

# Instructions for installing Android N Developer Preview on Nexus

Google has just released Android N Preview for Nexus 6P, 5X, 6, Nexus 9, Nexus Player and Pixel C. devices, Google also launched a new program called Android Beta Program, allowing users to post Sign online and receive a trial version via OTA without having to download the ROM to flash.

Google has just released Android N Preview for Nexus 6P, 5X, 6, Nexus 9, Nexus Player and Pixel C. devices, Google also launched a new program called Android Beta Program, allowing users to post Sign online and receive a trial version via OTA without having to download the ROM to flash.

Note: Android N Preview is a test program, so having some errors is inevitable.

## 1. The device is qualified to install Android N

Some devices are qualified to install Android N as:

1. Nexus 5X
2. Nexus 6
3. Nexus 6P
4. Nexus 9 Wi-Fi
5. Nexus 9 LTE
6. Pixel C

7. Nexus Player
8. General Mobile 4G (Android One)

## 2. Register for Android Beta Program and get Android N Developer Preview

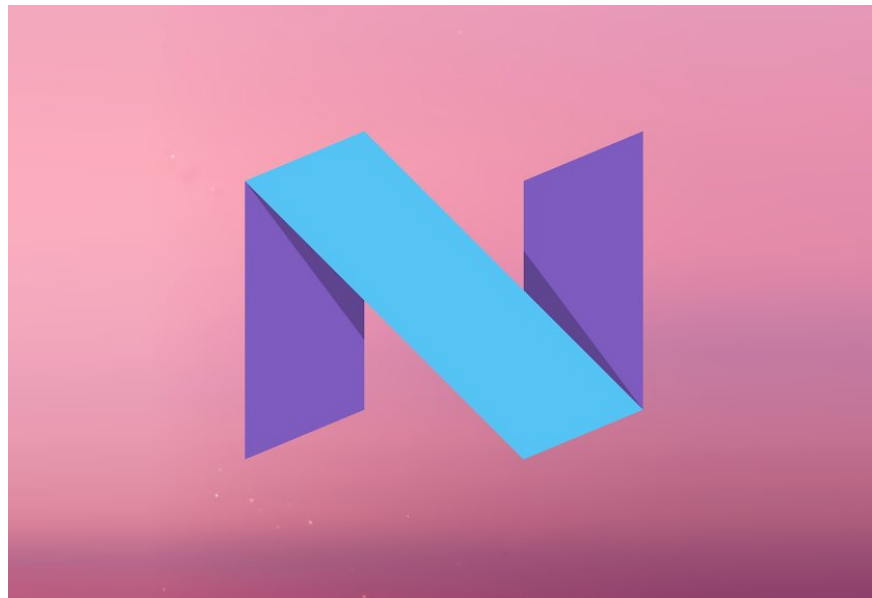

This process is for people who do not install the N Developer Preview Android flash. If you have it installed, your device does not receive updates (updates) via wireless networks.

Also if you are using Android Marshmallow, follow the instructions below:

1. Access the Android Beta Site page on your device or on the computer.
2. Log in to your Gmail account, then scroll down to see if your device is eligible.
3. Click on the **Enroll Device** and accept the terms.

Within 24 hours, you will receive the latest Android N Developer Preview updates available to download the device and install. The installation of Android N Developer Preview is similar to the process of updating other Android versions.

You will receive a regular 4 - 6 week update, this process takes place until Google officially launched Android N in the third quarter of this year (July - September).

## 3. Send Feedback (feedback) to Google

Because this is a test program, users can respond to Google errors during use. To send feedback to Google, you can refer to some of the following:

1. On your device click on **Android N Quick Settings** or open **Settings => About => Send feedback about this device**.
2. Upload your comments on the Android Beta Program Google+ community.
3. Report bugs on Android Open Source Project Issue Tracker (for developers only).

## 4. Unsubscribe from Android Beta Program

For some reason you want to unsubscribe from the Android Beta Program, such as Android N with too many errors . Very simply, you just need to follow the steps below:

1. Visit Android Beta Site on your device or on the computer.
2. Log in to your Gmail account, then scroll down to see if your device is eligible.
3. Click **Unenroll Device** and accept to reset the whole device (factory reset) when notified.

**Note :** All data on the device will not be backed up and will be erased after you exit the testing process.

Within 24 hours, your device will receive a notification of an appropriate Android update to download and install, which may be Android Marshmallow version.
