

# Instructions for installing fingerprint sensor on LG G6 phone

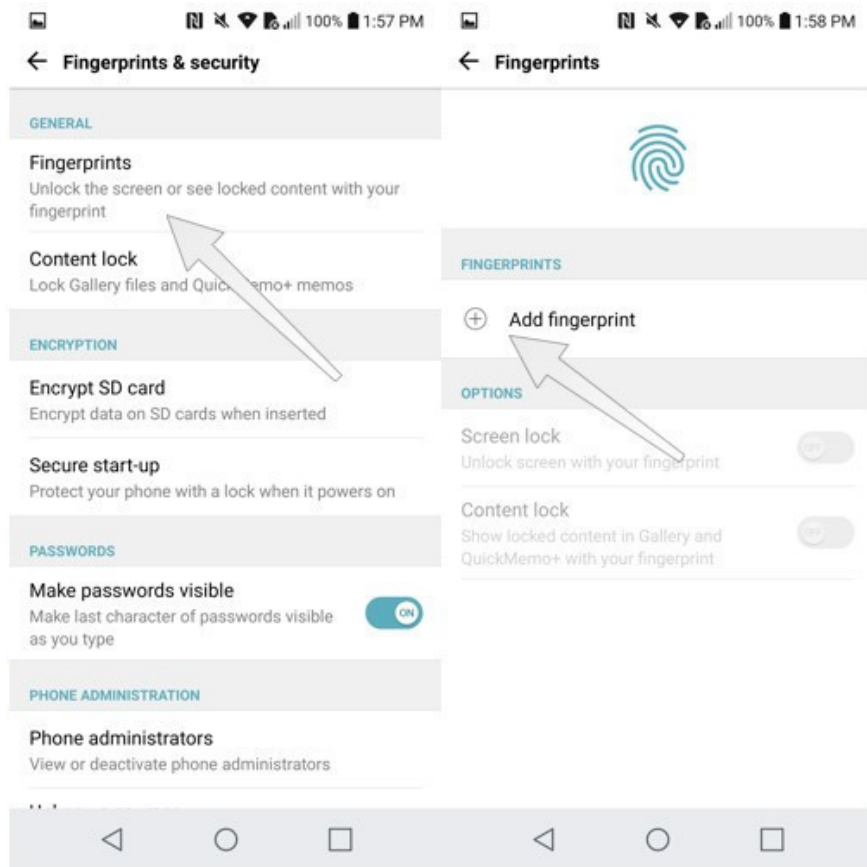

By installing a fingerprint sensor, you can do a lot of things on your LG G6 phone such as locking content in the photo library and QuickMemo + application and unlocking with fingerprints. The article will show you how to install the fingerprint sensor on your LG G6 phone.

By installing a fingerprint sensor, you can do a lot of things on your LG G6 phone such as locking content in the photo library and QuickMemo + application and unlocking with fingerprints. To be able to install the fingerprint sensor on your LG G6 phone, follow these steps:

1. Swipe from the upper corner of the screen to open the **Notification Shade** bulletin board.
2. Click on the **Settings** icon with a pinion image in the upper right corner of the bulletin board.
3. Select **General** .
4. Go to **Fingerprints & Security> Fingerprint** .

1. Select **Add fingerprint** .
2. Then place your finger on the fingerprint sensor on the back of the device and let the device scan your fingerprint a few times until the instruction has been installed.

Then you can use fingerprints to quickly unlock on LG G6.
