

Instructions for downloading files on Motrix

Motrix is a file downloading tool that supports many protocols and download torrent files quickly.

Internet Download Manger (IDM) download tool is familiar to users, but there are many other file download software such as Motrix. This is open source file download software, which supports downloading files on many protocols including Torrent. The Motrix user interface is very simple, users only need to copy the link to download and the file download process proceeds immediately afterwards. So we do not need to install uTorrent or a separate file download program, but Motrix will download many different file types. How to use Motrix to download files will be in the article below.

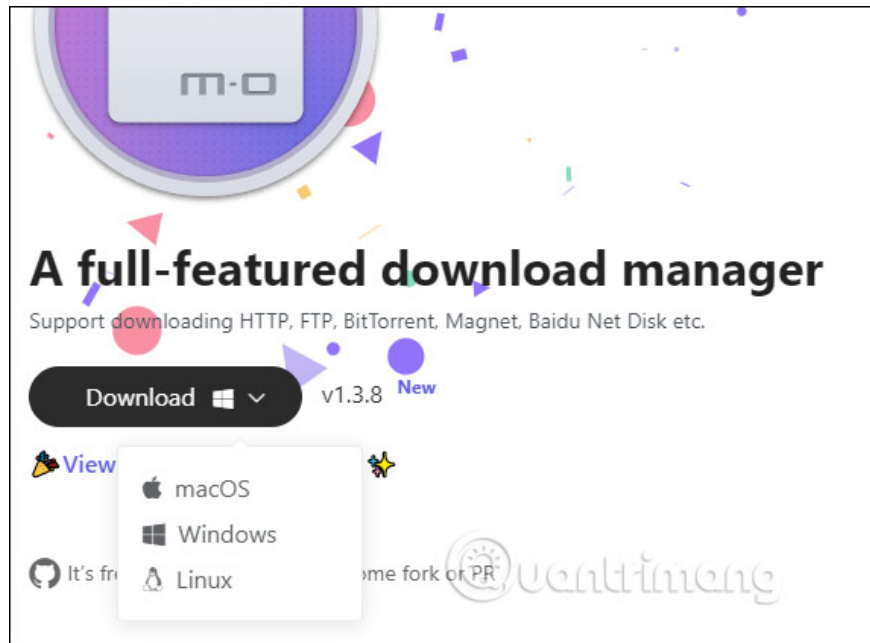

1. The best free download support software
2. 11 websites to download free security software
3. How to use uTorrent Web to download torrents in the browser
4. 9 tools to download the best torrent files

Instructions for downloading files on Motrix

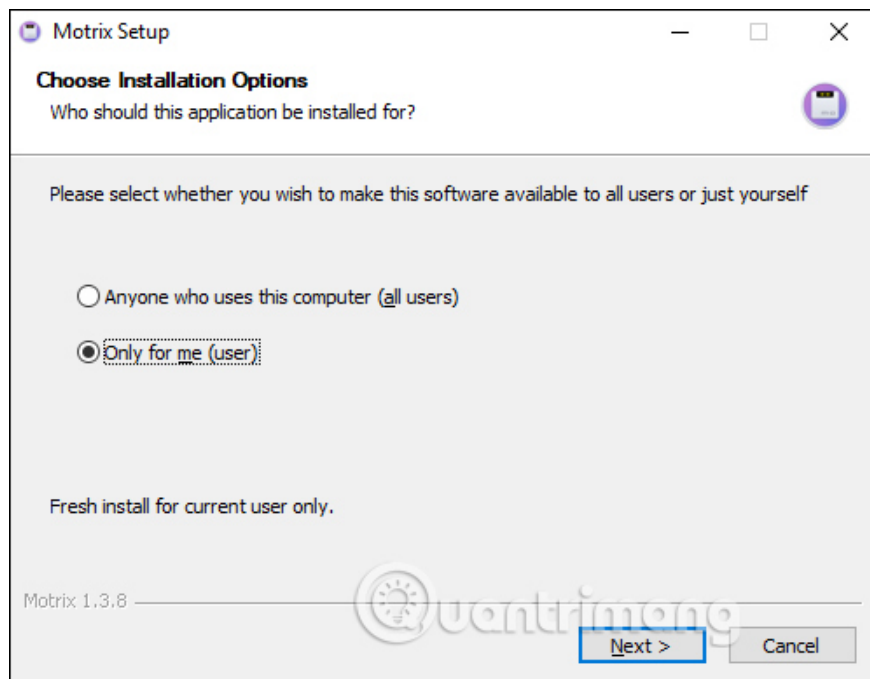

Step 1:

Users access the Motrix homepage link below. Motrix **offers 3 software versions** for 3 different computer operating systems for users to choose.

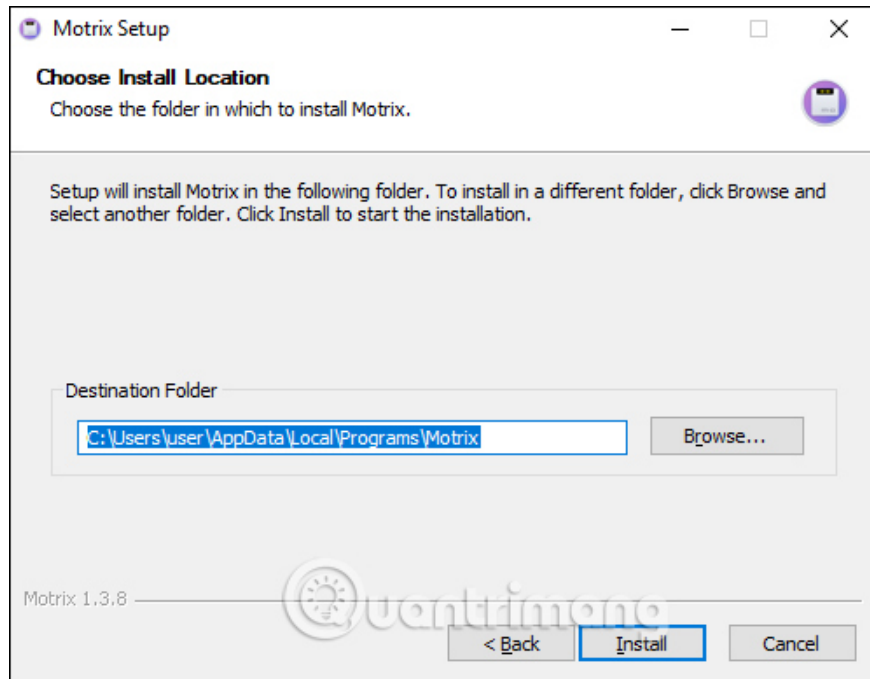

<https://motrix.app/>

After downloading, proceed to install, select the account to use to install.

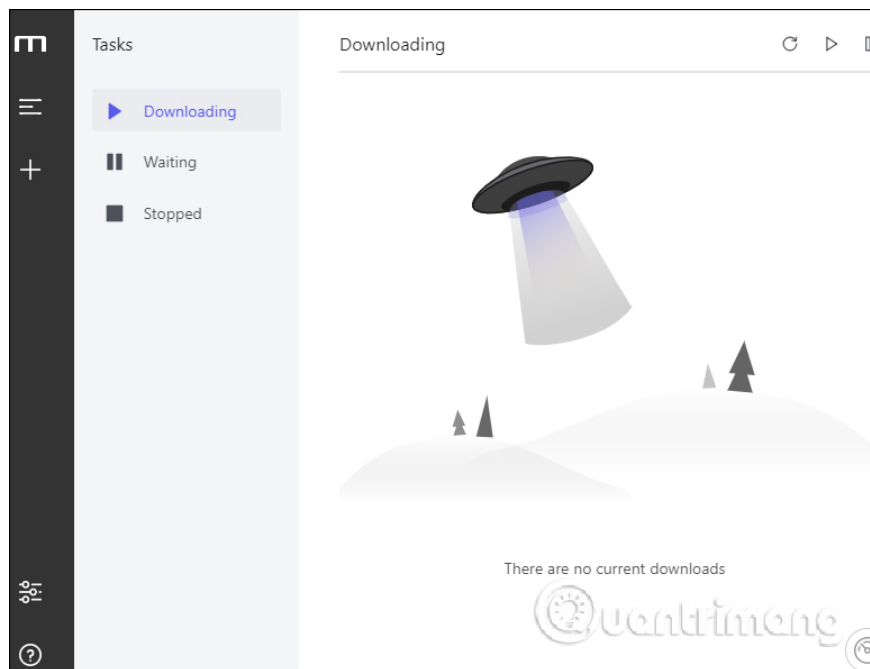

Finally **click Install** to install the software.

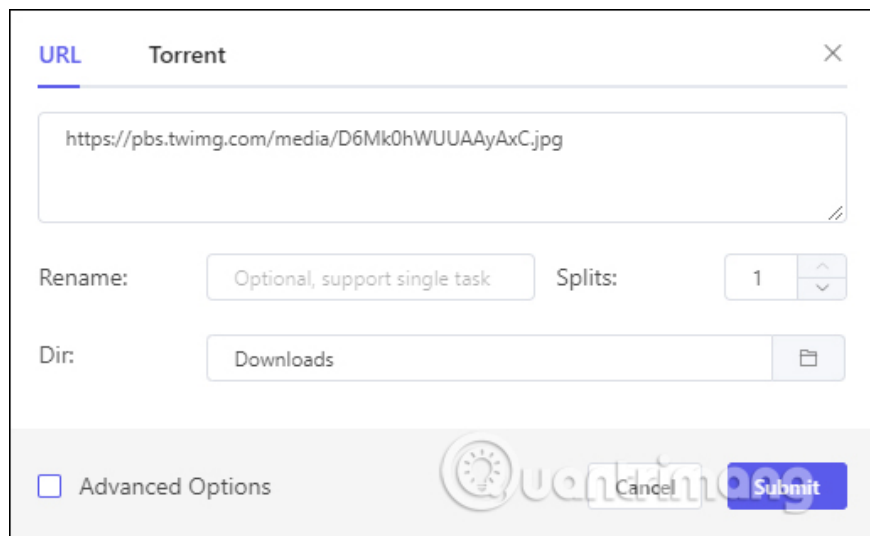

Step 2:

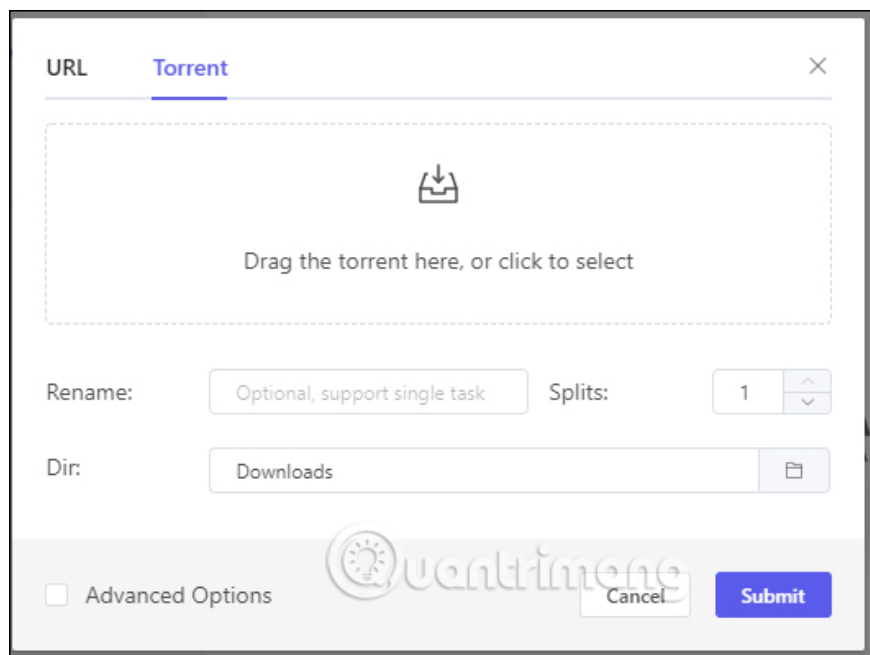

This is the main interface of Motrix software. Click **the plus icon** in the toolbar to the left of the screen.

Display the file selection interface with URL and Torrent. To **download the file in URL format**, paste the file link to download under any http protocol, ftp, magnet, .

To **download** our **torrent files** or drag and drop torrent files into the Motrix interface.

Step 3:

Select **Advanced options** to expand the file download interface. We enter another name for the file with the file extension at Rename if desired, the number of threads to accelerate the download at Splits, the location to save the Dir file and some advanced options below such as cookies, . Finally **click Submit** to download file.

URL **Torrent** ×

`https://pbs.twimg.com/media/D6Mk0hWUUAyAxC.jpg`

Rename: Optional, support single task Splits: 1

Dir: Downloads

User-Agent: User-Agent

Referer: Referer

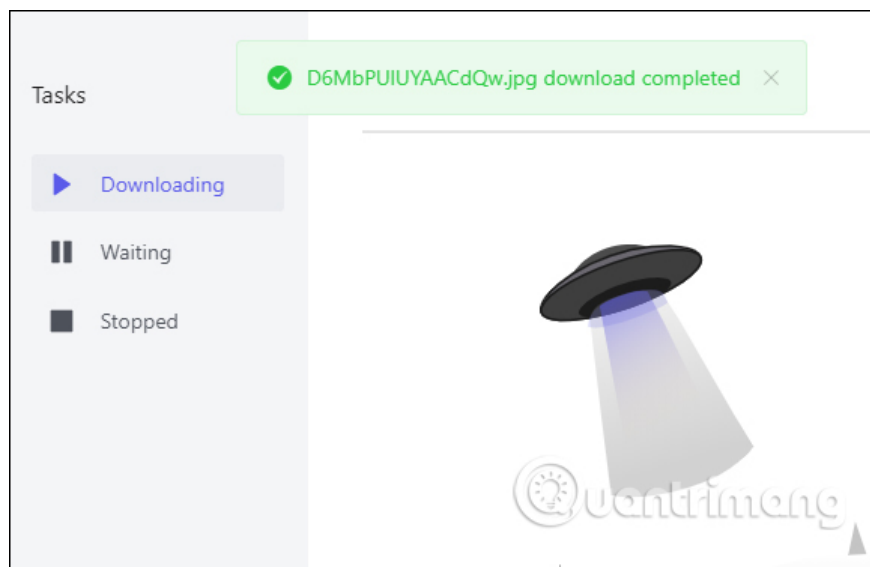

Cookie: Cookie

Navigate to Downloading

Advanced Options Cancel Submit

Step 4:

The download process takes place immediately and displays the download process in **the Download section** . When the download is completed the user receives the message as shown below.

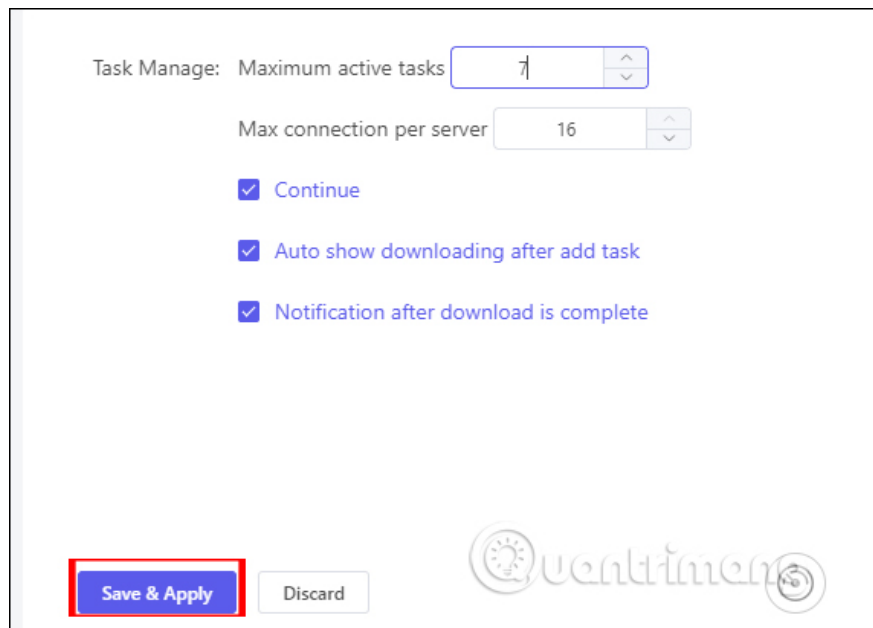

Step 5:

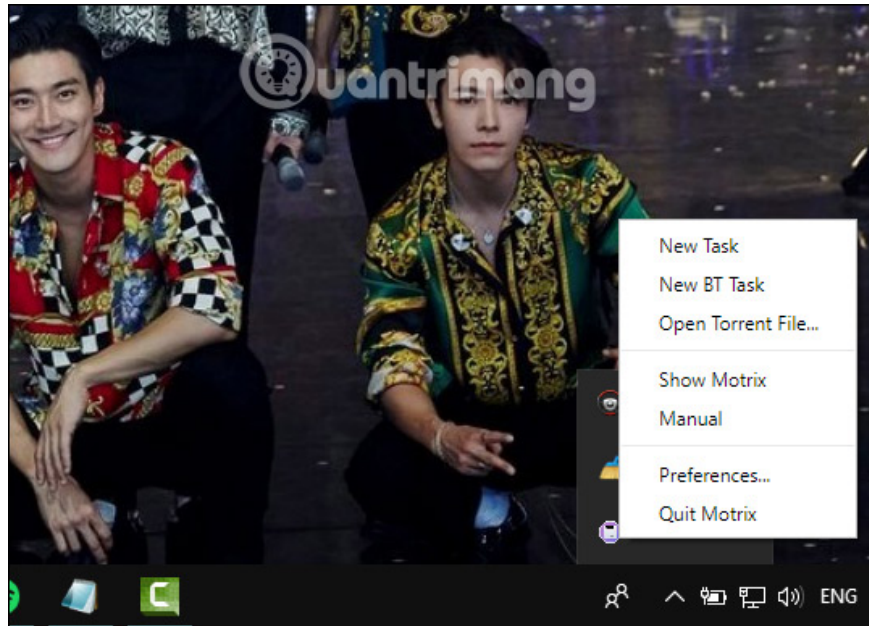

Motrix by default allows users to download up to 3 files at once, but if you want, you can increase it to 10 files. In the interface, click **the Preferences icon** at the bottom left of the screen.

Displaying the new interface, in the **Maximum active tasks section** click on the number of files that you want to download at most. Click Save & Apply to save the changes.

Also when you right-click **the Motrix icon in the system tray**, we also have the option to download files quickly.

Motrix uses absolutely free, without ads, so it creates software strengths compared to other tools. The process of downloading the file is divided into separate Download section for users to easily observe.

I wish you all success!
