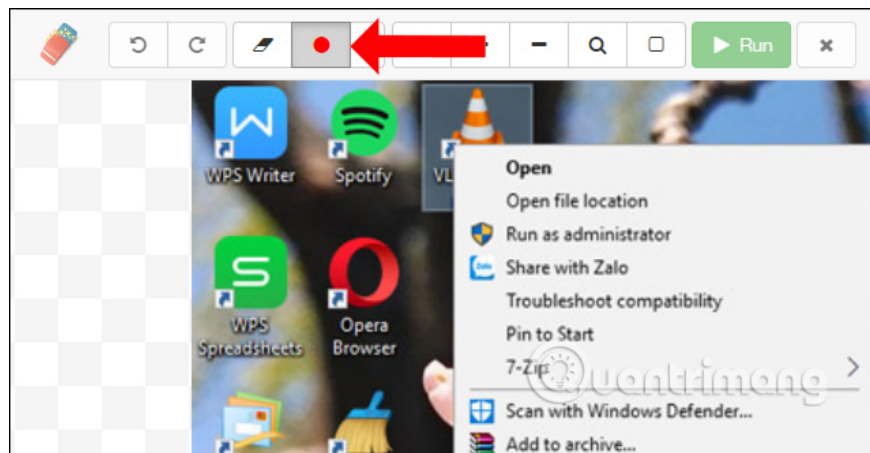

Step 3:

Then click the **Upload Image button** to download the image you want to delete the logo in your computer. Photos with a maximum capacity of 3 MB and a maximum resolution of 3Mpx, can download JPG or PNG images.

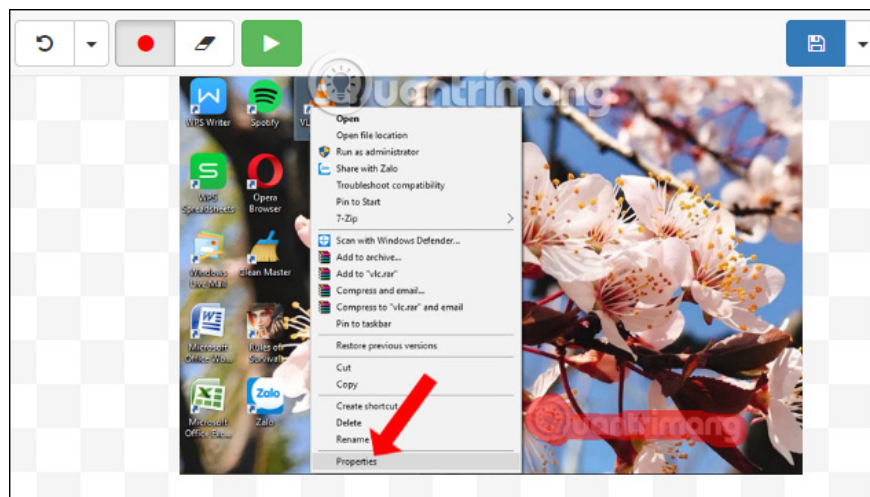

Step 4:

Next click on **the red dot icon to circle** the logo you want to delete. You can also adjust the size of the dot with a - or + sign.

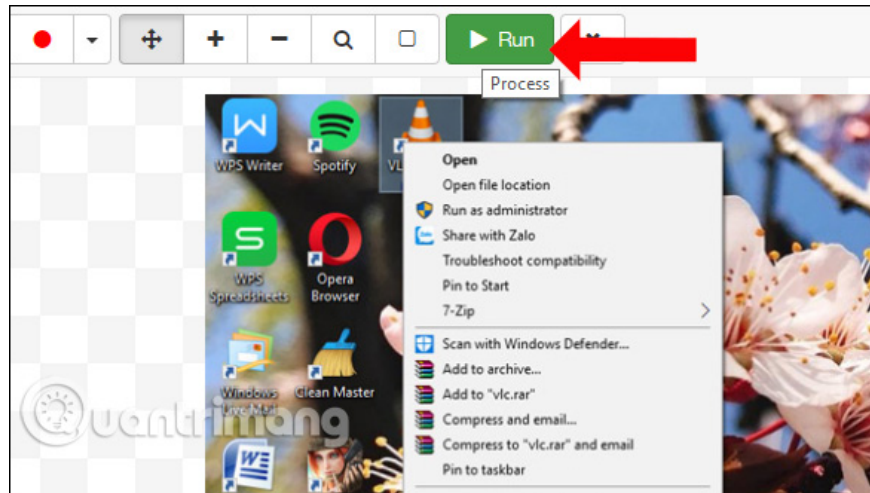

In case the red zone has been circled but you want to re-adjust the area or delete the entire red circle, click the eraser icon.

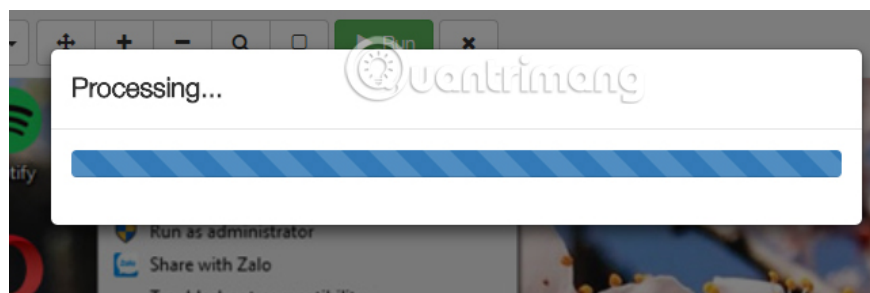

Step 5:

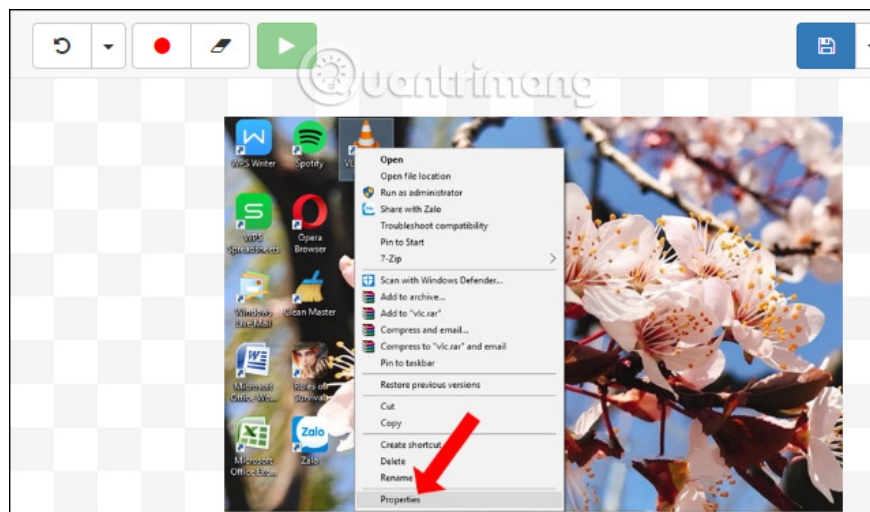

Click on the **Run** button above to proceed with deleting the logo on the image.

The process of deleting the logo on Webinpaint will then take place.

The complete image after deleting the logo will be as follows. Since this is a free version, we cannot download images to a computer.
