

# Instructions for installing Brush on Photoshop

The latest Adobe Photoshop version brings a lot of new brushes, but if you still want to install your own brushes on Photoshop, this is the way.

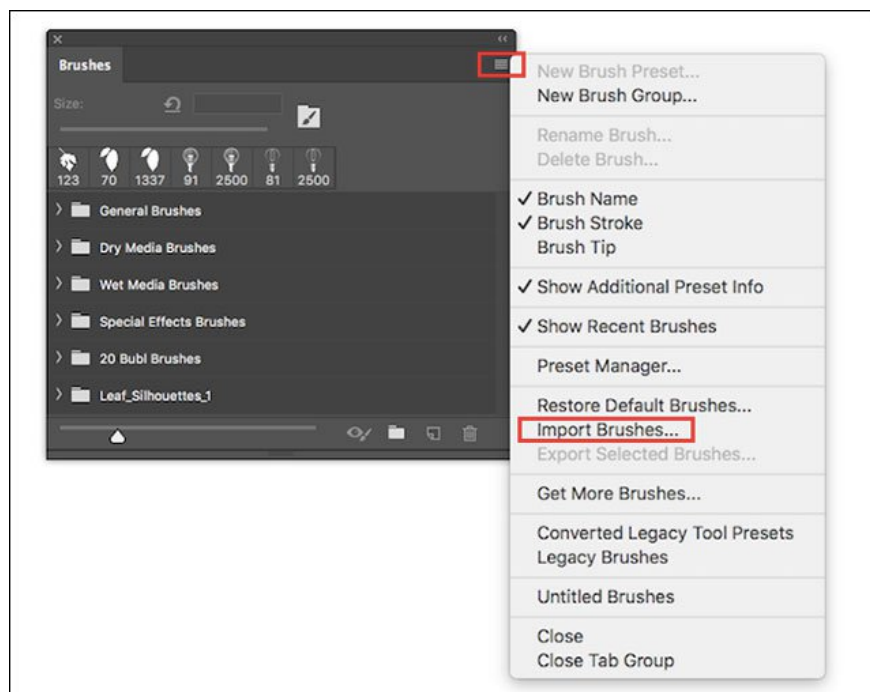

The latest Adobe Photoshop version brings a lot of new brushes, but if you still want to install your own brushes on Photoshop, this is the way.

Photoshop users already have a set of brushes in the software, but depending on their needs, each person can create their own Custom Brush to save it in ABR format and use it later. If you have already obtained a Brush somewhere and want to install it on Photoshop, here are 4 very simple steps.

## How to install Brush in Photoshop

1. **Step 1** : Go to **Menu > Windows > Brushes** to open the **Brushes** control panel
2. **Step 2** : Click the menu button in the right corner and select **Import Brushes**.
3. **Step 3** : In the new window that opens, go to the place where you saved the ABR file and double click on it.
4. **Step 4** : The brush you just selected will now be below using Photoshop's brush list.

*Enter Brush into Photoshop*

## **Save the Brush in Photoshop**

If you want to save the existing brush to import into another computer, open the **Brushes** panel and select all brushes. Then click on the menu button and select **Export Selected Brushes**. The brush will be saved in ABR format.
