How to *Stream Facebook with your computer*

In this article, TipsMake.com will guide you how to **Live Stream on Facebook by computer via OBS software**

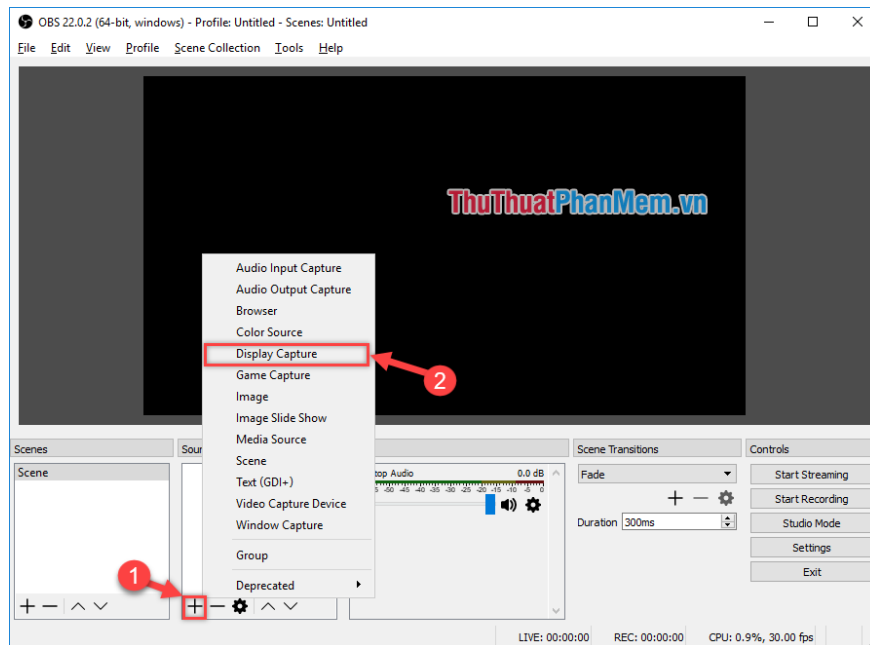

Step 1 : First you download more livestream support software that is being used by a lot of people today, which is OBS software: <https://obsproject.com/>

Step 2 : After the OBS software installation has been completed.

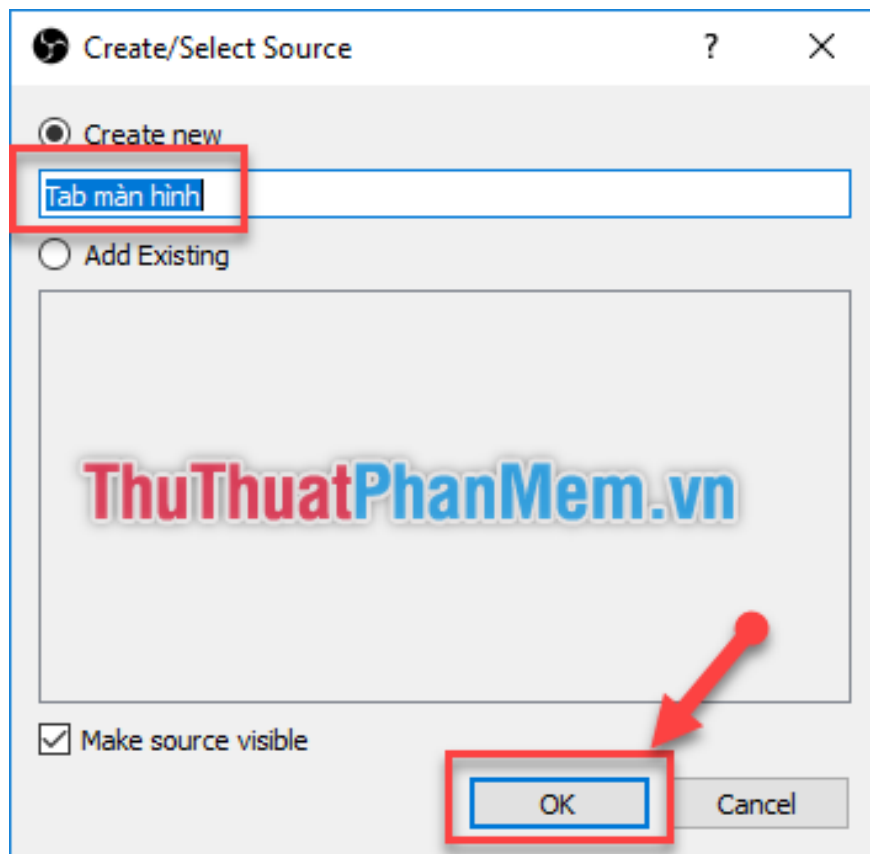

At the interface of the software, in Sources, click the plus sign '+' (1)

Then there will be some source options for you such as **Browser** (Web browser) **Display Capture** (screen display) **Image** (image display) **Game Capture** (showing a specific game) **Window Capture** (showing a specific window) . You can customize it according to your intended use

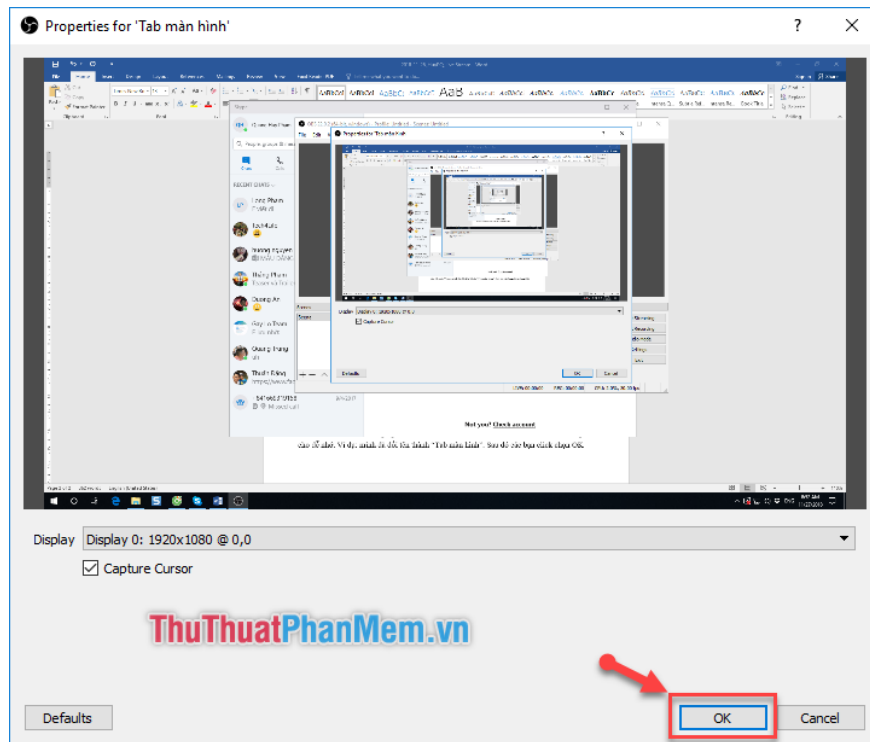

Here I will Live Stream the whole screen so I choose **Display Capture** . (2)

Step 3 : After selecting the source, a new window will appear, you can rename the source to make it easier to remember. For example, I changed the name to ' *Screen Tab* '. Then you click **OK**

Step 4 : A preview window appears, you will see your screen has been returned. Click **OK** to return to the main interface screen.

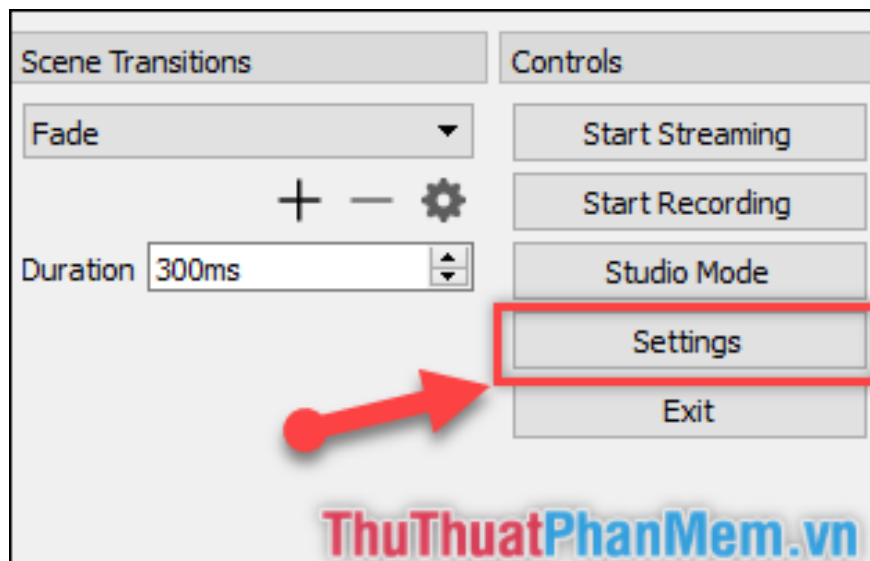

So you have installed a Live Stream source.

Note:

You can add multiple sources to Live Stream at the same time.

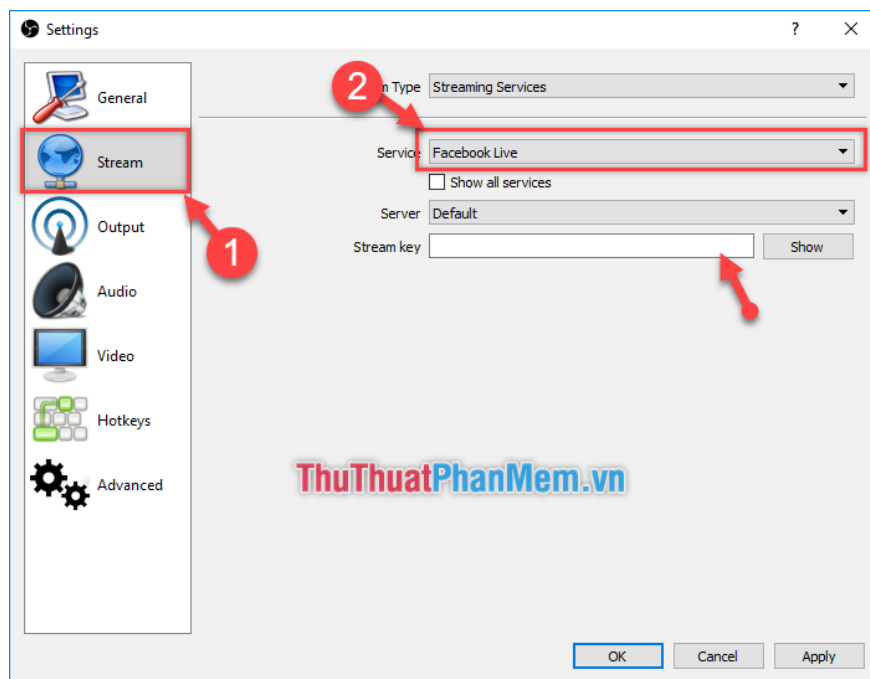

Like gamers when they LiveStream, they can install more sources at the same time to display the game screen (*Game Capture*), display the Webcam (*Video Capture Device*), and display the text running on the screen (*Text*).

Step 5 : Once you've installed all the sources you want to stream. Outside the main interface, click **Settings** in the lower right corner of the screen.

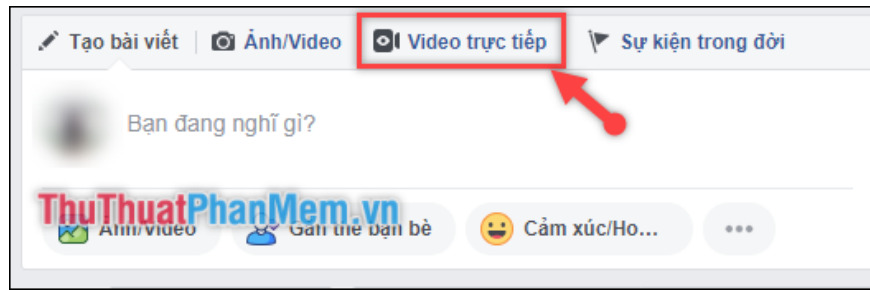

Step 6 : At the **Settings** window:

- (1) Go to the Stream tab
- (2) Optional LiveStream streaming source. You choose the source for **Facebook Live** .

Step 7 : To get the **Stream key** , you need to access your personal Facebook or Fanpage - where you are preparing to stream Livestream.

Click on **Live video** .

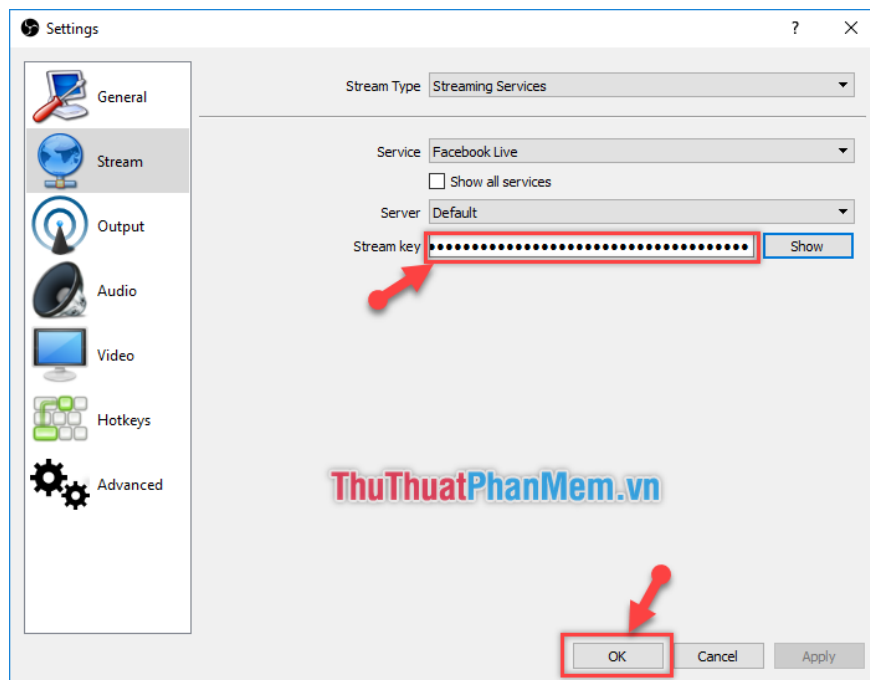

Step 8 : In the new window that appears, switch to the **Connect** tab (1)

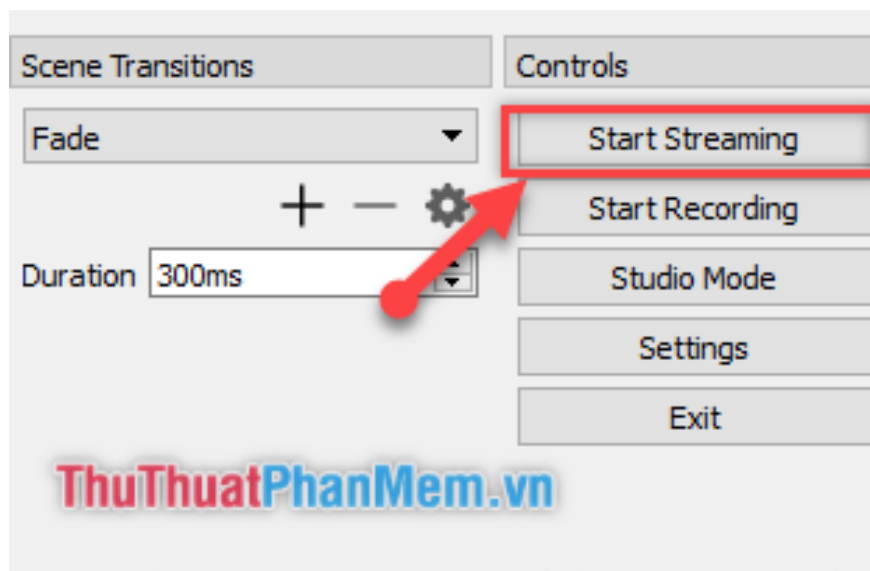

There will appear Streamkey, please Copy / Copy Streamkey stream (2)

Step 9 : Paste the **Stream key** you copied in the Facebook page into the Settings section of the OBS and click **OK**

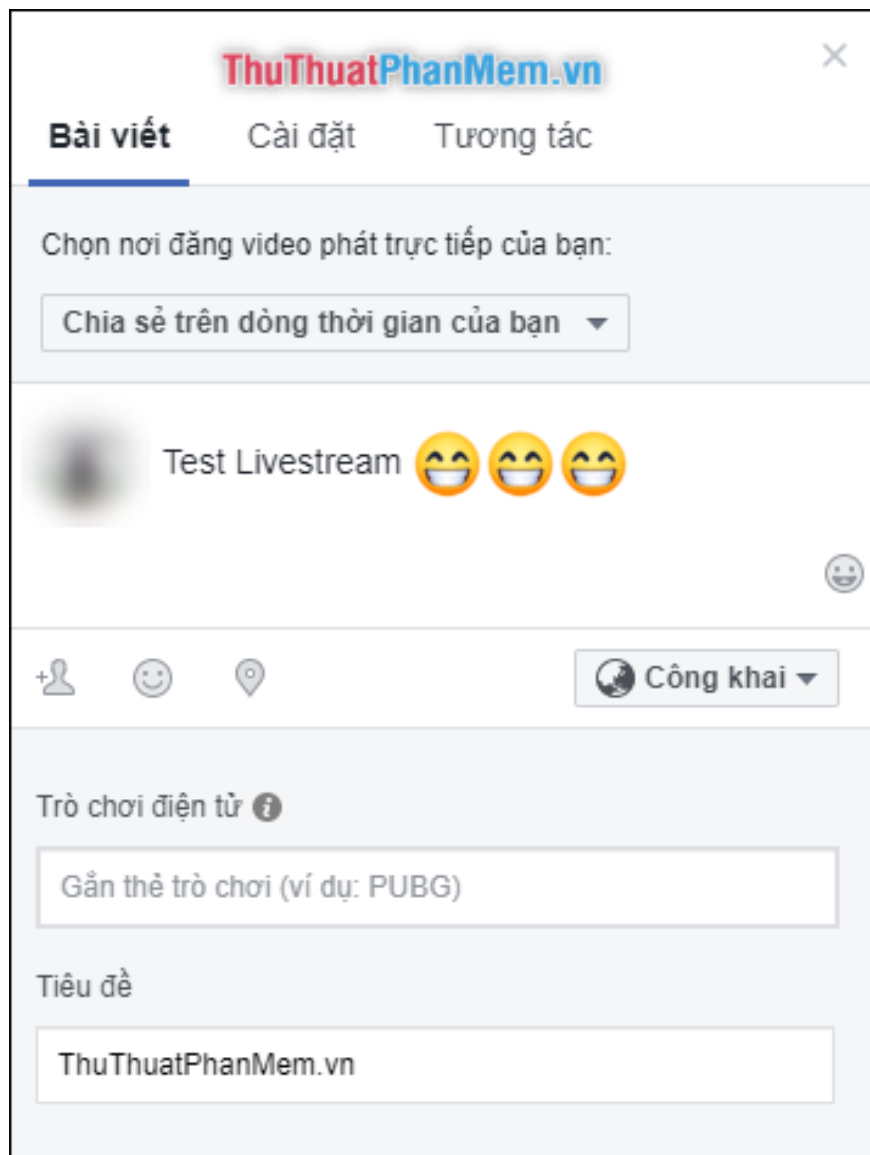

Step 10 : Then at the interface of OBS software, click **Start Streaming**

Step 11 : Wait a bit for Facebook to find LiveStream feed.

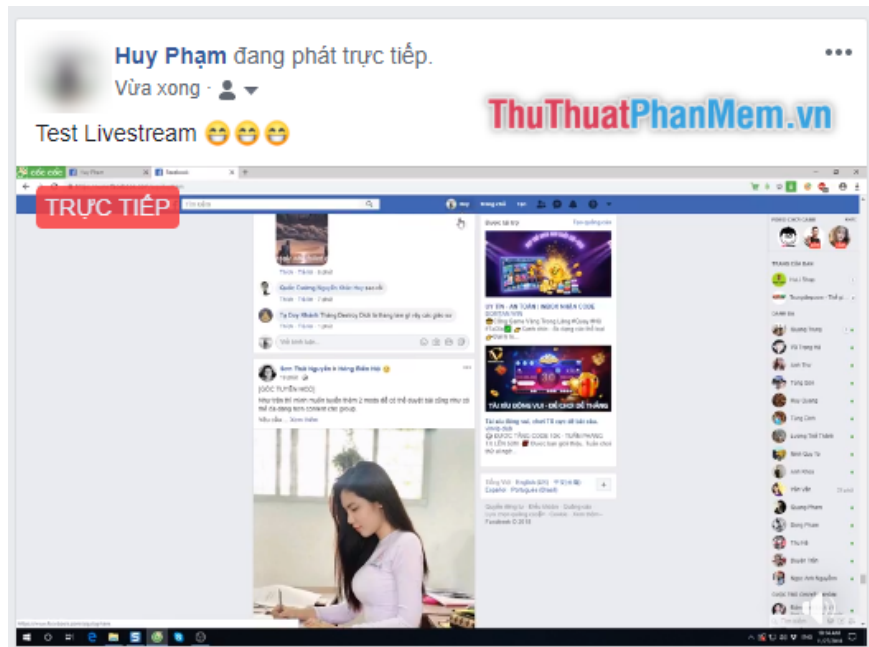

In the meantime you can add the title Live, Tag your friends, Choose where you want to live .

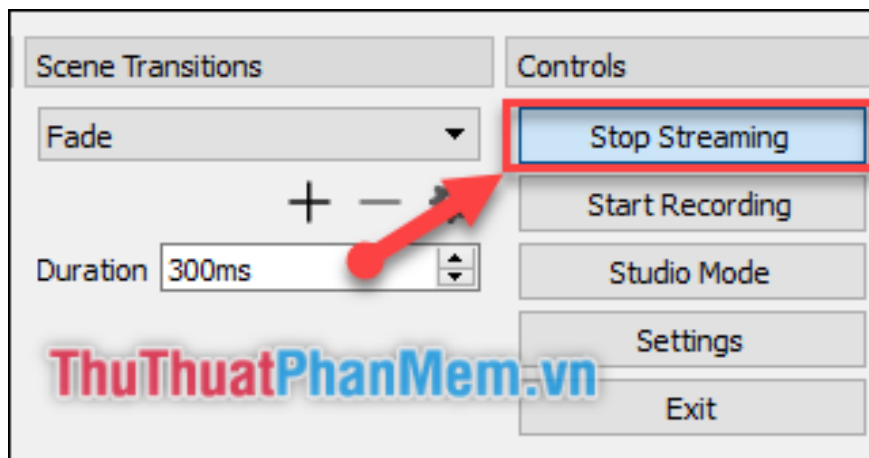

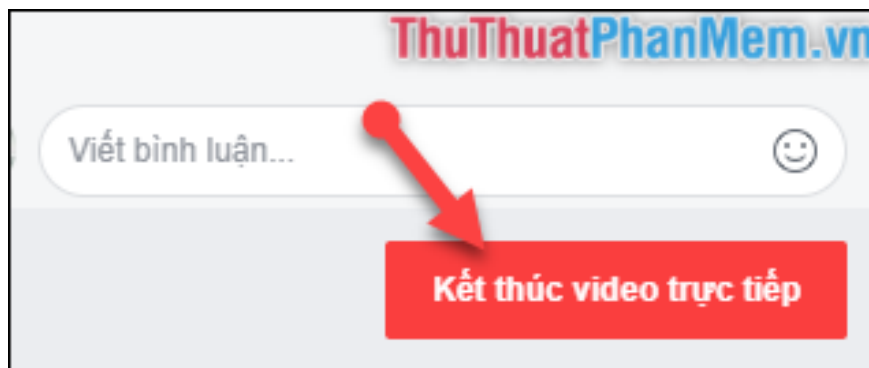

Step 12 : Then click on **Live Streaming**. That's it!

Interface when you are live streaming

Step 13 : When you want to end the live stream, click **Finish video directly** in Facebook interface or **Stop Streaming** in OBS software interface.
