

# How to remove Charms in Minecraft

How to remove Charms in Minecraft using Grindstone: crafting recipe, uses, limitations and useful tips.

In Minecraft , Charms make weapons, armor, and tools stronger. But not all Charms are useful. If you accidentally load the wrong charm or want to refresh your equipment, you can completely delete the Charm to reuse the item.

The simplest and most canonical way in the game to remove spells is to use a Grindstone — fully supported on both Java and Bedrock.

## How to Remove Charms in Minecraft

### Benefits of Removing Spells with Grindstone

1. Removes all common spells
2. Get more experience points (XP)
3. Combine the durability of multiple items into a new, more durable item
4. No fuel, time or XP cost

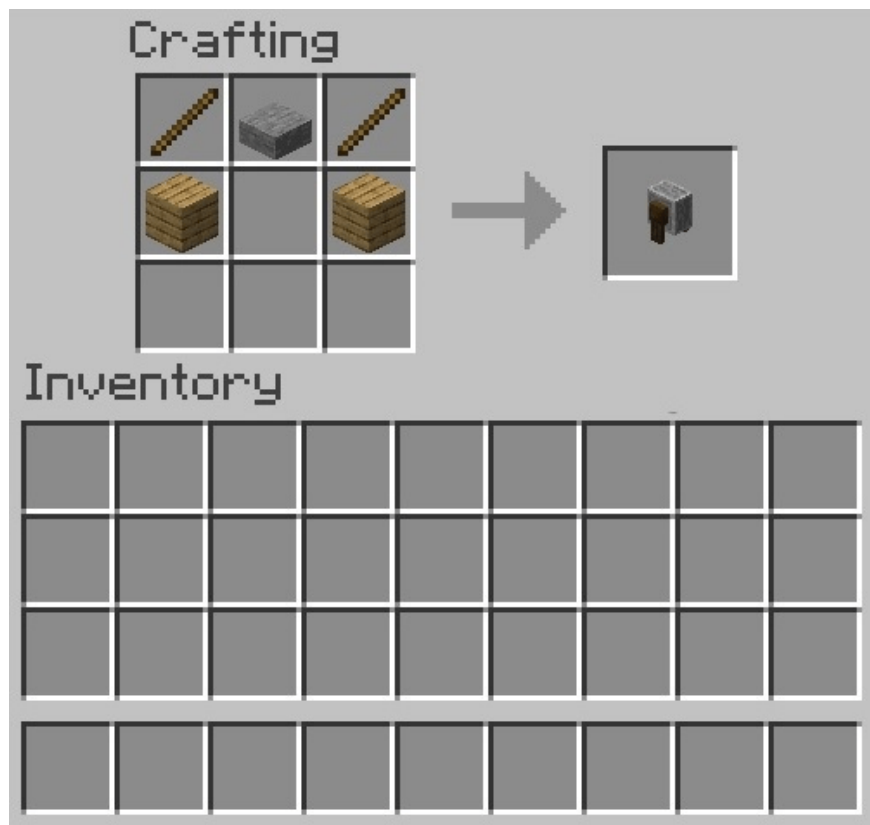

### Important Note

The Grindstone cannot be erased:

1. Curse of Binding
2. Curse of Vanishing

? Only mods can remove these two curses.

## How to own a Grindstone

**You can:**

**A. Pick up from the Village**

1. Appears at the Weaponsmith's house

2. Get bonus XP if **Charm** is removed

## Combinations in Grinding Stone

| Method | Input                                 | Result  | XP received |
|--------|---------------------------------------|---|-------------|
| A      | 2 items with <b>Charms</b>            | 1 item <b>without Charm</b> , combined durability | Have        |
| B      | 1 <b>Charmed</b> item + 1 normal item | 1 item <b>without Charm</b> , combined durability | Have        |
| C      | 2 normal dishes                       | 1 normal item plus durability                     | Are not     |

Prioritize using A or B to get the most productive XP.
