3. Instructions to review old messages on Zalo

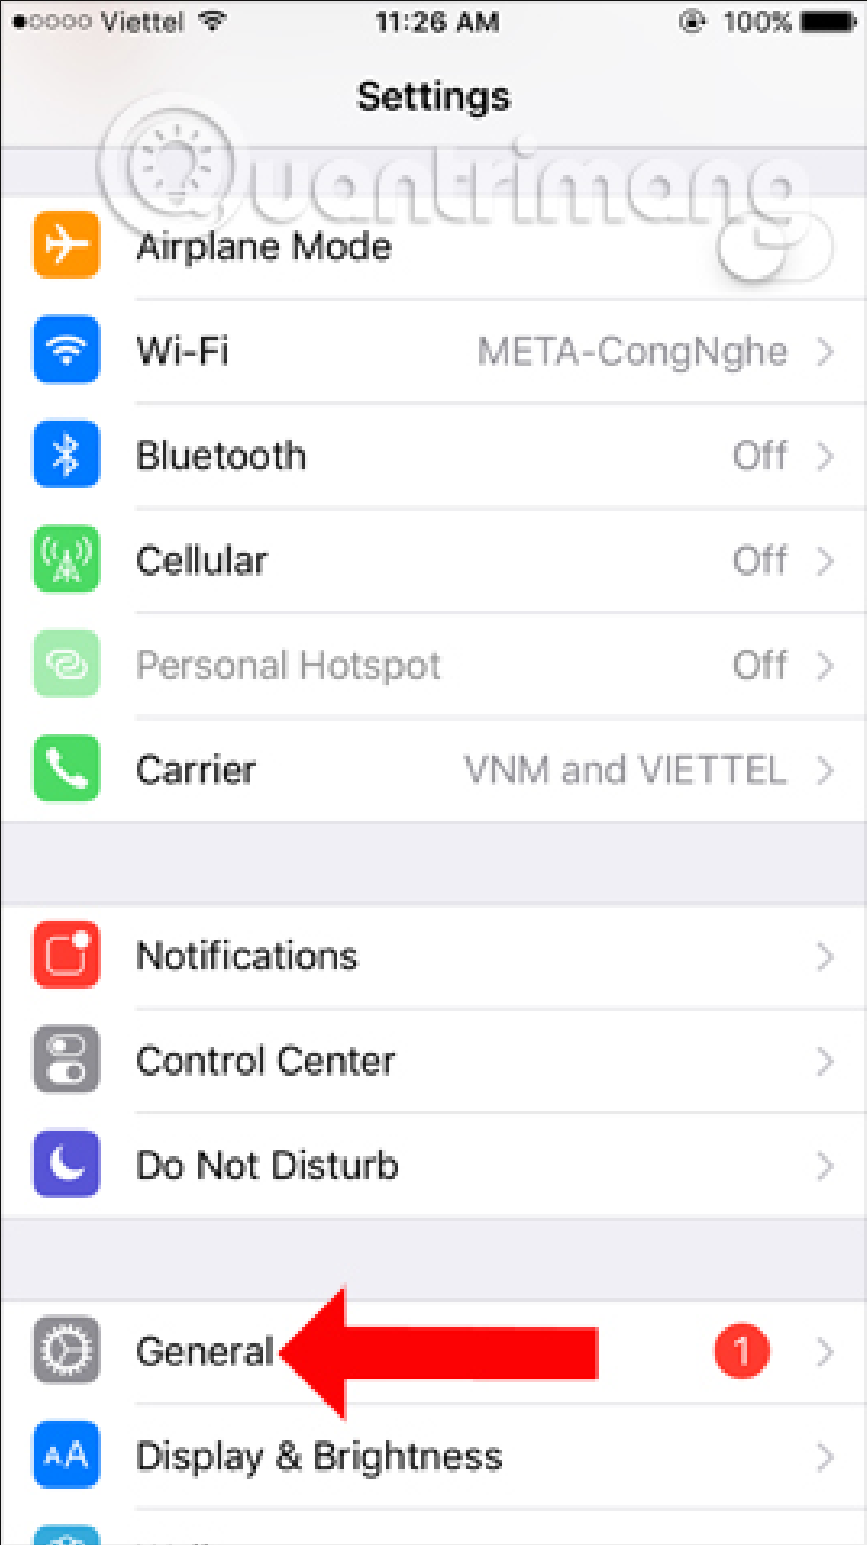

How to fix Zalo 502 error

1. Download Zalo for Android
2. Download Zalo for iOS
3. Download Zalo

502 error occurs on Zalo is due to wrong device date and time settings, can not synchronize with Zalo application. So users need to check the phone to switch back to the current date and time correctly.

Step 1:

We go to **Settings** on the device and then select **General** . Then switch to the new interface to find the **Date & Time** section.

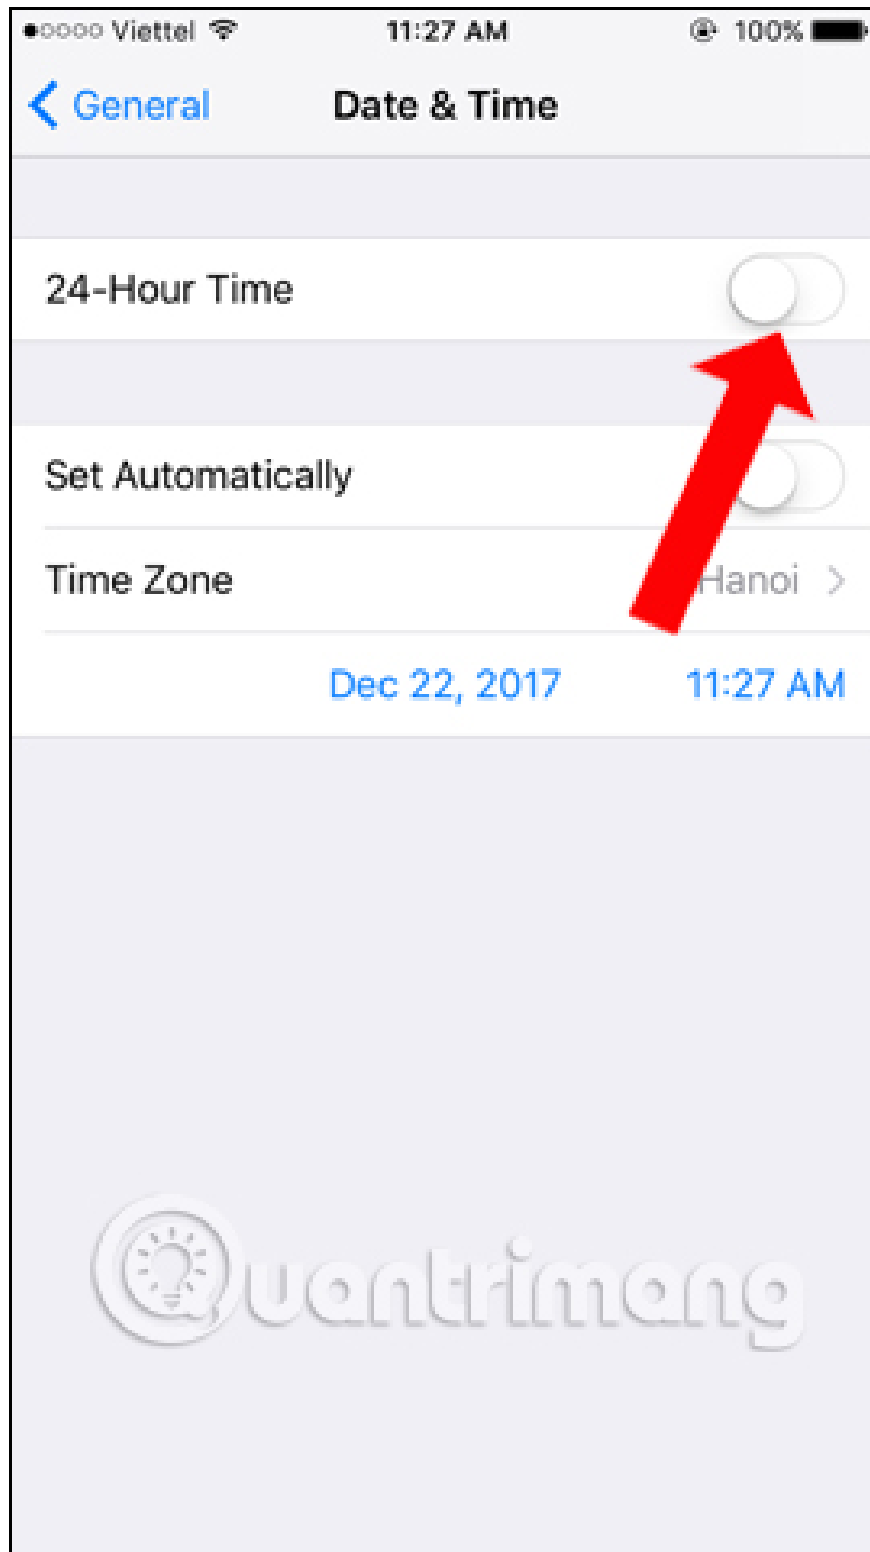

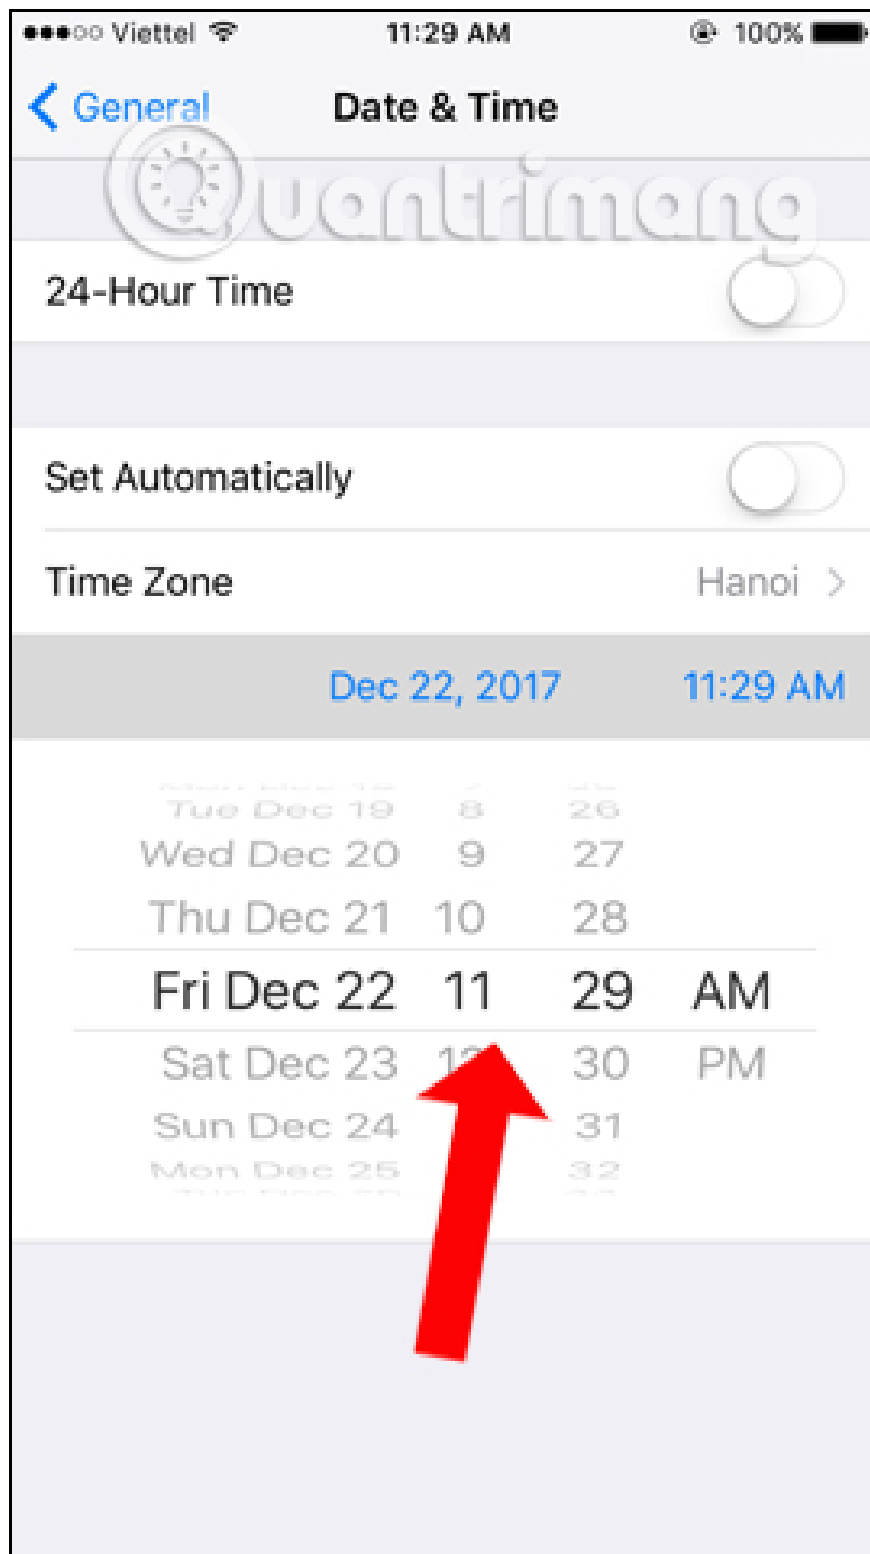

Step 2:

Switch to the time setting interface on the device. Here, please **turn off the automatic setting time** at **Set Automatically** by swiping the horizontal bar to the left.

Next we proceed to adjust the date and time on the device.

After that, users log in to Zalo account again. After changing the date and time on the device again, we proceed to upgrade the latest version of Zalo to fix the bugs in the old version and experience new features.

With changing the date and time settings on the device, you can fix the error of Zalo 502. During the use process, you should also check and upgrade the application to the latest version. This can help fix bugs in older versions, especially can quickly experience new features.
