

Instructions for fixing 99% download errors are stopped on IDM

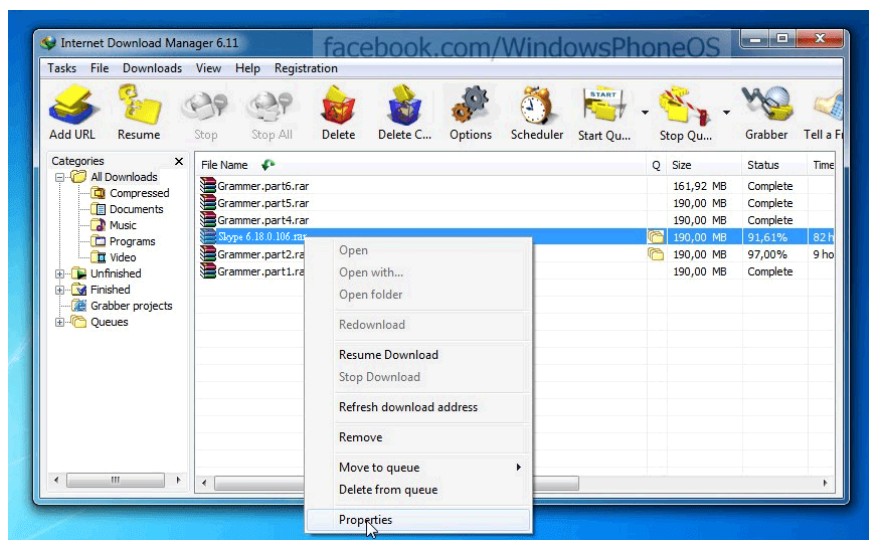

You are very frustrated when IDM is downloading 99%, then stop, how much effort does it take to reload? Below we have a way to help you fix that error, you can refer to it.

You are very frustrated when IDM is downloading 99%, then stop, how much effort does it take to reload? Below we have a way to help you fix that error, you can refer to it.

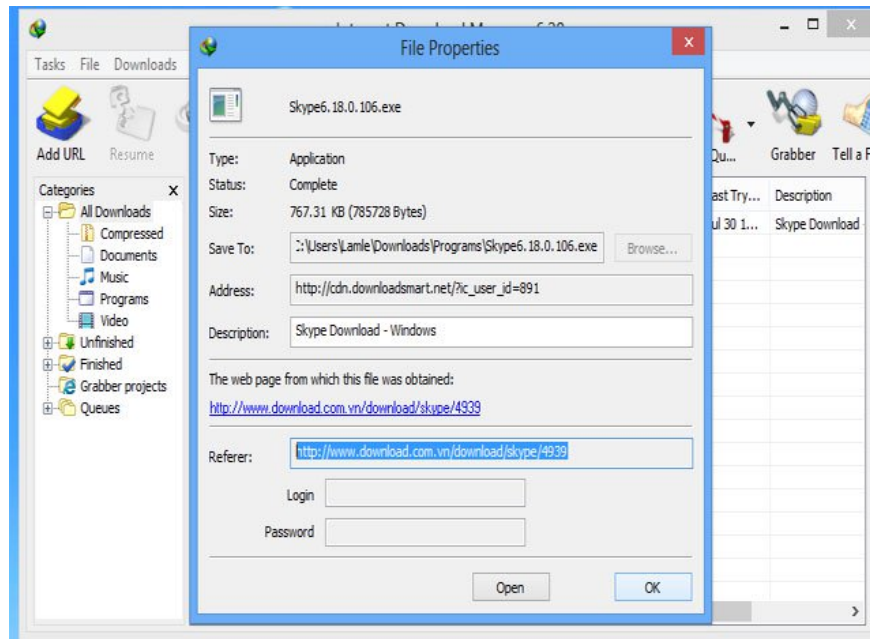

Tips: This way you can apply for IDM to stop regardless of time 40%, 50%, 66% . not necessarily 99%.

Instructions for fixing 99% IDM download errors

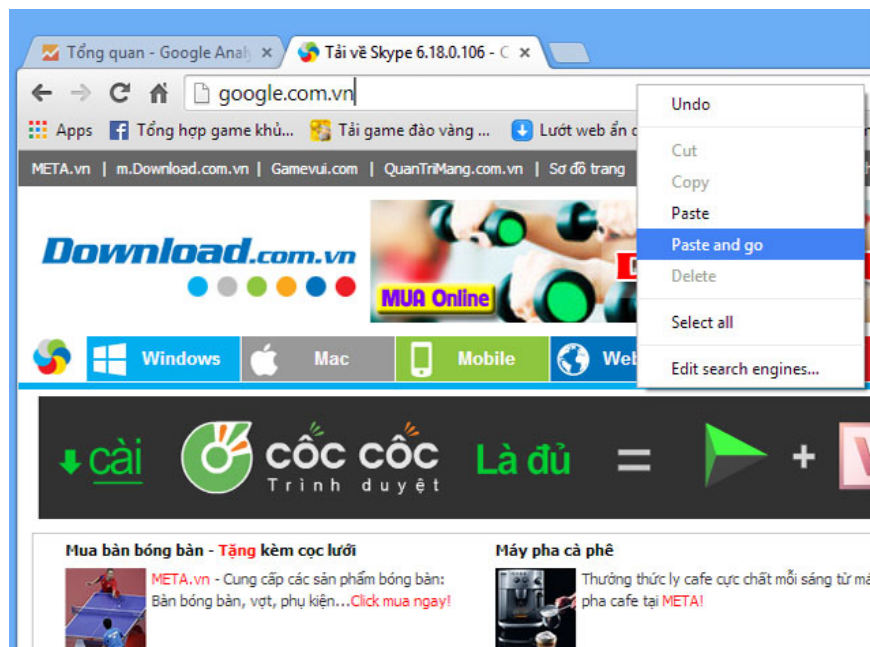

Step 1: Open IDM software, right-click on the **downloaded file** and stop 99% and select **properties** .

Copy the link in the **Referer** section.

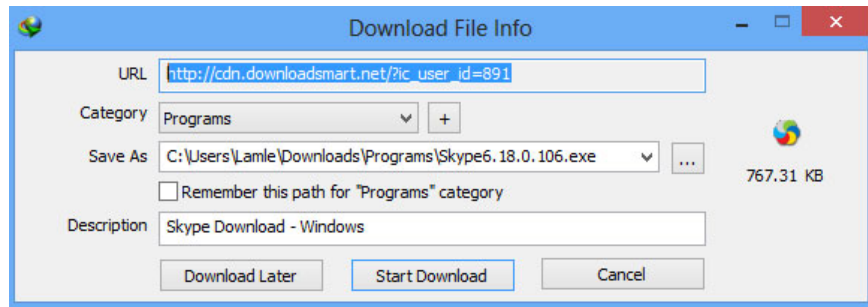

Step 2: Paste the above copied link into your web browser and **Enter** .

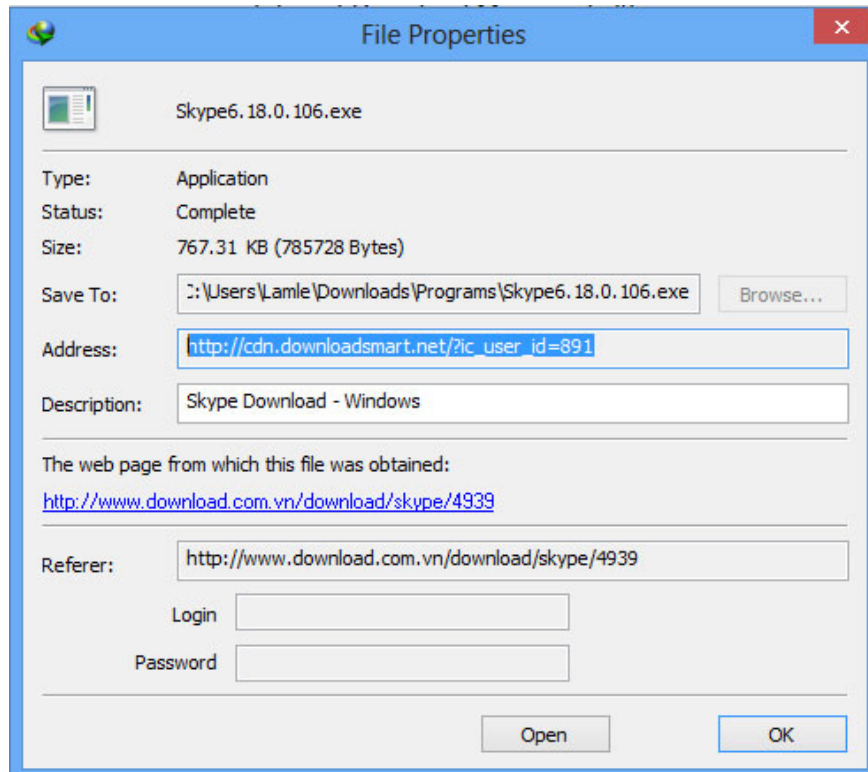

Click download to reload the 99% error file before.

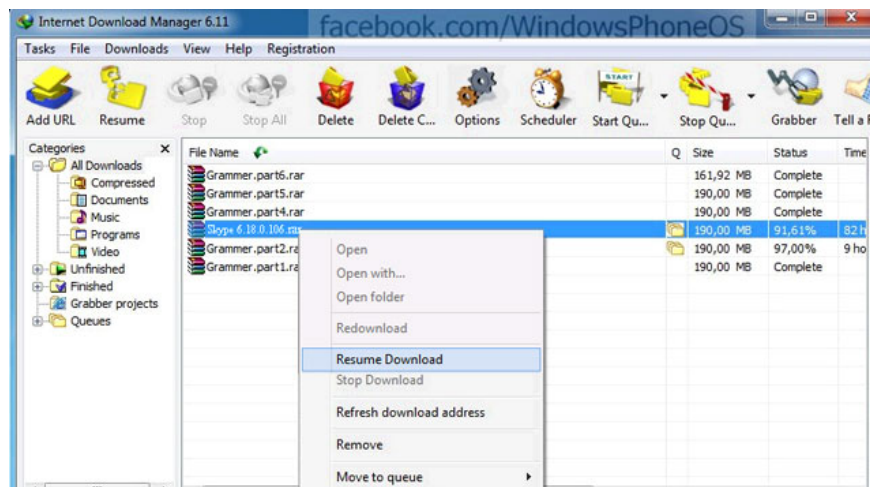

When IDM shows up in the *download* window, note that you don't download the file but just copy the link in the URL section as shown below and click **Cancel** .

Step 3: Back to **IDM** , right-click on the file with that 99% error, select **Properties** . Then **paste the** above copied **URL** into the **Address** box, replacing the old address. Then click **OK**.

Step 4: Continue to select **Resume** as shown below so that IDM continues to download the 99% error file.

With the way to fix IDM file download errors up to 99%, stop this, you can save a lot of time for reloading files. Not sure whether to download the file again without getting this error.

Good luck!!!
