

Instructions for hiding IP when calling on WhatsApp

To protect your privacy when using WhatsApp, Meta has now provided the feature to protect your IP address.

When making voice calls on WhatsApp or video calls on WhatsApp, your IP address may be revealed during a peer-to-peer connection. To limit IP exposure to a minimum, WhatsApp will help you hide your IP address right within the application. The article below will guide you to hide IP in WhatsApp.

How to hide IP when calling WhatsApp video

Step 1:

At the WhatsApp interface, click on **Settings** in the bottom right corner of the interface on the application. Now you will see the setup options for the WhatsApp application, click on **Privacy** .

Step 2:

Switch to WhatsApp's privacy settings interface, scroll down below and click **Advanced** to see more advanced settings for your WhatsApp account.

Step 3:

You will now see **the IP Address Protection setting during calls** . We need to enable this feature by **sliding the white circle button to the right** to secure the IP address when making calls on WhatsApp.

Nâng cao

Bảo vệ địa chỉ IP trong cuộc gọi

Để mọi người khó đoán vị trí của bạn hơn, các cuộc gọi trên thiết bị này sẽ được chuyển an toàn qua máy chủ WhatsApp. Điều này sẽ làm giảm chất lượng cuộc gọi. [Tìm hiểu thêm](#)
