

Instructions for downloading files on Motrix - Supports downloading files on many protocols

Motrix is a file download tool that supports many protocols and downloads torrent files quickly.

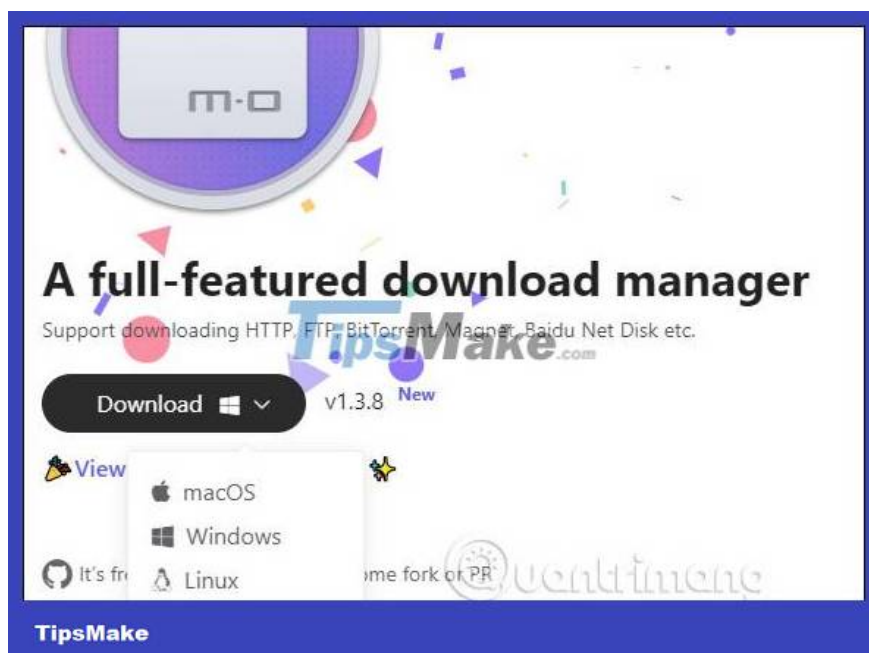

The Internet Download Manger (IDM) file download tool is familiar to users, but there are also many other file download software such as Motrix. This is open source file download software, supporting file downloading on many protocols including Torrent. The Motrix user interface is very simple, users just need to copy the link to download and the file download process proceeds immediately afterwards. So we do not need to install uTorrent or a separate file download program, Motrix will download many different types of files. How to use Motrix to download files will be in the article below.

Instructions for downloading files on Motrix

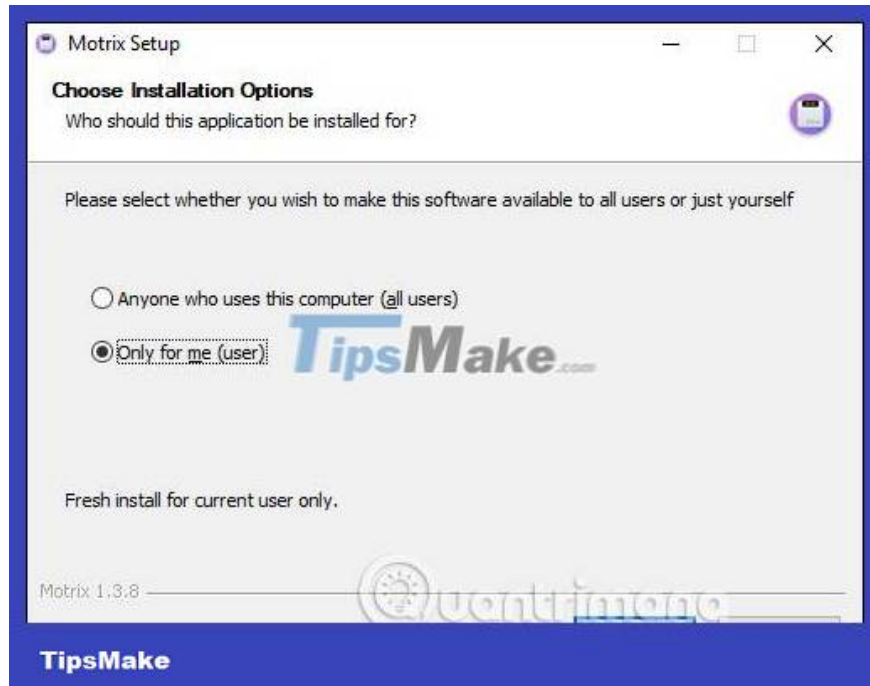

Step 1:

Users access the Motrix homepage link below. Motrix **provides 3 software versions** for 3 different computer operating systems for users to choose from.

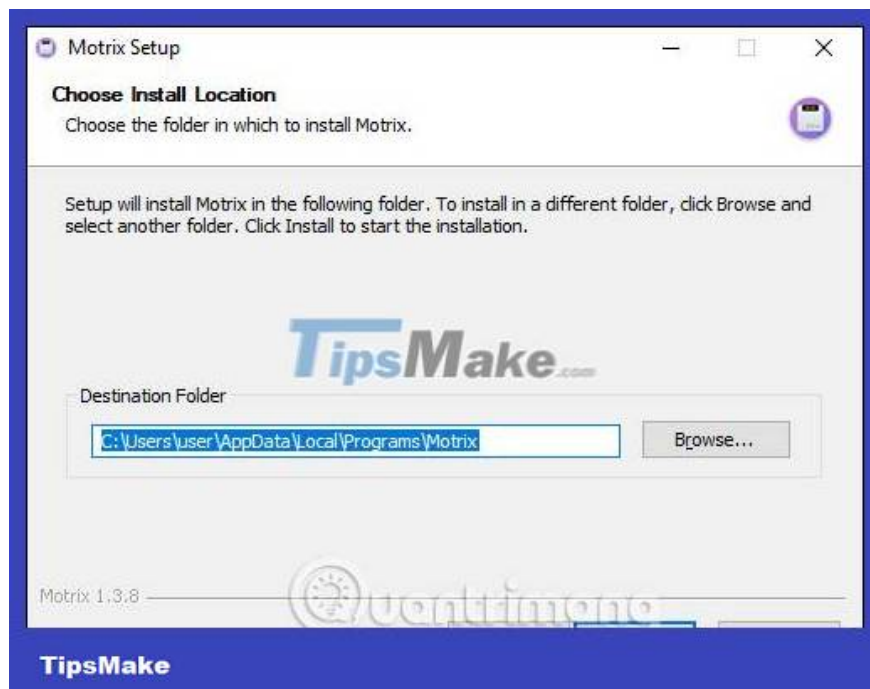

<https://motrix.app/>

After downloading, proceed with the installation, select the account to use for installation.

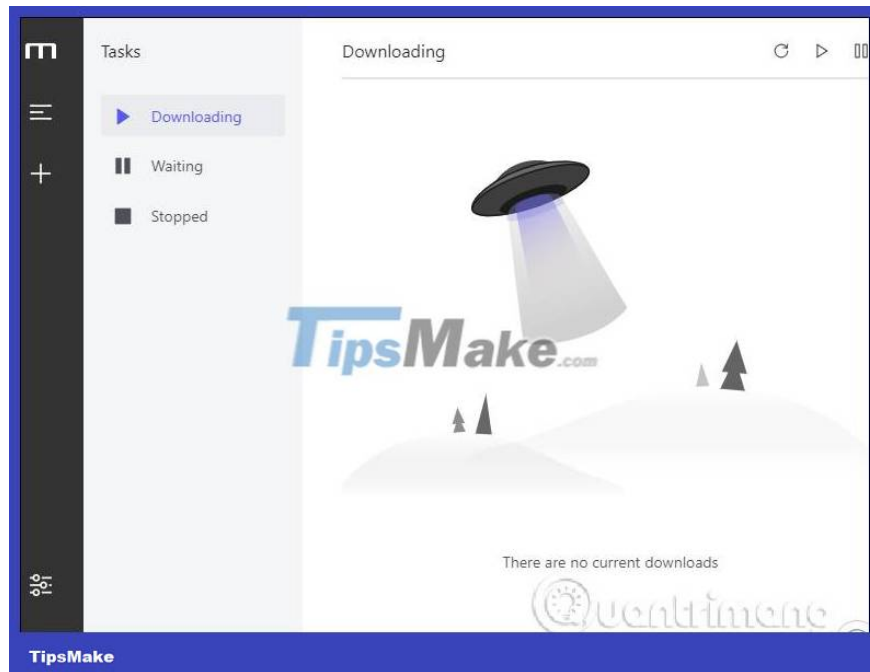

Finally **click Install** to install the software.

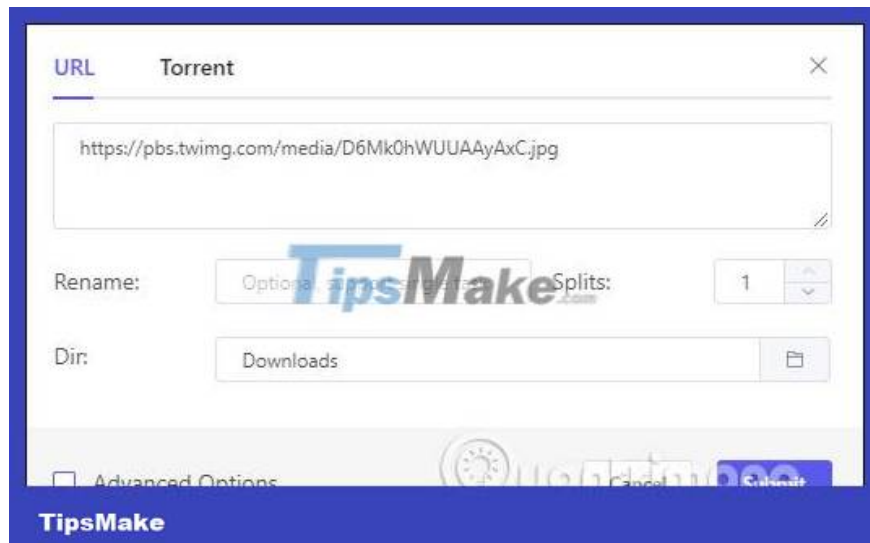

Step 2:

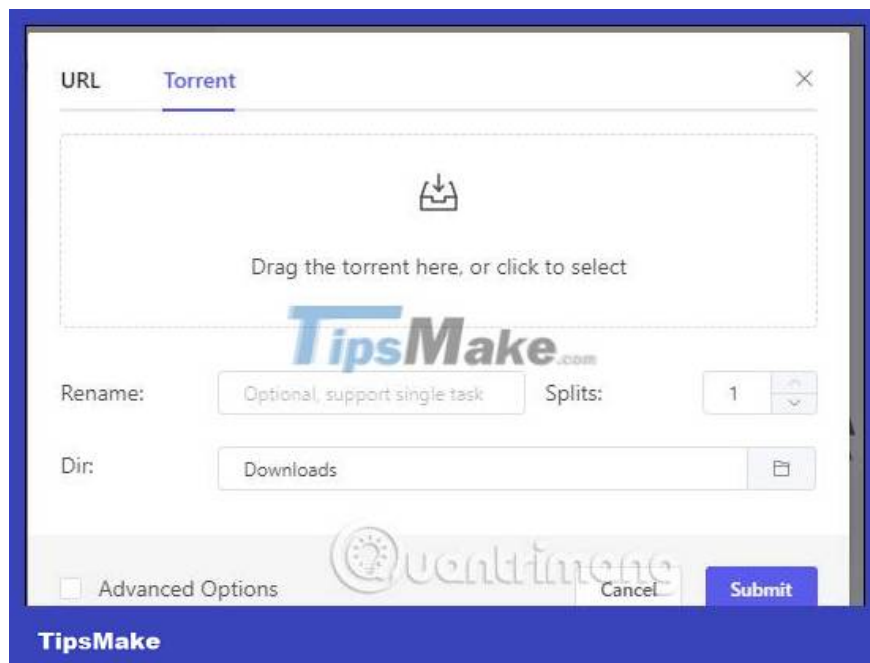

This is the main interface of Motrix software. Click **the plus icon** in the toolbar on the left side of the screen.

Displays the file download selection interface with URL and Torrent. To **download files in URL format** , paste the file link to download under any protocol http, ftp, magnet,.

To **download torrent files** , we can drag and drop torrent files into the Motrix interface.

Step 3:

Select **Advanced options** to expand the file download interface. We enter a different name for the file with the file extension at **Rename** if desired, number of streams to speed up download at **Splits**, location to save the **Dir** file and some advanced options below such as cookies, etc. Finally click **Submit** to **download** . file.

Step 4:

The download process takes place immediately afterward and displays the download process in **the Download section** . When the download is complete, the user receives a notification as shown below.

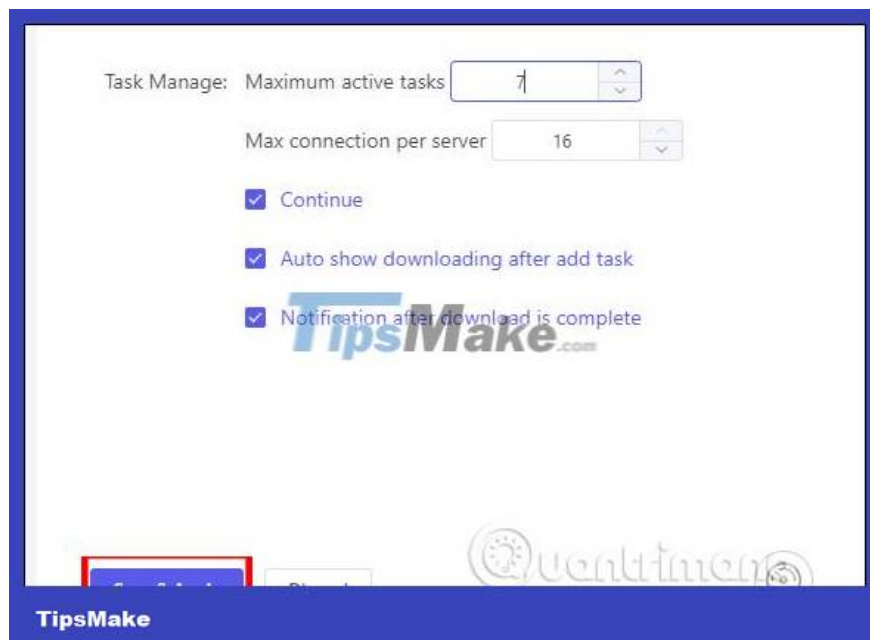

Step 5:

Motrix by default allows users to download up to 3 files at the same time, but if you want you can increase it to 10 files. In the interface click on **the Preferences icon** in the bottom left corner of the screen.

Display the new interface, in the **Maximum active tasks** section click on the maximum number of files you want to download. Click Save & Apply to save the changes.

In addition, when right-clicking on **the Motrix icon in the system tray**, we also have options to quickly download files.

Motrix is completely free to use, without limitations, without advertising, creating a strong point of the software compared to other tools. The file download process is divided into separate Download sections for users to easily observe.

Wishing you success!
