How to install Dota Underlords on PC

To download Dota Underlords in the current time, you will have to have the Battle Pass first to join the test phase soon. In the near future, the test phase will be completely free to open in Dota 2 client. You can log into Dota 2 first to download Dota Underlords to your Steam.

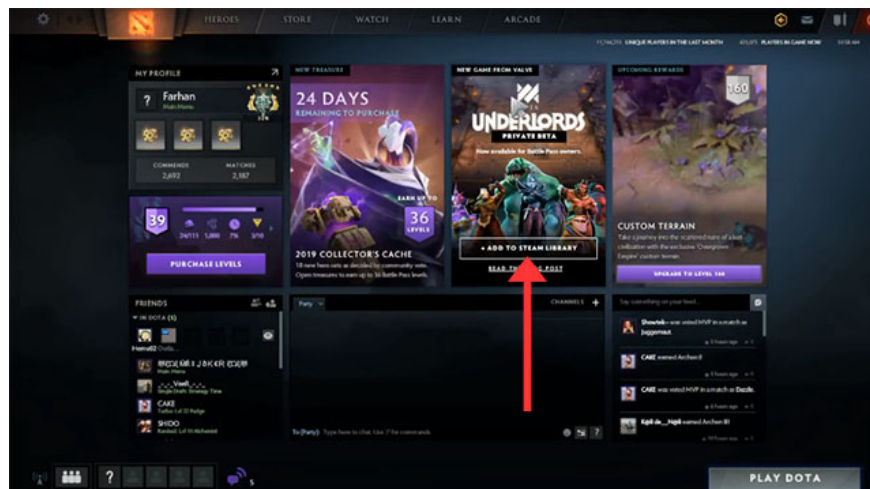

Step 1: First go to your game library in Steam and open up Dota 2, if not, you must download Dota 2.

In the main interface of Dota 2, you must purchase The International Battle Pass 2019. Click Purchase Battle Pass to buy.

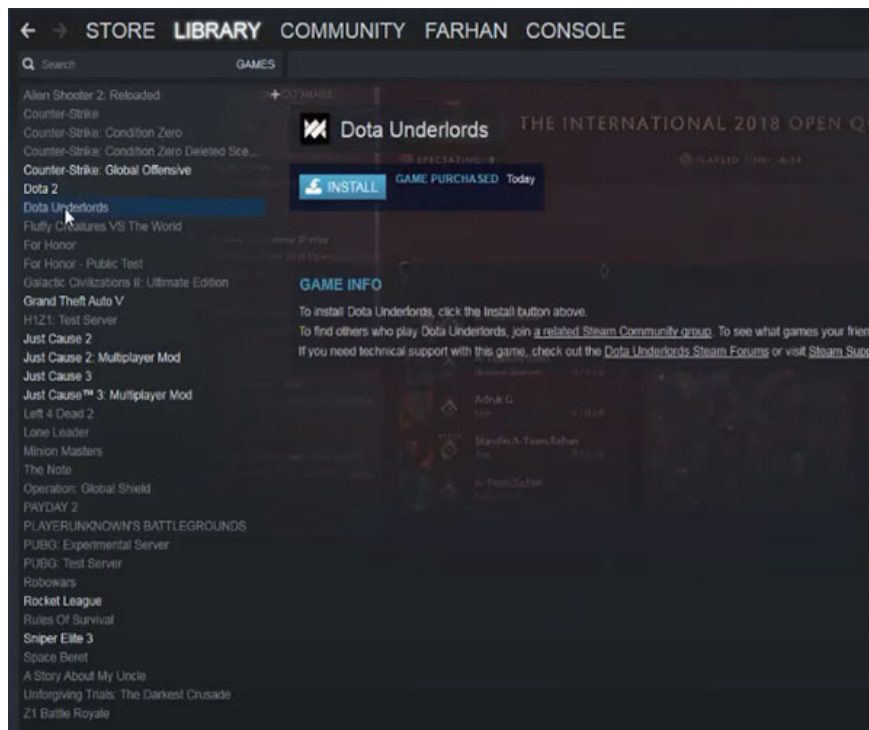

Once you have purchased the Battle Pass, you will see the Add to Steam Library button, click it to install Dota Underlords.

If you see the message shown below, you are successful.

Then go to your **Library** on **Steam** and click **Install** to install and play Dota Underlords on your computer.

It is expected that for gamers without Battle Pass, Valve will also open for free in the near future. For iOS and Android versions, people also have to wait for the upcoming time for Valve to launch a free PC version in the near future (will be updated when the game officially opens).

Once officially launched, Dota Underlords will be free to play and link multiple systems together (PC, iOS, Android). That means you can play together in both normal and ranking mode.
