

Instructions for free Wi-Fi playback on iOS 10 devices

Like previous iOS devices, if your iPhone or iPad is running iOS 10, it can also turn it into a free Wi-Fi transmitter for other devices.

Along with a lot of support or adjustment applications right on the device, we can completely turn our smartphone into a free Wi-Fi transmitter. With iOS devices such as iPhone, iPad, for example, you can also set them to turn them into free Wi-Fi hotspots. Previously, network administrators have also instructed you how to play free Wi-Fi on iPhone or iPad with operating systems under iOS 10. However, with devices upgraded to iOS 10, the operation is done. change or not? The following article will show you how to use iPhone running iOS 10 as a Wi-Fi transmitter for smatphone, laptop or other tablet.

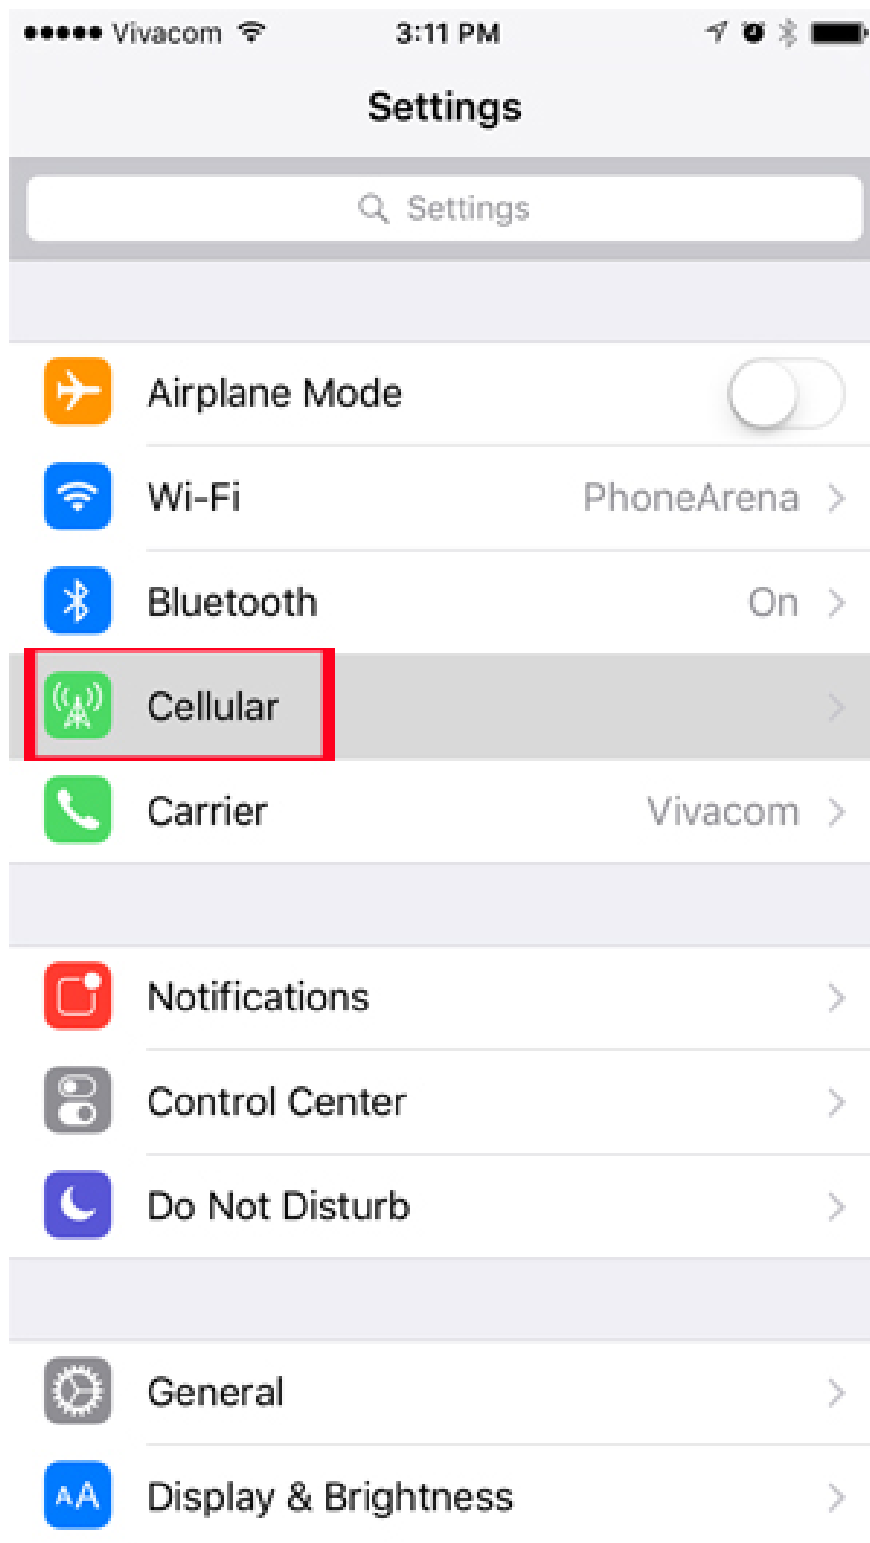

Step 1:

On the device's interface, click on **Settings** .

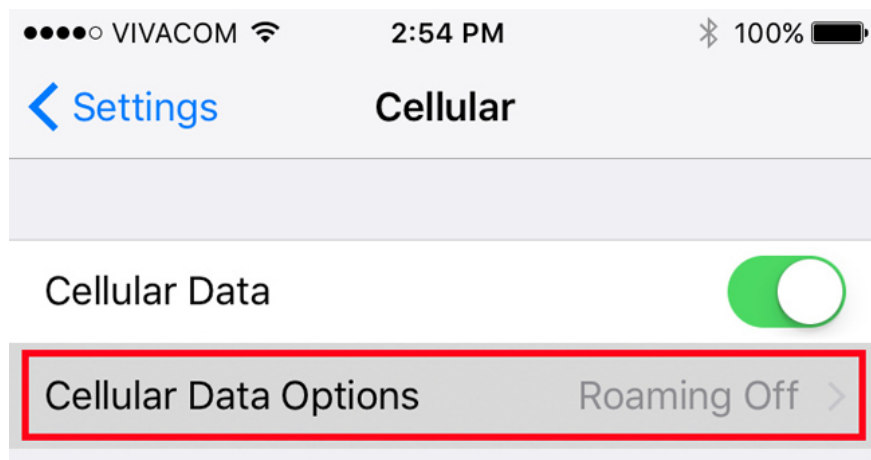

Step 2:

Next, in the Settings interface we will select the **Cellular** item.

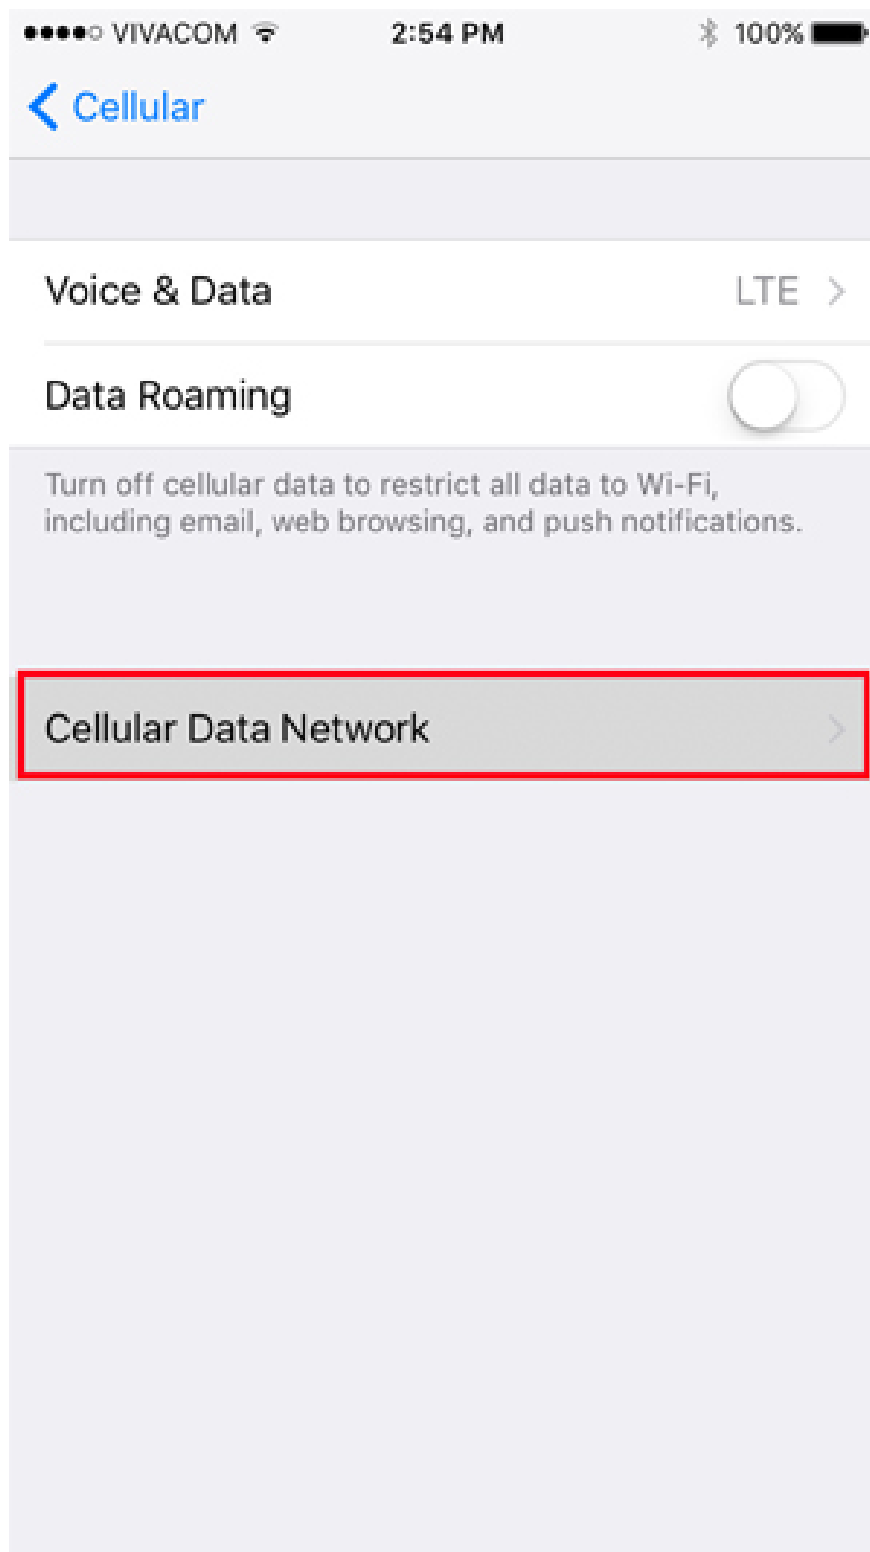

Step 3:

Then, select the **Cellular Data Options** item as shown below.

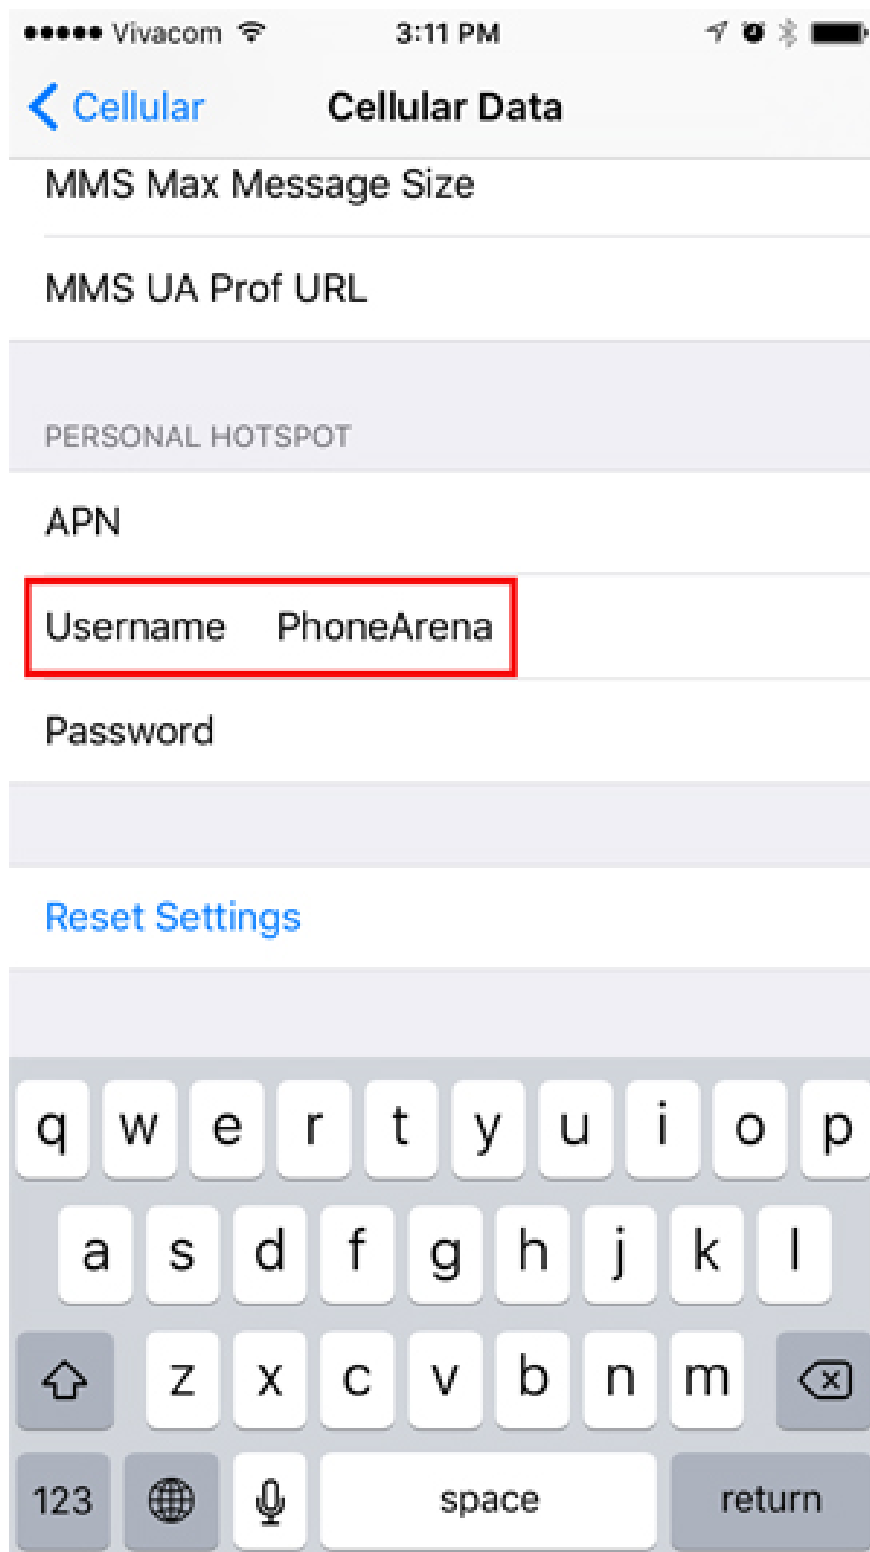

Step 4:

Click Next to **Cellular Data Network** .

Step 5:

In the **Cellular Data view**, scroll down to the **Personal Hotspot** section and **name the free Wi-Fi network that** will play, or you can add a password if you want. Then return to the Cellular interface.

Step 6:

In this interface, you will see the **Personal Hotspot section** . Click on it to turn on Wi-Fi free play mode.

Step 7:

In the Personal Hotspot interface, we can **change the password for the Wi-Fi option** , then click **Done** at the top to save it.

Personal Hotspot

Now Discoverable.

Other users can look for your shared network using Wi-Fi and Bluetooth under the name "iPhone".

Wi-Fi Password
