

How to Disable Chatbot AI Firefox

Firefox has introduced AI chatbot support directly into the browser. If you are annoyed by the Firefox AI Chatbot, follow this article to disable it.

Since version 133.0, Firefox has introduced AI chatbot support directly into the browser. When you select text on a web page, a small AI icon will appear, providing various chatbot support tools. However, not everyone wants to use this AI Chatbot on the Firefox browser. If you are feeling annoyed by the Firefox AI Chatbot, follow this article to disable it.

How to disable AI Chatbot hover menu

If the floating AI icon that appears when you highlight text is distracting, highlight the content and tap **the chatbot icon** . You should now tap **Hide chatbot shortcut** .

Các router sau đây đang bị nhắm mục tiêu:

- Cisco M10
 -  o Linksys E1500
 - Cisco Linksys E1550
- Tóm tắt ON

Giải thích điều này

Hỏi đố tôi

Hỏi ChatGPT: 

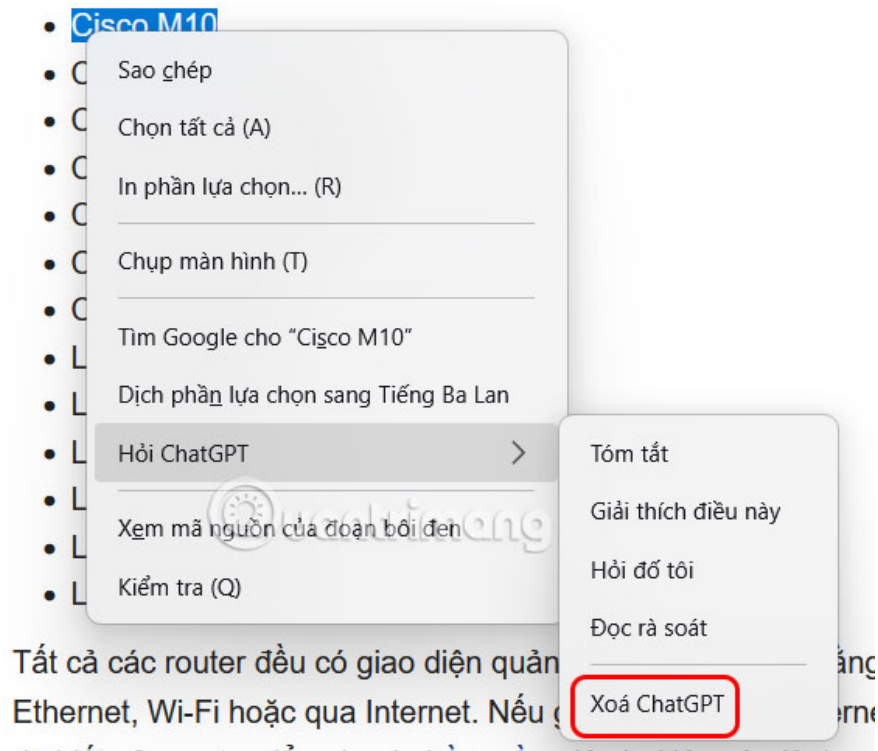

Ẩn lỗi tắt chatbot

Tất cả các router đều có giao diện quản lý có thể truy cập qua Ethernet, Wi-Fi hoặc qua Internet. Nếu giao diện bị nhắm mục tiêu đã biết của router để **upload nhân mềm độc hại** lên

This will remove the icon from the screen every time you select text in the future.

How to remove chatbot right click menu

If you don't want to see the Ask ChatGPT option in the right-click menu, we also need to highlight the content and right-click. Then you select Delete ChatGPT at the bottom of the list.

And the next time you select text, the chatbot will not appear in the context menu.

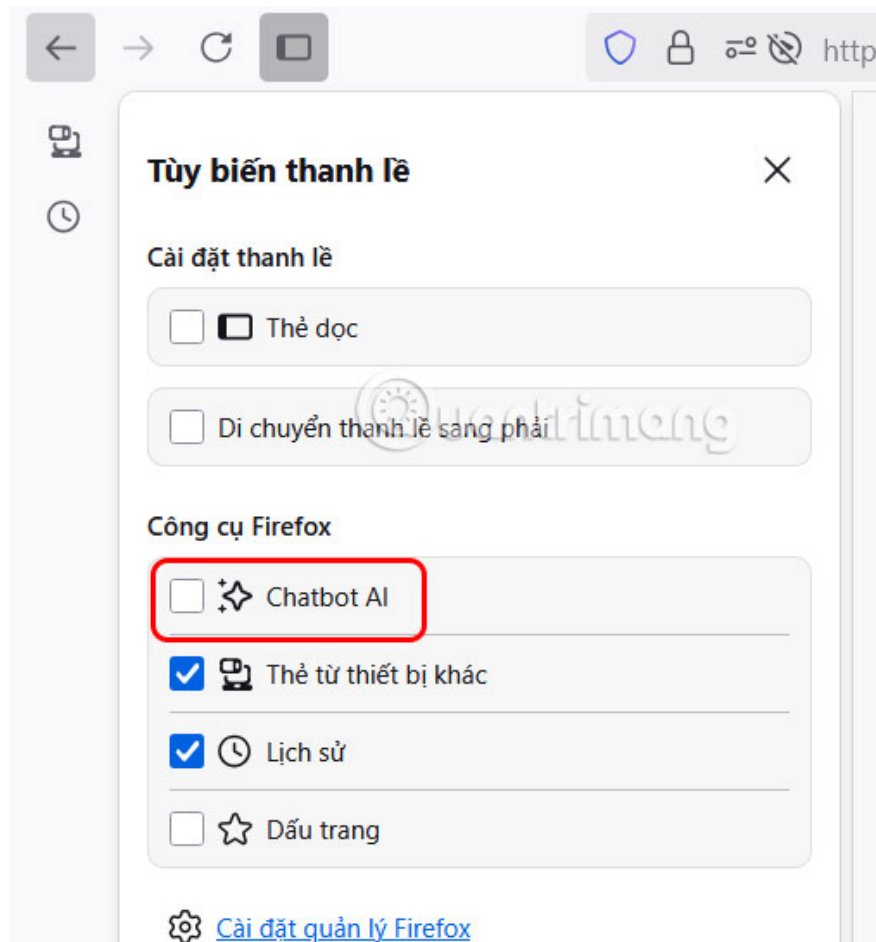

How to Disable Firefox Sidebar Chatbot

The Firefox sidebar displays AI chatbot options for you to click and use quickly.

On the Firefox browser interface, click on **the gear icon** at the bottom of the interface.

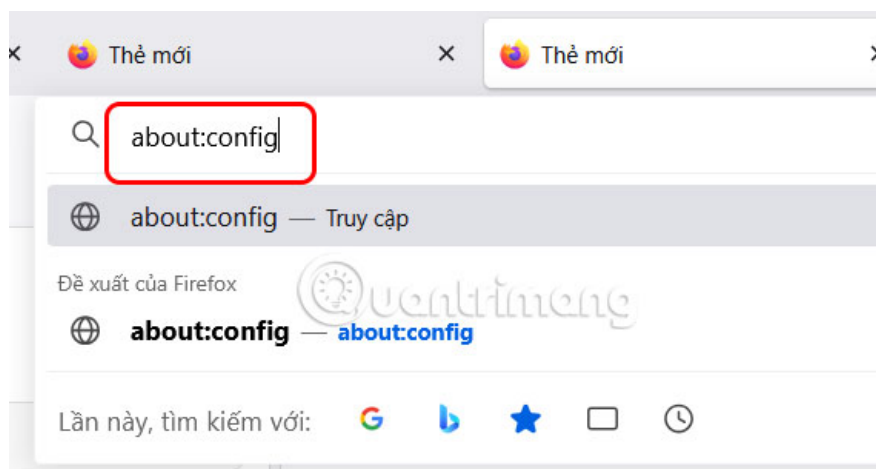

Then just **uncheck Chatbot AI** to turn off the display of the Chatbot AI icon in the sidebar.

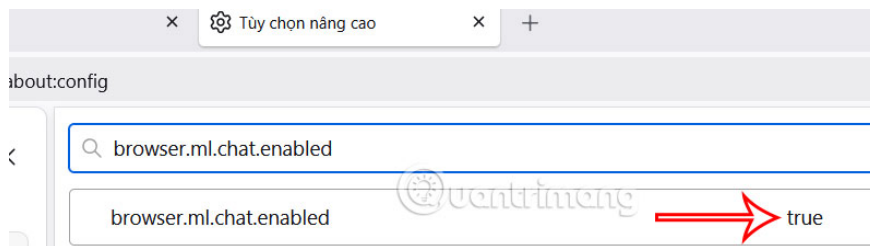

How to completely disable AI chatbot on Firefox

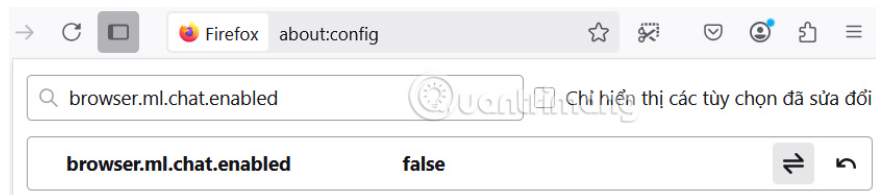

First you **type about:config** in the Firefox browser address bar.

Next you **type browser.ml.chat.enabled** in the search bar and see the default value to true.

Now you need to **switch this setting to false** and restart the browser.
