

# Instructions for installing extensions on Edge browser Windows 10

The good news for Edge browser believers is that Microsoft recently allowed to download and install extensions on the Edge browser. To install the extension on the Edge browser Windows 10, please refer to the following article of Network Administrator.

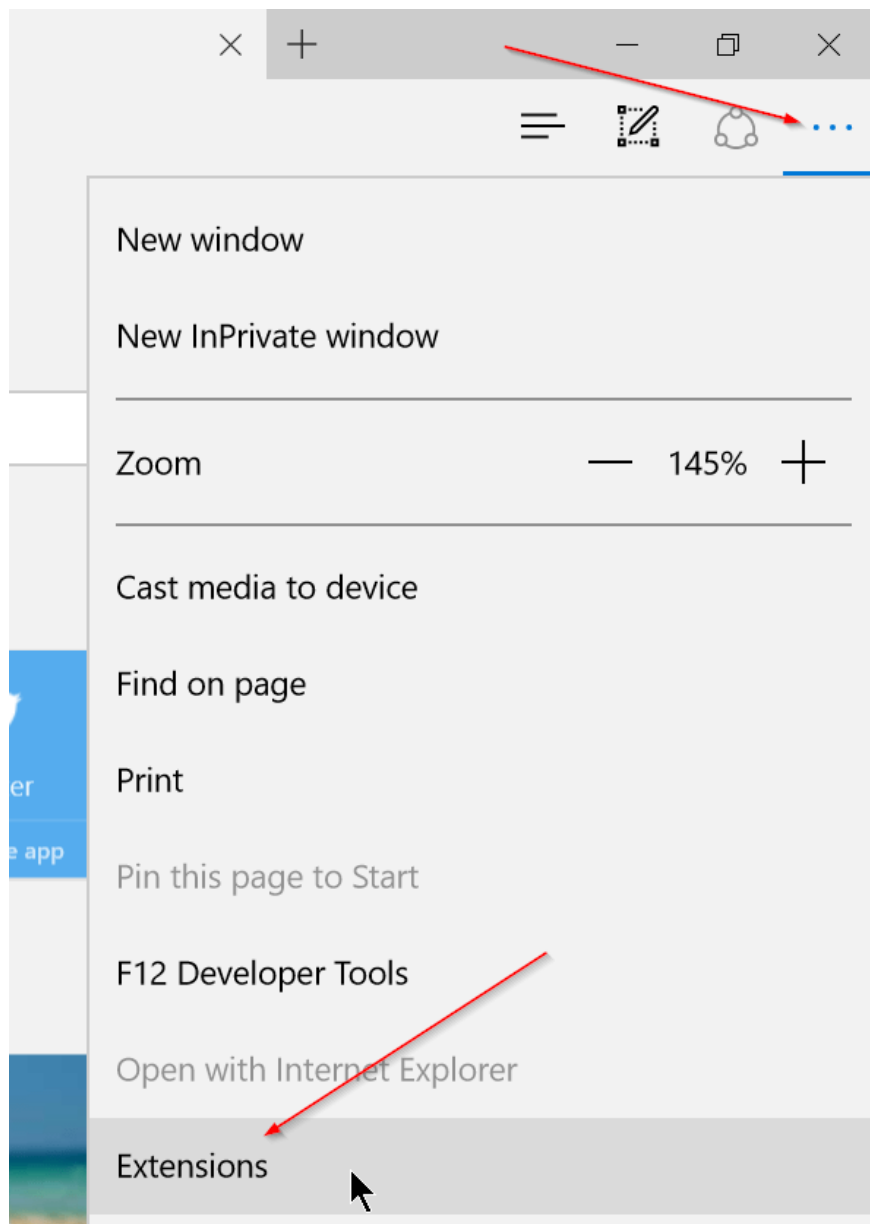

Microsoft Edge Browser (Formerly Project Spartan) is one of the new integrated features on Windows 10. Many people predict that in the future the Edge browser will completely replace the Internet Explorer browser.

The good news for Edge browser believers is that Microsoft recently allowed to download and install extensions on the Edge browser. To install the extension on the Edge browser Windows 10, please refer to the following article of Network Administrator.

## Install the extension on the Edge browser

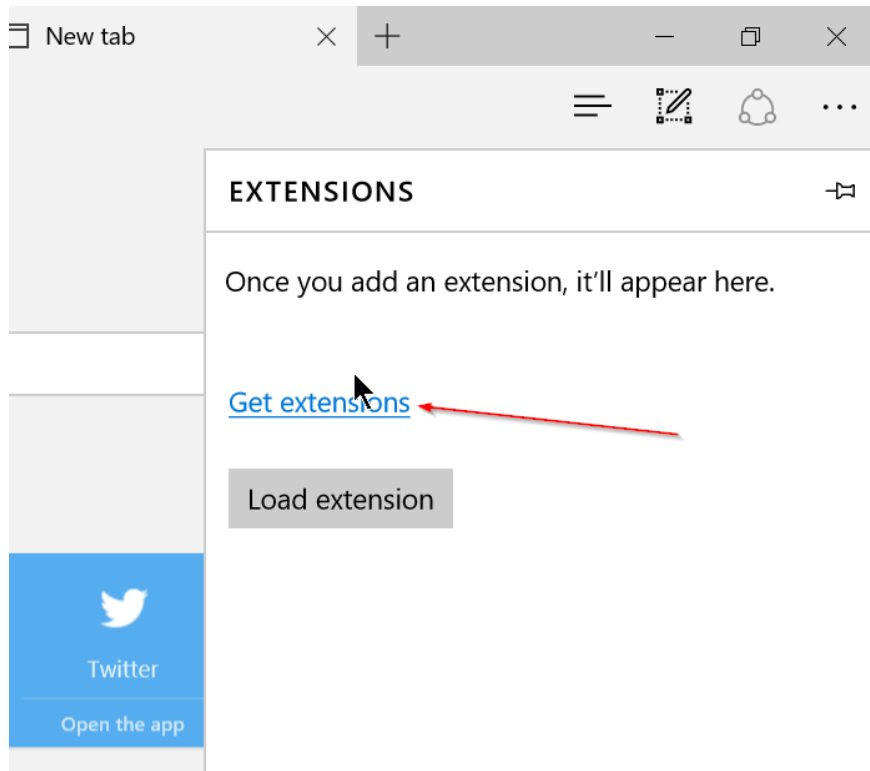

### Step 1:

Open Edge browser, then click **More** (3 dots icon) in the top right corner of the browser, then click Extensions.

**Step 2:**

Click to select **Get extensions** to access the **extension** homepage.

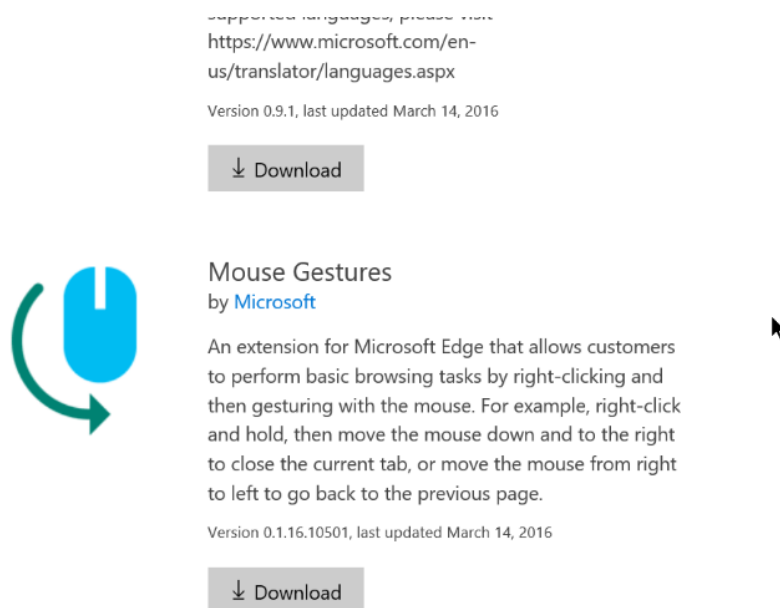

### Step 3:

Scroll down to see a list of available extensions.

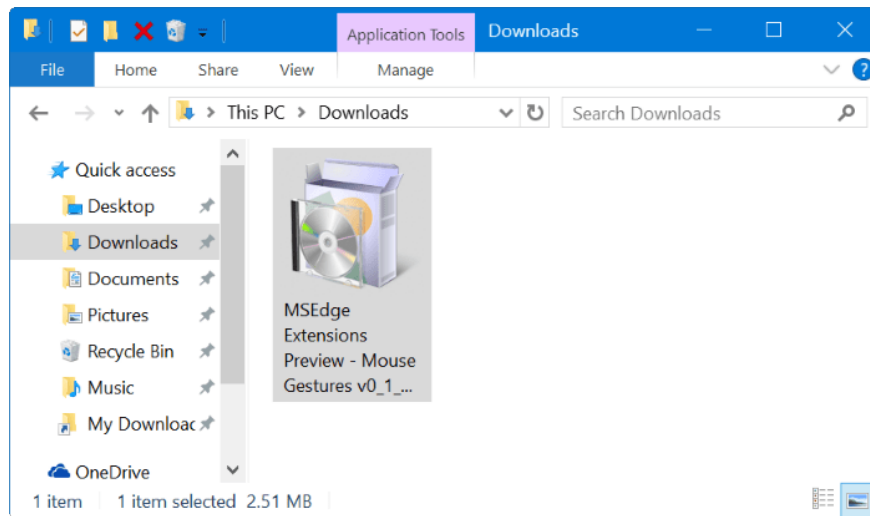

### Step 4:

Click the **Download** button to download extensions to your device.

## Step 5:

After the extension is completed, click the **Run** button. In addition, you can find the directory containing the extension you just downloaded and then double-click on the extension to proceed with the installation.

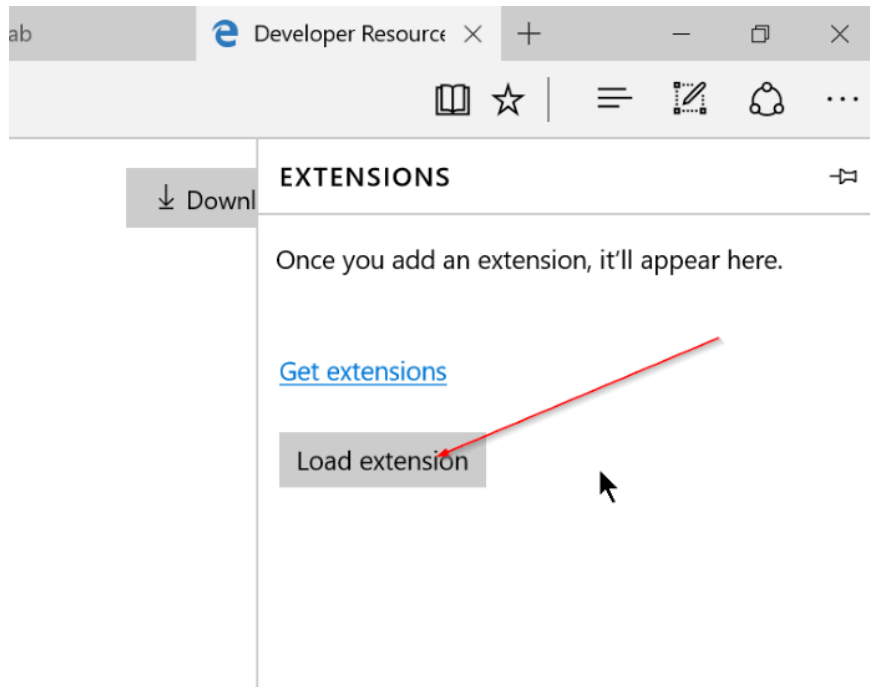

## Step 6:

After the installation process is complete, open your Edge browser and click on **More** (3 dots icon), then click **Extensions**.

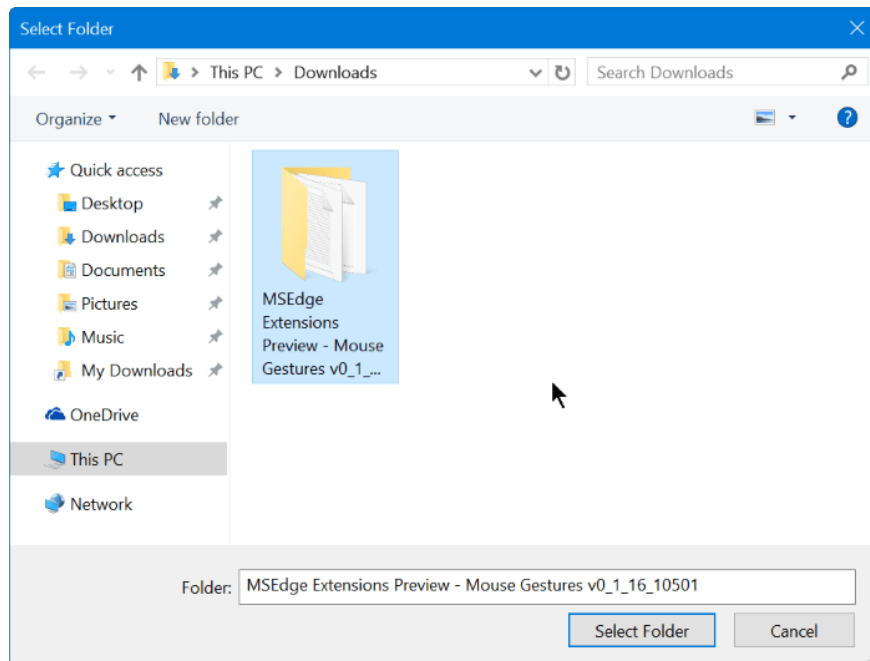

## Step 7:

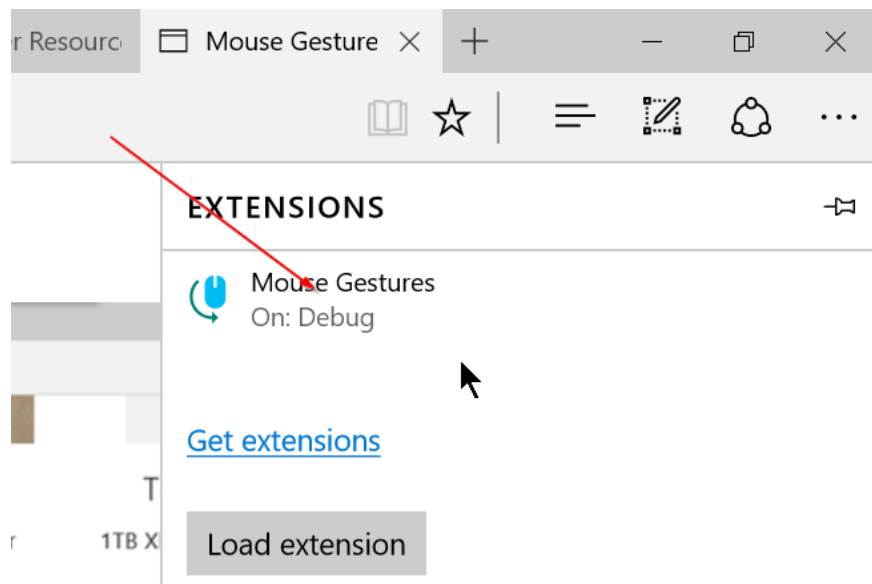

Finally click on the **Load extension** button then navigate to the folder containing the extension you downloaded.

### Step 8:

Select the extension folder, then select **Select Folder** to download the extension you just selected.

So you have completed the installation of the extension on the Edge browser.
