

# Instructions for installing external applications on iPhone without jailbreak

Suppose if you want to download and install applications, programs outside the App Store on iPhone for use and experience. Apple does not allow users to download and install applications outside the App Store. But however, if you want, you can still do this by using Cydia Impactor tool.

Suppose if you want to download and install applications, programs outside the App Store on iPhone for use and experience. Apple does not allow users to download and install applications outside the App Store. But however, if you want, you can still do this by using Cydia Impactor tool.

Cydia Impactor is a tool that makes it easy to move external applications to your iOS device without having to jailbreak the device.

## Step 1:

First you have to download and install **Cydia Impactor** tool . **Cydia Impactor** is a free tool, users can visit [cydiaimpactor.com](http://cydiaimpactor.com) to download the correct version of their operating system, or the version for macOS or Windows. After downloading Cydia Impactor, proceed to extract the file to get the executable file.

## Step 2:

The next step is to have the application's **.ipa file** . The reason is because some game / application files must have a .ipa extension to successfully transfer to your iPhone.

Each application will have a different .ipa file but the steps to create a .ipa file are the same.

Note that the **DEB** file does not work with **Cydia Impactor** .

### Step 3:

After you have the .ipa file of the application, proceed **to connect your** iOS device to your Mac or Windows computer with a USB cable and iTunes.

If your Mac or Windows computer does not yet have iTunes, you can download iTunes to your device and install it.

1. Download iTunes for Mac [here](#).
2. Download iTunes for Windows [here](#).

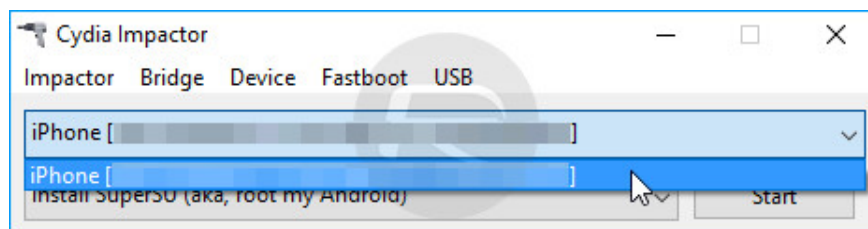

### Step 4:

Run the **Cydia Impactor** executable file that you just downloaded and extract it in the previous step.

Name	Date modified	Type	Size
AdbWinApi.dll	8/12/2016 7:09 AM	Application extens...	96 KB
AdbWinUsbApi.dll	8/12/2016 7:09 AM	Application extens...	62 KB
fc46ded9423f090e5cab87dc70fd832ffb7b...	8/12/2016 7:32 AM	Personal Informati...	4 KB
Impactor.dat	8/12/2016 7:09 AM	DAT File	2,744 KB
Impactor.dll	8/12/2016 7:09 AM	Application extens...	8,712 KB
Impactor.exe	8/12/2016 7:14 AM	Application	9,110 KB
WinSparkle.dll	8/12/2016 7:09 AM	Application extens...	922 KB

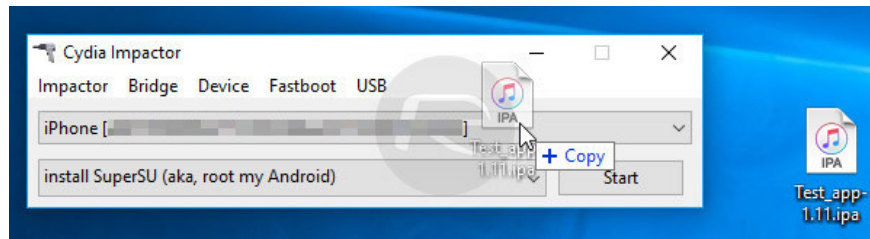

### Step 5:

When the Cydia Impactor launches, from the Dropdown menu you choose to connect the device (connect device).

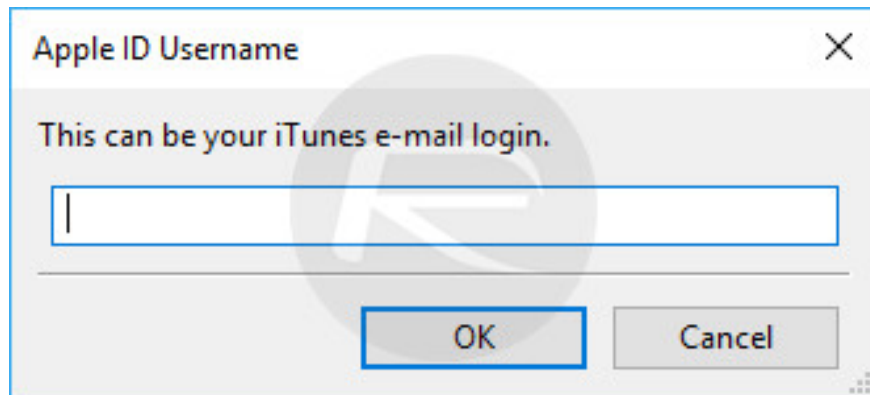

### Step 6:

Next drag and drop the .ipa file to download the application into the Cydia Impactor window. You will be asked for Apple ID to log in to the device.

### Step 7:

Your task is to **enter the Apple ID** and password into it and click **OK**.

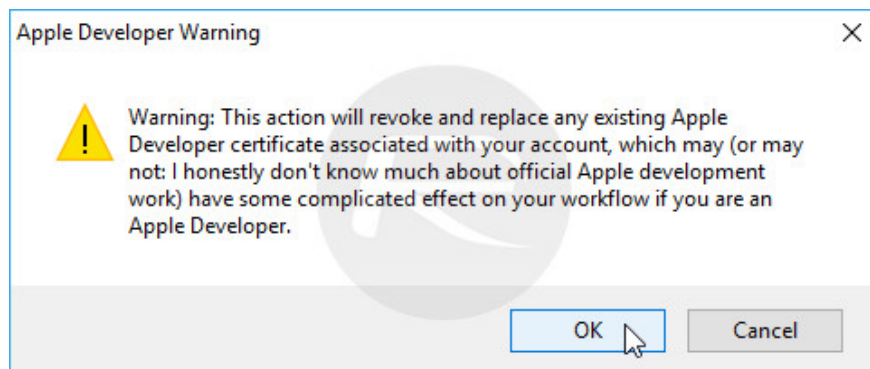

### Note:

If using a free ID account, the application will expire in 7 days, so you will have to repeat the same steps.

### Step 8:

If a warning dialog box appears, click **OK** to continue.

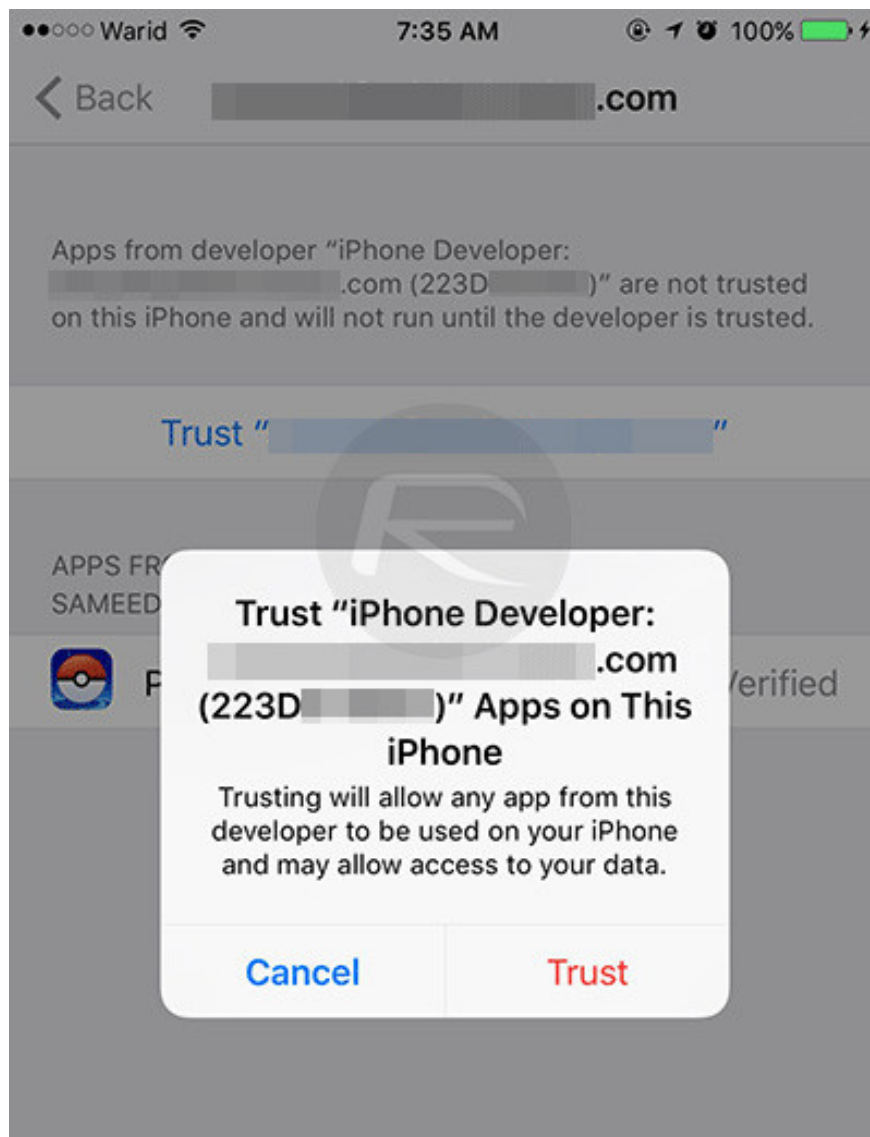

### Step 9:

The process takes a few seconds, so you'll have to wait a while.

### Step 10:

Finally go to **Settings => General => Profile & Device Management** and find the application profile you just installed. Click **Trust** to verify and allow the application to run.
