

# Instructions for installing Vietnamese for IDM for all versions

Instructions for installing Vietnamese for IDM for all versions. By default, IDM's interface is in English, so it will be a bit difficult for newbies. However, we can completely install Vietnamese language for IDM if desired.

IDM is currently the best download acceleration software available today and is used by a lot of people. By default, IDM's interface is in English, so it will be a bit difficult for newbies. However, we can completely install Vietnamese language for IDM if we want, but this is not an easy task that anyone can do. Therefore, in the following article, Thuthuatphanmem.vn will guide you to install Vietnamese for IDM step by step, please follow along.

**Step 1 :** You access the following link to download Vietnamese package of IDM on your computer

[http://www.internetdownloadmanager.com/languages/idm\\_en.zip](http://www.internetdownloadmanager.com/languages/idm_en.zip)

After downloading we will be 1 file named **idm\_vn.zip**.

You unzip the file will be 3 files **idm\_vn.lng** , **inst\_vn.lng** and **tips\_vn.txt** as shown below:

Name	Date modified	Type	Size
idm_vn.lng	19/07/2016 02:40	LNG File	108 KB
inst_vn.lng	19/07/2016 02:40	LNG File	8 KB
tips_vn.txt	19/07/2016 02:40	Text Document	3 KB

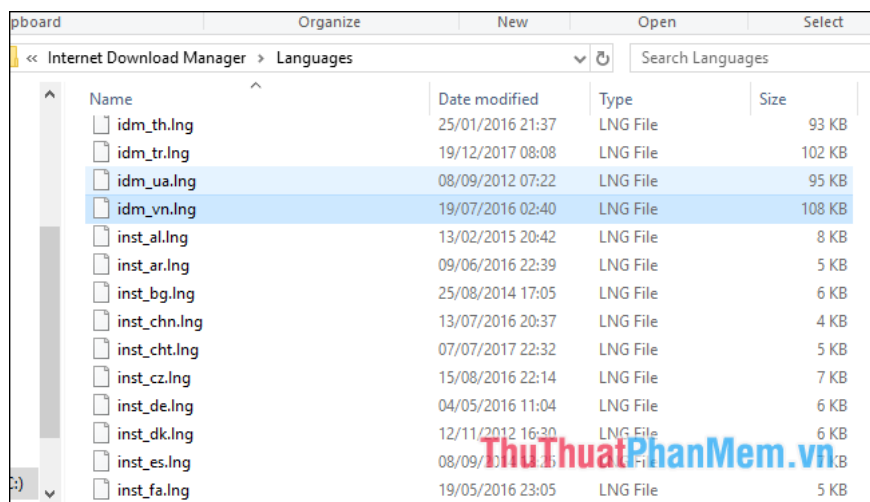

**ThuThuatPhanMem.vn**

**Step 2 :** Copy the above 3 files to the installation directory of IDM according to the following path:

C: Program Files (x86) Internet Download Manager Language

Or:

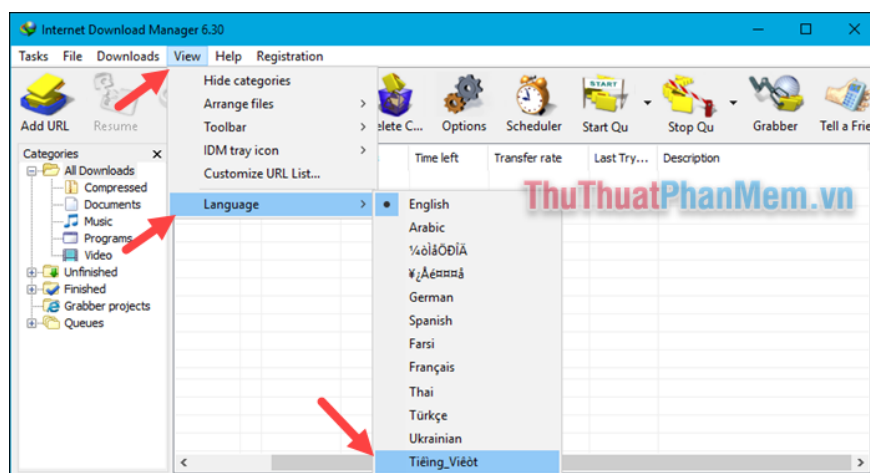

C: Program Files Internet Download Manager Language

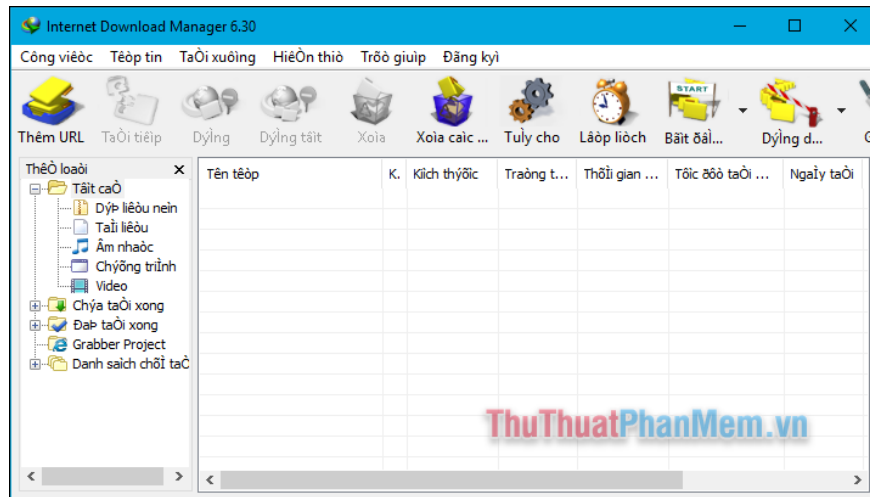

**Step 3** : After copying, you exit IDM completely (right click on IDM icon on the taskbar, select Exit) and then turn on IDM again.

At the interface of the program you choose **View -> Language -> Vietnamese** .

A message appears, click OK.

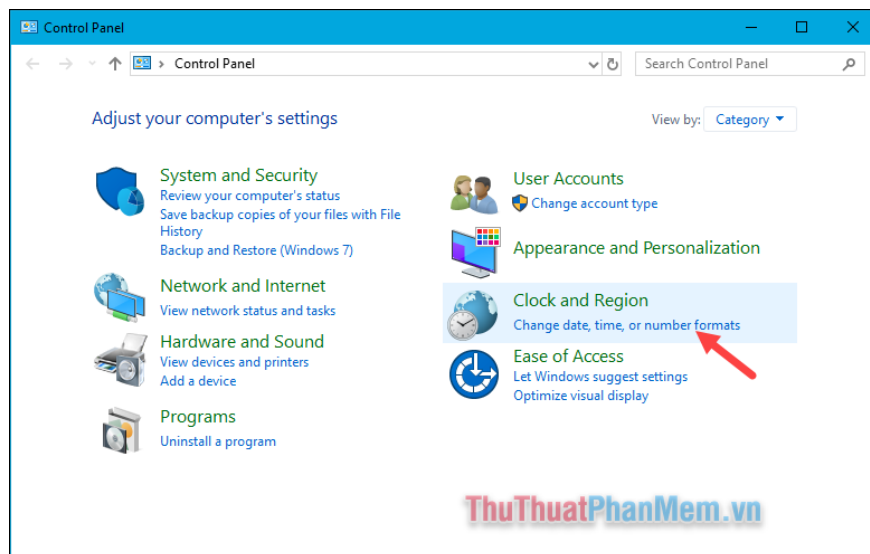

So IDM has switched to the Vietnamese interface, but you can see IDM has a font error.

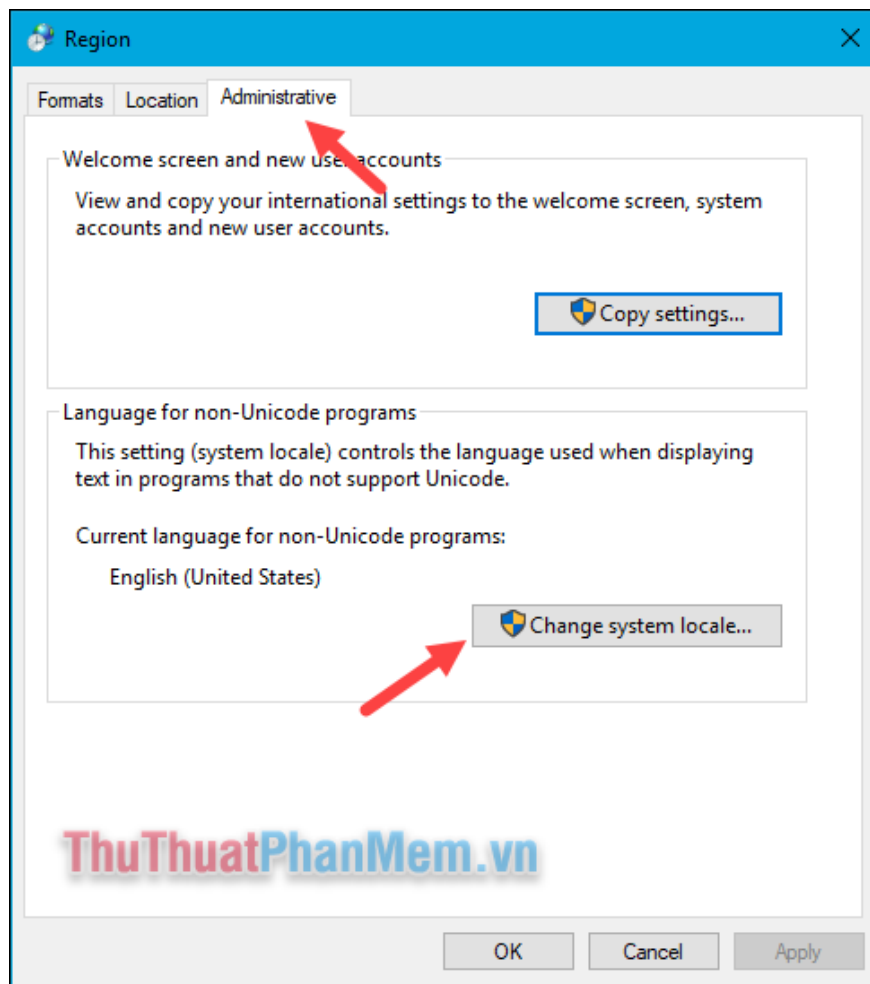

To fix font errors we continue to do the following steps.

**Step 1 : Go to Control Panel .**

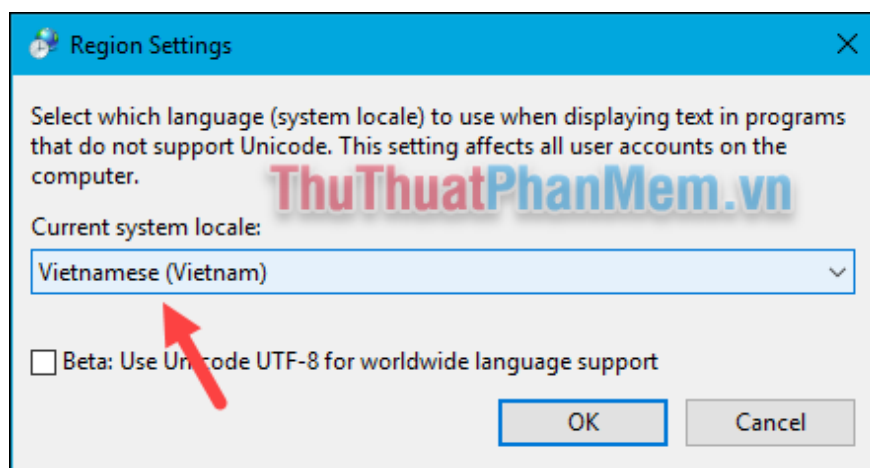

In the Control Panel, select **Change date, time, or number formats**

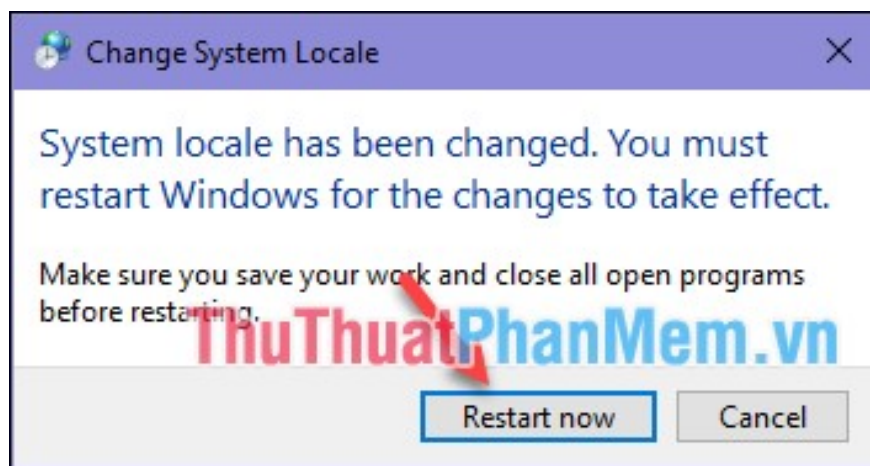

**Step 2 : A new window appears, select the Administrative tab, then select Change system locale .**

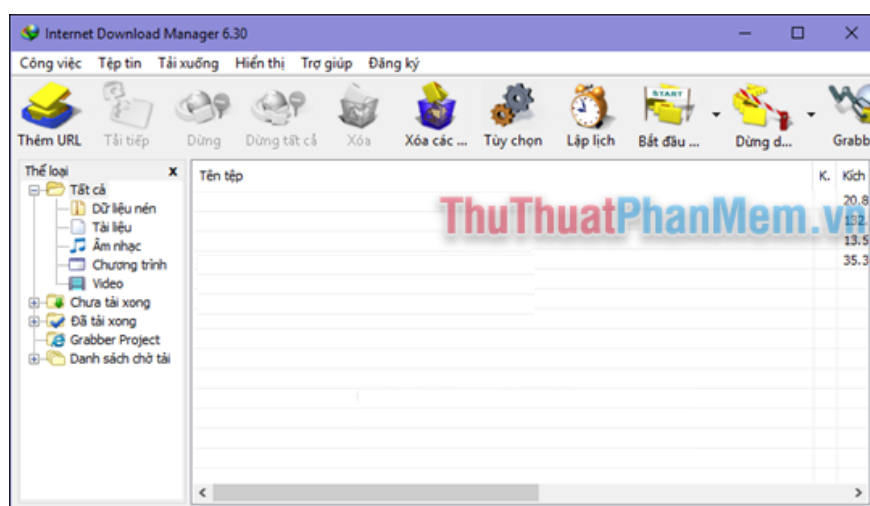

**Step 3** : Choose **Vietnamese** and then click **OK**

Finally, select **Restart now** to restart the computer.

After the computer restarts, open IDM and we have successfully fixed the font error.

Above is a guide on how to install Vietnamese for IDM in all versions and fix font errors when installing Vietnamese for IDM. Hope the article will be helpful to you. Good luck!
