During use, you may want to insert notes in the PDF file. There are quite a lot of software to support this but TipsMake.com will guide you how to take simple notes with **Foxit Reader** software. Please consult.

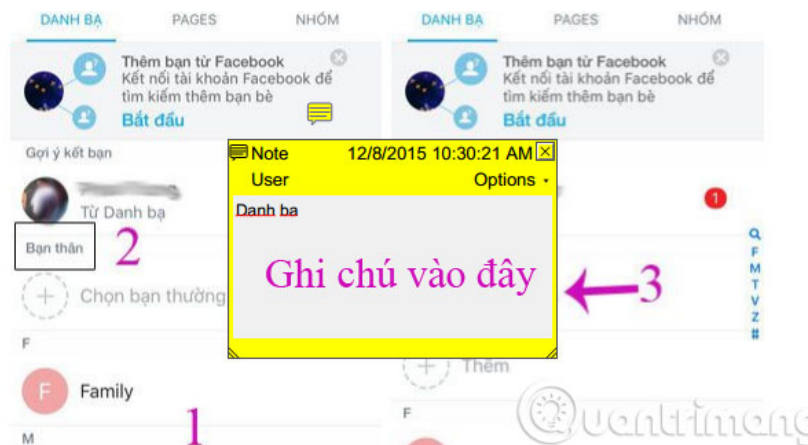

**Step 1** : Open the PDF file with additional comments using **Foxit Reader** software

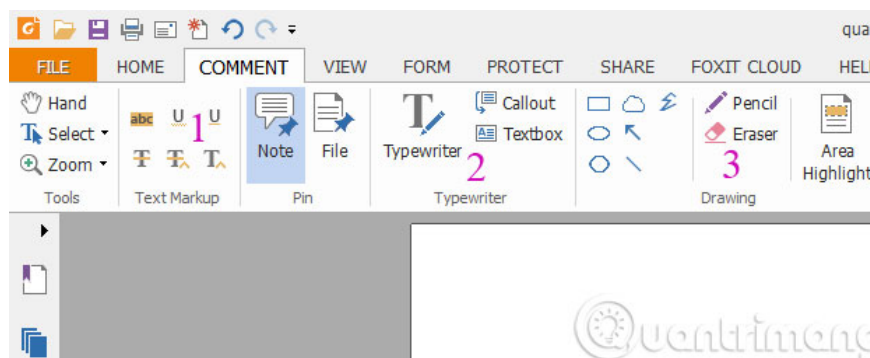

**Step 2** : Click the **Comment** menu, select **Note**

**Step 3 :** Hover your mouse over the text to be noted, then the yellow Note frame will appear on the screen for you to record.

**Step 4 :** In addition to adding regular text to the annotations for PDF files, you can also proceed with adding notes with some of the following options

1. **Text Markup** : Support the text displayed on annotations.
2. **Typewriter** : Support caption writing style.

3. **Drawing** : Add captions with special symbols and drawing tools.

The above are steps for you to insert notes on PDF files. Very simple, right? From now on, you can freely add notes that you like.
