

# Instructions for installing Dynamic Island on Windows

Experience Dynamic Island on Windows now in a few easy steps today.

Dynamic Island is a new feature introduced by Apple on its latest iPhone line. If you want to experience this feature but do not have an iPhone 14 series, you can install Dynamic Island on Windows. Discover how to install and use right through the article below.

## Dynamic Island features on Windows own

Through installation on Windows, Dynamic Island can display various content, including:

1. **Date and time:** Dynamic Island will display the date and time, in addition you can view the calendar year by clicking the calendar icon and scrolling.
2. **Weather:** When you switch to the weather section, Dynamic Island will display the corresponding weather situation, temperature and weather icon.
3. **Memory:** Displays the percentage of used RAM.
4. **Battery:** Battery status, charging or not charging is displayed on Dynamic Island.
5. **Music player:** Dynamic Island on Windows will display the duration, the name of the song as well as the sound wave icon when you listen to music. You can expand the music player by clicking on the sound wave icon.
6. **Shutdown:** Includes a profile and two buttons Shutdown, Restart.

## Instructions to download and install Dynamic Island on Windows via XWidget

If you want to experience Dynamic Island on Windows, you first need support from the desktop skin mod tool - XWidget. Also you will need to download the Dynamic Island Widget on Windows. Specifically, the steps are as follows:

### Step 1

Download XWidget [HERE](#). Then proceed to extract and install this software on your device.

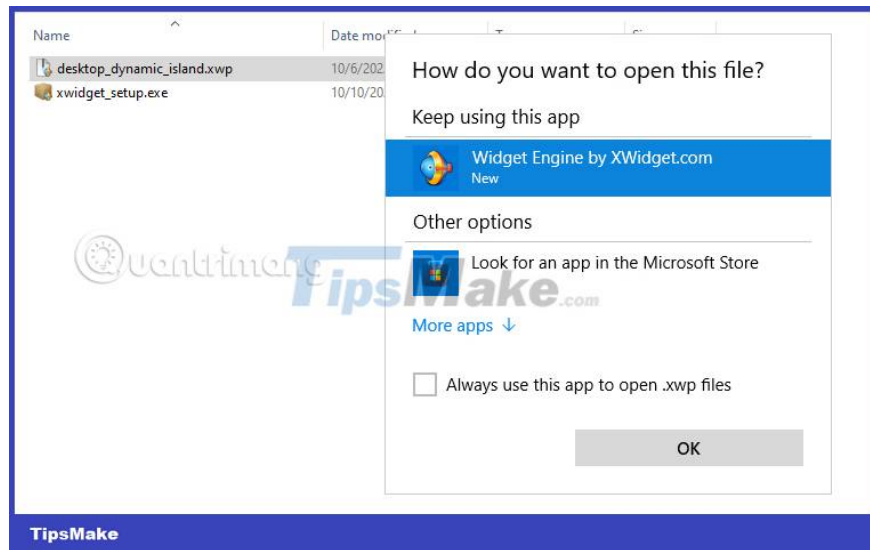

### Step 2

Next, proceed to download the Dynamic Island Widget on Windows [HERE](#).

### Step 3

The next step you need to do is left-click Widget Dynamic Island and select **Open with > Widget Engine by XWidget.com**

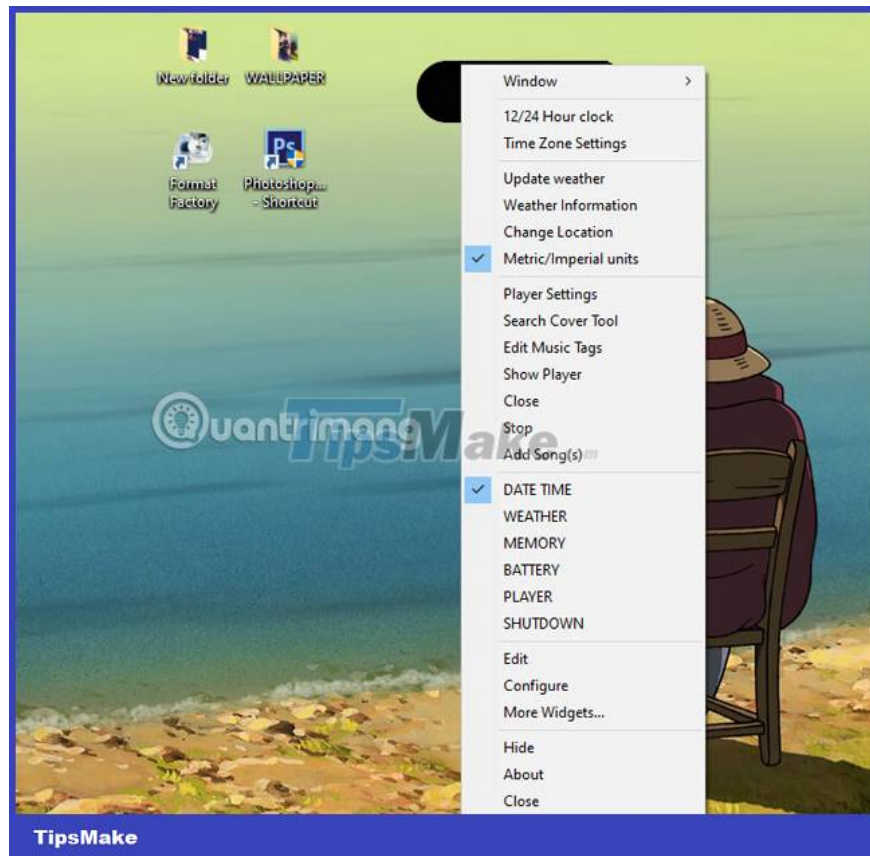

#### Step 4

Through the aforementioned steps, a Dynamic Island icon bar will appear on your desktop. You can left-click to expand the display content of the Dynamic Island bar such as calendar, clock, music player.
