

# Instructions for PayLoad PUBG Mobile mode

With this guide to playing Firepower mode of PUBG Mobile, you will know how to use new weapons, control helicopters and revive teammates in Payload mode PUBG Mobile

Payload Mode, also known as Firepower mode of PUBG Mobile is the most noticeable point in PUBG Mobile version 0.15.0. True to the name of Firepower, weapons in this mode all belong to heavy weapons and helicopters, which are noticeable highlights in this new mode.

So in addition to the weapons of the terrorist and the other helicopter, the mode of PUBG Mobile Firepower has something to gamers attention. If you want to know how to play Firepower PUBG Mobile mode, please see the instructions below.

## How to play Firepower PUBG Mobile mode

### Started fighting

First, go into the Infinity Mode menu and choose Firepower Mode. In this mode, you will only be able to play in teams of 4 and do not choose Duo or Single.

Currently, the Payload mode is only available on Erangel maps. You will enter the waiting area and board the plane, parachuting down to the map like normal game mode. Upon landing on Erangel you will begin to see

differences, initially the Resurrection **Tower** as shown below.

You can also tell where the revival tower appears by turning on the map, which area you see the blue dot on is where the revival tower is. Almost every large and small location on Erangel will have at least 1 revival tower.

Now start to loot things, in this Payload mode you will see grenade launchers (Grenade Launcher) appear everywhere. And the number of bullets is enough for you to kill the enemy team alone.

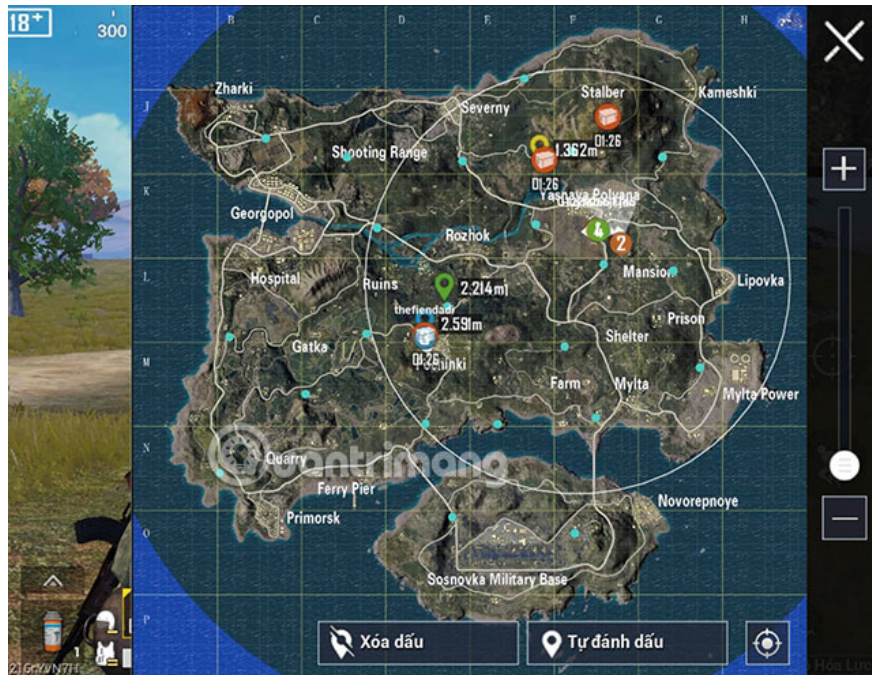

After loot enough items, you start to search for helicopters, helicopters in Fire mode can appear on the roof of buildings or in densely populated areas.

To drive the helicopter, you just need to press the normal scroll key, while the two icons on the right are used to ascend (Ascend) and down (Descend). Remember, when you go up, hold AR or SMG, if you find the LMG, the better.

There will be times when you will receive a notification that a super weapon box appears with a countdown time, turn on the map and see if they are near the area you are standing at. If at a distance of about 200 meters refilled, you will see the light column of the super weapon chest area.

When the countdown is over, a super weapon chest will appear. If you do not notice the countdown time, there will be a notice that the **Super Weapon Box has been activated** to help you know the Super Weapon **Box** has appeared.

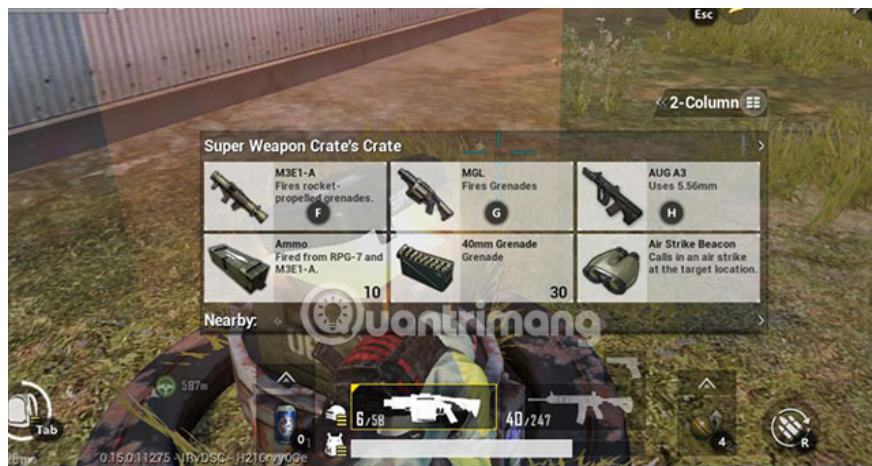

## Use new weapons

In this hearing box will include valuable items like PUBG Mobile's normal Air Drop, but the number will be a bit more and it will be indispensable for the heat-resistant rocket shoulder mount M3E1-A and a binoculars called air strike ( **Air Strike Beacon** ).

To use the binoculars, grab them in the grenade menu, click the binoculars and there will be a red arrow measuring the distance.

Point the binoculars at the enemy area and click the bomb icon. You will see bombs hitting that area just like in the Red Zone. Of course, these binoculars are only used at close range. This is really a very powerful weapon in the last bo.

As for shoulder-to-shoulder missiles, you can catch any heat at a distance of about 200m. Once the target is identified, the shoulder-carrying target will turn red, so launch the rocket to chase the target. Do not fire when the mind is green.

## Revive teammates

At the time of reviving a teammate, when your teammate is destroyed (already dead into a chest instead of being knocked), go near the teammate's body to loot that teammate's ID card. If the enemy loot identifies your teammates will not see this ID card.

Next, go to the nearest revival tower, insert the card and wait for your teammates to "re-export" by parachuting from the plane as the beginning of the game. Remember, you only have 120 seconds to pick up your teammate ID card, but if that teammate is free, it's okay.

Above is a guide to playing Firepower PUBG Mobile mode, I must say that this mode is very interesting when you can revive your teammates and can overwhelm enemies easily with the heavy weapons in the game. If there are any errors in this Payload mode, you can comment with [Quantrimang](#) by leaving a comment below.
