Instructions for installing Flash Player for browsers on computers. Flash Player is a commonly used browser to run Flash content like videos or web games. If your computer does not have Flash Player installed then of course we cannot view the video

Flash Player is a commonly used browser to run Flash content like videos or web games. If your device does not have Flash Player installed, then of course we cannot watch online videos or play games using the browser.

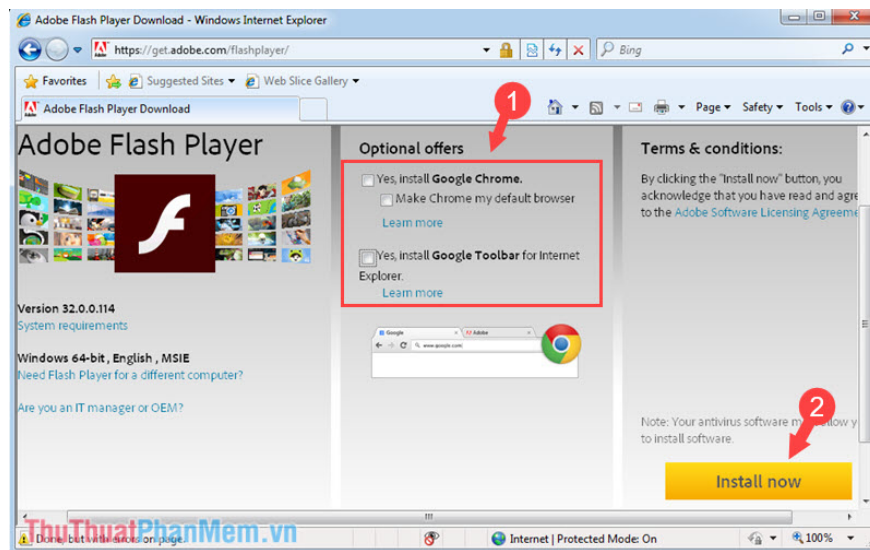

## 1. Download and install Flash Player

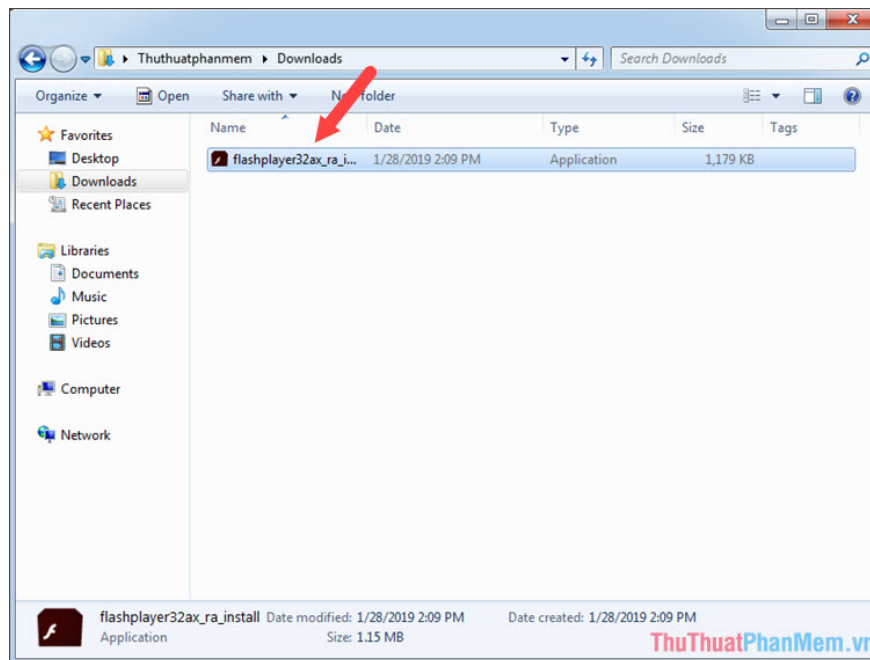

To install Flash Player, we need to download Adobe Flash Player software here.

<https://get.adobe.com/flashplayer/>

**Step 1:** Before downloading **Adobe Flash Player** , uncheck the bundled software installed in the **Optional offers** section and then click **Install now** .

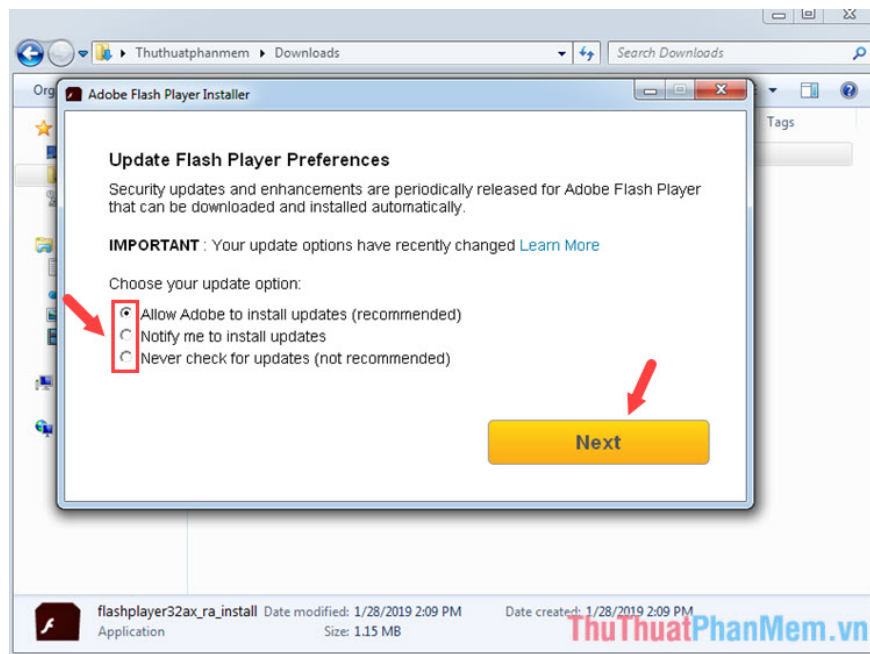

**Step 2:** After downloading, you need to install by double clicking on the *flashplayer32ax\_ra\_install.exe* file .

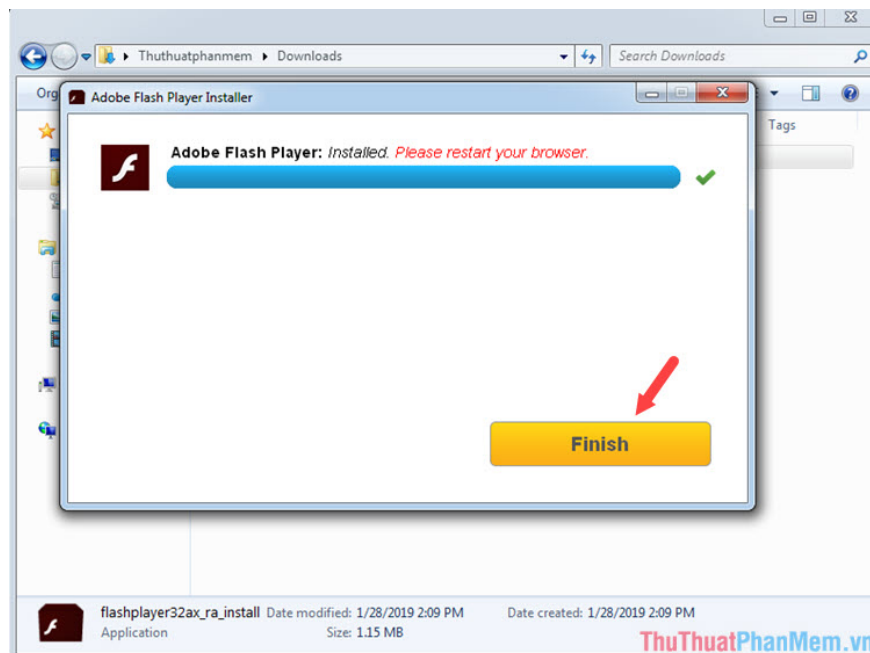

**Step 3:** After running the installation file, **Adobe Flash Player** will ask you to allow the software to update automatically. You can check 1 of the 3 options above.

- **Allow Adobe to install updates:** Automatically update when a new version is available.
- **Notify me to install updates:** Notify you when new updates are available.
- **Never check for updates:** Never check for new updates.

After ticking the options you like, click **Next** to continue.

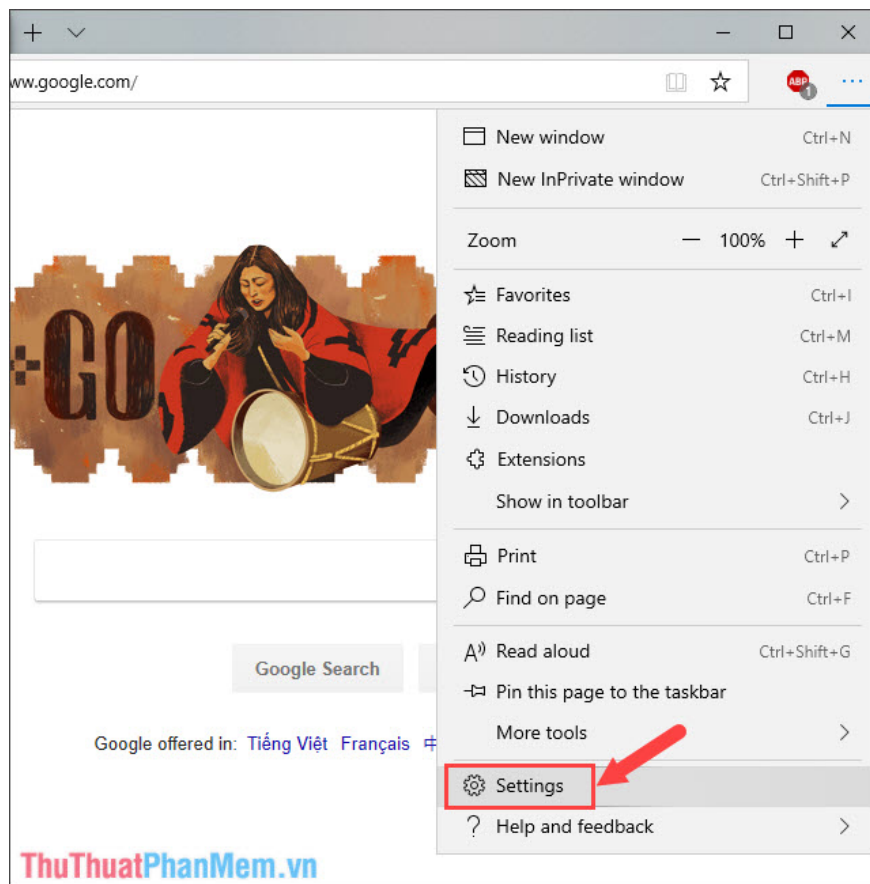

**Step 4:** After installation is complete, you click **Finish** to complete. However, you need to restart active browsers like Mozilla Firefox, Internet Explorer . for Adobe Flash Player to work on your phone.

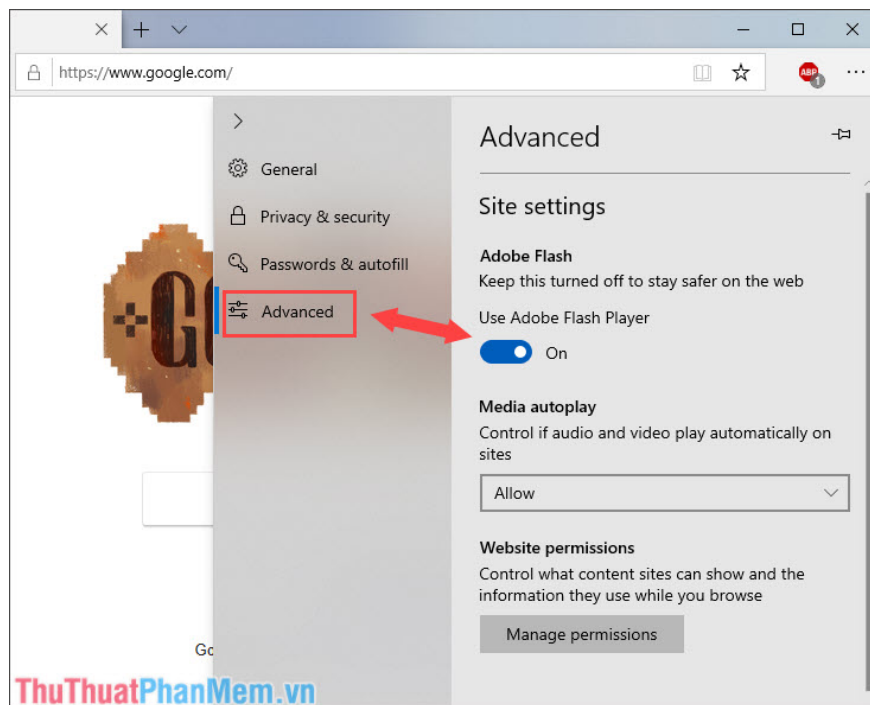

## 2. Turn on the Flash Player for the browser

### a. For Microsoft Edge browser

**Step 1:** Click on the 3 dots in the rightmost corner and select **Settings** .

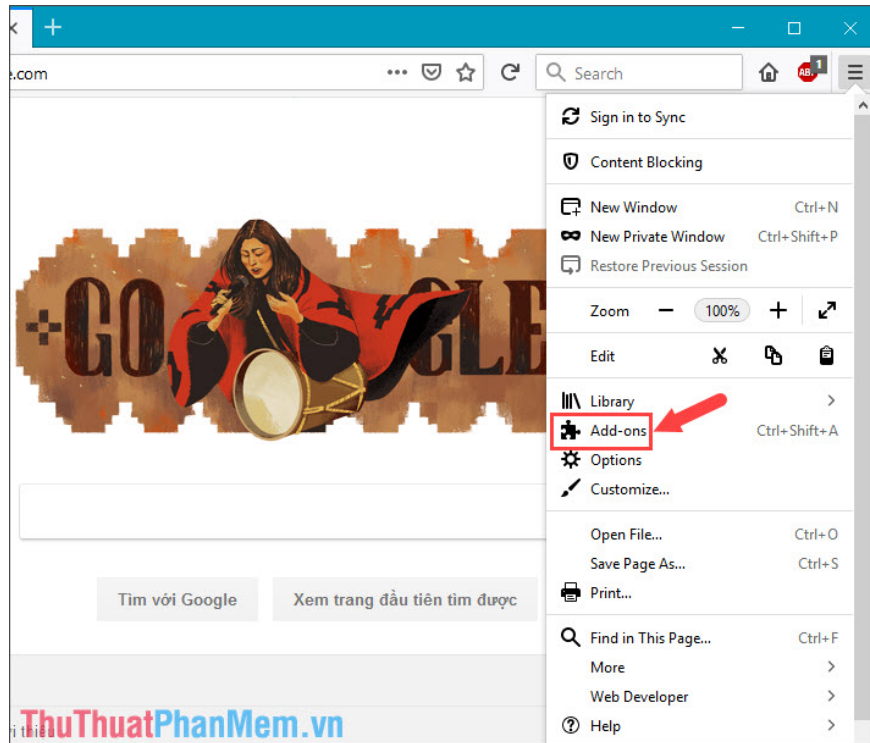

**Step 2:** Switch to the **Advanced** tab and switch the **Use Adobe Flash Player** switch to **On**.

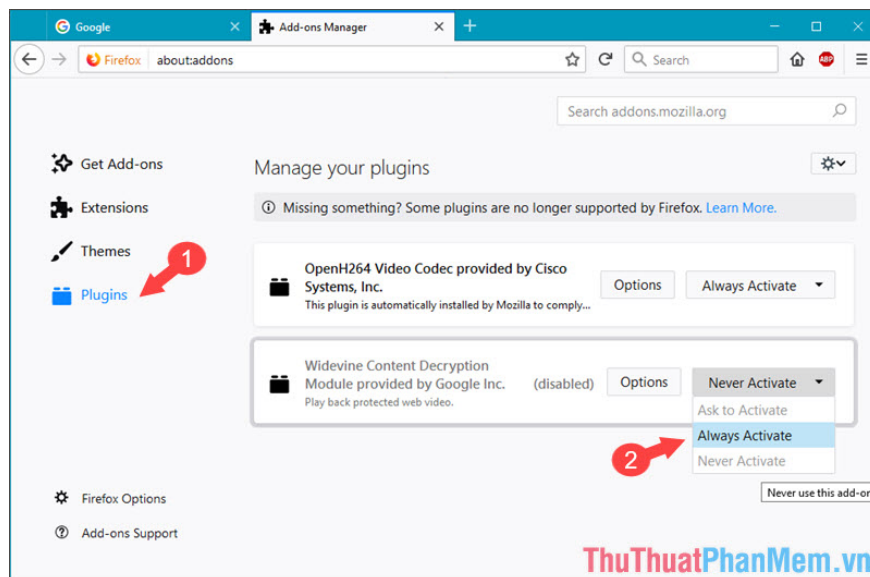

**b. For Firefox browser**

**Step 1:** After opening Firefox, click on the 3 dashes in the top right corner and select **Add-ons** .

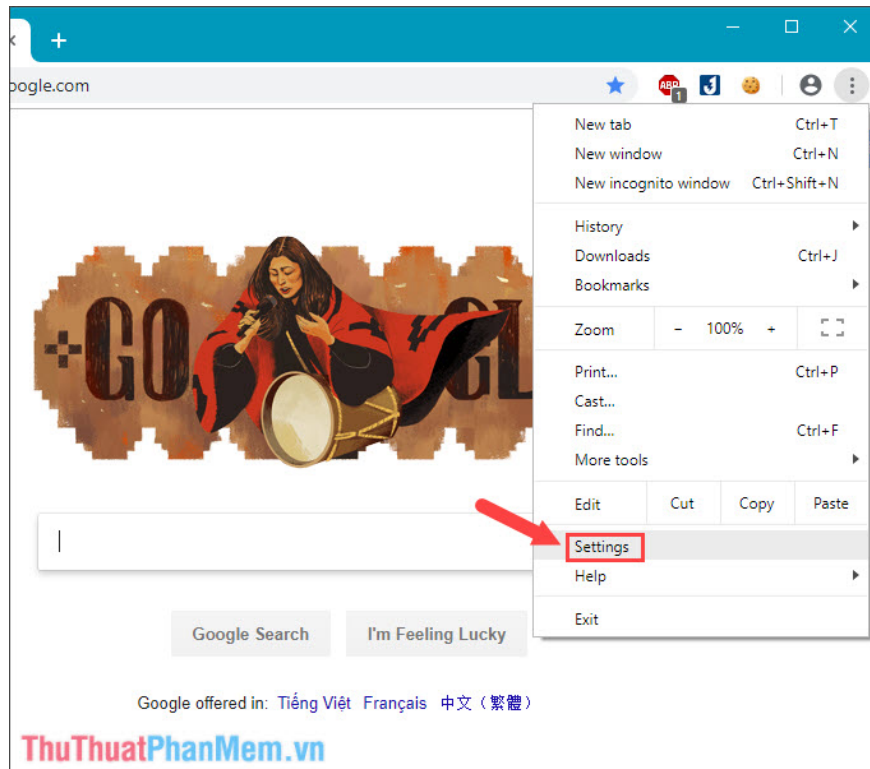

**Step 2:** Go to Plugins and set **Widevine Content Decryption Module** to **Always Activate** .

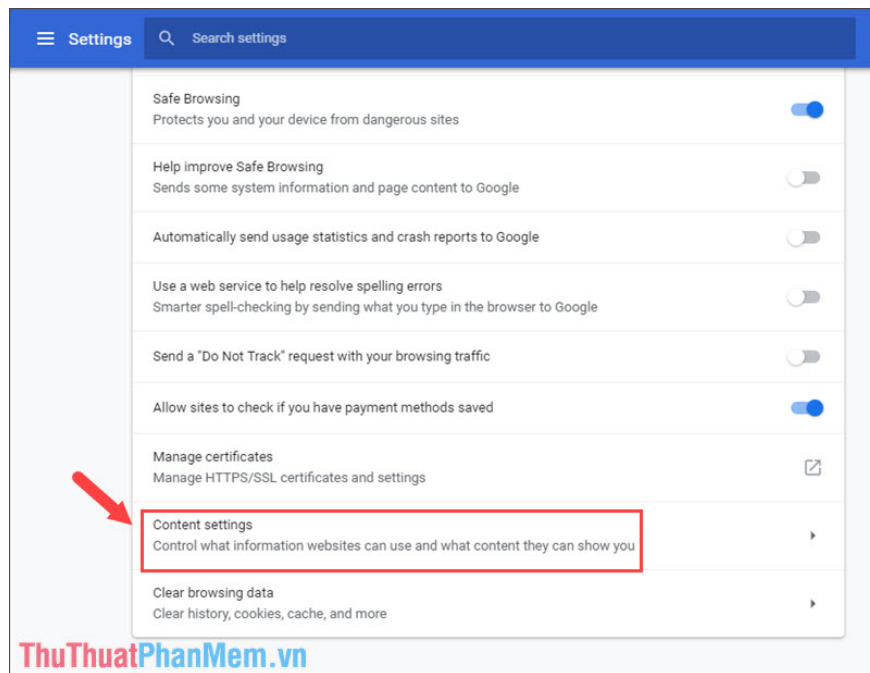

### c. For Google Chrome browser

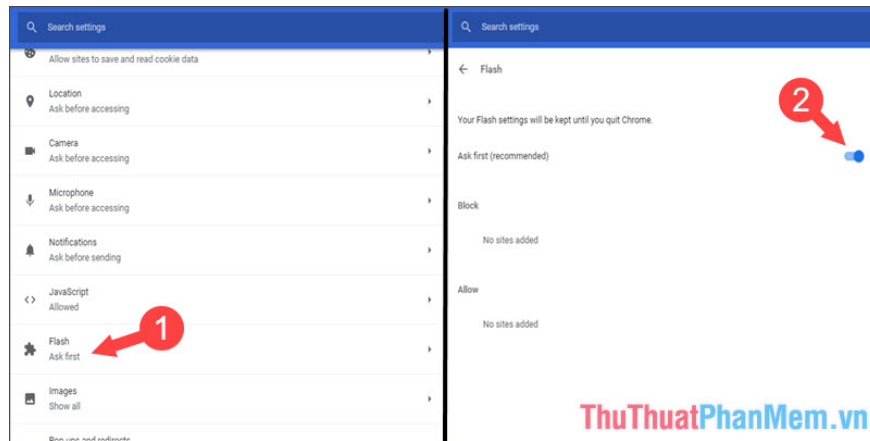

**Step 1:** Click on the icon 3 dots in the top right corner and select **Settings** .

**Step 2:** Scroll down to find the **Content Settings** section and click on that item.

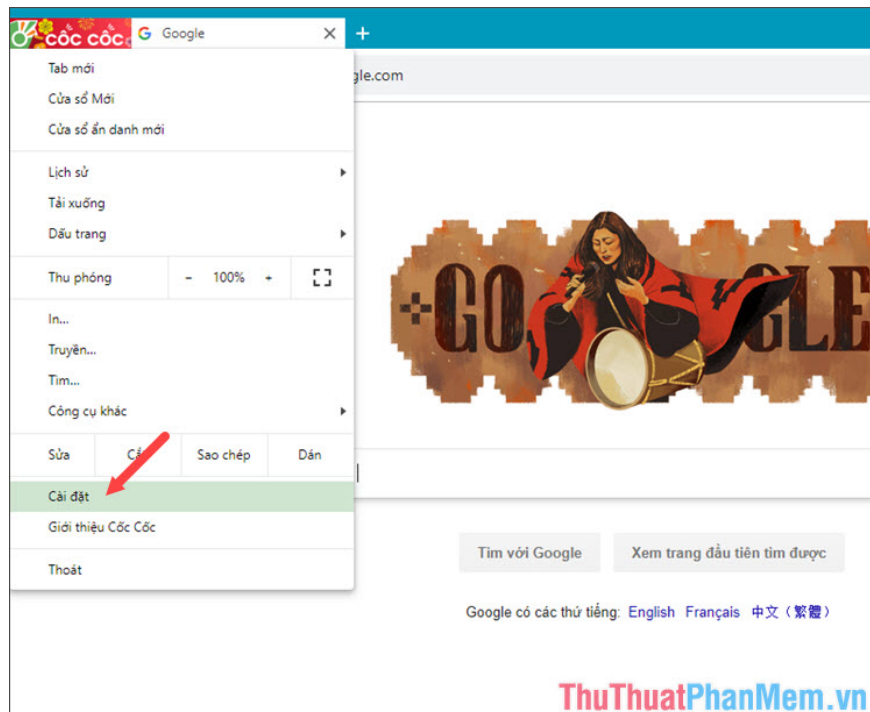

**Step 3:** Choose **Flash** and switch **Ask first** to **On** .

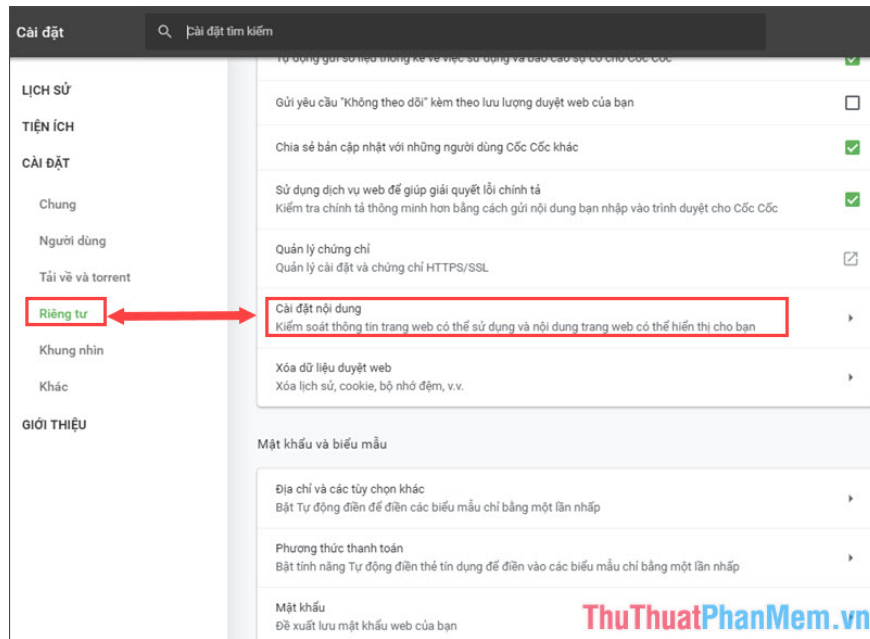

#### d. For C?c C?c browser

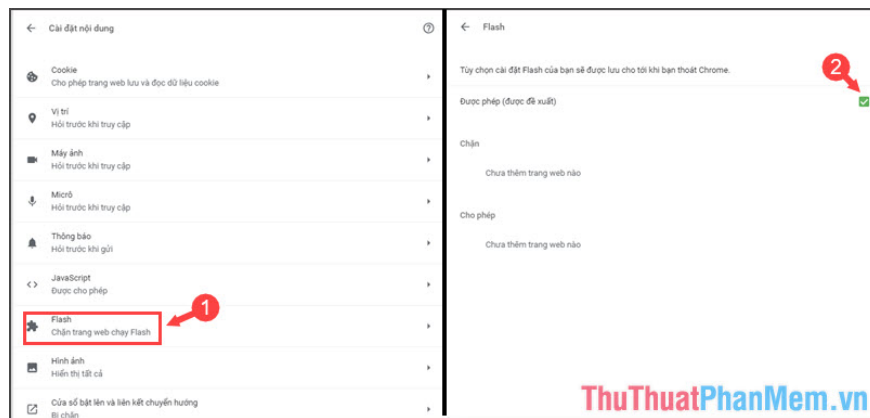

**Step 1:** Click on the Coc Coc icon and then select **Install** .

**Step 2:** Go to **Privacy** section => **Content settings** .

**Step 3:** You select the item Flash and **tick Allowed** to turn on Flash Player.

After installing Flash Player for the browser, you can play Flash games, watch online videos on your computer browser. Good luck!
