

Instructions for locking the USB port

USB contains a lot of viruses that are harmful to computers, you do not want others to plug the USB into your computer to avoid your virus. You can lock the USB port on your computer to prevent the USB from being plugged into the computer with the very simple steps below.

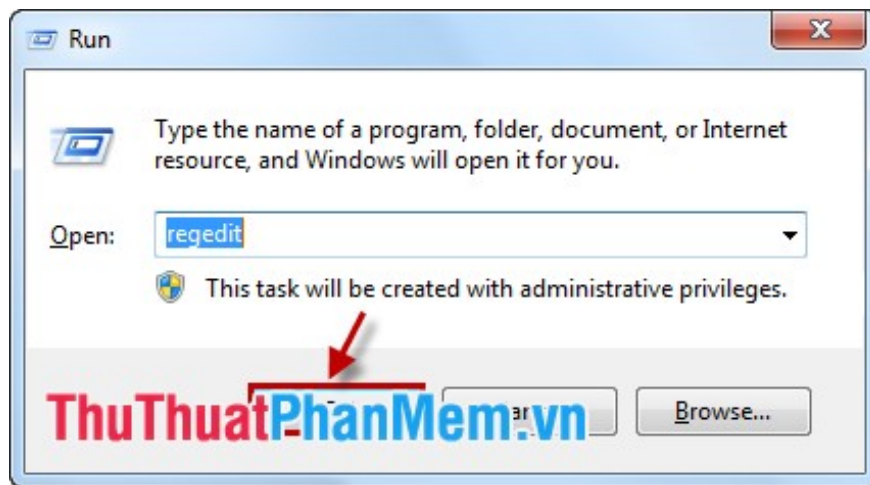

USB contains a lot of viruses that are harmful to computers, you do not want others to plug the USB into your computer to avoid your virus. You can lock the USB port on your computer to prevent the USB from being plugged into the computer with the very simple steps below.

Step 1: Open the Windows **Run** dialog box .

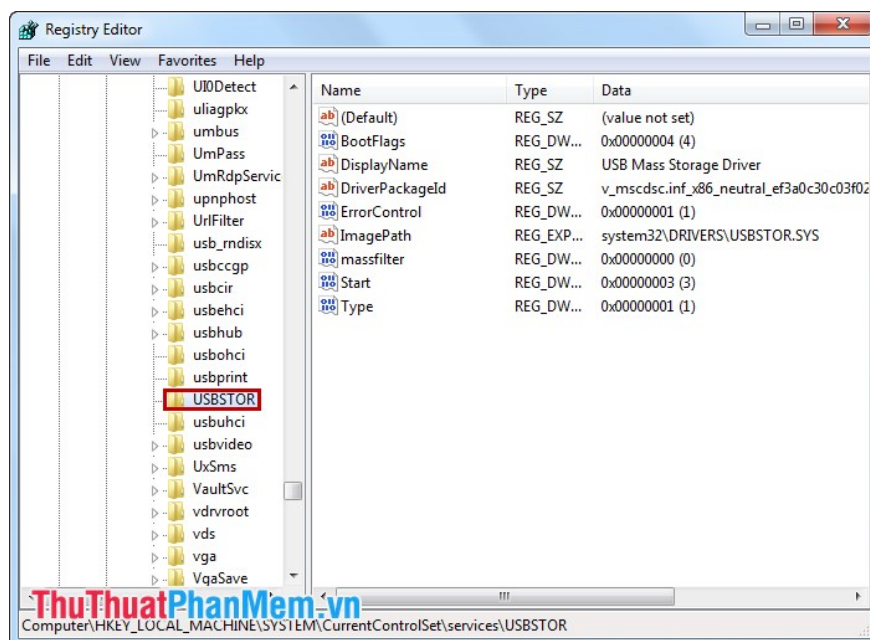

- Go to **Start**, type in the search box for the word **Run** and press **Enter** .
- Or you can press **Windows + R** combination .

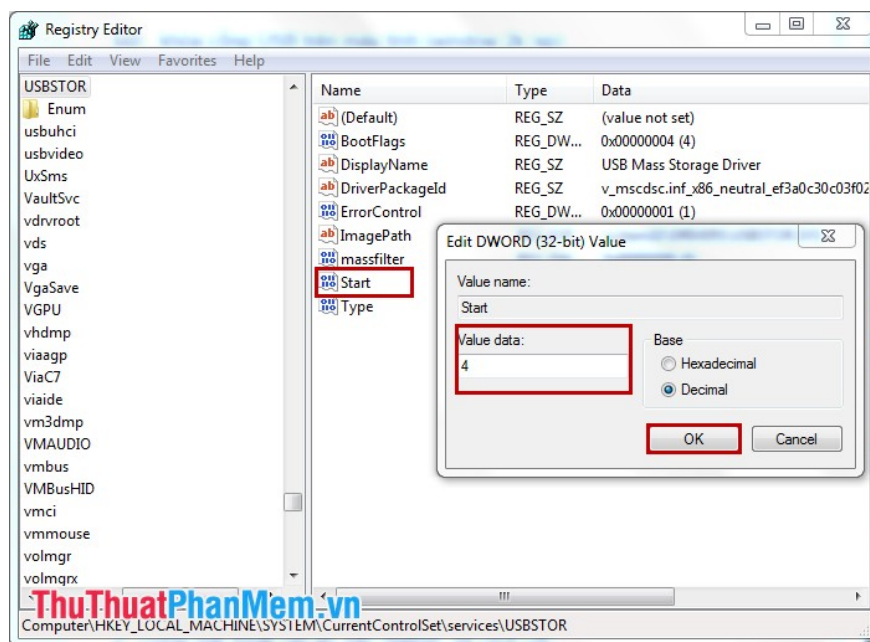

Step 2: Type *Regedit* in the **Run** dialog box , press **OK** (or **Enter**).

Step 3: Find the keyword **USBSTOR** . Find the link: ***HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\services\USBSTOR***.

Step 4: Double-click on **Start** , in **Value data** you enter number **4** and then click **OK** .

Exit **Registry Editor** , you can plug in USB to see the results.

From now on, your computer will not accept any USB, if you want to unblock the USB port, fix Value data to 3. Wish you success!
