

Instructions for installing and setting up the microphone on the computer

Microphone is a peripheral device on the computer that makes it possible to make VoIP calls or even sing karaoke right on your computer. TipsMake.com will guide you how to set up and install microphones on your computer effectively.

1. Basic Microphone setup on computer

On Windows 7

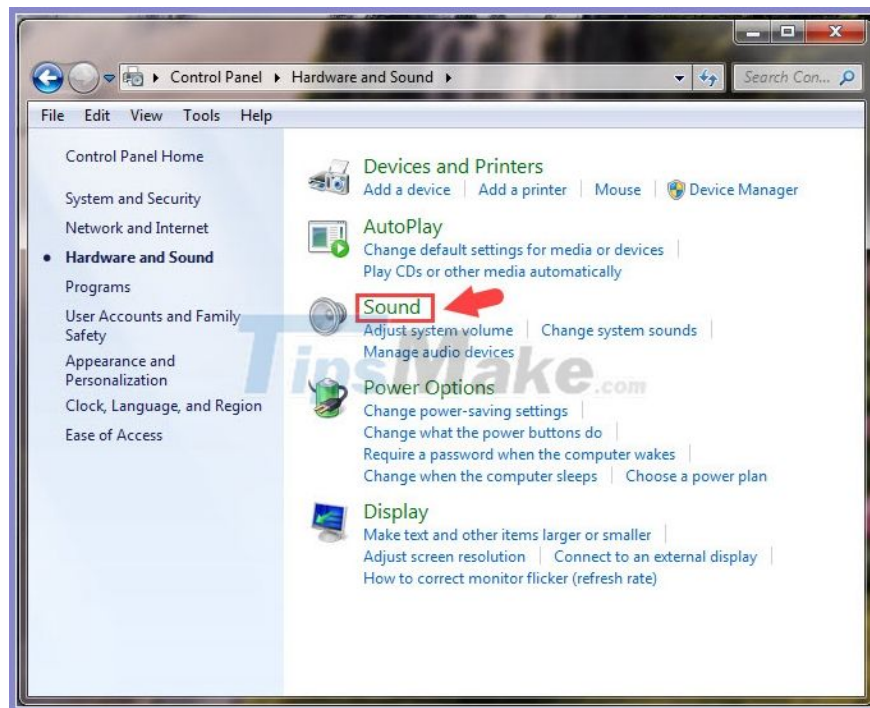

Step 1: Go to **Start => Control Panel** .

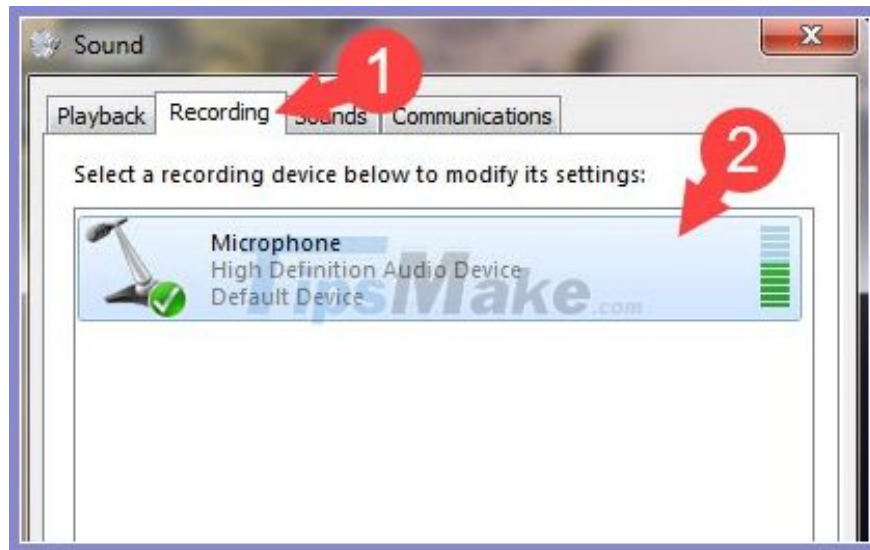

Step 2: Select the item **Hardware and Sound** .

Then select the item **Sound** .

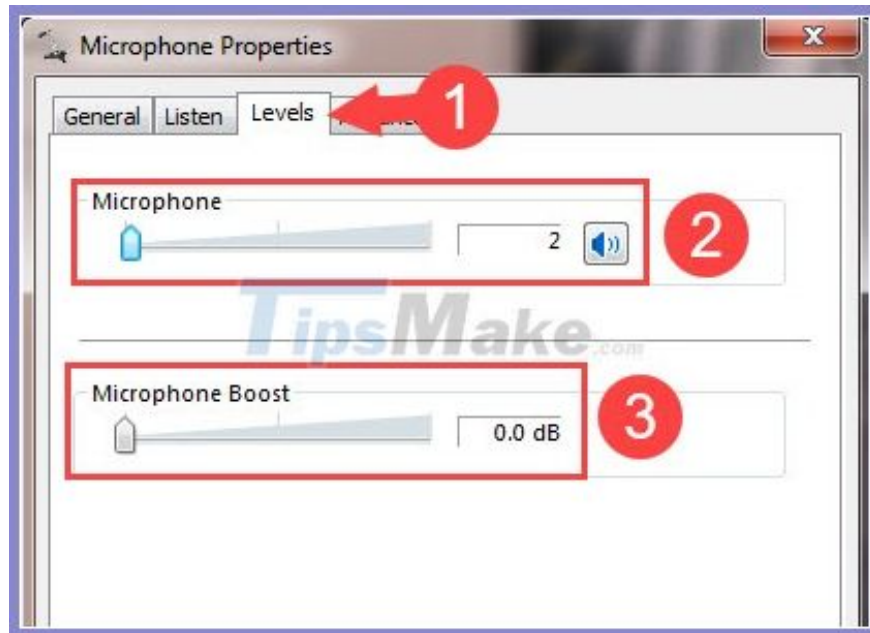

Step 3: Choose **Recording (1)** => left-click **Microphone (2)** .

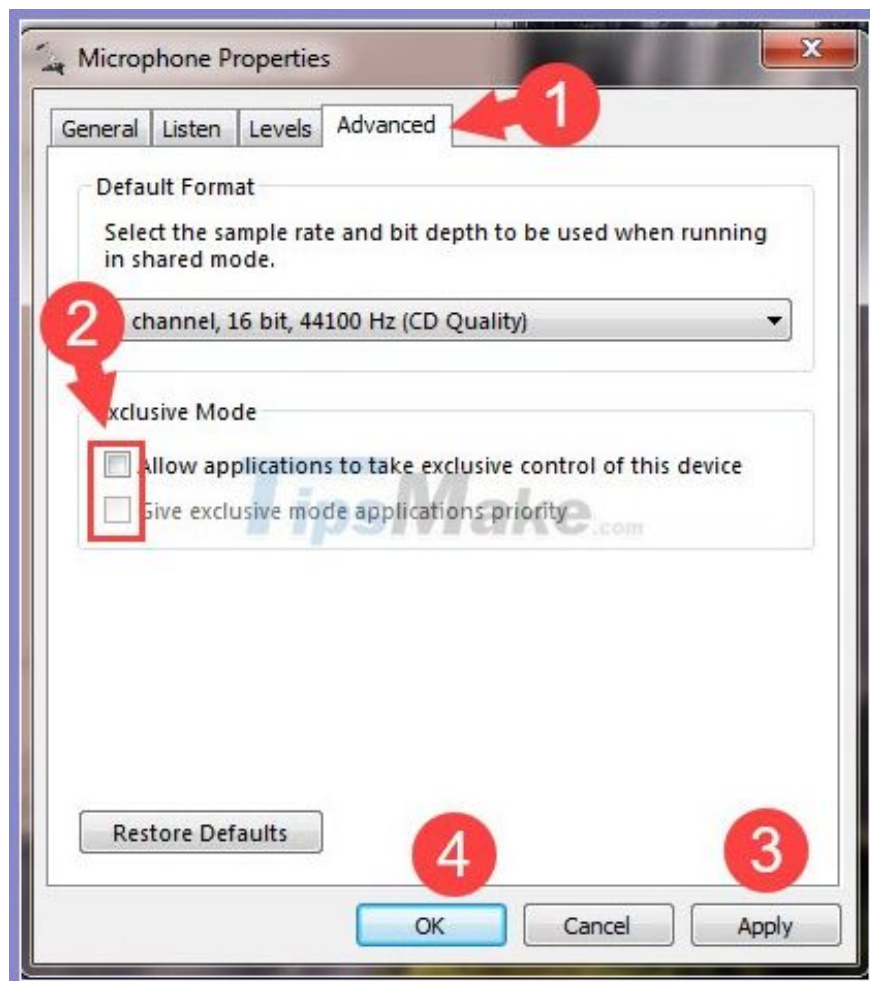

Step 4: In the **General** (1) , click on **Device usage** (2) => **Use this device (enable)** (3) to turn on the microphone on the computer.

Step 5: Switch to **Levels** (1) and adjust the **Microphone** volume (2) . To increase the volume of the microphone, you adjust the **Microphone Boost** (3), but this section can make the microphone recording sound or be echoes if you adjust this item too loud.

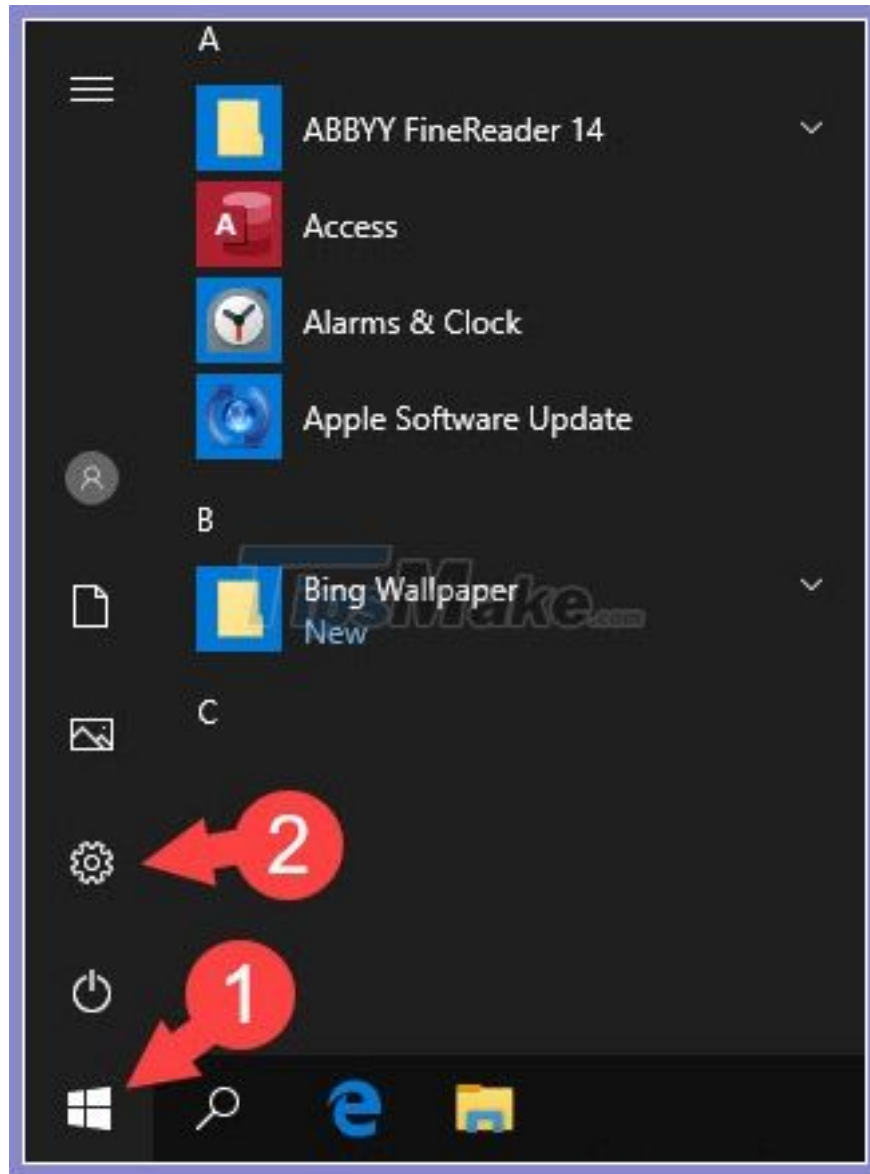

Step 6: Go to **Advanced** (1) , tick 2 items in **Exclusive Mode** (2) so that the application on your computer will automatically control the volume and reproduce the sound from the microphone . Next, click **Apply** (3) and **OK** (4) to save.

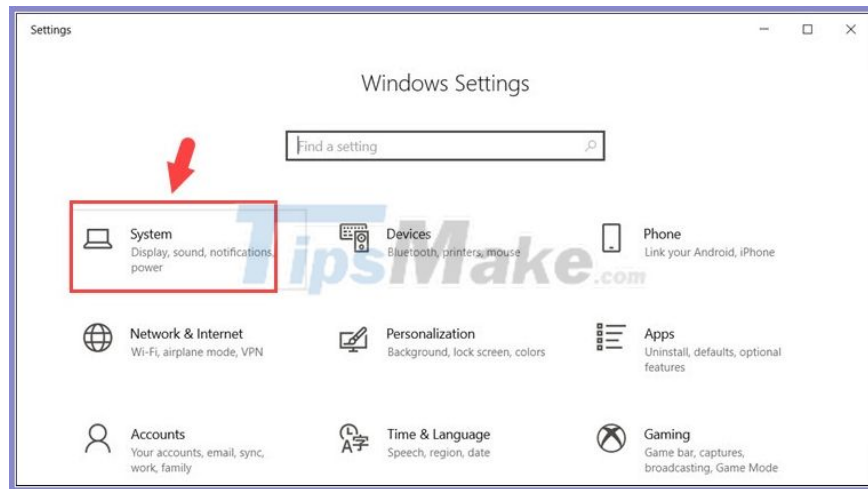

On Windows 10

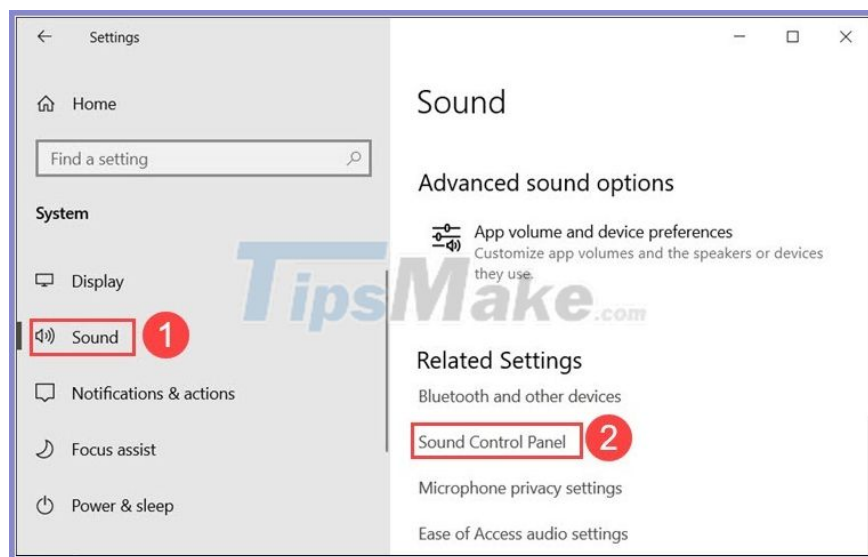

Step 1: Open the **Start menu** (1) => **Settings** (2) .

Step 2: Select the **System** item .

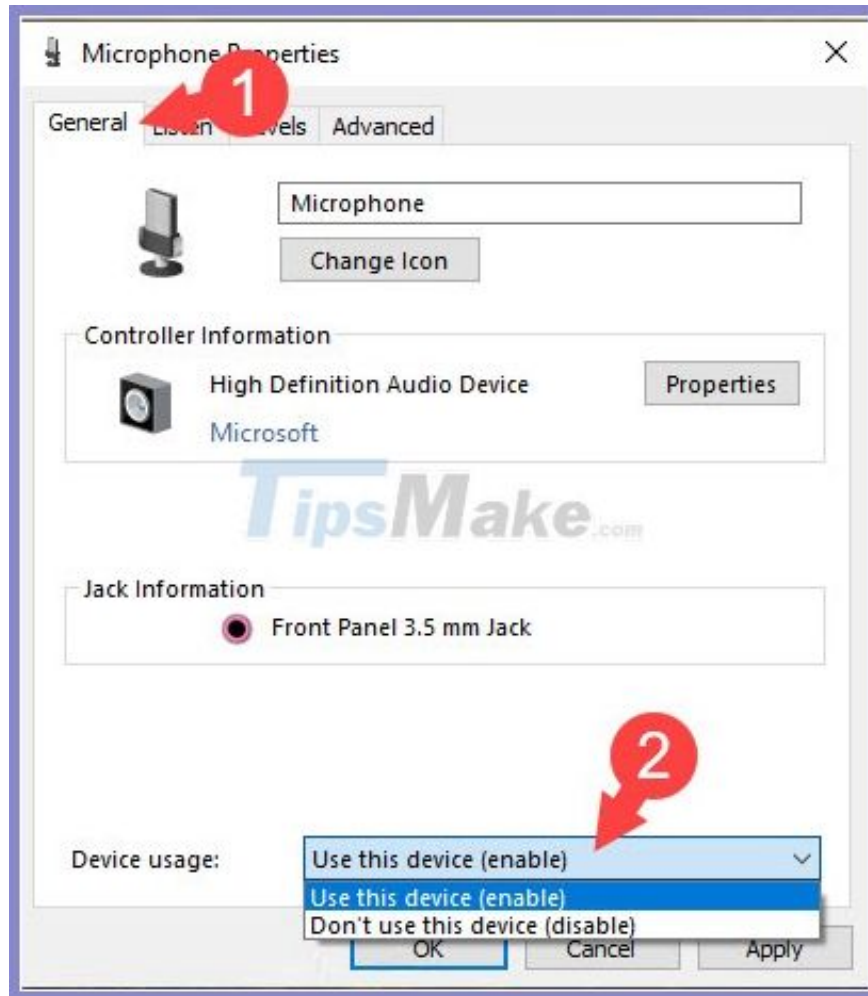

Step 3: Next, select the item **Sound** (1) and find the section **Sound Control Panel** (2) in **Related Settings** .

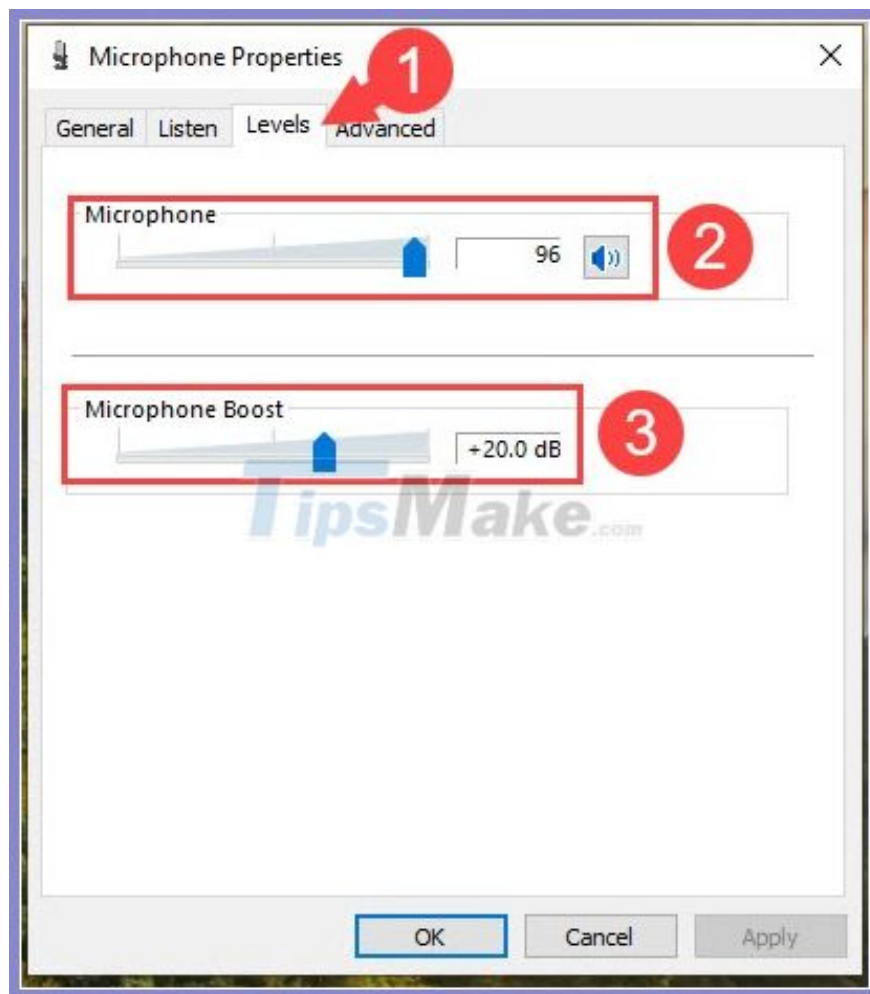

Step 4: Switch to **Recording** card (1) => click on **Microphone** (2) .

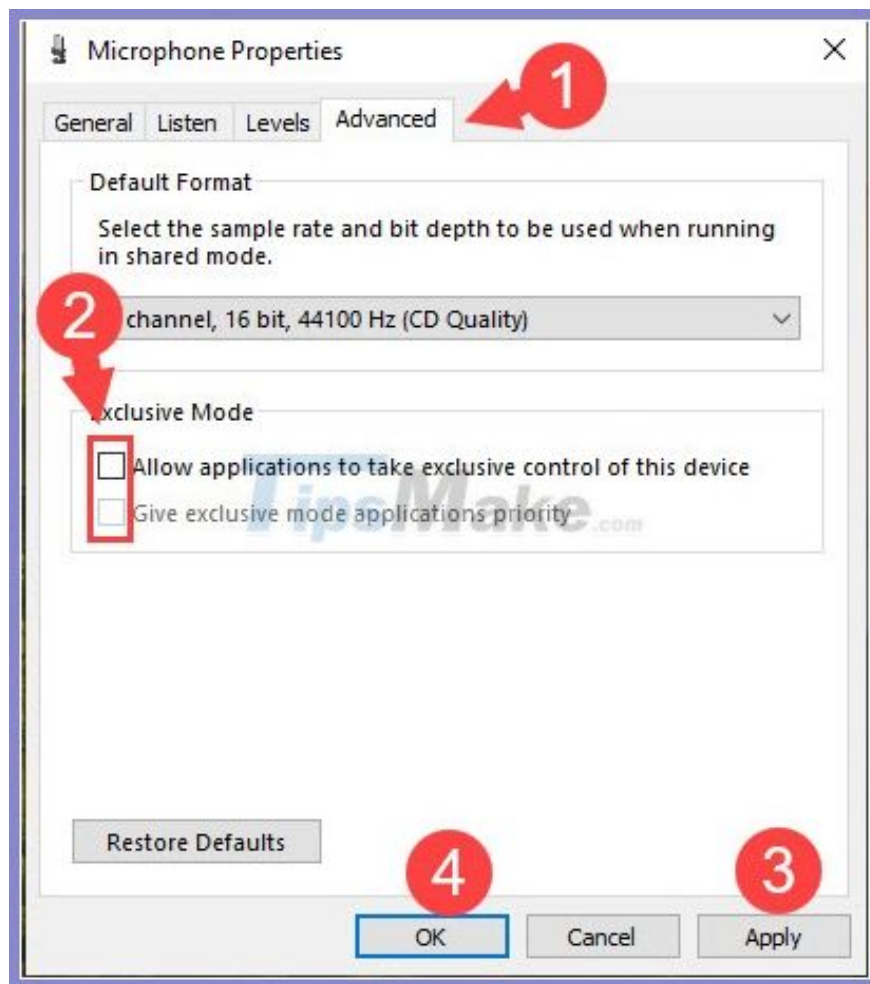

Step 5: In the **General (1)** section , click **Use this device (enable) (2)** in the **Device usage** section .

Step 6: Go to **Levels (1)** and adjust the volume level for the microphone in **Microphone (2)** . To increase the volume even further, adjust the **Microphone Boost (3)** accordingly.

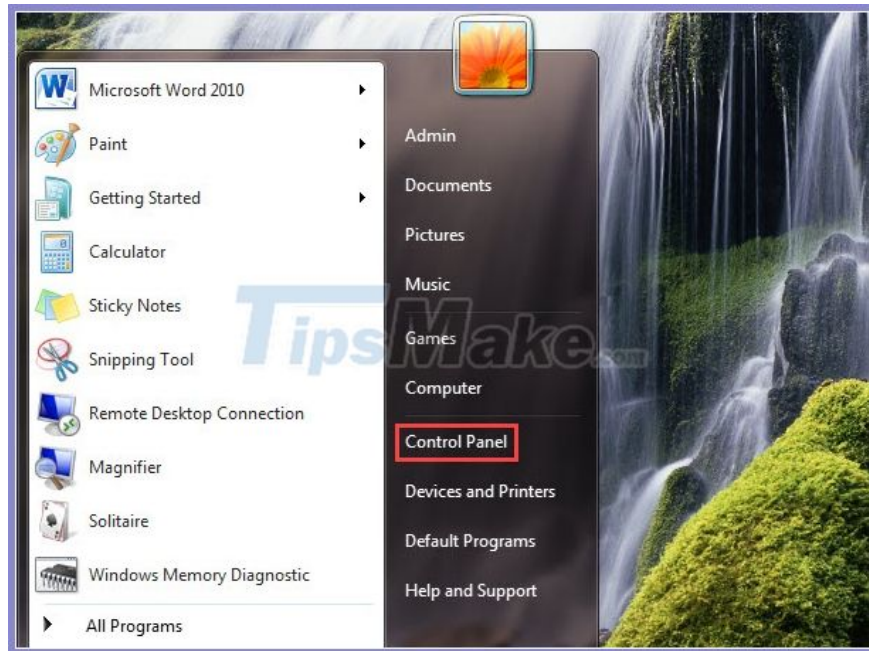

Step 7: Switch to the **Advanced** tab (1) and check the two items in **Exclusive Mode** (2) to automatically allow recording applications to have full access to the microphone. Then click on **Apply** (3) and **OK** (4) to save the changes.

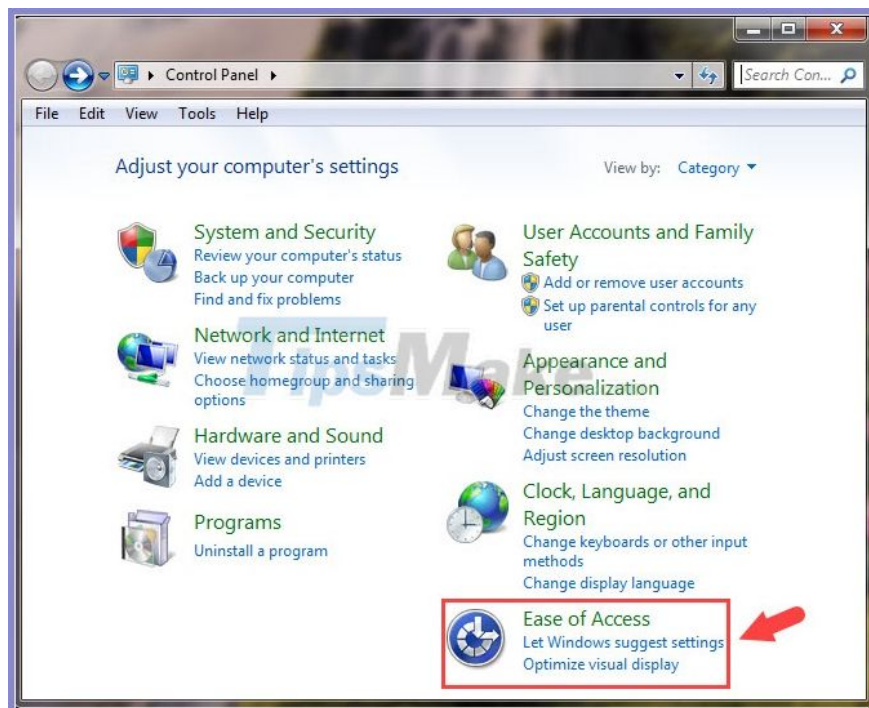

2. Set up recording on Micro on computer

On Windows 7

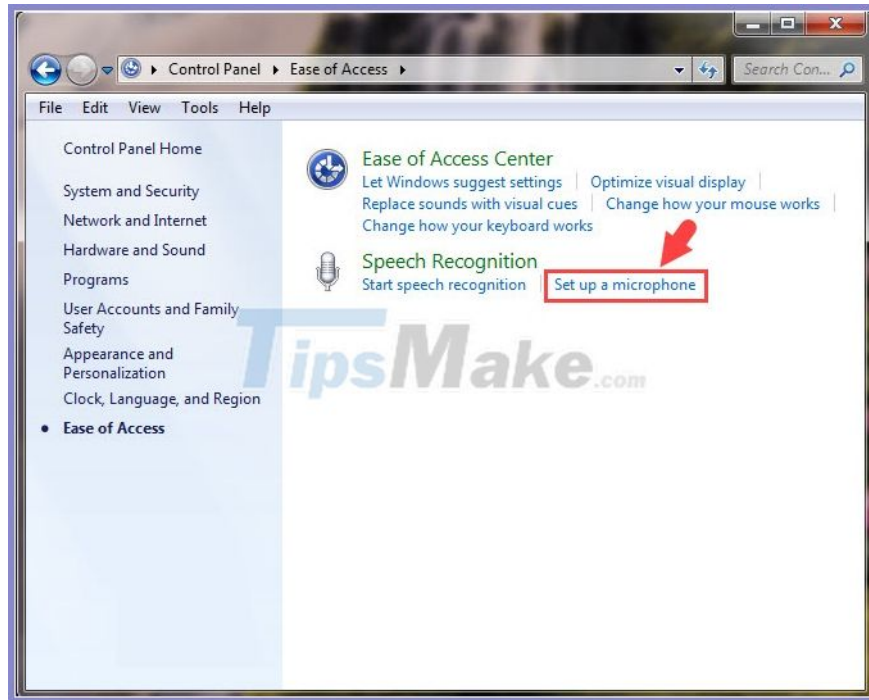

Step 1: Open Start => Control Panel .

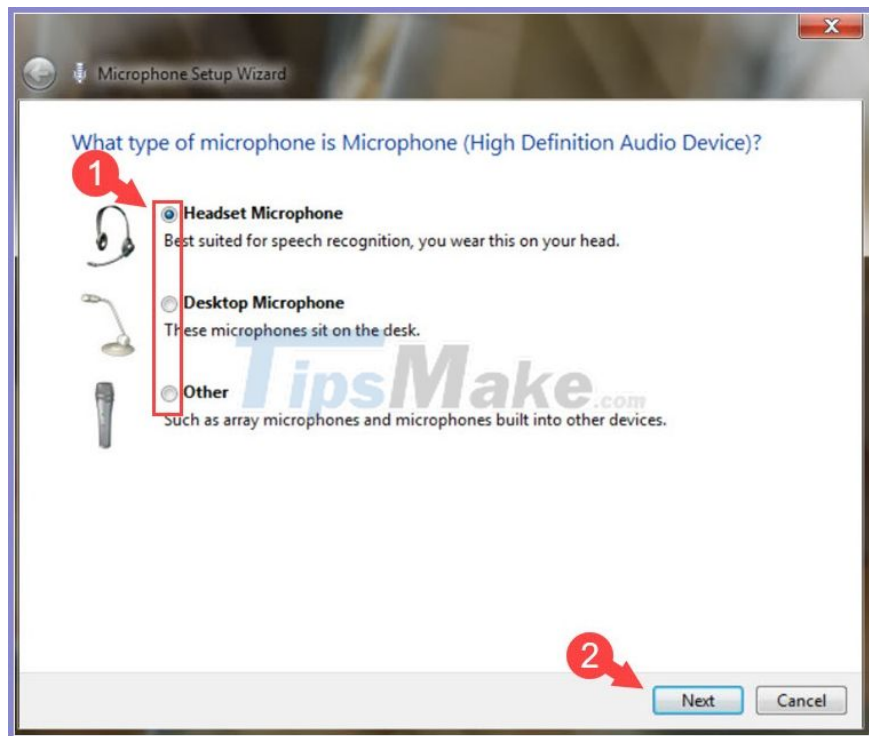

Step 2: Select the item **Ease of Access** .

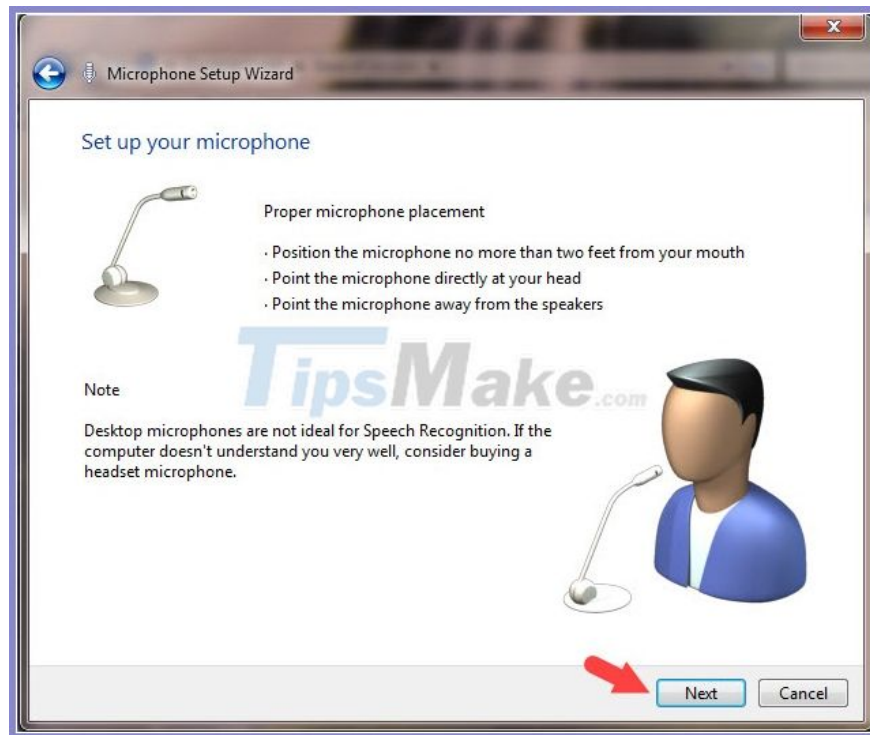

Step 3: Next, select the **Setup a microphone** item in the **Speech Recognition** section .

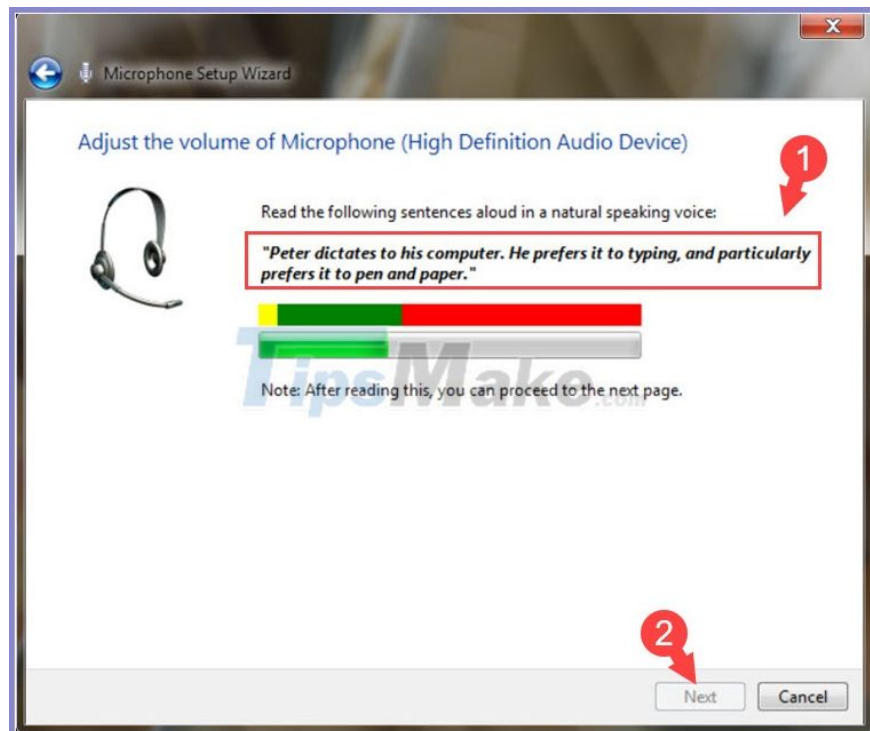

Step 4: Choose the name of the microphone device that you connected to the computer (1) => **Next** (2) .

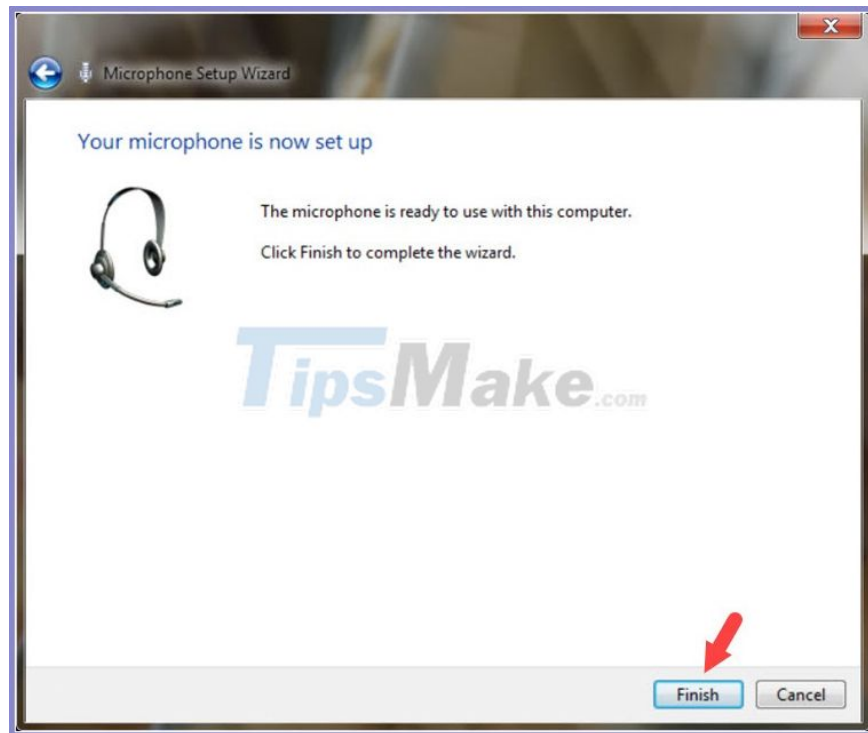

You continue to click **Next** to move to the next step.

Step 5: Read the paragraph (1) into the microphone to try the mic and click **Next (2)** to move to the next step.

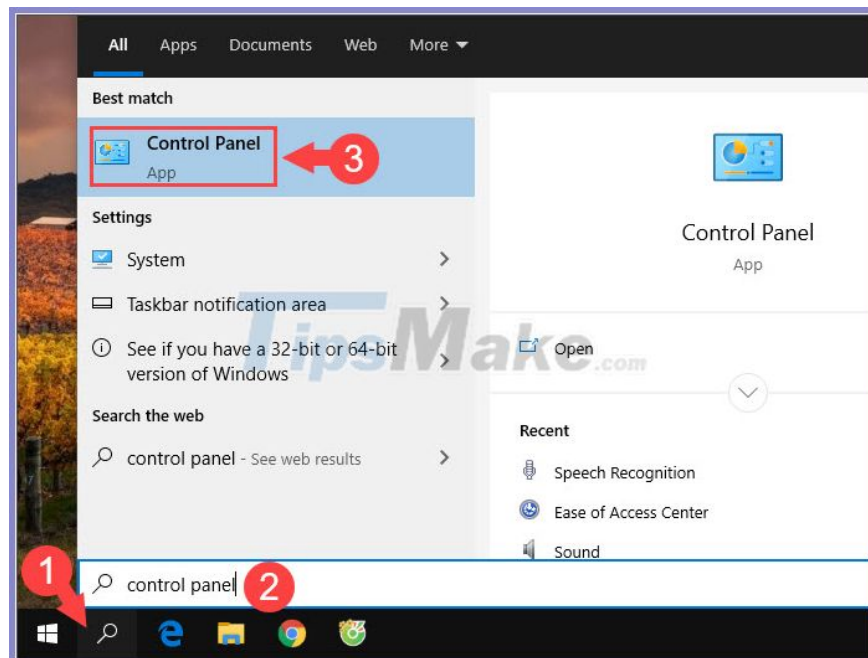

Step 6: Once done, we click on **Finish** to complete.

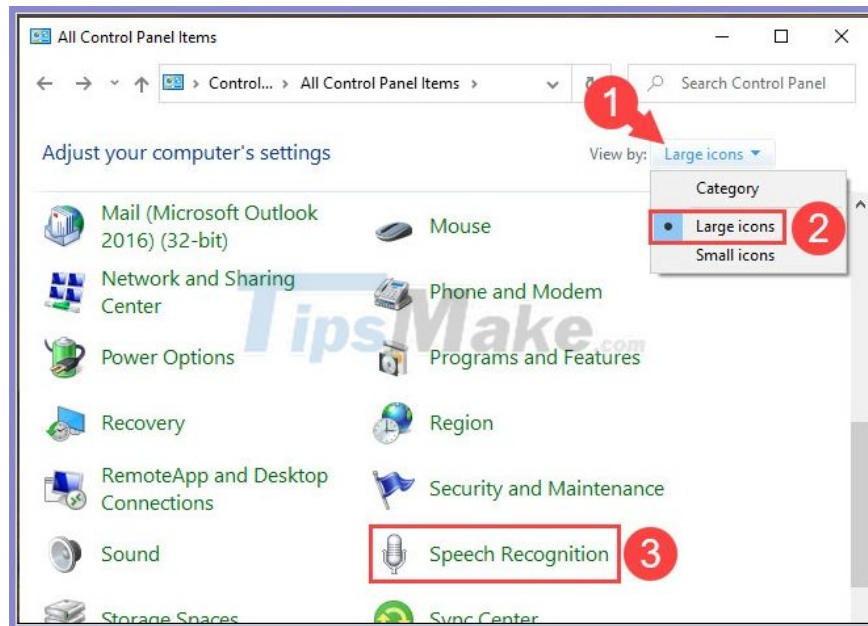

On Windows 10

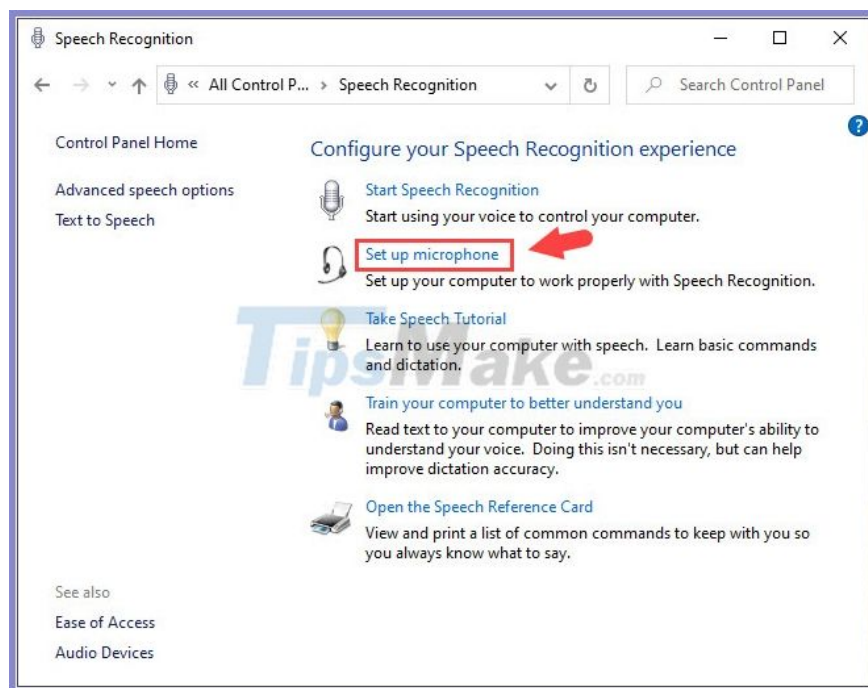

Step 1: You click on **Search** (1) or use the keyboard shortcut *Windows + S* . Next, you enter the keyword **Control Panel** (2) => select **Control Panel** (3) .

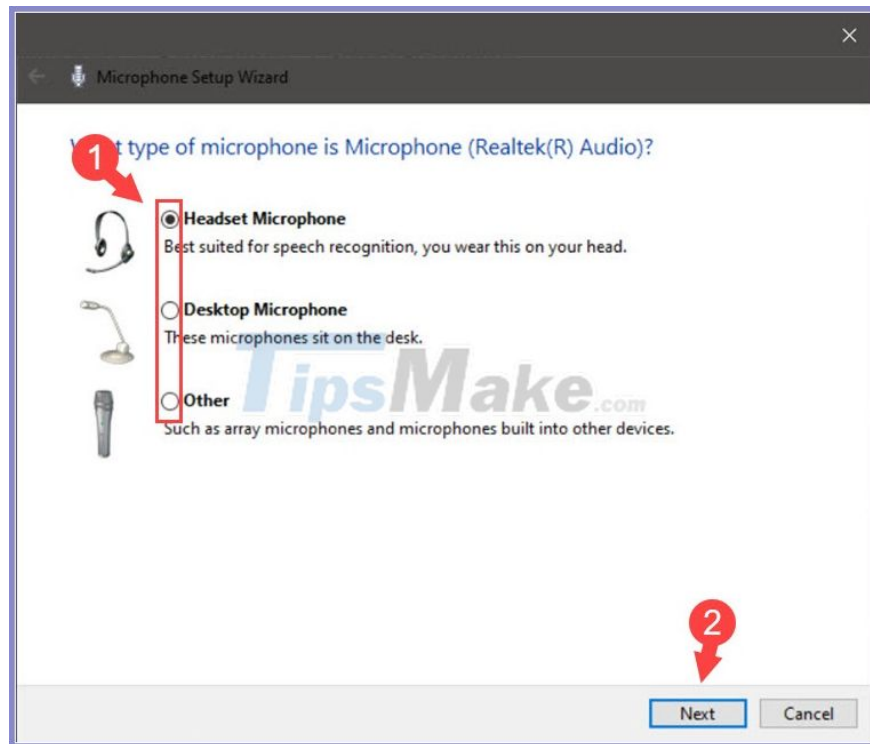

Step 2: Click on **View by** (1) => **Large icons** (2) to easily find items in the form of icons. Next, select **Speech Recognition** (3) .

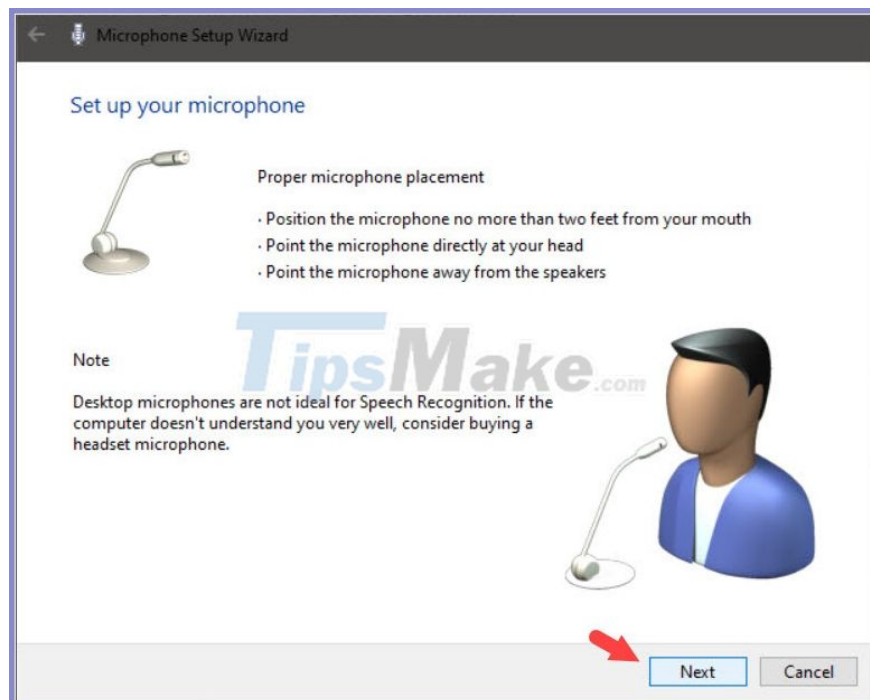

Step 3: Choose **Set up microphone** .

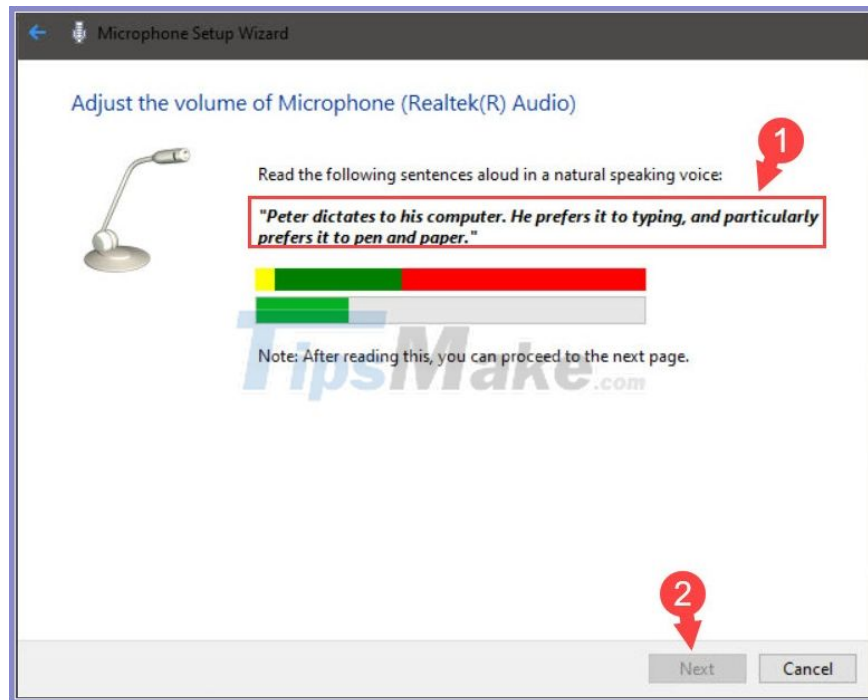

Step 4: Choose the type of microphone you are using in the list (1) and click **Next** (2) .

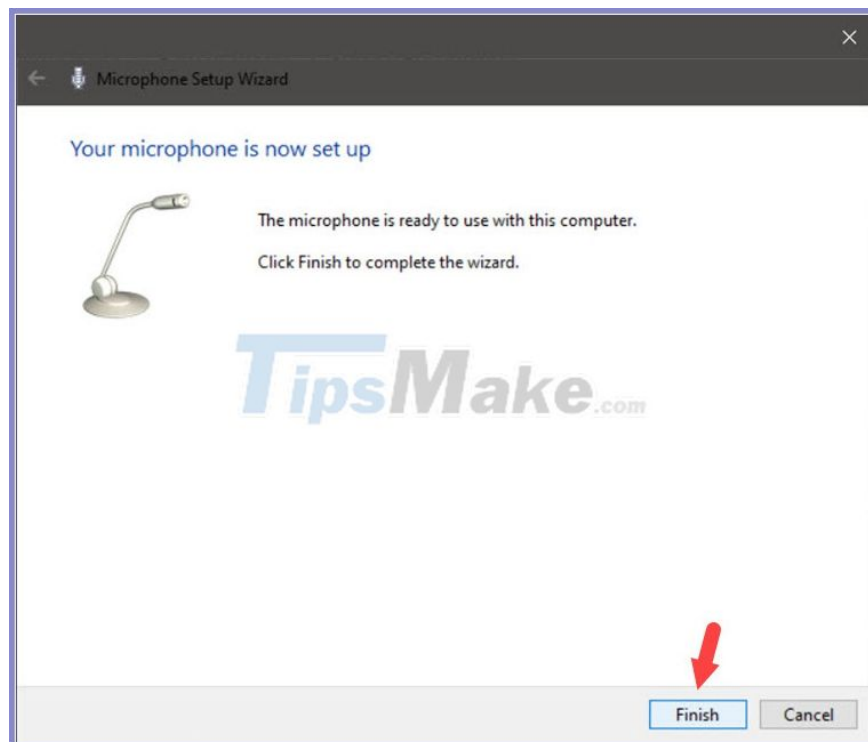

You continue to click **Next** to move to the next step.

Step 5: Read the text on the screen **(1)** into the microphone for the application to identify and click on **Next (2)** to proceed to set up the microphone.

Step 6: Click **Finish** to complete the setup.

With instructions for setting up and setting up microphones on your computer, readers will no longer get errors that do not recognize the device.
