

Instructions for installing, updating and using iTunes on Windows 10

iTunes is one of the 'indispensable' apps for iOS users. The application provides the ability to manage data and copy music, movies, photos, books, ringtones, applications, In the article below, Network Administrator will guide you how to install, update and use iTunes on Windows 10 computers.

iTunes is one of the 'indispensable' apps for iOS users. The application provides the ability to manage data and copy music, movies, photos, books, ringtones, applications, . In the article below, Network Administrator will guide you how to install, update and use iTunes on Windows 10 computers.

1. Download and install iTunes on Windows 10

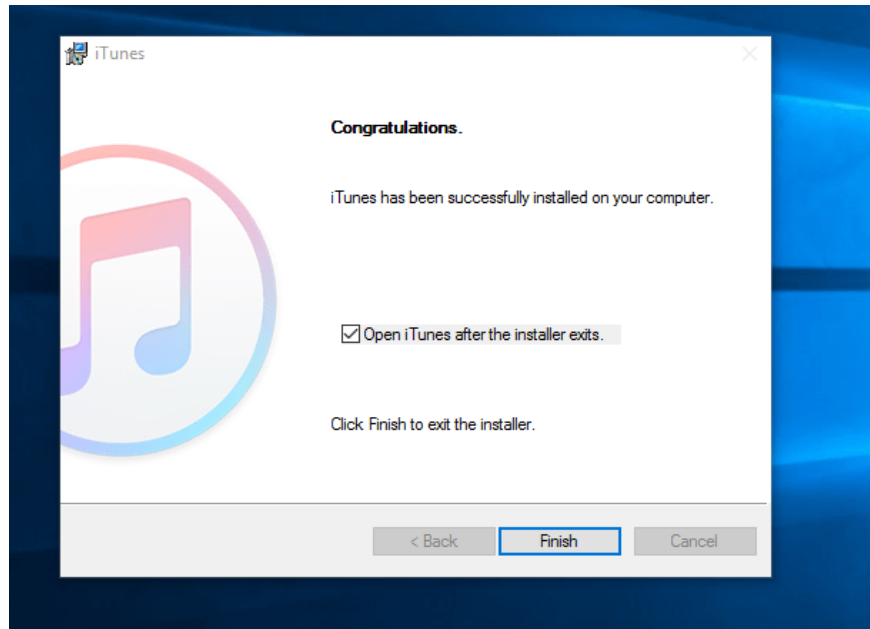

1. First access the iTunes download page.
2. Next in the left pane of the page, under **iTunes 12.x.xx for Windows 7 or later**, enter the email address into the Email Address frame and select the country in the Location frame and then click **Download Now**.

Note:

You need to make sure you have checked the system requirements before downloading iTunes.

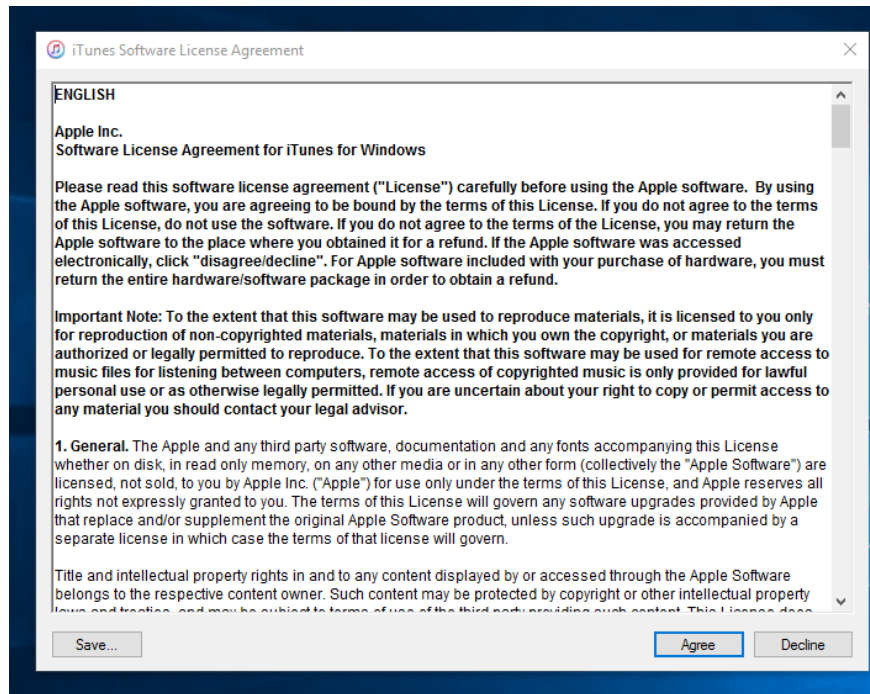

3. At this point the system will begin the download process of the iTunesSetup.exe installation file.
4. After completing the download process, run the installation file that you just downloaded and follow the on-screen instructions to install iTunes. The installation process will take about 3-5 minutes.

Note:

When the UAC popup window appears, click **Yes** to continue.

5. When you open iTunes for the first time, the software's terms screen appears. Here you click **Accept** to continue.

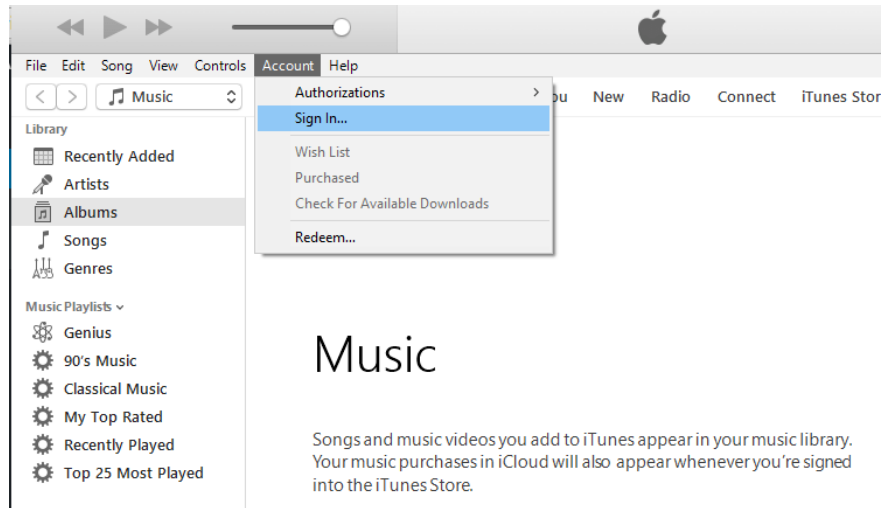

6. Now the iTunes application will open successfully.

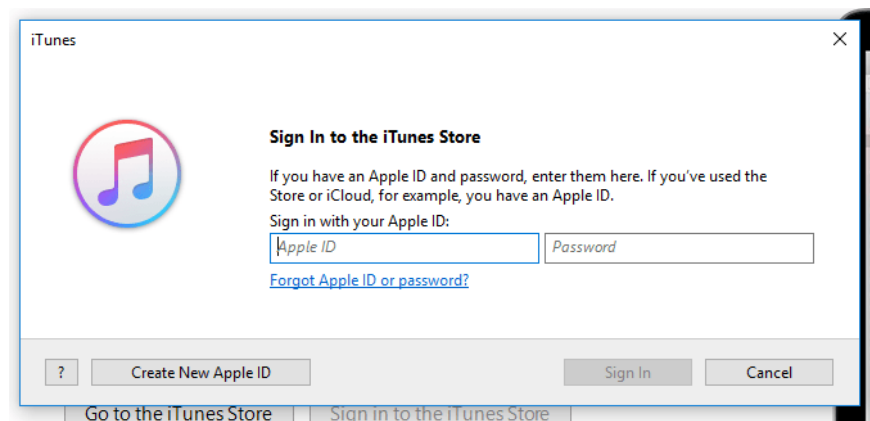

2. Use iTunes to create Apple ID

After successfully installing iTunes on your Windows 10 laptop or computer, you will be asked to log in with Apple ID for future use. If you don't have an Apple ID, you can apply the steps below to create an Apple ID:

1. Open the iTunes application.

2. Click the **Account** tab in the top corner of the iTunes application window. Here you click the **Sign in** option . At this time, a window appears asking you to add login information. If you already have an account, you can always use that account.

3. If you do not have an account, click **Create New Apple ID** . And follow the steps below:

1. On the iTunes Store introduction window, click the **Continue** button .

2. Read the terms carefully, then select the option **I have read and agreed to these terms and conditions** and click the **Agree** button .

3. On the Apple ID details window, complete the information including Email ID, password, date of birth and recovery email and click **Continue** .

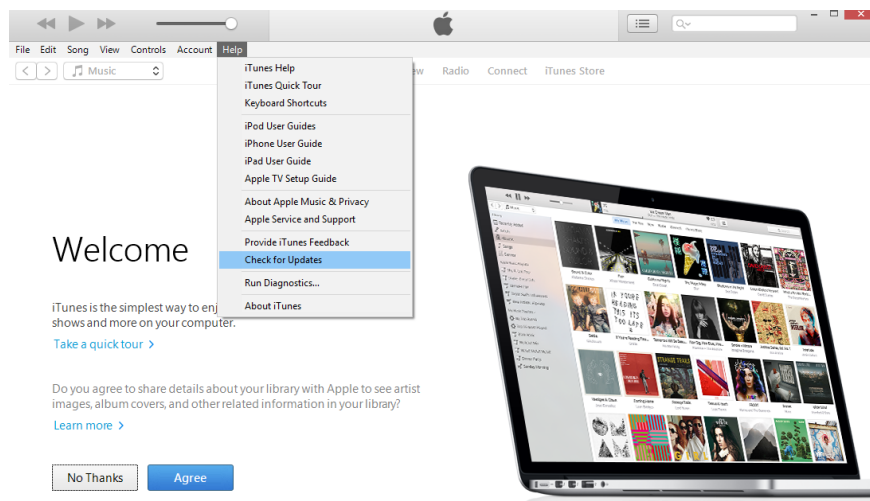

4. Select any credit card mentioned after entering your bill payment details and then click on '**Create Apple ID**'.
5. Once completed, confirm your email.
6. Finally log in with the iTunes account you just created.

In addition, you can refer to creating free Apple ID accounts on your computer here.

3. Update iTunes on Windows 10

Suppose in case you just installed iTunes on your Windows 10 computer or laptop and you want to update (update) the latest iTunes version. To do this, follow the steps below:

1. First open the iTunes application.
2. In the top left corner of the Menu Bar, click on the **Help Menu** , then from the context menu, click on the **Check for update option**.

3. A small window appears on the screen. If the latest iTunes version is available, you will get the option to download and install the version.

Note:

If the latest iTunes version is available, you will receive a message: '**This version of the iTunes is the Current Version**'.

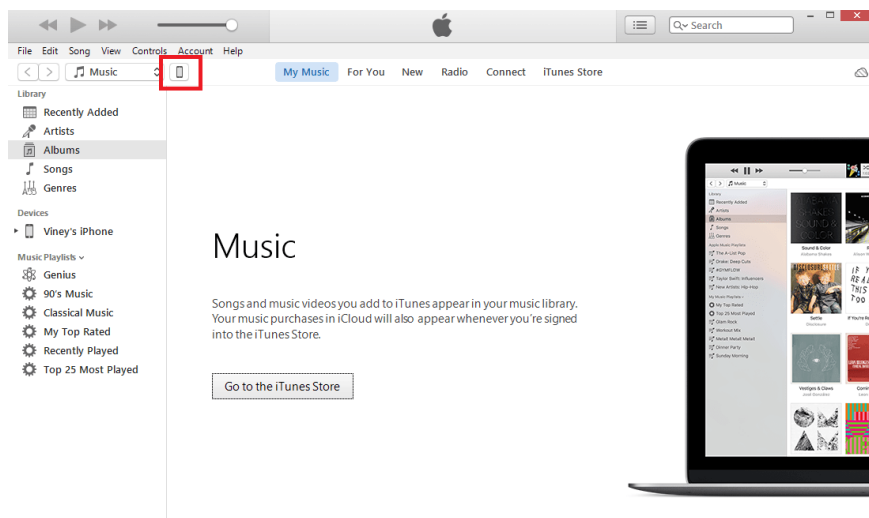

4. Connect your iPhone with iTunes

1. First use the USB cable to connect your iPhone device to the computer, and iTunes will automatically start.
2. A popup window will appear on the screen with the message: '**Do you want to allow this computer to access information on iPhone**'. Your task is to click **Continue** to continue.

3. Next, log in to iTunes using the Apple ID you registered on your iPhone phone. To login, click **Account** => **Sign in** and enter your login information.

4. To view iPhone phone information, click on the phone icon in the top left corner of the window.

All information will be displayed on the screen as shown below:

At the **Summary** tab, you can:

- Update the latest firmware version, if available.
- Back up your device.
- Backup encryption.
- Synchronize music and photos.

Also at the **Apps** tab will display all applications on your iPhone phone. Similarly, **Music and Photos** tab you can sync and manage music and photos on your device. If you want to synchronize your name and calendar

(calendar), switch to the **Info** tab .

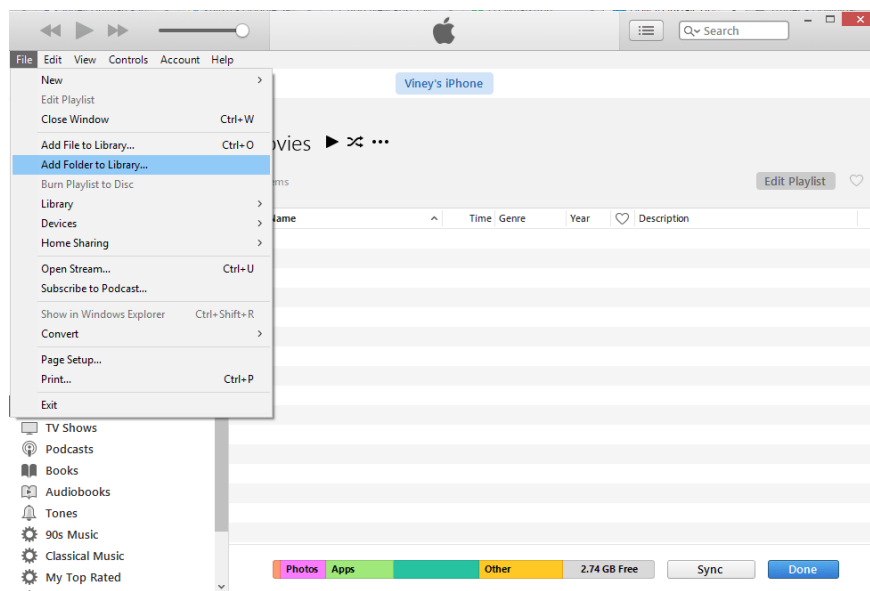

You can also switch to the **On My devices** tab to check whether your photos, songs and videos are on the device.

5. How to import music and video into iTunes on a Windows 10 computer

No need to download music and videos from the iTunes store, you can still import music and videos into iTunes. The first time you open iTunes on your Windows 10 computer, you will be asked to scan your computer for multimedia devices. If you click **Yes** , all media files on your computer will be displayed on iTunes.

In this case you can skip the initial installation step, below are the steps to import music and video to Windows 10 computer:

1. Click **File** in the top corner of the iTunes window.
2. From the File Menu, click on **Add Folder to Library** .

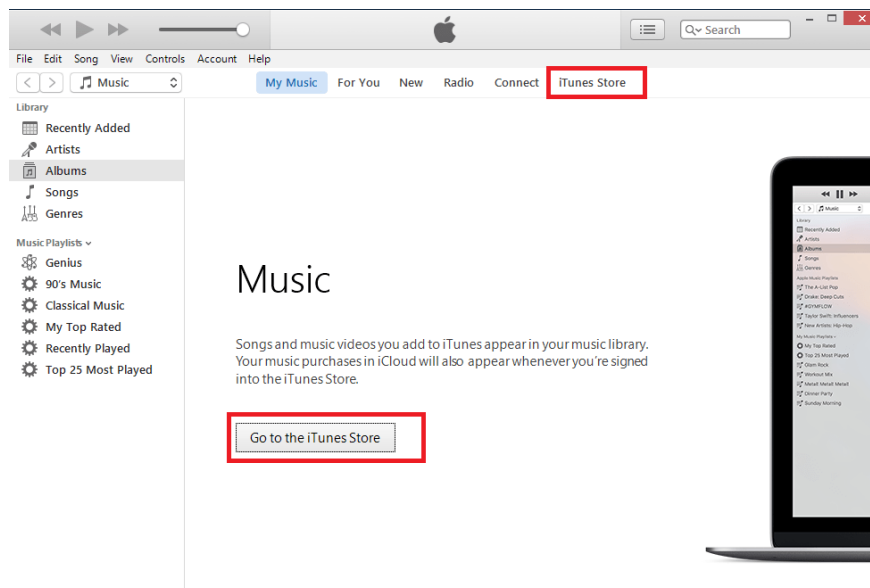

3. Select the folder and add music, videos, and other multimedia files to iTunes.
